2020 IEEE 26th International Conference on Parallel and Distributed Systems (ICPADS)

ICPADS 2020

Table of Contents

Message from the General Chair ..... **xviii**
Message from the Program Chair ..... **xix**
Organizing Committee ..... **xxi**
Program Committee ..... **xxii**
Steering Committee ..... **xxvii**
Reviewers ..... **xxviii**

Session 1: Learning Algorithm

LTG-LSM: The Optimal Structure in LSM-tree Combined with Reading Hotness 1
Jiaping Yu (Ningbo University), Huahui Chen (Ningbo University), Jiangbo Qian (Ningbo University), and Yihong Dong (Ningbo University)

Improved MapReduce Load Balancing through Distribution-Dependent Hash Function Optimization 9
Zafar Ahmad (Stony Brook University), Sharmila Duppala (University of Maryland), Rezaul Chowdhury (Stony Brook University), and Steven Skiena (Stony Brook University)

Efficient Sparse-Dense Matrix-Matrix Multiplication on GPUs Using the Customized Sparse Storage Format 19
Shaohuai Shi (The Hong Kong University of Science and Technology), Qiang Wang (Hong Kong Baptist University), and Xiaowen Chu (Hong Kong Baptist University)

Session 2: Algorithms for Cloud Systems

Joint Service Placement and Request Scheduling for Multi-SP Mobile Edge Computing Network 27
Zhengwei Lei (University of Science and Technology of China, China), Hongli Xu (University of Science and Technology of China, China), Liusheng Huang (University of Science and Technology of China, China), and Zeyu Meng (University of Science and Technology of China, China)

A Similarity Clustering-Based Deduplication Strategy in Cloud Storage Systems 35
Saiqin Long (Xiangtan University), Zhetao Li (Xiangtan University), Zihao Liu (Xiangtan University), Qingyong Deng (Xiangtan University), Sangyoon Oh (Ajou University), and Nobuyoshi Komuro (Chiba University)

A Fair Task Assignment Strategy for Minimizing Cost in Mobile Crowdsensing 44
Yujun Liu (Jilin University, Changchun, China), Yongjian Yang (Jilin University, Changchun, China), En Wang (Jilin University, Changchun, China), Wenbin Liu (Jilin University, Changchun, China), Dongming Luan (Jilin University, Changchun, China), Xiaoying Sun (Jilin University, Changchun, China), and Jiu Wu (Temple University, Philadelphia, USA)

Communication-Aware Load Balancing of the LU Factorization over Heterogeneous Clusters 54
Lucas Leandro Nesi (Institute of Informatics PPGC/UFRGS, Brazil), Lucas Mello Schnorr (Institute of Informatics PPGC/UFRGS, Brazil), and Arnaud Legrand (University Grenoble Alpes, CNRS, Inria, Grenoble INP, LIG, France)

Session 3: Algorithms for Networks

An Efficient Work-Stealing Scheduler for Task Dependency Graph 64
Chun-Xun Lin (University of Illinois Urbana-Champaign, USA), Tsung-Wei Huang (The University of Utah, USA), and Martin D. F. Wong (University of Illinois Urbana-Champaign, USA)

LBNN: Perceiving the State Changes of a Core Telecommunications Network via Linear Bayesian Neural Network 72
Yanying Lin (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Kejiang Ye (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Ming Chen (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Naitian Deng (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Tailin Wu (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), and Cheng-Zhong Xu (University of Macau)

A Method to Detecting Artifact Anomalies in A Microservice Architecture 81
Faisal Fahmi (National Chiao-Tung University, Taiwan), Pei-Shu Huang (National Chiao-Tung University, Taiwan), and Feng-Jian Wang (National Chiao-Tung University, Taiwan)

Contention Resolution on a Restrained Channel 89
Elijah Hradovich (Wrocław University of Technology, Poland), Marek Klonowski (Wrocław University of Technology, Poland), and Dariusz Kowalski (Augusta University: Augusta, GA, US)

Session 4: Performance Prediction and Optimization

Real-Time Scheduling and Analysis of OpenMP Programs with Spin Locks 99
He Du (Northeastern University, China), Xu Jiang (Northeastern University, China), Tao Yang (Northeastern University, China), Mingsong Lv (Northeastern University, China), and Yi Wang (Northeastern University, China)

Predicting Performance Degradation on Adaptive Cache Replacement Policy 109
Yi Zhang (Northeastern University), Ran Cui (Northeastern University), Mingsong Lv (Northeastern University), Chuanwen Li (Northeastern University), and Qingxu Deng (Northeastern University)

Making Inconsistent Components more Efficient for Hybrid B+Trees 117
Xiongxiong She (Chongqing University, China), Chengliang Wang (Chongqing University, China), and Fenghua Tu (Chongqing University, China)

Session 5: Edge and Persistent Memory

XOR-Net: An Efficient Computation Pipeline for Binary Neural Network Inference on Edge Devices 124
Shien Zhu (Nanyang Technological University, Singapore), Luan H. K. Duong (Nanyang Technological University, Singapore), and Weichen Liu (Nanyang Technological University, Singapore)

Load Balance Awared Data Sharing Systems in Heterogeneous Edge Environment 132
Sheng Chen (Tianjin UniversityChina), Zheng Chen (Tianjin UniversityChina), Siyuan Gu (National University of Defense Technology, China), Baochao Chen (Tianjin University, China), Junjie Xie (Institute of Systems Engineering, AMS, PLA, Beijing, P.R. China), and Deke Guo (Tianjin University, China)

Themis: Malicious Wear Detection and Defense for Persistent Memory File Systems 140
Wenbin Wang (Chongqing University, Chongqing, China), Chaoshu Yang (Guizhou University, Guiyang, China), Runyu Zhang (Chongqing University, Chongqing, China), Shun Nie (Chongqing University, Chongqing, China), Xianzhang Chen (Chongqing University, Chongqing, China), and Duo Liu (Chongqing University, Chongqing, China)

Session 6: Federated Learning and Reinforcement Learning

Incentive Mechanism Design for Federated Learning: A Two-Stage Stackelberg Game Approach ... 148
Guiliang Xiao (University of Science and Technology of China, China), Mingjun Xiao (University of Science and Technology of China, China), Guoju Gao (Soochow University, China), Sheng Zhang (Nanjing University, China), Hui Zhao (University of Science and Technology of China, China), and Xiang Zou (The Third Research Institute of the Ministry of Public Security, China)

Time Efficient Federated Learning with Semi-Asynchronous Communication 156
Jiangshan Hao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Yanchao Zhao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), and Jiale Zhang (Nanjing University of Aeronautics And Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China)

Multi-Agent Fault-Tolerant Reinforcement Learning with Noisy Environments 164
Canhui Luo (Hunan University), Xuan Liu (Hunan University), Xinning Chen (Hunan University), and Juan Luo (Hunan University)

Decentralized Exploration of a Structured Environment Based on Multi-Agent Deep Reinforcement Learning 172
Dingjie He (National University of Defense Technology, China), Dawei Feng (National University of Defense Technology, China), Hongda Jia (National University of Defense Technology, China), and Hui Liu (National University of Defense Technology, China)

Session 7: Crowd Sourcing and Parallel Acceleration

D2D-Enabled Reliable Data Collection for Mobile Crowd Sensing 180
Pengfei Wang (Dalian University of Technology), Zhen Yu (Dalian University of Technology), Chi Lin (Dalian University of Technology), Leyou Yang (Northeastern University), Yaqing Hou (Dalian University of Technology), and Qiang Zhang (Dalian University of Technology)

Improving the Applicability of Visual Peer-to-Peer Navigation with Crowdsourcing 188
Erqun Dong (Tsinghua University), Jianzhe Liang (Tsinghua University), Zeyu Wang (Tsinghua University), Jingao Xu (Tsinghua University), Longfei Shangguan (Microsoft Cloud&AI), Qiang Ma (Tsinghua University), and Zheng Yang (Tsinghua University)

Massively Parallel Causal Inference of Whole Brain Dynamics at Single Neuron Resolution 196
Wassapon Watanakeesuntorn (Nara Institute of Science and Technology, Japan), Keichi Takahashi (Nara Institute of Science and Technology, Japan), Kohei Ichikawa (Nara Institute of Science and Technology, Japan), Joseph Park (U.S. Department of the Interior, USA), George Sugihara (University of California San Diego, USA), Ryousei Takano (National Institute of Advanced Industrial Science and Technology, Japan), Jason Haga (National Institute of Advanced Industrial Science and Technology, Japan), and Gerald M. Pao (Salk Institute for Biological Studies, USA)

An Effective Design to Improve the Efficiency of DPUs on FPGA 206
Yutian Lei (Xiangtan University), Qingyong Deng (Xiangtan University), Saiqin Long (Xiangtan University), Shaohui Liu (The Artificial Intelligence Center PengCheng Laboratory Shenzhen, China), and Sangyoon Oh (Ajou University)

Session 8: Localization and Cross-Technology Communication

Lightweight Mobile Devices Indoor Location Based on Image Database 214
Ran Gao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Yanchao Zhao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), and Maoxing Tang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China)

A Dynamic Escape Route Planning Method for Indoor Multi-Floor Buildings Based on Real-Time Fire Situation Awareness 222
Chun Wang (Hunan University), Juan Luo (Hunan University), Cuijun Zhang (Hunan University), and Xuan Liu (Hunan University)

Mitigating Cross-Technology Interference in Heterogeneous Wireless Networks Based on Deep Learning 230
Weidong Zheng (Shenzhen University), Junmei Yao (Shenzhen University), and Kaishun Wu (Shenzhen University)

Accelerating PageRank in Shared-Memory for Efficient Social Network Graph Analytics 238
Baofu Huang (Shenzhen University), Zhidan Liu (Shenzhen University), and Kaishun Wu (Shenzhen University)

Session 9: Scheduling in Edge Environment

Using Configuration Semantic Features and Machine Learning Algorithms to Predict Build Result in Cloud-Based Container Environment 248
Yiwen Wu (National University of Defense Technology, China), Yang Zhang (National University of Defense Technology, China), Junsheng Chang (National University of Defense Technology, China), Bo Ding (National University of Defense Technology, China), Tao Wang (National University of Defense Technology, China), and Huaimin Wang (National University of Defense Technology, China)

Joint Service Placement and Computation Offloading in Mobile Edge Computing: An Auction-Based Approach 256
Lei Zhang (Nanjing University, China), Zhihao Qu (Hohai University, China), Baoliu Ye (Nanjing University, China), and Bin Tang (Hohai University, China)

Multi-user Edge-Assisted Video Analytics Task Offloading Game Based on Deep Reinforcement Learning 266
Yu Chen (Nanjing University, China), Sheng Zhang (Nanjing University, China), Mingjun Xiao (University of Science and Technology, China), Zhuzhong Qian (Nanjing University, China), Jie Wu (Temple University, USA), and Sanglu Lu (Nanjing University, China)

Accelerating Deep Learning Tasks with Optimized GPU-Assisted Image Decoding 274
Lipeng Wang (Hong Kong University of Science and Technology), Qiong Luo (Hong Kong University of Science and Technology), and Shengen Yan (SenseTime Research)

Session 10: Application and Security

Scheduling Rechargeable UAVs for Long Time Barrier Coverage 282
Zhouqing Han (Nanjing University of Aeronautics and Astronautics, China), Xiaojun Zhu (Nanjing University of Aeronautics and Astronautics, China), and Lijie Xu (Nanjing University of Posts and Telecommunications, China)

Use of Genetic Programming Operators in Data Replication and Fault Tolerance 290
Syed Mohtashim Abbas Bokhari (University of Oldenburg, Germany) and Oliver Theel (University of Oldenburg, Germany)

Multiple Balance Subsets Stacking for Imbalanced Healthcare Dataset 300
Yachao Shao (Institute of Computer Science, University of Göttingen, Germany), Tao Zhao (National University of Defense Technology, China), Xiaoning Wang (First Affiliated Hospital of Gannan Medical University, China), Xiaofeng Zou (First Affiliated Hospital of Gannan Medical University, China), and Xiaoming Fu (Institute of Computer Science, University of Göttingen, Germany)

Securing App Behaviors in Smart Home: A Human-App Interaction Perspective 308
Jinlei Li (Shanghai Jiao Tong University, China), Yan Meng (Shanghai Jiao Tong University, China), Lu Zhou (Shanghai Jiao Tong University, China), and Haojin Zhu (Shanghai Jiao Tong University, China)

Session 11: Edge-Cloud Performance

Task Offloading in Trusted Execution Environment Empowered Edge Computing 316
Yuepeng Li (China University of Geosciences, Wuhan), Deze Zeng (China University of Geosciences, Wuhan), Lin Gu (Huazhong University of Science and Technology), Andong Zhu (China University of Geosciences, Wuhan), and Quan Chen (Huazhong University of Science and Technology)

Gecko: Guaranteeing Latency SLO on a Multi-Tenant Distributed Storage System 324
Zhenyu Leng (Chinese Academy of Sciences, China University of Chinese Academy of Sciences, China), Dejun Jiang (Chinese Academy of Sciences, China University of Chinese Academy of Sciences, China), Liuying Ma (Chinese Academy of Sciences, China), and Jin Xiong (Chinese Academy of Sciences, China University of Chinese Academy of Sciences, China)

A Learning-Based Dynamic Load Balancing Approach for Microservice Systems in Multi-Cloud Environment 334
Jieqi Cui (Sun Yat-Sen University), Pengfei Chen (Sun Yat-Sen University), and Guangba Yu (Sun Yat-Sen University)

Enhancing Availability for the MEC Service: CVaR-Based Computation Offloading 342
Shengli Pan (China University of Geosciences (Wuhan), China), Zhiyong Zhang (Cyberspace Security Key Laboratory of Sichuan Province, CETCSC, China), Tao Xue (China University of Geosciences (Wuhan), China), and Guangmin Hu (University of Electronic Science and Technology of China, China)

Session 12: Performance of Distributed Systems

Intermediate Value Size Aware Coded MapReduce 348
Yamei Dong (Nanjing University, China), Bin Tang (Hohai University, China), Baoliu Ye (Nanjing University, China), Zhihao Qu (Hohai University, China), and Sanglu Lu (Nanjing University, China)

A Customized Reinforcement Learning Based Binary Offloading in Edge Cloud 356
Yuepeng Li (China University of Geosciences, Wuhan), Lvhao Chen (China University of Geosciences, Wuhan), Deze Zeng (China University of Geosciences, Wuhan), and Lin Gu (Huazhong University of Science and Technology)

Optimal Use of the TCP/IP Stack in User-Space Storage Applications with ADQ Feature in NIC..... 363
Ziye Yang (Intel, China), Benjamin Walker (Intel, U.S.), Harris James (Intel, U.S.), Yadong Li (Intel, U.S.), and Gang Cao (Intel, U.S.)

Session 13: Cyber Physical Security

SIC2: Securing Microcontroller Based IoT Devices with Low-Cost Crypto Coprocessors 372
Bryan Pearson (University of Central Florida), Cliff Zou (University of Central Florida), Yue Zhang (Jinan University), Zhen Ling (Southeast University), and Xinwen Fu (University of Massachusetts Lowell)

Intelligent Detection Algorithm against UAVs' GPS Spoofing Attack 382
Shenqing Wang (Nanjing University of Aeronautics and Astronautics), Jian Wang (Nanjing University of Aeronautics and Astronautics), Chunhua Su (University of Aizu), and Xinshu Ma (Nanjing University of Aeronautics and Astronautics)

An Efficient and Scalable Sparse Polynomial Multiplication Accelerator for LAC on FPGA 390
Jipeng Zhang (Nanjing University of Aeronautics and Astronautics, China), Zhe Liu (Nanjing University of Aeronautics and Astronautics, China), Hao Yang (Nanjing University of Aeronautics and Astronautics, China), Junhao Huang (Nanjing University of Aeronautics and Astronautics, China), and Weibin Wu (Nanjing University of Aeronautics and Astronautics, China)

Secure and Verifiable Data Access Control Scheme with Policy Update and Computation Outsourcing for Edge Computing 398
Yue Guan (Southwest University), Songtao Guo (Chongqing University), Pan Li (Southwest University), and Yuanyuan Yang (Stony Brook University)

Session 14: AI and Distributed System Security

Secure Door on Cloud: A Secure Data Transmission Scheme to Protect Kafka's Data 406
Hanyi Zhang (Nanjing University of Aeronautics and Astronautics), Liming Fang (Nanjing University of Aeronautics and Astronautics), Keyu Jiang (Nanjing University of Aeronautics and Astronautics), Weiting Zhang (Nanjing University of Aeronautics and Astronautics), Minghui Li (Nanjing University of Aeronautics and Astronautics), and Lu Zhou (University of Aizu)

A Solution to Data Accessibility across Heterogeneous Blockchains 414
Zhihui Wu (State Key Laboratory of Integrated Services Networks, Xidian University), Yan Xiao (State Key Laboratory of Integrated Services Networks, Xidian University), Enyuan Zhou (State Key Laboratory of Integrated Services Networks, Xidian University), Qingqi Pei (Shaanxi Key Laboratory of Block Chain and Secure Computing, Xidian University), and Quan Wang (Shaanxi Key Laboratory of Block Chain and Secure Computing, Xidian University)

PrivAG: Analyzing Attributed Graph Data with Local Differential Privacy 422
ZiChun Liu (University of Science and Technology of China, China), Liusheng Huang (University of Science and Technology of China, China), Hongli Xu (University of Science and Technology of China, China), Wei Yang (University of Science and Technology of China, China), and Shaowei Wang (University of Science and Technology of China, China)

Exploring Data Correlation between Feature Pairs for Generating Constraint-Based Adversarial Examples 430
Yunzhe Tian (Beijing Jiaotong University, Beijing, China), Yingdi Wang (Beijing Jiaotong University, Beijing, China Wang), Endong Tong (Beijing Jiaotong University, Beijing, China), Wenjia Niu (Beijing Jiaotong University, Beijing, China), Liang Chang (Guilin University of Electronic Technology, Guilin, China), Qi Alfred Chen (University of California, Irvine), Gang Li (Deakin University, Geelong, Australia), and Jiqiang Liu (Beijing Jiaotong University, Beijing, China)

A Deep Learning Framework Supporting Model Ownership Protection and Traitor Tracing 438
Guowen Xu (University of Electronic Science and Technology of China, Chengdu, China), Hongwei Li (University of Electronic Science and Technology of China, Chengdu, China), Yuan Zhang (University of Electronic Science and Technology of China, Chengdu, China), Xiaodong Lin (University of Guelph, Guelph, Canada), Robert H Deng (Singapore Management University, Singapore), and Xuemin Sherman Shen (University of Waterloo, Waterloo Ontario N2L 3G1 Canada)

Session 15: Data Processing

A Social Link Based Private Storage Cloud 447
Michalis Konstantopoulos (University of Athens), Nikos Chondros (University of Athens), and Mema Roussopoulos (University of Athens)

Enabling Generic Verifiable Aggregate Query on Blockchain Systems 456
Yanchao Zhu (ECNU), Zhao Zhang (ECNU), Cheqing Jin (ECNU), and Aoying Zhou (ECNU)

SrSpark: Skew-Resilient Spark Based on Adaptive Parallel Processing 466
Yijie Shen (SKL Computer Architecture, Institute of Computing Technology, CAS, Beijing, China; University of Chinese Academy of Sciences, Beijing, China), Jin Xiong (SKL Computer Architecture, Institute of Computing Technology, CAS, Beijing, China; University of Chinese Academy of Sciences, Beijing, China), and Dejun Jiang (SKL Computer Architecture, Institute of Computing Technology, CAS, Beijing, China; University of Chinese Academy of Sciences, Beijing, China)

Optimizing Multi-way Theta Join for Data Skew in Sub-Second Stream Computing 476
Xiaopeng Fan (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Xinchun Liu (University of Science and Technology of China), Yang Wang (Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences), Youjun Wang (Hangzhou Institute of Advanced Technology), and Jing Li (University of Science and Technology of China)

Session 16: Resource and Data Management

OOOPS: An Innovative Tool for IO Workload Management on Supercomputers 486
Lei Huang (The University of Texas at Austin, USA) and Si Liu (The University of Texas at Austin, USA)

URFS: A User-Space Raw File System Based on NVMe SSD 494
Yaofeng Tu (Nanjing University of Aeronautics & Astronautics, ZTE Corporation), Yinjun Han (ZTE Corporation), Zhenghua Chen (ZTE Corporation), Zhengguang Chen (ZTE Corporation), and Bing Chen (Nanjing University of Aeronautics & Astronautics)

DyRAC: Cost-Aware Resource Assignment and Provider Selection for Dynamic Cloud Workloads 502
Yannis Sfakianakis (FORTH), Manolis Marazakis (FORTH), and Angelos Bilas (FORTH)

WMAlloc: A Wear-Leveling-Aware Multi-Grained Allocator for Persistent Memory File Systems .. 510
Shun Nie (Chongqing University, China), Chaoshu Yang (Guizhou University, China), Runyu Zhang (Chongqing University, China), Wenbin Wang (Chongqing University, China), Duo Liu (Chongqing University, China), and Xianzhang Chen (Chongqing University, China)

Session 17: Secure and Reliable Systems

Optimizing Complex OpenCL Code for FPGA: A Case Study on Finite Automata Traversal 518
Marziyeh Nourian (North Carolina State University), Mostafa Eghbali Zarch (North Carolina State University), and Michela Becchi (North Carolina State University)

FastCredit: Expediting Credit-Based Proactive Transports in Datacenters 528
Dezun Dong (National University of Defense Technology, China), Shan Huang (National University of Defense Technology, China), Zejia Zhou (National University of Defense Technology, China), Wenxiang Yang (National University of Defense Technology, China), and Hanyi Shi (No. 63871 Unit, China)

Proactive Failure Recovery for Stateful NFV 536
Zhenyi Huang (Sun Yat-Sen University) and Huawei Huang (Sun Yat-Sen University)

TEEp: Supporting Secure Parallel Processing in ARM TrustZone 544
Zinan Li (Shanghai Jiao Tong University), Wenhao Li (Shanghai Jiao Tong University), Yubin Xia (Shanghai Jiao Tong University), and Binyu Zang (Shanghai Jiao Tong University)

Session 18: Scheduling and Resource Management

Compressive Sensing Based Predictive Online Scheduling with Task Colocation in Cloud Data Center 554
Yunhin Chan (Sun Yat-sen University, Guangzhou, China), Ke Luo (Sun Yat-sen University, Guangzhou, China), and Xu Chen (Sun Yat-sen University, Guangzhou, China)

Non-Technical Losses Detection in Smart Grids: An Ensemble Data-Driven Approach 563
Yufeng Xing (Taiyuan University of Science and Technology), Lei Guo (Taiyuan University of Technolog), Zongchao Xie (University of Melbourn), Lei Cui (Deakin University), Longxiang Gao (Deakin University), and Shui Yu (University of Technology Sydney)

Virtual Machine Consolidation for NUMA Systems: A Hybrid Heuristic Grey Wolf Approach 569
Kangli Hu (South China University of Technology, GuangZhou, China), Weiwei Lin (South China University of Technology, GuangZhou, China), Tiansheng Huang (South China University of Technology, GuangZhou, China), Keqin Li (State University of New York, New Paltz, New York , USA), and Like Ma (Scutech Corporation Co., Ltd. GuangZhou, China)

A Novel Classification Model to Predict Batch Job Failures in Co-Located Cloud 577
Yurui Li (South China University of Technology, Guangzhou, China), Weiwei Lin (South China University of Technology, Guangzhou, China), Keqin Li (State University of New York, New Paltz, New York , USA), James Z. Wang (Scutech Corporation Co., Ltd. Guangzhou, China), Fagui Liu (South China University of Technology, Guangzhou, China), and Jie Liu (South China University of Technology, Guangzhou, China)

Session 19: Federated Learning and Deep Learning

Robust Federated Learning Approach for Travel Mode Identification from Non-IID GPS Trajectories 585
Yuanshao Zhu (Southern University of Science and Technology), Shuyu Zhang (Southern University of Science and Technology), Yi Liu (Southern University of Science and Technology), Dusit Niyato (Nanyang Technological University), and James J.Q. Yu (Southern University of Science and Technology)

Deep Spatio-Temporal Attention Model for Grain Storage Temperature Forecasting 593
Shanshan Duan (Henan University of Technology, Zhengzhou, Henan, China), Weidong Yang (Henan University of Technology, Zhengzhou, Henan, China), Xuyu Wang (California State University, Sacramento, CA, USA), Shiwen Mao (Auburn University, Auburn, AL, USA), and Yuan Zhang (Henan University of Technology, Zhengzhou, Henan, China)

Proactive Content Caching for Internet-of-Vehicles Based on Peer-to-Peer Federated Learning 601
Zhengxin Yu (University of Exeter), Jia Hu (University of Exeter), Geyong Min (University of Exeter), Han Xu (University of Exeter), and Jed Mills (University of Exeter)

Session 20: Distributed System Design and Implementation

ABC: An Auction-Based Blockchain Consensus-Incentive Mechanism 609
Zhengpeng Ai (Northeastern University, China), Yuan Liu (Northeastern University, China), and Xingwei Wang (Northeastern University, China)

A Trustworthy Blockchain-Based Decentralised Resource Management System in the Cloud 617
Zhiming Zhao (University of Ansterdam, Netherlands), Chunming Rong (University of Stavanger, Norway), and Martin Gilje Jaatun (University of Stavanger, Norway)

DCVP: Distributed Collaborative Video Stream Processing in Edge Computing 625
Shijing Yuan (Shanghai Jiao Tong University, China), Jie Li (Shanghai Jiao Tong University, China), Chentao Wu (Shanghai Jiao Tong University, China), Yusheng Ji (Information Systems Architecture Research Division, National Institute of Informatics, Japan), and Yongbing Zhang (University of Tsukuba, Tsukuba, Ibaraki, Japan)

Efficient Post-Quantum Identity-Based Encryption with Equality Test 633
Willy Susilo (University of Wollongong, Australia), Dung Hoang Duong (University of Wollongong, Australia), and Huy Quoc Le (University of Wollongong, Australia)

WorkShop Session 1: Big Data Systems

How Fast Can We Insert? An Empirical Performance Evaluation of Apache Kafka 641
Guenter Hesse (Hasso Plattner Institute, University of Potsdam), Christoph Matthies (Hasso Plattner Institute, University of Potsdam), and Matthias Uflacker (Hasso Plattner Institute, University of Potsdam)

Graph-Based Approaches for the Interval Scheduling Problem 649
Panagiotis Oikonomou (Southern University of Science and Technology, China), Nikos Tziritas (University of Thessaly, Greece), Georgios Theodoropoulos (Southern University of Science and Technology, China), Maria Koziri (University of Thessaly, Greece), Thanasis Loukopoulos (University of Thessaly, Greece), and Samee U Khan (Mississippi State University, USA)

MPI Parallelization of NEUROiD Models Using Docker Swarm 655
Raghu Sesha Iyengar (Indian Institute of Technology, Hyderabad) and Mohan Raghavan (Indian Institute of Technology, Hyderabad)

WorkShop Session 2: Edge Intelligence for Smart IoT Applications

S-GAT: Accelerating Graph Attention Networks Inference on FPGA Platform with Shift Operation 661
Weian Yan (Shanghai University, China), Weiqin Tong (Shanghai University, China), and Xiaoli Zhi (Shanghai University, China)

Explainable Congestion Attack Prediction and Software-Level Reinforcement in Intelligent Traffic Signal System 667
Xiaojin Wang (Beijing Jiaotong University), Yingxiao Xiang (Beijing Jiaotong University), Wenjia Niu (Beijing Jiaotong University), Endong Tong (Beijing Jiaotong University), and Jiqiang Liu (Beijing Jiaotong University)

Dynamic-Static-Based Spatiotemporal Multi-Graph Neural Networks for Passenger Flow Prediction 673
Jingyan Ma (Nanjing University of Aeronautics and Astronautics), Jingjing Gu (Nanjing University of Aeronautics and Astronautics), Qiang Zhou (Nanjing University of Aeronautics and Astronautics), Qiuhong Wang (Nanjing University of Aeronautics and Astronautics), and Ming Sun (Nanjing University of Aeronautics and Astronautics)

Incentive-Driven Data Offloading and Caching Replacement Scheme in Opportunistic Mobile Networks 679
Tong Wu (China Three Gorges University, Yichang, China), Xuxun Liu (South China University of Technology, Guangzhou, China), Deze Zeng (China University of Geosciences, Wuhan, China), Huan Zhou (China Three Gorges University, Yichang, China), and Shouzhi Xu (China Three Gorges University, Yichang, China)

Adaptive DNN Partition in Edge Computing Environments 685
Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Lei Wei (State Grid Jiangsu Electric Power Co., Ltd., P.R. China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Chengling Jiang (State Grid Jiangsu Electric Power Co., Ltd., P.R. China), and Zhen Zhang (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China)

Efficient Edge Service Migration in Mobile Edge Computing 691
Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), Lei Wei (State Grid Jiangsu Electric Power Co., Ltd., P.R. China), Chengling Jiang (State Grid Jiangsu Electric Power Co., Ltd., P.R. China), Chuanjun Wang (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China), and Mingxuan Zhang (State Grid Jiangsu Electric Power Co., Ltd. Information & Telecommunication Branch, P.R. China)

A Protocol-Independent Container Network Observability Analysis System Based on eBPF 697
Chang Liu (Zhejiang University), Zhengong Cai (Zhejiang University), Bingshen Wang (Alibaba Cloud), Zhimin Tang (Alibaba Cloud), and Jiaxu Liu (Alibaba Cloud)

WorkShop Session 3: Heterogeneous Multi-access Mobile Edge Computing and Applications

Performance Guaranteed Single Link Failure Recovery in SDN Overlay Networks 703
Lilei Zheng (University of Science and Technology of China), Hongli Xu (University of Science and Technology of China), Suo Chen (University of Science and Technology of China), and Liusheng Huang (University of Science and Technology of China)

A Personal Distributed Real-Time Collaborative System 709
Michalis Konstantopoulos (University of Athens), Nikos Chondros (University of Athens), and Mema Roussopoulos (University of Athens)

Cooperative Resource Sharing Strategy with eMBB Cellular and C-V2X Slices 716
Yan Liang (Beijing Information Science and Technology University), Xin Chen (Beijing Information Science and Technology University), Shuang Chen (Beijing Information Science and Technology University), and Ying Chen (Beijing Information Science and Technology University)

CP-BZD Repair Codes Design for Distributed Edge Computing 722
Shuangshuang Lu (Shenzhen University, China), Chanting Zhang (Shenzhen University, China), and Mingjun Dai (Shenzhen University, China)

Computation Task Scheduling and Offloading Optimization for Collaborative Mobile Edge Computing 728
Bin Lin (Shenzhen University), Xiaohui Lin (Shenzhen University), Shengli Zhang (Shenzhen University), Hui Wang (Shenzhen University), and Suzhi Bi (Shenzhen University, and Peng Cheng Laboratory, Shenzhen)

Author Index **735**
