# 2020 IEEE 20th International Conference on Software Quality, Reliability and Security (QRS)

# QRS 2020

## Table of Contents

**Message from the Steering Committee Chairs and General Chairs** xv
**Message from the Program Chairs** xvi
**Organizing Committee** xvii
**Program Committee** xix
**Steering Committee** xxii
**List of Additional Reviewers** xxiii
**Chairs of Workshops Co-Located with QRS 2020** xxiv
**ICCLC-Committee** xxvi

## Session 1: Quality Assurance I

PBLInv: Postcondition-Based Loop Invariant Learning for C Programs 1
*Hong Lu (Nanjing University, China), Chengyi Wang (Nanjing University, China), Jiacheng Gui (Nanjing University, China), and Hao Huang (Nanjing University, China)*

Data Evaluation and Enhancement for Quality Improvement of Machine Learning 13
*Haihua Chen (University of North Texas), Jiangping Chen (University of North Texas), and Junhua Ding (University of North Texas)*

A Semantic Definition of Faults and Its Implications (S) 14
*Besma Khaireddine (University of Tunis El Manar, Tunisia), Aleksandr Zakharchenko (NJIT, USA), and Ali Mili (NJIT, USA)*

Quality Assurance for Machine Learning – An Approach to Function and System Safeguarding (S) 22
*Alexander Poth (Volkswagen AG), Burkhard Meyer (Audi AG), Peter Schlicht (Volkswagen AG), and Andreas Riel (Grenoble Alps University)*

## Session 2: Quality Assurance II

Incorporating Android Code Smells into Java StaticCode Metrics for Security Risk Prediction of Android Applications 30
*Ai Gong (State Key Laboratory for Novel Software Technology, Nanjing University), Yi Zhong (Nanjing University and College of Mobile Telecommunications Chongqing University of Posts and Telecom), Weiqin Zou (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics and Key Laboratory of Safety-Critical Software (NUAA), Ministry of Industry and Information Technology), Yangyang Shi (State Key Laboratory for Novel Software Technology, Nanjing University, China), and Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University, China)*

PHM Technology for Memory Anomalies in Cloud Computing for IaaS 41
*Xiwei Qiu (University of Electronic Science and Technology of China), Yuanshun Dai (University of Electronic Science and Technology of China), Peng Sun (University of Electronic Science and Technology of China, Hebi NLED Company Limited), and Xin Jin (University of Electronic Science and Technology of China)*

Have It Your Way: Generating Customized Log Data Sets with a Model-Driven Simulation Testbed 52
*Max Landauer (Austrian Institute of Technology), Florian Skopik (Austrian Institute of Technology), Markus Wurzenberger (Austrian Institute of Technology), Wolfgang Hotwagner (Austrian Institute of Technology), and Andreas Rauber (Vienna University of Technology)*

Revisiting the Impact of Concept Drift on Just-in-Time Quality Assurance (S) 53
*Kwabena Ebo Bennin (Blekinge Institute of Technology), Nauman Bin Ali (Blekinge Institutute of Technology), Jurgen Börstler (Blekinge Institutute of Technology), and Xiao Yu (City University of Hong Kong)*

## Session 3: Reliability

An Improved Mapping Method for Automated Consistency Check between Software Architecture and Source Code 60
*Fangwei Chen (Beihang University, China), Li Zhang (Beihang University, China), and Xiaoli Lian (Beihang University, China)*

A Log-Based Anomaly Detection Method with the NW Ensemble Rules 72
*Bingming Wang (Wuhan University, China), Shi Ying (Wuhan University, China), Guoli Cheng (Wuhan University, China), and Yiyao Li (Tongji University, China)*

HARRD: Real-Time Software Rejuvenation Decision based on Hierarchical Analysis under Weibull Distribution (S) 83
*Sihang Wang (Inner Mongolia University) and Jing Liu (Inner Mongolia University)*

On the Link between Refactoring Activity and Class Cohesion through the Prism of Two Cohesion-Based Metrics (S) 91
*Steve Counsell (Brunel University), Giuseppe Destefanis (Brunel University), Stephen Swift (Brunel University), Mahir Arzoky (Brunel University), and Davide Taibi (Tampere University)*

## Session 4: Security

Comprehensive Robustness Evaluation of File Systems with Model Checking .99
*Jingcheng Yuan (Japan Advanced Institute of Science and Technology), Toshiaki Aoki (Japan Advanced Institute of Science and Technology), and Xiaoyun Guo (Japan Advanced Institute of Science and Technology)*

Continuous Implicit Authentication through Touch Traces Modelling .111
*Thomas Karanikiotis (Aristotle University of Thessaloniki, Greece), Michail D. Papamichail (Aristotle University of Thessaloniki, Greece), Kyriakos C. Chatzidimitriou (Aristotle University of Thessaloniki, Greece), Napoleon-Christos I. Oikonomou (Aristotle University of Thessaloniki, Greece), Andreas L. Symeonidis (Aristotle University of Thessaloniki, Greece), and Sashi K. Saripalle (ZOLOZ, USA)*

RTPDroid: Detecting Implicitly Malicious Behaviors under Runtime Permission Model .121
*Jie Zhang (Xidian University), Cong Tian (Xidian University), Zhenhua Duan (Xidian University), and Liang Zhao (Xidian University)*

An Intrusion Detection System Integrating Network-Level Intrusion Detection and Host-Level Intrusion Detection (S) .122
*Jiannan Liu (University of Electronic Science and Technology of China), Kun Xiao (University of Electronic Science and Technology of China, China), Lei Luo (University of Electronic Science and Technology of China, China), Yun Li (University of Electronic Science and Technology of China, China), and Lirong Chen (University of Electronic Science and Technology of China, China)*

## Session 5: Testing

Multi-Objective Search for Model-Based Testing .130
*Rui Wang (Western Norway University of Applied Sciences, Norway), Cyrille Artho (KTH Royal Institute of Technology, Sweden), Lars Michael Kristensen (Western Norway University of Applied Sciences, Norway), and Volker Stolz (Western Norway University of Applied Sciences, Norway)*

Architecture for the Automation of Live Testing of Cloud Systems .142
*Oussama Jebbar (Concordia University), Ferhat Khendek (Concordia University), and Maria Toeroe (Ericsson Canada)*

Quality-of-Experience Driven Configuration of WebRTC Services through Automated Testing (S) .152
*Antonia Bertolino (CNR-ISTI, Pisa, Italy), Antonello Calabrò (CNR-ISTI, Pisa, Italy), Guglielmo De Angelis (CNR-IASI, Roma, Italy), Francisco Gortázar (Universidad Rey Juan Carlos, Madrid, Spain), Francesca Lonetti (CNR-ISTI, Pisa, Italy), Michel Maes (Universidad Rey Juan Carlos, Madrid, Spain), and Guiomar Tuñón (NAEVA TEC, Madrid, Spain)*

An Approach to Determine the Optimal k-Value of K-means Clustering in Adaptive Random Testing (S) 160
*Jinfu Chen (Jiangsu University, China), Lingling Zhao (Jiangsu University, China), Minmin Zhou (Jiangsu University, China), Yisong Liu (Jiangsu University, China), and Songling Qin (Jiangsu University, China)*

## Session 6: Fault Localization and Debugging

A Lightweight Fault Localization Approach based on XGBoost 168
*Bo Yang (North China University of Technology, Beijing, China), Yuze He (North China University of Technology, Beijing, China), Huai Liu (Swinburne University of Technology, Australia), Yixin Chen (University of Mississippi, USA), and Zhi Jin (Peking University, Beijing, China)*

A Similarity Integration Method based Information Retrieval and Word Embedding in Bug Localization (S) 180
*Shasha Cheng (College of Computer Science Technology Nanjing University of Aeronautics and Astronautics, Collaborative Innovation Center of Novel Software Technology and Industrialization), Xuefeng Yan (College of Computer Science Technology Nanjing University of Aeronautics and Astronautics, Collaborative Innovation Center of Novel Software Technology and Industrialization), and Arif Ali Khan (College of Computer Science Technology Nanjing University of Aeronautics and Astronautics, Collaborative Innovation Center of Novel Software Technology and Industrialization)*

Practical Automatic Lightweight Nondeterminism and Flaky Test Detection and Debugging for Python (S) 188
*Alex Groce (Northern Arizona University) and Josie Holmes (Northern Arizona University)*

Non-Intrusive Virtual Machine Analysis and Reverse Debugging with SWAT (S) 196
*Pavel Dovgalyuk (Institute for System Programming, Russia), Ivan Vasiliev (Institute for System Programming, Russia), Natalia Fursova (Institute for System Programming, Russia), Denis Dmitriev (Institute for System Programming, Russia), Mikhail Abakumov (Institute for System Programming, Russia), and Vladimir Makarov (Institute for System Programming, Russia)*

## Session 7: Defect Prediction

A Multi-objective Learning Method for Building Sparse Defect Prediction Models 204
*Xin Li (Shenzhen Technology University, and Sun Yat-Sen University, China), Xiaoxing Yang (Shenzhen Technology University, and Sun Yat-Sen University, China), Jianmin Su (Wuyi University, China), and Wushao Wen (Sun Yat-Sen University, China)*

How Well Just-In-Time Defect Prediction Techniques Enhance Software Reliability? 212
*Tian Yuli (Northwestern Polytechnical University, China), Li Ning (Northwestern Polytechnical University, China), Tian Jeff (Southern Methodist University, USA), and Zheng Wei (Northwestern Polytechnical University, China)*

Simplified Deep Forest Model based Just-in-Time Defect Prediction for Android Mobile Apps 222
*Kunsong Zhao (Wuhan University), Zhou Xu (Chongqing University), Tao Zhang (Macau University of Science and Technology), and Yutian Tang (The Hong Kong Polytechnic University)*

Cross-Project Dynamic Defect Prediction Model for Crowdsourced Test (S) 223
*Yi Yao (Army Engineering University of PLA), Yuchan Liu (Army Engineering University of PLA), Song Huang (Army Engineering University of PLA), Hao Chen (Army Engineering University of PLA), Jialuo Liu (Army Engineering University of PLA), and Fan Yang (Army Engineering University of PLA)*

## Session 8: Model and Algorithm

Pull Request Prioritization Algorithm based on Acceptance and Response Probability 231
*Muhammad Ilyas Azeem (University of Chinese Academy of Sciences, China), Qiang Peng (Lab for Internet Software Technologies, ISCAS, China), and Qing Wang (State Key Lab of Computer Science, ISCAS, China)*

Towards Analyzing Contributions from Software Repositories to Optimize Issue Assignment 243
*Vasileios Matsoukas (Aristotle University of Thessaloniki, Greece), Themistoklis Diamantopoulos (Aristotle University of Thessaloniki, Greece), Michail D. Papamichail (Aristotle University of Thessaloniki, Greece), and Andreas L. Symeonidis (Aristotle University of Thessaloniki, Greece)*

Development Method of Three Kinds of Typical Tree Structure Algorithms and Isabelle-Based Machine Assisted Verification 254
*Changjing Wang (Jiangxi Normal University), Fan Xu (Jiangxi Normal University), Haimei Luo (Jiangxi Normal University), Qing Huang (Jiangxi Normal University), and Zhengkang Zuo (Jiangxi Normal University)*

On Symbolic Execution of Decompiled Programs (S) 265
*Lukáš Korenčik (Masaryk University Brno, Czech Republic), Petr Ročkai (Masaryk University Brno, Czech Republic), Henrich Lauko (Masaryk University Brno, Czech Republic), and Jiří Barnat (Masaryk University Brno, Czech Republic)*

## Session 9: Blockchain and Smart Contracts

STAN: Towards Describing Bytecodes of Smart Contract 273
*Xiaoqi Li (The Hong Kong Polytechnic University, China), Ting Chen (University of Electronic Science and Technology of China, China), Xiapu Luo (The Hong Kong Polytechnic University, China), Tao Zhang (Macau University of Science and Technology, China), Le Yu (The Hong Kong Polytechnic University, China), and Zhou Xu (Chongqing University, China)*

Attack Graph Auto-Generation for Blockchains based on Bigraphical Reaction Systems 285
*Lian Yu (Peking University), Lijun Liu (China Mobile), Yanbing Jiang (Peking University), Qi Jing (Peking University), Bei Zhao (China Mobile), and Chen Zhang (China Mobile)*

Early Detection of Smart Ponzi Scheme Contracts based on Behavior Forest Similarity 297
*Weisong Sun (Nanjing University), Guangyao Xu (Nanjing University), Zijiang Yang (Western Michigan University), and Zhenyu Chen (Nanjing University)*

## Session 10: Cyber-Physical Systems and IoT

STSL: A Novel Spatio-Temporal Specification Language for Cyber-Physical Systems 309
*Tengfei Li (East China Normal University, China), Jing Liu (East China Normal University, China), Jiexiang Kang (China Aeronautical Radio Electronics Research Institute), Haiying Sun (East China Normal University), Wei Yin (China Aeronautical Radio Electronics Research Institute), Xiaohong Chen (East China Normal University), and Hui Wang (China Aeronautical Radio Electronics Research Institute)*

Reliability Evaluation of FPGA with Common Cause Failure in Multi-Phase Mission 320
*Qi Shao (Beihang University), Shunkun Yang (Beihang University), Chong Bian (Beihang University), and Xiaodong Gou (Beihang University)*

Correct and Control Complex IoT Systems: Evaluation of a Classification for System Anomalies (S) 321
*Sina Niedermaier (University of Stuttgart, Germany), Stefan Heisse (Bosch Engineering GmbH, Stuttgart, Germany), and Stefan Wagner (Institute of Software Technology, University of Stuttgart, Germany)*

Process-Variation Effects on 3D TLC Flash Reliability: Characterization and Mitigation Scheme (S) 329
*Yuqian Pan (Huazhong University of Science and Technology, China), Haichun Zhang (Huazhong University of Science and Technology, China), Mingyang Gong (Huazhong University of Science and Technology, China), and Zhenglin Liu (Huazhong University of Science and Technology, China)*

A Hybrid Interface Recovery Method for Android Kernels Fuzzing 335
*Shuaibing Lu (National Key Laboratory of Science and Technology on Information System Security, China), Xiaohui Kuang (National Key Laboratory of Science and Technology on Information System Security, China), Yuanping Nie (National Key Laboratory of Science and Technology on Information System Security, China), and Zhechao Lin (National Key Laboratory of Science and Technology on Information System Security, China)*

## Session 11: AI for Software Engineering I

High-Reliability Compilation Optimization Sequence Generation Framework Based ANN .347.....
*Jiang Wu (National University of Defense Technology, China), Jianjun Xu (National University of Defense Technology, China), Xiankai Meng (National University of Defense Technology, China), Zhuo Zhang (National University of Defense Technology, China), Nan Zhang (National University of Defense Technology, China), and Haoyu Zhang (National University of Defense Technology, China)*

Mutation Testing for Artificial Neural Networks: An Empirical Evaluation .356.....
*Lorenz Klampfi (CD Laboratory for Quality Assurance Methodologies for Cyber-Physical Systems, Institute for Software Technology Graz University of Technology, Austria), Nour Chetouane (Graz University of Technology, Austria), and Franz Wotawa (Graz University of Technology, Austria)*

Defect Prediction via LSTM based on Sequence and Tree Structure (S) .366.....
*Xuan Zhou (South China University of Technology, Guangzhou, People's Republic of China) and Lu Lu (South China University of Technology, Guangzhou, People's Republic of China)*

On the Defect Prediction for Large Scale Software Systems – From Defect Density to Machine Learning (S) .374.....
*Satya Pradhan (Cisco Systems, USA), Venky Nanniyur (Cisco Systems, USA), and Pavan Vissapragada (Cisco Systems, India)*

## Session 12: AI for Software Engineering II

Semantic Code Clone Detection Via Event Embedding Tree and GAT Network .382.....
*Bingzhuo Li (Hainan University), Chunyang Ye (Hainan University), Shouyang Guan (Hainan University), and Hui Zhou (Hainan University)*

Convergence based Evaluation Strategies for Learning Agent of Hyper-Heuristic Framework for Test Case Prioritization .394.....
*Jinjin Han (Beijing University of Chemical Technology), Zheng Li (Beijing University of Chemical Technology), Junxia Guo (Beijing University of Chemical Technology), and Ruilian Zhao (Beijing University of Chemical Technology)*

PEACEPACT: Prioritizing Examples to Accelerate Perturbation-Based Adversary Generation for DNN Classification Testing (S) .406.....
*Zijie Li (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences), Long Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences), Jun Yan (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences), Jian Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences), Zhenyu Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences), and T.H. Tse (Department of Computer Science, The University of Hong Kong)*

Research on Ensemble Model of Anomaly Detection Based on Autoencoder (S) 414
*Yaning Han (University of Chinese Academy of Sciences, Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences Beijing, China), Yunyun Ma (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Jinbo Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), and Jianmin Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China)*

## Session 13: Empirical Study I

The Characteristics and Impact of Uncompilable Code Changes on Software Quality Evolution 418
*Jincheng He (University of Southern California), Sitao Min (University of Southern California), Kelechi Ogudu (University of Southern California), Michael Shoga (University of Southern California), Alex Polak (University of Southern California), Iordanis Fostiropoulos (University of Southern California), Barry Boehm (University of Southern California), and Pooyan Behnamghader (University of Southern California)*

A Survey of the Use of Test Report in Crowdsourced Testing 430
*Song Huang (Army Engineering University of PLA), Hao Chen (Army Engineering University of PLA), Zhanwei Hui (Army Engineering University of PLA), and Yuchan Liu (Army Engineering University of PLA)*

An Empirical Study of Utilization of Imperative Modules in Ansible (S) 442
*Shoma Kokuryo (Kyoto Institute of Technology, Japan), Masanari Kondo (Kyoto Institute of Technology, Japan), and Osamu Mizuno (Kyoto Institute of Technology, Japan)*

Preliminary Findings about DevSecOps from Grey Literature (S) 450
*Runfeng Mao (State Key Laboratory for Novel Software Technology, Nanjing University, China), He Zhang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Qiming Dai (State Key Laboratory for Novel Software Technology, Nanjing University, China), Huang Huang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Guoping Rong (State Key Laboratory for Novel Software Technology, Nanjing University, China), Haifeng Shen (Australian Catholic University, Australia), Lianping Chen (Huawei Technologies (Ireland) Ltd., Ireland), and Kaixiang Lu (State Key Laboratory for Novel Software Technology, Nanjing University, China)*

## Session 14: Empirical Study II

Which Metrics Should Researchers Use to Collect Repositories: An Empirical Study 458
*Kai Yamamoto (Kyoto Institute of Technology, Japan), Masanari Kondo (Kyoto Institute of Technology, Japan), Kinari Nishiura (Kyoto Institute of Technology, Japan), and Osamu Mizuno (Kyoto Institute of Technology, Japan)*

How Fast and Effectively Can Code Change History Enrich Stack Overflow? 467
*Ryujiro Nishinaka (Kyushu University), Naoyasu Ubayashi (Kyushu University), Yasutaka Kamei (Kyushu University), and Ryosuke Sato (Kyushu University)*

An Analysis of Utility for API Recommendation: Do the Matched Results Have the Same Efforts? 479
*Huidan Li (Southeast University), Rensong Xie (Southeast University), Xianglong Kong (Southeast University), Lulu Wang (Southeast University), and Bixin Li (Southeast University)*

Interpretable Test Case Recommendation based on Knowledge Graph (S) 489
*Wenjun Ke (Institute of Computing Technology, Chinese Academy of Sciences, Beijing, China; University of Chinese Academy of Sciences, Beijing, China; Beijing Institute of Computer Technology and Application, Beijing, China), Chao Wu (Beijing Institute of Computer Technology and Application), Xiufeng Fu (Beijing Institute of Computer Technology and Application), Chen Gao (Fifth Military Representative Office of the Chinese People's Liberation Army Rocket Army in Beijing), and Yinyi Song (Beijing Institute of Computer Technology and Application)*

## Session 15: Empirical Study III

Is There a "Golden" Rule for Code Reviewer Recommendation?: An Experimental Evaluation 497
*Yuanzhe Hu (Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junjie Wang (State Key Laboratory of Computer Sciences, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jie Hou (Institute of Software Chinese Academy of Sciences, China), Shoubin Li (Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Qing Wang (State Key Laboratory of Computer Sciences, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)*

On the Impact of Inter-Language Dependencies in Multi-language Systems 509
*Manel Grichi (Polytechnique Montreal), Mouna Abidi (Polytechnique Montreal), Fehmi Jaafar (The Computer Research Institute of Montreal), Ellis E. Eghan (Polytechnique Montreal), and Bram Adams (Polytechnique Montreal)*

A Practical, Principled Measure of Fuzzer Appeal: A Preliminary Study (S) 510
*Miroslav Gavrilov (University of California, Santa Barbara), Kyle Dewey (California State University, Northridge), Alex Groce (Northern Arizona University), Davina Zamanzadeh (University of California, Los Angeles), and Ben Hardekopf (University of California, Santa Barbara)*

Dissecting Mobile Offerwall Advertisements: An Explorative Study (S) 518
*Guosheng Xu (Beijing University of Posts and Telecommunications, China), Yangyu Hu (Beijing University of Posts and Telecommunications, China), Qian Guo (Beijing University of Posts and Telecommunications, China), Ren He (Beijing University of Posts and Telecommunications, China), Li Li (Monash University, Australia), Guoai Xu (Beijing University of Posts and Telecommunications, China), Zhihui Han (CNCERT, China), and Haoyu Wang (Beijing University of Posts and Telecommunications, China)*

**Author Index** 527
