Table of contents

2. Measurement Technology for Permanent Magnets

2.1. Measuring the Hysteresis Curve of Not-Saturated, High-Coercive Permanent Magnets by Pulsed-Field-Magnetometer
Dr. Hristian Naumoski, Mercedes Benz AG (DE) 2

2.2. Comparison Between Different Air Gaps and Rotor Magnet Geometries of a Scalable Axial Flux Motor with Standard Core Laminations
Sebastian Berndl, Hochschule Landshut (DE)..... N/A

3. Artificial Intelligence in Hairpin Production

3.1. Prediction of the Joint Cross-Section of Laser-Welded Hairpin Windings Based on 2D Image data Using Convolutional Neural Networks
Andreas Mayr, University of Erlangen-Nuremberg (DE)..... 14

3.2. Inline Testing Method Based on Paschen's Law With Integrated Machine Learning for Hairpin Stator Production
Andreas Kraus, PEM of RWTH Aachen (DE)..... 21

3.3. Development of a Cloud- and Edge-Architecture for Adaptive Model Weight Optimization of a CNN Exemplified by Optical Detection of Hairpin Welding
Johannes Vater, BMW Group (DE)..... 29

4. Asynchronous Traction Motor I

4.1. NeWwire[1] - Design of an Induction Machine with an Automatable Pitched Double-Layer Lap Winding
Christian Dr. Spieker, University of Kassel (DE) 38

4.2. Thermal design of an asynchronous machine within the project NeWwire
Christian Dr. Spieker, University of Kassel (DE) 46

5. Testing of Magnetic Characteristics

5.1. A study of the Effects of the Magnetization Tolerance in the Manufacturing Process on Permanent Magnet Synchronous Machines
Dr. Sergio Zarate, Mondragon Unibertsitatea (ES)..... 54

6. Artificial Intelligence in Motor Drive Control

6.1. Cognitive Power Electronics for Intelligent Drive Technology
Dr. Georg Roeder, Fraunhofer IISB (DE) 64

6.2. An Advanced Policy Gradient Based Vector Control of PMSM for EV Application
Muhammad Towhidi, University of Windsor (CA) 72

6.3. Thermal Modelling of an Induction Motor with Liquid Cooling Optimization for Different EV Drive Cycles
Muhammad Towhidi, University of Windsor (CA) ..... N/A

8. Asynchronous Traction Motor II

8.1. Development of an Alternative Round Wire Process Chain: Automated Trickle Winding
Dr. Florian Sell-Le Blanc, Aumann Espelkamp GmbH (DE) 86
8.2. Development and Implementation of a Compact Winding Process
Maximilian Halwas, Karlsruhe Institute of Technology (KIT) 94

9. Oscillations and Vibrations

9.1. Elimination of Current Harmonics in Electrical Machines with Iterative Learning Control
Annette Mai, Nuremberg Institute of Technology, Georg Simon Ohm (DE) 106
9.2. Influence of Static Eccentricities on Performance and Control of Dual Three-Phase Permanent Magnet Synchronous Machines
Dr. Hristian Naumoski, Mercedes Benz AG (DE) 111

10. Hairpin Stator Production Engineering

10.1. Opportunities of Model-Based Production-Oriented Design of Stators with Hairpin Winding
Ludwig Hausmann, Karlsruhe Institute of Technology (KIT) (DE) 122

11. Trends in Electric Machine Design

11.1. Efficient Method for Simulation of AC Losses in Permanent Magnet Synchronous Machines
Dr. Siegfried Silber, Linz Center of Mechatronics GmbH (AT) 132
11.2. A Comprehensive Review of State-of-the-Art Maximum Torque per Ampere Strategies for Permanent Magnet Synchronous Motors
Ze Li, University of Windsor (CA) 137
11.3. An Overview of Noise-Vibration-Harshness Analysis for Induction Machines and Permanent Magnet Synchronous Machines
Pengzhao Song, University of Windsor (CA) 145

12. Advanced Manufacturing of Magnetic Cores

12.1. Electromagnetic Assessment of Welding Processes for Packaging of Electrical Sheets
David Ukwungwu, RWTH Aachen University (DE) 156
12.2. Design Concept of a Wound Field Transverse Flux Machine using Soft Magnetic Composite Claw-Poles
Lukas Rabenstein, Nuremberg Institute of Technology, Georg Simon Ohm 162

13. Process Development and Testing of Stators

13.1. Study on Different Partial Discharge Testing Methods Qualifying Insulation Materials for Automotive Application
Moritz Kilper, Mercedes Benz AG (DE)..... N/A
13.2. Efficiency Deficits and Solution Principles of Requirements Management for Hairpin Stator Production Ramp-up by Early Prototypes
Patrick Treichel, PEM of RWTH Aachen University (DE) 176

14. Manufacturing of Preformed Coils

14.1. Economical Production of Conically Shaped Concentrated Windings Using Forming Technology for Use in Wheel Hub Engines
Daniel Petrell, RWTH Aachen University (DE) 188
14.2. High Torque Density Low Voltage Traction Drives with Preformed Coils: Evaluation of Operational Limitations
Florian Pauli, RWTH Aachen University (DE)..... 196

15. Additive Manufacturing of Functional Parts

15.1. Correlation between Residual Stresses, Building Angle and Illumination Parameters of Addivitve Manufactured FeSi6.5 on Mechanical and Magnetic Properties
Nikolaus Urban, University of Erlangen-Nuremberg (DE) 206
15.2. Additive Manufacturing Technologies for Next-Generation Powertrains
Philipp Fiedler, Fraunhofer Institute for Machine Tools and Forming Technology IWU (DE) 213

16. Winding Technologies II

16.1. Optimization of Direct Winding Processes Based on a Holistic Control Approach
Alexander Lomakin, University of Erlangen-Nuremberg (DE)..... 224
16.2. Integration of Forming Manufacturing Technology into the Component Production of Innovative Electric Motor Concepts
Mirko Bach, Fraunhofer IWU (DE)..... 231
16.3. Numerical Simulation and Experimental Validation of Flatpack Bending and Joining Process
David Wüterich, SEG Automotive Germany Gmbh (DE)..... N/A

17. Trends in Motor Production Processes

17.1. New Production Techniques for Electric Motors in High Performance Light-weight Applications
Paul Ruhland, Karlsruhe Institute of Technology (KIT) (DE)..... 248
17.2. Optimized Manufacturing Process and Modelling of Squirrel-Cage Induction Machines with Copper Cage and Axially Segmented End Rings for High-Speed Applications
Philipp Harnisch, HTW Dresden (DE) 256

18. Signal and Power Connectors

18.1. Innovative Signal and Power Connection Solutions for Alternative Powertrain Concepts
Simon Fröhlig, University of Erlangen-Nuremberg (DE) 266
18.2. Predicting the Quality of High-power Connector Joints with Different Machine Learning Methods
Elisabeth Birgit Schwarz, Robert Bosch GmbH (DE) 273
18.3. Towards an Inline Quality Monitoring for Crimping Processes Utilizing Machine Learning Techniques
Moritz Meiners, University of Erlangen-Nuremberg (DE)..... 282

19. Scientific Poster Sessions

19.1. Review and Enhancements of Rotor Designs for High Speed Synchronous Reluctance Machines
Heim, Markus, Karlsruhe Institute of Technology (KIT) (DE) 290
19.2. A Systematic Approach to Inspection Planning in Agile Process Development of Hairpin Stator Production
Treichel, Patrick, PEM of RWTH Aachen University (DE) 298
19.3. Development and Validation of a Material Application Tool for the Covering Process of a Wire Harness
Heisler, Paul, University of Erlangen-Nuremberg (FAU) (DE)..... N/A
19.4. Deep Learning-Based and Automated Optical Inspection System for Crimp Connectors
Nguyen, Huong, University of Erlangen-Nuremberg (DE) 313
19.5. Real-Time Inference of Neural Networks on FPGAs for Motor Control Applications
Schindler, Tobias, Nuremberg Institute of Technology, Georg Simon Ohm (DE) 318

20. Closing Session

20.1. Sensing machine elements as enablers of comprehensive digitization – A review
Prof. Kirchner, Eckhard, Technische Universität Darmstadt (DE) 326
