SPIE

**Volume 11450**

Proceedings of SPIE 0277-786X, V. 11450

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Modeling, Systems Engineering, and Project Management for Astronomy IX*, edited by George Z. Angeli, Philippe Dierickx, Proceedings of SPIE Vol. 11450 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## MODELING I

---

- 11450 02 **An end-to-end model for the correlator and beamformer of the Square Kilometer Array Mid Telescope** [11450-1]
- 11450 03 **An end-to-end model for the correlator and beamformer of the Square Kilometer Array Low Frequency Aperture Array** [11450-2]
- 11450 04 **Simulation approach to WVRs using an RF system simulator** [11450-3]

---

## SYSTEMS ENGINEERING II

---

- 11450 0C **The intersection of risk mitigation and innovation: the planning and development of Roman's data management system in a water-scrum-fall world** [11450-13]

---

## SYSTEMS ENGINEERING III

---

- 11450 0E **Documentation automation for the verification and validation of Rubin Observatory software** [11450-16]
- 11450 0F **Sculpting a maintenance twin for SKA** [11450-17]
- 11450 0G **Origins Space Telescope intergration and testing** [11450-18]

---

## SYSTEMS ENGINEERING IV

---

- 11450 0H **Key performance parameter based systems engineering for the Giant Magellan Telescope through construction and commissioning** [11450-20]

---

## JOINT SESSION WITH CONFERENCES 11445 AND 11450: MODELING AS A DRIVER OF OBSERVATORY DESIGN II

---

- 11450 0L **Aerothermal modeling for ground-based observatories: present and future** [11450-25]
- 11450 0M **GMTO approach to integrated modeling based system engineering** [11450-26]

- 11450 0N **ESO ELT - vibration sources characterization: a step forward towards requirement and performance verification** [11450-27]
- 11450 0O **ULTIMATE-Subaru: system performance modeling of GLAO and wide-field NIR instruments** [11450-28]

---

### MODELING II

- 11450 0R **Performance analysis overview for the main structure of the Extremely Large Telescope** [11450-32]
- 11450 0S **Protecting a fragile giant: seismic design, analysis, results and requirements for the GMT** [11450-33]

---

### MODELING III

- 11450 0V **A Fourier optics approach to evaluate the astrometric performance of MICADO** [11450-37]
- 11450 0W **Experimental data improves prediction of Thirty Meter Telescope segment warping harness correction** [11450-38]

---

### PROJECT MANAGEMENT

- 11450 0Z **Parametric cost model for ground and space telescopes** [11450-41]
- 11450 11 **Supporting the coordination of a software work-package of the Cherenkov Telescope Array via model-driven methodologies** [11450-43]

---

### POST-DEADLINE

- 11450 14 **Are we there yet? Science-based roadmaps for astronomy technology research and development** [11450-119]
- 11450 15 **Systems engineering applied to ELT instrumentation: MANIFEST pre-conceptual design case** [11450-120]
- 11450 16 **A collaborative systems engineering approach for large instrument consortium** [11450-121]
- 11450 18 **Integrated design teams for increased efficiency in flight projects** [11450-123]

---

**POSTER SESSION: MODELING**

---

- 11450 1B **SOXS end-to-end simulator: development and applications for pipeline design** [11450-47]
- 11450 1C **Using raytracing to derive the expected performance of STELLA's SES-VIS spectrograph**  
[11450-48]
- 11450 1D **An open-source Gaussian beamlet decomposition tool for modeling astronomical telescopes**  
[11450-50]
- 11450 1R **ESO-ELT: structural coupling effects between main structure and hosted units** [11450-66]
- 11450 1S **A new software tool to predict astrometric errors for ELTs** [11450-67]

---

**POSTER SESSION: PROJECT MANAGEMENT**

---

- 11450 1W **Utilization of concept maturity levels in the ISAS/JAXA space science program** [11450-71]
- 11450 22 **The industrialization of astronomical instrumentation: an industrial system and process engineering perspective** [11450-77]
- 11450 23 **Maunakea Spectroscopic Explorer: a guide to manage an international design team**  
[11450-78]

---

**POSTER SESSION: SYSTEM ENGINEERING**

---

- 11450 28 **Design for additive manufacture (DfAM): the "equivalent continuum material" for cellular structures analysis** [11450-84]
- 11450 29 **HARMONI: first light spectroscopy for the ELT: procedure for adapting application programming interfaces (API) for systems engineering** [11450-85]
- 11450 2A **Challenges to the assembly and integration of the WSS with METIS** [11450-86]
- 11450 2D **Verification control using DOORS** [11450-91]
- 11450 2F **Fiber links for the WEAVE instrument: the making of** [11450-95]
- 11450 2H **SKA-LFAA firmware: a SysML application** [11450-97]
- 11450 2K **The instrumental profile of the 4MOST facility** [11450-101]
- 11450 2L **Maunakea Spectroscopic Explorer (MSE): systems engineering management for a massively multiplexed spectroscopic survey facility** [11450-102]

- 11450 2R **Commissioning of the Gregorian Optical System calibration unit for DKIST** [11450-108]
- 11450 2T **Highlights of the SKA1-Mid Telescope architecture** [11450-110]
- 11450 2U **Concept of operations versus operations concept: how do you choose?** [11450-111]
- 11450 2W **Monitoring the atmospheric turbulence profile with high vertical resolution with the PML instrument** [11450-114]
- 11450 2Y **Cryogenic cooling services for the Thirty Meter Telescope** [11450-116]
- 11450 2Z **Deriving telescope Wavefront Error (WFE) stability error budget from coronagraph performance** [11450-117]
