2020 IEEE Real-Time Systems Symposium (RTSS)

RTSS 2020

Table of Contents

Message from the Program, Track, and General Chairs xi
Outstanding Paper Awards xiii
Hot Topics Day xiv
Organizers xv
Program Committee Members xvii
List of Secondary Reviewers xx

Invited TCRTS Award Papers

Real Time Spent on Real Time 1
Reinhard Wilhelm (Saarland University)

An Empirical Survey-Based Study into Industry Practice in Real-time Systems 3
Benny Akesson (ESI (TNO) & University of Amsterdam), Mitra Nasri (Eindhoven University of Technology), Geoffrey Nelissen (Eindhoven University of Technology), Sebastian Altmeyer (University of Augsburg), and Robert I. Davis (University of York)

Mixed-Criticality Systems

Schedulability Analysis for Adaptive Mixed Criticality Systems with Arbitrary Deadlines and Semi-Clairvoyance 12
Alan Burns (University of York, UK) and Robert Ian Davis (University of York, UK)

Mixed-Criticality Scheduling in Compositional Real-Time Systems with Multiple Budget Estimates 25
Kecheng Yang (Texas State University) and Zheng Dong (Wayne State University)

Pythia-MCS: Enabling Quarter-Clairvoyance in I/O-Driven Mixed-Criticality Systems 38
Zhe Jiang (University of York, United Kingdom), Kecheng Yang (Texas State University, USA), Nathan Fisher (Wayne State University, USA), Neil Audsley (University of York, United Kingdom), and Zheng Dong (Wayne State University, USA)

From Soft to Hard Real-Time

Reliability Test Based on a Binomial Experiment for Probabilistic Worst-Case Execution Times .51
Luís Fernando Arcaro (Instituto SENAI de Inovação em Sistemas Embarcados, Brazil), Karila Palma Silva (Instituto SENAI de Inovação em Sistemas Embarcados, Brazil), Rômulo Silva de Oliveira (Universidade Federal de Santa Catarina, Brazil), and Luís Almeida (CISTER / Fac. Engenharia da Universidade do Porto, Portugal)

Hard-Real-Time Routing in Probabilistic Graphs to Minimize Expected Delay .63
Kunal Agrawal (Washington University in St. Louis), Sanjoy Baruah (Washington University in St. Louis), Zhishan Guo (University of Central Florida), Jing Li (New Jersey Institute of Technology), and Sudharsan Vaidhun (University of Central Florida)

Generating Utilization Vectors for the Systematic Evaluation of Schedulability Tests .76
David Griffin (University of York, UK), Iain Bate (University of York, UK), and Robert I. Davis (University of York, UK)

Multiprocessor Scheduling

Towards Practical Multiprocessor EDF with Affinities .89
Stephen Tang (University of North Carolina at Chapel Hill, USA) and James H. Anderson (University of North Carolina at Chapel Hill, USA)

Non-Preemptive Real-Time Multiprocessor Scheduling Beyond Work-Conserving .102
Hyeongboo Baek (Incheon National University (INU), Republic of Korea), Jaeheon Kwak (KAIST, Republic of Korea), and Jinkyu Lee (Sungkyunkwan University (SKKU), Republic of Korea)

Response-Time Analysis for Non-Preemptive Global Scheduling with FIFO Spin Locks .115
Suhail Nogd (Delft University of Technology), Geoffrey Nelissen (Eindhoven University of Technology), Mitra Nasri (Eindhoven University of Technology), and Björn Brandenburg (Max Planck Institute for Software Systems)

DAG Scheduling and Analysis on Multiprocessor Systems: Exploitation of Parallelism and Dependency .128
Shuai Zhao (University of York), Xiaotian Dai (University of York), Iain Bate (University of York), Alan Burns (University of York), and Wanli Chang (University of York)

Real-Time Communication: Wired and Wireless

A Real-Time CAN-CAN Gateway with Tight Latency Analysis and Targeted Priority Assignment .141
Guoqi Xie (Hunan University; Key Laboratory for Embedded and Network Computing of Hunan Province), Haijie Gong (Hunan University; Key Laboratory for Embedded and Network Computing of Hunan Province), Yunbo Han (Future Network Lab, CSIG), Samarjit Chakraborty (University of North Carolina at Chapel Hill), and Wanli Chang (University of York)

Optimal Priority Assignment for Multiple CAN/CAN-FD Buses with a Central Gateway .153.....
Taeju Park (University of Michigan), Jiarui Lyu (University of Michigan), and Kang Geun Shin (University of Michigan)

Maintaining Real-Time Data Freshness in Wireless Powered Communication Networks .166.....
Zimeng Zhou (Shandong University, China), Zelin Yun (University of Connecticut, USA), Chenchen Fu (Southeast University, China), Chun Jason Xue (City University of Hong Kong, China), and Song Han (University of Connecticut, USA)

CPS and Autonomous Systems

GoodSpread: Criticality-Aware Static Scheduling of CPS with Multi-QoS Resources .178.....
Debayan Roy (Technical University of Munich, Germany), Sumana Ghosh (Technical University of Munich, Germany), Qi Zhu (Northwestern University, USA), Marco Caccamo (Technical University of Munich, Germany), and Samarjit Chakraborty (UNC Chapel Hill, USA)

R-TOD: Real-Time Object Detector with Minimized End-to-End Delay for Autonomous Driving .191
Wonseok Jang (Kookmin University), Hansaem Jeong (Kookmin University), Kyungtae Kang (Hanyang University), Nikil Dutt (University of California, Irvine), and Jong-Chan Kim (Kookmin University)

Real-Time Attack-Recovery for Cyber-Physical Systems Using Linear Approximations .205.....
Lin Zhang (Syracuse University), Xin Chen (University of Dayton), Fanxin Kong (Syracuse University), and Alvaro Cardenas (University of California, Santa Cruz)

Predictability and Verification of Existing Systems

The Best of All Worlds: Improving Predictability at the Performance of Conventional Coherence with No Protocol Modifications .218.....
Salah Hessien (McMaster University) and Mohamed Hassan (McMaster University)

Response Time Analysis and Priority Assignment of Processing Chains on ROS2 Executors .231....
Yue Tang (Northeastern University, China), Zhiwei Feng (Northeastern University, China), Nan Guan (The Hong Kong Polytechnic University, Hong Kong SAR), Xu Jiang (Northeastern University, China), Mingsong Lv (The Hong Kong Polytechnic University, Hong Kong SAR), Qingxu Deng (Northeastern University, China), and Wang Yi (Northeastern University, China and Uppsala University, Sweden)

Hybridization for Stability Verification of Nonlinear Switched Systems .244.....
Miriam García Soto (Institute of Science and Technology of Austria) and Pavithra Prabhakar (Kansas State University)

Energy Optimization and Multicore Systems

Energy-Constrained Standby-Sparing for Weakly Hard Real-Time Systems .257.....
Linwei Niu (Howard University) and Danda B. Rawat (Howard University)

HARC: A Heterogeneous Array of Redundant Persistent Clocks for Batteryless, Intermittently-Powered Systems 270
Vishal Deep (Iowa State University), Vishak Narayanan (Iowa State University), Mathew Wymore (Iowa State University), Daji Qiao (Iowa State University), and Henry Duwe (Iowa State University)

A Study of Predictable Execution Models Implementation for Industrial Data-Flow Applications on a Multi-Core Platform with Shared Banked Memory 283
Matheus Schuh (Univ. Grenoble Alpes), Claire Maiza (Univ. Grenoble Alpes), Joël Goossens (Univ. libre de Bruxelles), Pascal Raymond (Univ. Grenoble Alpes), and Benoît Dupont de Dinechin (Kalray S.A.)

Integrating Online Safety-Related Memory Tests in Multicore Real-Time Systems 296
Ciro Donnarumma (Rete Ferroviaria Italiana S.P.A., Scuola Superiore Sant'Anna), Alessandro Biondi (Scuola Superiore Sant'Anna), Francesco De Rosa (Rete Ferroviaria Italiana S.P.A.), and Stefano Di Carlo (Politecnico di Torino)

Outstanding Papers

Rate-Monotonic Schedulability of Implicit-Deadline Tasks is NP-hard Beyond Liu and Layland's Bound 308
Pontus Ekberg (Uppsala University, Sweden)

On Removing Algorithmic Priority Inversion from Mission-Critical Machine Inference Pipelines 319
Shengzhong Liu (University of Illinois at Urbana-Champaign, USA), Shuochao Yao (University of Illinois at Urbana-Champaign, USA), Xinzhe Fu (Massachusetts Institute of Technology, USA), Rohan Tabish (University of Illinois at Urbana-Champaign, USA), Simon Yu (University of Illinois at Urbana-Champaign, USA), Ayoosh Bansal (University of Illinois at Urbana-Champaign, USA), Heechul Yun (University of Kansas, USA), Lui Sha (University of Illinois at Urbana-Champaign, USA), and Tarek Abdelzaher (University of Illinois at Urbana-Champaign, USA)

An Optimization Framework for Real-Time Systems with Sustainable Schedulability Analysis 333
Yecheng Zhao (Virginia Tech, USA), Runzhi Zhou (Case Western Reserve University, USA), and Haibo Zeng (Virginia Tech, USA)

E-WarP: A System-wide Framework for Memory Bandwidth Profiling and Management 345
Parul Sohal (Boston University, USA), Rohan Tabish (University of Illinois at Urbana-Champaign, USA), Ulrich Drepper (Red Hat), and Renato Mancuso (Boston University, USA)

Robust and Accurate Period Inference using Regression-Based Techniques 358
Şerban Vădineanu (Delft University of Technology, Netherlands) and Mitra Nasri (Eindhoven University of Technology, Netherlands)

Work-in-Progress

Work In Progress: Control-Flow Migration for Data-Locality Optimisation in Multi-core Real-Time Systems 371
Stefan Reif (Friedrich-Alexander Universitat Erlangen-Nurnberg (FAU)), Phillip Raffeck (Friedrich-Alexander Universitat Erlangen-Nurnberg (FAU)), Peter Ulbrich (Technische Universitat Dortmund), and Wolfgang Schroder-Preikschat (Friedrich-Alexander Universitat Erlangen-Nurnberg (FAU))

Work-In-Progress: Fault Tolerance in a Two-State Checkpointing Regularity-Based System 375
Elena Torre (University of Houston) and Albert Mo Kim Cheng (University of Houston)

Work-In-Progress: Designing a Server-Side Progressive JPEG Encoder for Real-Time Applications 379
Andrew Louie (University of Houston) and Albert Mo Kim Cheng (University of Houston)

Work-In-Progress: Fine-Grained On-Chip Energy Measurement of a Real-Time Multi-core Processor 383
Dominic Oehlert (Hamburg University of Technology), Edward Umaña Williams (Costa Rica Institute of Technology), and Heiko Falk (Hamburg University of Technology)

Work-In-Progress: Safe and Secure Configuration Synthesis for TSN using Constraint Programming 387
Niklas Reusch (Technical University of Denmark), Paul Pop (Technical University of Denmark), and Silviu S. Craciunas (TTTech Computertechnik AG, Vienna, Austria)

Work in Progress: The ILP-Tractability of Schedulability Analysis Problems 391
Sanjoy Baruah (Washington University in Saint Louis)

Work-In-Progress: A DSL for the Safe Deployment of Runtime Monitors in Cyber-Physical Systems 395
Giann Spilere Nandi (CISTER - Research Centre in Real-Time & Embedded Computing Systems), David Pereira (CISTER - Research Centre in Real-Time & Embedded Computing Systems), José Proença (CISTER - Research Centre in Real-Time & Embedded Computing Systems), and Eduardo Tovar (CISTER - Research Centre in Real-Time & Embedded Computing Systems)

Work-In-Progress: Cyber-Physical Systems and Dynamic Partial Reconfiguration Scalability: Opportunities and Challenges 399
Gabriella D'Andrea (Università degli Studi dell'Aquila) and Giacomo Valente (Università degli Studi dell'Aquila)

Work-in-Progress: Towards a Fine-Grain Thermal Model for Uniform Multi-core Processors 403
Javier Pérez Rodríguez (CISTER Research Centre, ISEP, Polytechnic Institute of Porto) and Patrick Meumeu Yomsi (CISTER Research Centre, ISEP, Polytechnic Institute of Porto)

Work-In-Progress: WCRT Analysis for the 3-Phase Task Model in Partitioned Scheduling 407
Jatin Arora (CISTER, ISEP, Polytechnic Institute of Porto, Portugal), Cláudio Maia (CISTER, ISEP, Polytechnic Institute of Porto, Portugal), Syed Aftab Rashid (CISTER, ISEP, Polytechnic Institute of Porto, Portugal), Geoffrey Nelissen (Eindhoven University of Technology (TU/e), Eindhoven, the Netherlands), and Eduardo Tovar (CISTER, ISEP, Polytechnic Institute of Porto, Portugal)

Work-In-Progress: Toward Precomputation in Real-Time Mixed-Trust Scheduling 411
Dionisio de Niz (SEI, Carnegie Mellon University), Bjorn Andersson (SEI, Carnegie Mellon University), Hyoseung Kim (University of California Riverside), Mark Klein (SEI, Carnegie Mellon University), and John Lehoczky (Stat, Carnegie Mellon University)

Work-in-Progress: Lessons Learnt from Creating an Extreme Value Library in Python 415
Marwan Wehaiba El Khazen (StatInf and Inria Paris), Adriana Gogonel (StatInf Paris), and Liliana Cucu-Grosjean (StatInf and Inria Paris)

Work-in-Progress: Towards Representative Measurement Protocols 419
Kossivi Kougblenou (Statinf), Rihab Bennour (Statinf), Adriana Gogonel (Statinf), and Liliana Cucu-Grosjean (Statinf & Inria)

Author Index 423
