Shannon Theory

Rényi Entropy Power and Normal Transport

Olivier Rioul (Telecom Paris & Ecole Polytechnique, France)

pp. 1-5

Synergy and Redundancy Duality Between Gaussian Multiple Access and Broadcast Channels

Xueyan Niu (Purdue University, USA); Christopher J Quinn (Iowa State University, USA)

pp. 6-10

On the Capacity of the Flash Memory Channel with Feedback

V. Arvind Rameshwar (Indian Institute of Science, Bengaluru, India); Aryabhatt M. Reghu and Navin Kashyap (Indian Institute of Science, India)

pp. 11-15

On Two Information Quantities Relating Two Distortion Balls

Shota Saito and Toshiyasu Matsushima (Waseda University, Japan)

pp. 16-20

An Equivalent Expression for the Wyner-Ziv Source Coding Problem

Tetsunao Matsuta and Tomohiko Uyematsu (Tokyo Institute of Technology, Japan)

pp. 21-25

A Study on the Overflow Probability of Variable-to-Fixed Length Codes

Shigeaki Kuzuoka (Wakayama University, Japan)

pp. 26-30

Remote Empirical Coordination

Michail Mylonakis, Photios A. Stavrou and Mikael Skoglund (KTH Royal Institute of Technology, Sweden)

pp. 31-35

Exponent Function for the Gel'fand-Pinsker Channel at Rates above the Capacity

Yasutada Oohama (University of Electro-Communications, Japan)

pp. 36-40

Entropy to Control Planning in Video-Games

Eric Jacopin (CREC Saint-Cyr, France)

pp. 41-45

Trellis Code Error Exponent From Results for Asynchronous Multiple Access Channels

Lóránt Farkas (Budapest University of Technology and Economics, Hungary)

pp. 46-50

Minimum Energy Analysis for Robust Gaussian Joint Source-Channel Coding with a Square-Law Profile

Mohammadamin Baniasadi (University of California, Riverside, USA); Ertem Tuncel (UC Riverside, USA)

pp. 51-55

On Berger-Tung Inner Bound for Sum-Rate versus Sum-Distortion Problem

Srinivas Avasarala (IIT Hyderabad, India); Sharang Sriram and Soumya Jana (Indian Institute of Technology, Hyderabad, India)

pp. 56-60

Coding Theorems on the Simple Capacity for Digital Fingerprinting Codes

Hiroki Koga (University of Tsukuba, Japan)

pp. 61-65

Source Coding

Gauss-Markov Source Tracking with Side Information: Lower Bounds

Omrri Lev (Tel-Aviv University, Israel); Anatoly Khina (Tel Aviv University, Israel)

pp. 66-70

Address-Event Variable-Length Compression for Time-Encoded Data

Sharu Theresa Jose and Osvaldo Simeone (King's College London, United Kingdom (Great Britain))

pp. 71-75

Third-Order Asymptotics of Variable-Length Compression Allowing Errors

Yuta Sakai and Vincent Y. F. Tan (National University of Singapore, Singapore)

pp. 76-80

Autoregressive Image Generative Models with Normal and t -distributed Noise and the Bayes Codes for Them

Yuta Nakahara and Toshiyasu Matsushima (Waseda University, Japan)

pp. 81-85

Channel Coding

An Effective Learning Scheme for Weighted-BP with Parallel Permutation Decoding

Ryota Yoshizawa, Kenichiro Furuta, Yuma Yoshinaga, Osamu Torii and Tomoya Kodama (Kioxia Corporation, Japan)

pp. 86-90

Maximum Likelihood Channel Decoding with Quantum Annealing Machine

Naoki Ide (Sony Corporation & R&D Center, Japan); Tetsuya Asayama and Hiroshi Ueno (Sony Corporation, Japan); Masayuki Ohzeki (Sigma-i Co., Ltd, Tohoku University, Tokyo Tech, Japan)

pp. 91-95

Orthogonal Sparse Superposition Codes

Yunseo Nam (POSTECH, Korea (South)); SongNam Hong (Ajou University, Korea (South)); Namyoon Lee (POSTECH, Korea (South))

pp. 96-100

Codes for high-noise memoryless channels

Ilya Dumer and Navid Gharavi (University of California at Riverside, USA)

pp. 101-105

Quantum Information Theory

Effect of Non-Gaussian Noise Due to Beam Wandering on Error Performance of Quantum Measurement

Tiancheng Wang and Tsuyoshi Usuda (Aichi Prefectural University, Japan)

pp. 106-110

Performance Evaluation of Ghost Imaging with Orthogonal/Non-orthogonal Quantum States in Terms of Image Quality

Yuto Takahashi (Meijo University, Japan); Tiancheng Wang (Aichi Prefectural University, Japan); Shogo Usami (Meijo University, Japan); Tsuyoshi Usuda (Aichi Prefectural University, Japan)

pp. 111-115

Quantum Illumination using Quasi-Bell States

Jun Yamauchi (Aichi Prefectural University, Japan); Yuto Takahashi (Meijo University, Japan); Tiancheng Wang and Tsuyoshi Usuda (Aichi Prefectural University, Japan)

pp. 116-120

Simplification of the Calculation of the Channel Matrix for AMPM Coherent-state Signals

Ryusuke Miyazaki, Mana Yoshida, Tiancheng Wang and Tsuyoshi Usuda (Aichi Prefectural University, Japan)

pp. 121-125

Coding Theory

Design of ZDF code using uniform shift enumerator

Yuya Naruse, Shan Lu and Hiroshi Kamabe (Gifu University, Japan)

pp. 126-130

A family of perfectness of the Levenshtein codes $L_a(n; 2n)$

Kento Nakada (Okayama University, Japan)

pp. 131-135

Theoretical Estimates of Burst Error Probability for Convolutional Codes

Anastasiia Smeshko (Institute for Information Transmission Problems & National Research University Higher School of Economics, Russia); Fedor Ivanov (National Research University Higher School of Economics & Institute for Information Transmission Problems, Russia); Victor V. Zyablov (Institute for Information Transmission Problems (IITP) RAS, Russia)

pp. 136-140

Coded Computing for Boolean Functions

Chien-Sheng Yang and Salman Avestimehr (University of Southern California, USA)

pp. 141-145

On Optimal Finite-length Binary Codes of Four Codewords for Binary Symmetric Channels

Yanyan Dong and Shenghao Yang (The Chinese University of Hong Kong, Shenzhen, China)

pp. 146-150

Upper Bounds on the Error Probability for the Ensemble of Linear Block Codes with Mismatched Decoding

Toshihiro Niinomi (Tokyo City University, Japan); Hideki Yagi (University of Electro-Communications, Japan); Shigeichi Hirasawa (Waseda University, Japan)

pp. 151-155

Property of Quantum Decoding for Sourlas Codes of Which Tuples Are Randomly Decimated

Sangook Lee and Kazunori Iwata (Hiroshima City University, Japan); Kazushi Mimura (Hiroshima city university, Japan)

pp. 156-159

Upper and Lower Estimates of Frame Error Rate for Convolutional Codes

Anastasiia Smeshko (Institute for Information Transmission Problems & National Research University Higher School of Economics, Russia); Fedor Ivanov (National Research University Higher School of Economics & Institute for Information Transmission Problems, Russia); Victor V. Zyablov (Institute for Information Transmission Problems (IITP) RAS, Russia)

pp. 160-164

Generator Polynomial Matrices of Reversed and Reversible Quasi-Cyclic Codes

Ramy Taki Eldin (Toyota Technological Institute & Ain Shams University, Cairo, Egypt); Hajime Matsui (Toyota Technological Institute, Japan)

pp. 165-169

A Construction of Binary Punctured Linear Codes and A Supporting Method for Best Code Search

Takuya Ohara (Kobe University, Japan); Makoto Takita (University of Hyogo, Japan); Masakatu Morii (Kobe University, Japan)

pp. 170-174

Decoder Error Propagation Mitigation for Spatially Coupled LDPC Codes

Min Zhu (Xidian University, China); David G. M. Mitchell (New Mexico State University, USA); Michael Lentmaier (Lund University, Sweden); Daniel J. Costello, Jr. (University of Notre Dame, USA)

pp. 175-179

Algebraic Codes

Finding Self-Dual Quasi-Cyclic Codes with Large Minimum Weight via Polynomial Matrices

Masaki Kawaguchi and Hajime Matsui (Toyota Technological Institute, Japan)

pp. 180-184

Algebraic List Decoding of Elliptic Codes Through Module Basis Reduction

Yunqi Wan, Li Chen and Fangguo Zhang (Sun Yat-sen University, China)

pp. 185-189

An Iterative Bit-Flipping Decoding Algorithm For Binary Reed-Muller Codes

Yong-Ting Ni, Cheng-Yu Pai and Chao-Yu Chen (National Cheng Kung University, Taiwan)

pp. 190-194

Polar Codes

On the dependency between the code symmetries and the decoding efficiency

Kirill Ivanov and Ruediger L Urbanke (EPFL, Switzerland)

pp. 195-199

Complexity-efficient Fano Decoding of Polarization-adjusted Convolutional (PAC) Codes

Mohammad Rowshan (Monash University, Australia); Andreas Burg (EPFL, Switzerland); Emanuele Viterbo (Monash University, Australia)

pp. 200-204

LDPC Codes

Decoding LDPC Codes with Probabilistic Local Maximum Likelihood Bit Flipping

Rejoy Roy Mathews and Chris Winstead (Utah State University, USA)

pp. 205-209

A Design of Differentially Encoded LDPC Coding Based on Multi-Edge Framework

Yung-Tsao Hsu and Mao-Chao Lin (National Taiwan University, Taiwan)

pp. 210-214

The 5G New Radio Code: Elementary Absorbing Sets and Error Floor Performance

Masoome Otarinia and Thomas E Fuja (University of Notre Dame, USA)

pp. 215-219

Performance of Non-Binary LDPC Codes on Two-Dimensional Array Erasure Models

Gou Hosoya (Waseda University, Japan); Toshihiro Niinomi (Tokyo City University, Japan)

pp. 220-224

Encoding Algorithm of Binary and Non-binary Irregular LDPC Codes via Block Triangular Matrices with Low Weight Diagonal Submatrices

Yuta Iketo and Takayuki Nozaki (Yamaguchi University, Japan)

pp. 225-229

Analysis of UEP QC-LDPC Codes Using Density Evolution

Yi-Hsuan Chen and Yu-Ting Liu (National Tsing Hua University, Taiwan); Chung-Hsuan Wang (National Chiao Tung University, Taiwan); Chi-chao Chao (National Tsing Hua University, Taiwan)

pp. 230-234

NB-LDPC Codes with High Rates Achieving Low BER over the AWGN Channel with QAM Signaling

Gada Rezgui (ETIS Lab, ENSEA, 6 Avenue du Ponceau, Cergy-Pontoise, France); Asma Maaloui (INP-INSEEIHT, France); Iryna Andriyanova (CY Cergy Paris University & ENSEA, CNRS, France); Charly Poulliat (INP - ENSEEIHT Toulouse, France); Cyril Measson (Nokia & Qualcomm, EPFL, France)

pp. 235-239

Coding for Storage

Bonds of Constrained Systems and Their Characteristics

Akiko Manada (Shonan Institute of Technology, Japan); Takahiro Ota (Senshu University, Japan); Hiroyoshi Morita (The University of Electro-Communications, Japan)

pp. 240-244

Repair of Multiple Descriptions on Distributed Storage

Anders Høst-Madsen (University of Hawaii, USA); Heecheol Yang (Kumoh National Institute of Technology, Korea (South)); Minchul Kim and Jungwoo Lee (Seoul National University, Korea (South))
pp. 245-249

Cooperative Locality and Availability of the MacDonald Codes for Multiple Symbol Erasures

Zhi Jing and Hong-Yeop Song (Yonsei University, Korea (South))
pp. 250-253

Segmented Reverse Concatenation: A New Approach to Constrained ECC

Ryan Gabrys (SPAWAR Pacific, USA); Paul H. Siegel (University of California, San Diego, USA); Eitan Yaakobi (Technion, Israel)
pp. 254-258

A Note on a Relationship between Smooth Locally Decodable Codes and Private Information Retrieval

Koki Kazama and Akira Kamatsuka (Waseda University, Japan); Takahiro Yoshida (Nihon University, Japan); Toshiyasu Matsushima (Waseda University, Japan)
pp. 259-263

Rack-Aware Cooperative Regenerating Codes

Shreya Gupta and V. Lalitha (IIIT Hyderabad, India)
pp. 264-268

Achievable Rates of Concatenated Codes in DNA Storage under Substitution Errors

Andreas Lenz (Technische Universität München, Germany); Lorenz Welter (Technical University of Munich(TUM), Germany); Sven Puchinger (Technical University of Denmark, Denmark)
pp. 269-273

Insertions/Deletions Correcting Codes

Conversion Method from Erasure Codes to Multi-Deletion Error-Correcting Codes for Information in Array Design

Manabu Hagiwara (Chiba University, Japan)
pp. 274-278

Optimal Reconstruction Codes for Deletion Channels

Johan Chrisnata (Nanyang Technological University, Singapore & Technion University, Israel); Han Mao Kiah (Nanyang Technological University, Singapore); Eitan Yaakobi (Technion, Israel)
pp. 279-283

Decoding Algorithms of Monotone Codes and Azinv Codes and Their Unified View

Hokuto Takahashi (Graduate School of Science and Engineering, Chiba University, Japan); Manabu Hagiwara (Chiba University, Japan)
pp. 284-288

Polar Coding for Oversampling Drift Channel

Leo Otani and Haruhiko Kaneko (Tokyo Institute of Technology, Japan)
pp. 289-293

Encoding Algorithm for Run-Length Limited Single Insertion/Deletion Correcting Code

Reona Takemoto and Takayuki Nozaki (Yamaguchi University, Japan)
pp. 294-298

Codes Correcting Bounded Length Tandem Duplication

Kamilla Nazirkhanova (Moscow Institute of Physics and Technology & Skolkovo Institute of Science and Technology, Russia); Luiza Medova (Moscow Institute of Physics and Technology & Institute for Information Transmission Problems (IITP RAS), Russia); Stanislav Kruglik (Skolkovo Institute of Science and Technology, Russia); Alexey A. Frolov (Skolkovo Institute of Science and Technology & IITP RAS, Russia)
pp. 299-303

Criss-Cross Deletion Correcting Codes

Rawad Bitar (Technical University of Munich, Germany); Ilia Smagloy (Technion - Israel Institute of Technology, Israel); Lorenz Welter (Technical University of Munich(TUM), Germany); Antonia Wachter-Zeh (Technical University of Munich (TUM), Germany); Eitan Yaakobi (Technion, Israel)
pp. 304-308

Information Theory and Biology

A Coding Theory Perspective on Multiplexed Molecular Profiling of Biological Tissues

Luca DAlessio (Broad Institute, USA); Litian Liu (Massachusetts Institute of Technology, USA); Ken R. Duffy (Hamilton Institute, Maynooth University, Ireland); Yonina C. Eldar (Weizmann Institute of Science, Israel); Muriel Médard (MIT, USA); Mehrtash Babadi (Broad Institute, USA)
pp. 309-313

Index Coding

Independent User Partition Multicast Scheme for the Groupcast Index Coding Problem

Arman Sharififar and Neda Aboutorab (University of New South Wales, Australia); Yucheng Liu and Parastoo Sadeghi (The Australian National University, Australia)
pp. 314-318

Secure Index Coding with Security Constraints on Receivers

Yucheng Liu (Australian National University, Australia); Parastoo Sadeghi (The Australian National University, Australia); Neda Aboutorab and Arman Sharififar (University of New South Wales, Australia)
pp. 319-323

Network Coding and Information Theory

A Simple Capacity Outer Bound for Two-Way Channels and Capacity Approximation Results

Jian-Jia Weng, Fady Alajaji and Tamas Linder (Queen's University, Canada)
pp. 324-328

Quantum Error Correction

Single Quantum Deletion Error-Correcting Codes

Ayumu Nakayama and Manabu Hagiwara (Chiba University, Japan)
pp. 329-333

New Instances of Quantum Error-Correcting Codes for Single Deletion Errors

Taro Shibayama (Chiba University, Japan)
pp. 334-338

Cryptography

Structurally aggregate message authentication codes

Yuta Ishii and Mitsuru Tada (Chiba University, Japan)
pp. 339-343

The time-adaptive statistical testing for random number generators

Boris Ryabko (Institute of Computational Technologies of SB RAS & Novosibirsk State University, Russia); Viacheslav Zhuravlev (Novosibirsk State University, Russia)
pp. 344-347

On the Power of Interaction in Signcryption

Junichi Ida and Junji Shikata (Yokohama National University, Japan); Yohei Watanabe (The University of Electro-Communications, Japan)

pp. 348-352

A Construction of Robustly Reusable Fuzzy Extractors over Blockchains

Kodai Sato, Kenji Yasunaga and Toru Fujiwara (Osaka University, Japan)
pp. 353-357

The Existence of Cycles in the Supersingular Isogeny Graphs Used in SIKE

Hiroshi Onuki (The University of Tokyo, Japan); Yusuke Aikawa (Mitsubishi Electric Corporation, Japan); Tsuyoshi Takagi (The University of Tokyo, Japan)
pp. 358-362

Delegatable proof of knowledge systems

Naoya Shiratori (Chiba University & Graduate School of Science and Engineering, Japan); Mitsuru Tada (Chiba University, Japan)
pp. 363-367

Hamming Weight of Product of Random Sparse Polynomials

Akinori Kawachi (Mie University, Japan)
pp. 368-371

The relation between Proportion test and Uniformity test in NIST SP800-22

Atsushi Iwasaki (Kyoto University, Japan)
pp. 372-376

How to Detect Malicious Behaviors in a Card-Based Majority Voting Protocol with Three Inputs

Yoshiaki Abe, Mitsugu Iwamoto and Kazuo Ohta (The University of Electro-Communications, Japan)
pp. 377-381

A Key Recovery Algorithm Using Random Key Leakage from AES Key Schedule

Tomoki Uemura, Yohei Watanabe and Yang Li (The University of Electro-Communications, Japan); Noriyuki Miura (Osaka University, Japan); Mitsugu Iwamoto, Kazuo Sakiyama and Kazuo Ohta (The University of Electro-Communications, Japan)
pp. 382-386

Client-Aided Bit-Composition Protocol with Guaranteed Output Delivery

Hikaru Tsuchida (University of Tsukuba & NEC, Japan); Takashi Nishide (Tsukuba University, Japan)
pp. 387-391

Information-Theoretic Security

Information leakage through passive timing attacks on RSA decryption system

Tomonori Hirata (Nagoya University, Japan); Yuichi Kaji (Nagoya University & Nara Institute of Science and Technology, Japan)
pp. 392-396

On the Capacity of Gaussian Multiple-Access Wiretap Channels with Feedback

Bin Dai (Southwest Jiaotong University, China); Chong Li (Nakamoto & Turing Labs, USA); Yingbin Liang (The Ohio State University, USA); Zheng Ma (Southwest Jiaotong University, China); Shlomo (Shitz) Shamai (The Technion, Israel)
pp. 397-401

Scalable Security in Interference Channels With Arbitrary Number of Users

Parisa Babaeidarian (Qualcomm Technologies, USA); Somayeh Salimi (KTH Royal Institute of Technology, Sweden); Panagiotis Papadimitratos (KTH, Sweden)
pp. 402-406

A Capacity-achieving One-way Key Agreement with Improved Finite Blocklength Analysis

Setareh Sharifian, Alireza Poostindouz and Reihaneh Safavi-Naini (University of Calgary, Canada)
pp. 407-411

A Channel Model of Transceivers for Multiterminal Secret Key Agreement

Alireza Poostindouz and Reihaneh Safavi-Naini (University of Calgary, Canada)
pp. 412-416

Biometric Identification Systems with Both Chosen and Generated Secrecy

Vamoua Yachongka (The University of Electro-Communications, Japan); Hideki Yagi (University of Electro-Communications, Japan)
pp. 417-421

Secret Sharing

Optimal Basis Matrices of a Visual Cryptography Scheme with Meaningful Shares and Analysis of Its Security

Sekine Kyohei and Hiroki Koga (University of Tsukuba, Japan)
pp. 422-426

A Linear Algebraic Approach to Strongly Secure Ramp Secret Sharing for General Access Structures

Reo Eriguchi (The University of Tokyo, Japan); Noboru Kunihiro (University of Tsukuba, Japan); Koji Nuida (The University of Tokyo & National Institute of Advanced Industrial Science and Technology, Japan)
pp. 427-431

New Constructions of an Evolving 2-Threshold Scheme Based on Binary or D-ary Prefix Codes

Ryo Okamura and Hiroki Koga (University of Tsukuba, Japan)
pp. 432-436

Compact Verifiably Multiplicative Secret Sharing

Maki Yoshida (National Institute of Information and Communications Technology, Japan); Satoshi Obana (Hosei University, Japan)
pp. 437-441

Fourier-based Verifiable Function Secret Sharing

Takeshi Koshihara (Waseda University, Japan)
pp. 442-446

Sequences

A Parallel Blum-Micali Generator Based on the Gauss Periods

Yuta Kodera, Tomoya Tatara, Takuya Kusaka and Yasuyuki Nogami (Okayama University, Japan); Satoshi Uehara (The University of Kitakyushu, Japan)
pp. 447-450

A Study on Randomness of Sequences Obtained from Piecewise Logistic Map over Integers

Sota Eguchi and Takeru Miyazaki (The University of Kitakyushu, Japan); Shunsuke Araki (Kyushu Institute of Technology, Japan); Satoshi Uehara (The University of Kitakyushu, Japan); Yasuyuki Nogami (Okayama University, Japan)
pp. 451-455

Almost perfect sequence family with perfect crosscorrelation

Gangsan Kim and Hong-Yeop Song (Yonsei University, Korea (South))
pp. 456-459

A Study on Binary Sequences Located in Hadamard Matrices of Order 2^n

Kasumi Nakano, Kako Takahashi, Satoshi Uehara and Takeru Miyazaki (The University of Kitakyushu, Japan); Shunsuke Araki (Kyushu Institute of Technology, Japan); Yasuyuki Nogami (Okayama University, Japan)
pp. 460-464

Data Privacy and Security

Cache-22: A Highly Deployable Encrypted Cache System

Keita Emura and Shiho Moriai (National Institute of Information and Communications Technology, Japan); Takuma Nakajima and Masato Yoshimi (TIS Inc, Japan)
pp. 465-469

Score Fusion Method by Neural Network Using GPS and Wi-Fi Log Data

Katsuya Matsuoka (The University of Tokyo, Japan); Mhd Irvan (The University of Tokyo, Japan); Ryosuke Kobayashi (Mitsubishi Electric Information Systems Corporation, Japan); Rie Shigetomi Yamaguchi (The University of Tokyo, Japan)
pp. 470-474

Randomized Nested Polar Subcode Constructions for Privacy, Secrecy, and Storage

Onur Günlü (Technische Universität Berlin, Germany); Peter Trifonov (Saint-Petersburg Polytechnic University & ITMO University, Russia); Muah Kim and Rafael F. Schaefer (Technische Universität Berlin, Germany); Vladimir Sidorenko (Technical University of Munich, Germany)
pp. 475-479

Fountain Codes for Private Distributed Matrix-Matrix Multiplication

Rawad Bitar and Marvin Xhemrishi (Technical University of Munich, Germany); Antonia Wachter-Zeh (Technical University of Munich (TUM), Germany)
pp. 480-484

Data Anonymization for Service Strategy Development and Information Recommendation to Users Based on TF-IDF Method

Kazuhiro Kono (Kansai University, Japan); Noboru Babaguchi (Osaka University, Japan)
pp. 485-489

Network Security and Computer Security**Detection Bottleneck links without multiple nodes**

Hiroomi Isozaki (Japan Coast Guard Academy, Japan)
pp. 490-493

A Decentralized Secure Email System based on Conventional RSA Signature

Kazumasa Omote (University of Tsukuba, Japan)
pp. 494-498

Memory Efficient and Provably Secure Virus Detection

Hayami Motohashi and Kazuki Yoneyama (Ibaraki University, Japan)
pp. 499-503

Packer Identification Method for Multi-layer Executables with k -Nearest Neighbor of Entropies

Omachi Ryuto and Yasuyuki Murakami (Osaka Electro-Communication University, Japan)
pp. 504-508

Information Hiding**Addressing Information Using Data Hiding for DNA-based Storage Systems**

Takahiro Ota (Senshu University, Japan); Akiko Manada (Shonan Institute of Technology, Japan)
pp. 509-513

Visible Video Data Hiding Techniques Based on Visual Effects Utilizing Barcodes

Tetsuya Kojima (National Institute of Technology, Tokyo College, Japan); Kento Akimoto (NHK Technologies, Inc., Japan)
pp. 514-518

Wireless Communications**Multi-Carrier Differential Trellis-Coded Modulation/Demodulation Employing Multiple Differential Detection with Channel Prediction**

Tetsuro Kubo (Ritsumeikan University, Japan); Hiroshi Kubo (Ritumeikan University, Japan)
pp. 519-523

Improvement of accuracy of UWB Positioning System within the intersection using a Long Short-Term Memory Network

Yuki Noda, Shunya Asano and Makoto Itami (Tokyo University of Science, Japan); Akira Nakamura (Kanagawa University, Japan)
pp. 524-528

On an Alternative Approach to Congestion Detection in Ad Hoc Networks

Xiaojie Liu and Ulrich Speidel (University of Auckland, New Zealand)
pp. 529-533

Optimal Power Allocation of Cooperative Superposition-Coded Relaying with Finite-Blocklength Transmission over Quasi-Static Rayleigh Channels

Masaya Kambara (Doshisha University, Japan); Guanghui Song (Singapore University of Technology and Design, Singapore); Tomotaka Kimura and Jun Cheng (Doshisha University, Japan)
pp. 534-538

Latency-Energy Tradeoff with Realistic Hardware Models

Anders Høst-Madsen, Nicholas Whitcomb and Jeffrey Weldon (University of Hawaii, USA); Zixiang Xiong (Texas A&M University & Monash University, USA)
pp. 539-543

Study on a delay and Doppler estimation performance of 2-dimensional BPSK signal using discrete gaussian wave

Masayoshi Ohashi (Fukuoka University, Japan)
pp. 544-548

Signal Processing**Deep Convolutional Autoencoders for Deblurring and Denoising Low-Resolution Images**

Michael Fernando Mendez Jimenez, Omar DeGuchy and Roummel Marcia (University of California, Merced, USA)
pp. 549-553

Acoustic Communications**Experimental Evaluation Results of Acoustic Spread Spectrum Communications Employing Orthogonal Gold Sequences**

Haruka Toyota (Ritsumeikan University, Japan); Hiroshi Kubo (Ritumeikan University, Japan)
pp. 554-558

Differential OFDM Employing AFC for Fast Time-Varying Doppler Shifts in Underwater Acoustic Communications

Yui Nakai and Yuka Tanaka (Ritsumeikan University, Japan); Hiroshi Kubo (Ritumeikan University, Japan)
pp. 559-563

Doubly Differential OFDM Employing an Inter-carrier Interference Self-Canceller for Underwater Acoustic Communications

Yuka Tanaka and Yui Nakai (Ritsumeikan University, Japan); Hiroshi Kubo (Ritumeikan University, Japan)
pp. 564-568

Designing a Symbol Classifier for Inaudible Sound Communication Systems Using a Neural Network

Kosei Ozeki, Naofumi Aoki, Saki Anazawa and Yoshinori Dobashi (Hokkaido University, Japan); Kenichi Ikeda and Hiroshi Yasuda (Smart Solution Technology, Inc., Japan)
pp. 569-572

Statistical Inference and Learning**Asymmetry models and model selection in square contingency tables with ordinal categories**

Kouji Tahata, Tatsuya Ochiai and Ukyo Matsushima (Tokyo University of Science, Japan)
pp. 573-577

Statistical Testing of Randomness

Boris Ryabko (Institute of Computational Technologies of SB RAS & Novosibirsk State University, Russia)
pp. 578-581

Optimal Resolution of Change-Point Detection with Empirically Observed Statistics and Erasures

Haiyun He, Qiaosheng Zhang and Vincent Y. F. Tan (National University of Singapore, Singapore)
pp. 582-586

On MDL Estimation for Simple Contaminated Gaussian Location Families

K. Miyamoto and Junichi Takeuchi (Kyushu University, Japan)
pp. 587-591

Machine Learning and Information Theory

Differential Description Length for Hyperparameter Selection in Supervised Learning

Mojtaba Abolfazli, Anders Høst-Madsen and June Zhang (University of Hawaii, USA)
pp. 592-596

Formalization

Formalization of VT Codes and Their Single-Deletion Correcting Property in Lean

Yuki Kondo, Manabu Hagiwara and Midori Kudo (Chiba University, Japan)
pp. 597-601

Formal Verification of Merkle-Damgård Construction in ProVerif

Mieno Takehiko (2070, Kotobuki-Koaka-Matsumoto, Nagano & Epson Avasys Company, Japan); Yoshimura Togo (Graduate School of Science and Technology, Japan); Hiroyuki Okazaki (Shinshu University Graduate School, Japan); Yuichi Futa (Tokyo University of Technology, Japan); Kenichi Arai (Nagasaki University, Japan)
pp. 602-606

Formal Verification and Code-Generation of Mersenne-Twister Algorithm

Takafumi Saikawa and Kazunari Tanaka (Nagoya University, Japan); Kensaku Tanaka (RAKUDO, Japan)
pp. 607-611
