Table of Contents

Welcome Message	xxvi
Conference Committees	xxvii
Conference Technical Committee and Reviewers	xxx
Sponsors and Supporters	xxxiii

Technical Papers

Probabilistic OPF Model with DFIGs Participating in Primary Frequency Regulation	1
<i>Shenghu Li (Hefei University of Technology, China) and Yitian Jiang (Hefei University of Technology, China)</i>	
Computation and Analysis of Power System Connected to Distributed Generation Based on Harmonic Balance Method	7
<i>Xiaojun Zhao (North China Electric Power University, China), Yuezhi Cao (North China Electric Power University, China), and Junwei Lu (Griffith University, Australia)</i>	
Novel Transient Stability Assessment Using Post-Disturbance Voltage Fluctuations	12
<i>Koichiro Shimizu (Kansai Electric Power Co., Japan) and Atsushi Ishigame (Osaka Prefecture University, Japan)</i>	
Assessing Microgrid Feasibility in Australia and Brazil	18
<i>Marco Aurelio Lenzi Castro (Electricity Regulatory Agency, Brazil), Pedro C. Martinez (Monash University, Australia), Yerbolat Zhazylybek (Monash University, Australia), Nusrat J. Prova (Monash University, Australia), and Ivan H. Vargas (Monash University, Australia)</i>	
Ensuring Short-Term Voltage Stability in Extensive Grids with High Power Electronic Penetration by Applying Grid Forming Controls	24
<i>Michael Herrmann (Institute of Electric Power Systems, Leibniz University Hanover, Germany) and Lutz Hofmann (Institute of Electric Power Systems, Leibniz University Hanover, Germany)</i>	
A Demand Side Management Solution: Fully Automated Demand Response Using OpenADR2.0b Coordinating with BEMS Pilot Project	30
<i>Kotchakorn Maneebang (Metropolitan Electricity Authority of Thailand, Thailand), Kanokpol Metrapatara (Metropolitan Electricity Authority of Thailand, Thailand), and Jasada Kudtongngam (Energy Forecasting and Control Laboratory, National Electronics and Computer Technology Center, Thailand)</i>	

Optimal Planning of ESS and Transmission Lines to Accommodate High Wind Power Integration .36	
	<i>Fahad Saleh AL-Ismail (King Fahd University of Petroleum and Minerals (KFUPM), Saudi Arabia)</i>
An Optimal Dispatch Model for Stand-Alone Microgrids Convexifying Operational Constraints of Distributed Generation .43.....	
	<i>Long Fu (The University of New South Wales, Australia), Ke Meng (The University of New South Wales, Australia), and Zhao Yang Dong (University of New South Wales, Australia)</i>
Development and Experimental Validation of Scaled-Down Analogous Power Distribution System with Single-Phase Arc Fault Generator .49.....	
	<i>Chen Yang (Wuhan Electric Power Technical College, China), Jinrui Tang (Wuhan University of Technology, China), Fengge Zhang (Huazhong University of Science and Technology, China), Dexian Yang (Huazhong University of Science and Technology, China), Tong Wu (Huazhong University of Science and Technology, China), and Wanying Qi (Wuhan University of Technology, China)</i>
Determining Maintenance Priority for Transmission Lines Based on System Impact Index .55.....	
	<i>Yicheng Zhou (Environmental Research Institute, Waseda University, Japan), Jinhua She (Tokyo University of Technology, Japan), Chongqing Kang (Tsinghua University, China), and Yosuke Nakanishi (Waseda University, Japan)</i>
Energy Co-Pricing in an Integrated Energy System for Promoting Electric Energy Substitution .60.....	
	<i>Yizheng Wang (Zhejiang University, China), Shuyin Duan (Zhejiang University, China), Fushuan Wen (Tallinn University of Technology, Estonia), Ivo Palu (Tallinn University of Technology, Estonia), and Yusheng Xue (Electric Power Research Institute State Grid Co., Ltd., China)</i>
Study on Operation in Power System Utilizing Customer's Resource for Providing Demand and Supply Regulation .66.....	
	<i>Yuta Nakamura (Nagoya Institute of Technology, Japan), Mutsumi Aoki (Nagoya Institute of Technology, Japan), and Suresh Chand Verma (Nagoya Institute of Technology, Japan)</i>
Optimal Coordinated Bidding of a Profit-Maximizing Heat Pump Aggregator: The Dutch Case .71..	
	<i>Yelena Vardanyan (Technical University of Denmark, Denmark), Armin Wolf (Fraunhofer Institute for Open Communication Systems, Germany), Peder Bacher (Technical University of Denmark, Denmark), Katerina Valalaki (HYPERTECH S.A., Greece), Kenneth Leerbeck (Technical University of Denmark, Denmark), Roland Tual (REScoop.eu, Belgium), and Silke Cuno (Fraunhofer Institute, Germany)</i>
Vulnerabilities, Threats, and Impacts of False Data Injection Attacks in Smart Grids: An Overview .77.....	
	<i>Ahmed S. Musleh (University of New South Wales, Australia), Guo Chen (University of New South Wales, Australia), Zhao Yang Dong (University of New South Wales, Australia), Chen Wang (CSIRO DATA61, Australia), and Shiping Chen (CSIRO DATA61, Australia)</i>

Statistical Techniques-Based Characterization of FDIA in Smart Grids Considering Grid Contingencies .83.....	83
<i>Ahmed S. Musleh (University of New South Wales, Australia), Guo Chen (University of New South Wales, Australia), Zhao Yang Dong (University of New South Wales, Australia), Chen Wang (CSIRO DATA61, Australia), and Shiping Chen (CSIRO DATA61, Australia)</i>	
Comparative Study of Voltage Security Indices in Terms of Limit-Induced Bifurcation Effect 89.....	89
<i>Shota Omi (Kyoto University, Japan) and Yasuyuki Shirai (Kyoto University, Japan)</i>	
Event-Triggered Cooperative Control of Distributed Generators in a Distribution Network Subject to Jamming Attacks .95.....	95
<i>Yan Xu (Zhejiang University, China), Fushuan Wen (Tallinn University of Technology, Estonia), and Ivo Palu (Tallinn University of Technology, Estonia)</i>	
Impact of Reverse Power Flow in Distribution Feeders on Under-Frequency Load Shedding Schemes .100.....	100
<i>Russell Frost (Australian Energy Market Operator, Australia), Julius Susanto (Australian Energy Market Operator, Australia), Lucas Zieland (Australian Energy Market Operator, Australia), and Dean Sharafi (Australian Energy Market Operator, Australia)</i>	
On the Stability of Converter-Dominated Power Systems: Impedance-Based Analysis .105.....	105
<i>Marc Dokus (Institute for Drive Systems and Power Electronics (IAL), Leibniz University Hannover, Germany), Axel Mertens (Leibniz University Hannover, Germany), and Marcel Sarstedt (Institute for Electric Power Systems (IFES), Leibniz University Hannover, Germany)</i>	
Evaluation of Switching Threshold in Hybrid Dispatch Method Based on Ramp-Rate and Merit-Order for Load Frequency Control .111.....	111
<i>Yuki Tsujii (Research & Development Group Hitachi, Ltd., Japan) and Shota Omi (Research & Development Group Hitachi, Ltd., Japan)</i>	
Day-Ahead Planning for EV Aggregators Based on Statistical Analysis of Road Traffic Data in Japan .117.....	117
<i>Tomo Takahashi (Meiji University, Japan) and Shigeru Tamura (Meiji University, Japan)</i>	
Method for the Voltage Estimation in Large-Scale Distributed Generators Under Power Fluctuations .123.....	123
<i>Oue Haruki (Central Research Institute of Electric Power Industry (CRIEPI), Japan), Takahashi Naoyuki (Central Research Institute of Electric Power Industry (CRIEPI), Japan), and Uemura Satoshi (Central Research Institute of Electric Power Industry (CRIEPI), Japan)</i>	
Integrated Busbar, Transformer and Feeder Backup Protection Based on Wide Area Voltage Measurements .128.....	128
<i>Patrick Tendayi Manditereza (Central University of Technology, South Africa)</i>	
Power System Inertia in High-Renewable Penetration Power Systems and the Emerging Role of Battery Energy Storage .133.....	133
<i>Nesimi Ertugrul (University of Adelaide, Australia) and Wai Kin Wong (AGL Energy Ltd, Australia)</i>	

Probabilistic Forecasting of Operational Demand in Australia .139.....	
	<i>Nariman Mahdavi (CSIRO Energy, Australia)</i>
Simple Method to Identify Harmonic Effects from Another Distribution Feeder .145.....	
	<i>Kenki Nakayama (Central Research Institute of Electric Power Industry, Japan), Kentaro Fukushima (Central Research Institute of Electric Power Industry, Japan), and Naotaka Okada (Central Research Institute of Electric Power Industry, Japan)</i>
Status of Mine Electrification and Future Potentials .151.....	
	<i>Nesimi Ertugrul (University of Adelaide, Australia), Ali Pourmousavi (University of Adelaide, Australia), Miles Davies (University of Adelaide, Australia), Daniel Sbarbaro (University of Concepcion, Chile), and Luis Morán (University of Concepcion, Chile)</i>
Charging Schedule Optimization Method for Electric Buses with PV Installed at Bus Stations: Sensitivity Analysis of PV Capacity Based on Real City Data .157.....	
	<i>Yuki Tomizawa (Waseda University, Japan), Yuto Ihara (Advanced Collaborative Research Organization for Smart Society, Waseda University, Japan), Teru Miyazaki (Advanced Collaborative Research Organization for Smart Society, Waseda University, Japan), Yutaka Iino (Advanced Collaborative Research Organization for Smart Society, Waseda University, Japan), Yasuhiro Hayashi (Waseda University, Japan), and Ryota Yamamoto (TEPCO Power Grid, Inc., Japan)</i>
Basic Study on Cooperative Management Scheme of Electric Vehicle Charging for Reduction of Impact on Low-Voltage Distribution System .163.....	
	<i>Taisei Ogura (Waseda University, Japan), Shinya Yoshizawa (Waseda University, Japan), Yu Fujimoto (Waseda University, Japan), Masataka Mitsuoka (Waseda University, Japan), Yasuhiro Hayashi (Waseda University, Japan), Kensuke Murai (Nissan Motor Co., Ltd., Japan), Kenta Suzuki (Nissan Motor Co., Ltd., Japan), and Keigo Ikezoe (Nissan Motor Co., Ltd., Japan)</i>
Backup Generator Output Control Method of Off-Grid System Based on Renewable Energy in Remote Island .169.....	
	<i>Kazuki Nagasawa (Waseda University, Japan), Teru Miyazaki (Waseda University, Japan), Yutaka Iino (Waseda University, Japan), Yasuhiro Hayashi (Waseda University, Japan), Tomoaki Shoji (TEPCO Power Grid, Inc., Japan), and Jun Yoshinaga (TEPCO Power Grid, Inc., Japan)</i>
Simulation of Hierarchical Multi-Level Grid Control Strategies .175.....	
	<i>Marcel Sarstedt (Institute for Electric Power Systems), Leonard Kluß (Institute for Electric Power Systems), Marc Dokus (Institute for Drive Systems and Power Electronics, Leibniz University Hannover, Germany), Lutz Hofmann (Institute for Electric Power Systems), and Johannes Gerster (Carl von Ossietzky University Oldenburg, Germany)</i>
Cost-Effective Energy Management System in Prosumer Based Electricity Market .181.....	
	<i>Syed Adrees Ahmed (University of Electronic Science and Technology of China, China), Qi Huang (University of Electronic Science and Technology of China, China), Waqas Amin (University of Electronic Science and Technology of China, China), and Muhammad Afzal (University of Electronic Science and Technology of China, China)</i>

Optimization of Integrated Energy System Considering the Integration of the Heat Storage Device .186.....	
	<i>Wang Jing (Shanghai University of Electric Power, China), Haijun Xing (Shanghai University of Electric Power, China), and Huaxin Wang (Shanghai University of Electric Power Shanghai, China)</i>
Increasing the Wind Power Utilization of Hybrid AC/DC Systems Based on Optimal Active Power Control of HVDC .192.....	
	<i>Zhenyu Zhang (Northwest Branch of State Grid Corporation of China, China), Weizhou Wang (State Grid Gansu Electric Power Corporation, China), Jia Lyu (Xian Jiaotong University, China), Xianbo Ke (Northwest Branch of State Grid Corporation of China, China), Chong Shao (State Grid Gansu Electric Power Corporation, China), Jun Liu (Xian Jiaotong University, China), and Chao Huo (Northwest Branch of State Grid Corporation, China)</i>
Application of Long-Short Term Memory Network and its Variants in Short-Term Power Load Time Series Forecasting .197.....	
	<i>Zhang Yuanhang (China Three Gorges University, China), Li Dan (China Three Gorges University, China), and Yang Baohua (China Three Gorges University, China)</i>
Impact of Operating Strategies of Distributed Energy Resources on Economic Design for Stand-Alone Microgrid in Rural Area .203.....	
	<i>Rehman Zafar (Kookmin University, South Korea), Munir Husein (Kookmin University, South Korea), and Il-yop Chung (Kookmin University, South Korea)</i>
Practical Considerations of DER Coordination with Distributed Optimal Power Flow .209.....	
	<i>Daniel Gebbran (University of Sydney, Australia), Sleiman Mhanna (University of Melbourne, Australia), Archie C. Chapman (University of Queensland, Australia), Wibowo Hardjawana (University of Sydney, Australia), Branka Vucetic (University of Sydney, Australia), and Gregor Verbic (University of Sydney, Australia)</i>
Optimal Planning of Smart Home Technologies .215.....	
	<i>Jose Iria (Australian National University, Australia) and Filipe Soares (INESC TEC, Portugal)</i>
An Electricity Spot Market Mechanism for Hybrid Bidding of Fossil-Fueled and Renewable Generators .221.....	
	<i>Jiajia Yang (University of New South Wales, Australia), Fushuan Wen (Zhejiang University, China), and Qixin Chen (Tsinghua University, China)</i>
Charging Prioritization of Electric Vehicles Under Peak Demand in Commercial Facility: Destination Charging as a Service .226.....	
	<i>Shota Miyahara (Waseda University, Japan), Shinya Yoshizawa (Advanced Collaborative Research Organization for Smart Society, Waseda University, Japan), Yu Fujimoto (Advanced Collaborative Research Organization for Smart Society, Waseda University, Japan), Yasuhiro Hayashi (Waseda University, Japan), Shinkichi Inagaki (Nagoya University, Japan), Akihiko Kawashima (Nagoya University, Japan), and Tatsuya Suzuki (Nagoya University, Japan)</i>

Prediction of Forecast Busts by Variation of Weather Elements of WRF Using Different Physical Schemes .232.....	
	<i>Shota Funami (Nagoya University, Japan), Masaki Imanaka (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), Muneaki Kurimoto (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), Shigeyuki Sugimoto (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), Takeyoshi Kato (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), and Fumichika Uno (Nihon University, Japan)</i>
Signal Dispatching Method for Load Frequency Control Based on Area Requirement Change and Merit-Order .238.....	
	<i>Masaru Saida (Nagoya University, Japan), Masaki Imanaka (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), Muneaki Kurimoto (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), Shigeyuki Sugimoto (Institute of Materials and Systems for Sustainability, Nagoya University, Japan), and Takeyoshi Kato (Institute of Materials and Systems for Sustainability, Nagoya University, Japan)</i>
Path Recovery Model for Power Systems with Renewable Energy Based on an Improved Node Weighting Method .244.....	
	<i>Yitong Li (Shaanxi Key Laboratory of Smart Grid Xian Jiaotong University, China), Ruizhe Zhang (Shaanxi Key Laboratory of Smart Grid Xian Jiaotong University, China), Chao Huo (Northwest Branch of State Grid Corporation, China), Jia Lyu (Shaanxi Key Laboratory of Smart Grid Xian Jiaotong University, China), Jun Liu (Xian Shaanxi Key Laboratory of Smart Grid Jiaotong University, China), and Ping Wei (State Grid Gansu Electric Power Corporation, China)</i>
Application of Flexibility in the Expansion of an Electrical Grid in the Philippines .249.....	
	<i>Aldrich Zeno (Electrical and Electronics Engineering Institute, University of the Philippines Diliman, Philippines), Tristan G. Magallones (Electrical and Electronics Engineering Institute, University of the Philippines Diliman, Philippines), and Jordan Rel Orillaza (Electrical and Electronics Engineering Institute, University of the Philippines Diliman, Philippines)</i>
Online Transient Stability Assessment Employing Decision Tree and Maximal Lyapunov Exponent .255.....	
	<i>Takahisa Oyama (The University of Tokyo, Japan), Akihiko Yokoyama (The University of Tokyo, Japan), Shingo Sakaeda (Electric Power Research and Development Center Chubu Electric Power Co., Inc., Japan), and Suresh Chand Verma (Electric Power Research and Development Center Chubu Electric Power Co., Inc., Japan)</i>
Detailed Reasoning and Derivation of a Convexified Quadratic Approximation Approach for the Security Constrained Optimal Power Flow .261.....	
	<i>Thomas Leveringhaus (Leibniz Universität Hannover, Germany) and Lutz Hofmann (Leibniz Universität Hannover, Germany)</i>

Advantages and Barriers of Applying Solar Nowcasting in Controlling Microgrids: Findings From A Survey in 2020	267
<i>Remember Samu (Murdoch University, Australia), Martina Calaris (Murdoch University, Australia), Gm Shafiullah (Murdoch University, Australia), Moayed Moghbel (Murdoch University, Australia), Md Asaduzzaman Shoeb (Murdoch University, Australia), and Craig Carter (Murdoch University, Australia)</i>	
Experimental Verification of Reconfiguration Method for Series-Parallel Connection of PV Modules Under Partial Shading	273
<i>Kento Iida (Okayama University, Japan), Akiko Takahashi (Okayama University, Japan), and Shigeyuki Funabiki (Okayama University, Japan)</i>	
The Effects of a Bifacial Photovoltaic Module on the Power System for Unit Commitment	279
<i>Ryuto Shigenobu (University of Fukui, Japan), Masakazu Ito (University of Fukui, Japan), and Hisao Taoka (Yamato University, Japan)</i>	
A Demand Side Response Strategy for Large Industrial Customers Considering the Uncertainty of Renewable Energy Generation	285
<i>Chenwei Jiang (Zhejiang University, China), Hongji Lin (Zhejiang University, China), Fushuan Wen (Tallinn University of Technology, Estonia), Farhad Shahnia (Murdoch University, Australia), Xiaojun Zhu (Fuyang Power Supply Company State Grid Zhejiang Electric Power Co. Ltd, China), Peng Wei (Jiaxing Power Supply Company State Grid Zhejiang Electric Power Co. Ltd, China), Yikai Sun (Economy Research Institute State Grid Zhejiang Electric Power Co. Ltd, China), and Xiao Shi (Zhoushan Power Supply Company State Grid Zhejiang Electric Power Co. Ltd, China)</i>	
Double Moving Average Methodology for Smoothing of Solar Power Fluctuations with Battery Energy Storage	291
<i>Miswar Akhtar Syed (KFUPM, Saudi Arabia), Ammar Atif Abdalla (KFUPM, Saudi Arabia), Abdullah Al-Hamdi (KFUPM, Saudi Arabia), and Muhammad Khalid (KFUPM, Saudi Arabia)</i>	
Optimal Installation of Battery Energy Storage with Wind Energy System in Distribution System	297
<i>Akshay Krishnan P (SASTRA Deemed University, India), Ashwin Agith (SASTRA Deemed University, India), Nihith Koundinya (SASTRA Deemed University, India), Narayanan K (SASTRA Deemed University, India), Gulshan Sharma (Durban University of Technology, South Africa), and Tomonobu Senjyu (University of Ryukyus, Japan)</i>	
Voltage Stability Analysis of Distribution Systems in the Presence of Electric Vehicle Charging Stations with Uncoordinated Charging Scheme	303
<i>Nihith Koundinya (SASTRA Deemed University, India), Vignesh S (SASTRA Deemed University, India), Narayanan K (SASTRA Deemed University, India), Gulshan Sharma (Durban University of Technology, South Africa), and Tomonobu Senjyu (University of Ryukyus, Japan)</i>	
A Novel Islanding Detection Method with Reduced Non Detection Zones for Different Distributed Generation Units	309
<i>Sowmya Ramachandradurai (SASTRA Deemed University, India) and Narayanan K (SASTRA Deemed University, India)</i>	

Data-Driven Robust Voltage/VAR Control Using PV Inverters in Active Distribution Networks .314	
	<i>Hangyue Liu (The University of New South Wales, Australia), Cuo Zhang (The University of New South Wales, Australia), and Qinglai Guo (Tsinghua University, China)</i>
Economic Frequency Regulation Based on Nanogrid Partition and Cost-Driven Droop Function: Enable A Scattered Microgrid .320.....	
	<i>Qian Hu (The Hong Kong Polytechnic University, China) and Siqu Bu (The Hong Kong Polytechnic University, Chian)</i>
Impact of Ultracapacitor Modelling on Fast Frequency Control Performance .326.....	
	<i>Matej Krpan (University of Zagreb, Croatia) and Igor Kuzle (University of Zagreb, Croatia)</i>
Adaptive Robust Operation for Battery Energy Storage Systems with SoC Management in a Three-Phase Unbalanced Microgrid .332.....	
	<i>Bo Wang (The University of New South Wales, Australia) and Cuo Zhang (The University of New South Wales, Australia)</i>
Illegitimate Trade Detection for Electricity Energy Markets .338.....	
	<i>Hongbo Sun (Data Analytics Group, Mitsubishi Electric Research Laboratories, US), Shoichi Kitamura (Mitsubishi Electric Corporation, Japan), Daniel Nikovski (Data Analytics Group, Mitsubishi Electric Research Laboratories, US), Kazuyuki Mori (Mitsubishi Electric Research Labs, Japan), and Hiroyuki Hashimoto (Data Analytics Group, Mitsubishi Electric Research Laboratories, USA)</i>
A General Decoupled Framework for State Estimation Based on Synchrophasor Measurements .344	
	<i>Ramtin Khalili (Northeastern University) and Ali Abur (Northeastern University)</i>
A Comprehensive Modeling of Double Tuned Filter for Efficient Mitigation of Harmonic Distortion .350.....	
	<i>Mushfiqul Ahmed (Bangladesh University of Engineering and Technology, Bangladesh), Nahid Al Masood (Bangladesh University of Engineering and Technology, Bangladesh), S. M. Ishraqul Huq (Ahsanullah University of Science and Technology, Bangladesh), Ferdous I Khan (Ahsanullah University of Science and Technology, Bangladesh), Hridi Juberi (Ahsanullah University of Science and Technology, Bangladesh), and Shamiul Bashir (Ahsanullah University of Science and Technology, Bangladesh)</i>
Islanding Detection Methods for PV Converters in DC Distribution System Based on Injected Perturbation with Feedback .356.....	
	<i>Hao Hu (Shanghai Jiao Tong University, China), Miao Zhu (Shanghai Jiao Tong University, China), Xiuyi Li (Shanghai Jiao Tong University, China), and Xu Cai (Shanghai Jiao Tong University, China)</i>
Coordinated Photovoltaic and Battery Control using OPF in Distribution System for Supply-Demand Balance Maintenance of Bulk Power System .362.....	
	<i>Fumiya Hyodo (Meijo University, Japan), Taisuke Masuta (Meijo University, Japan), Thavatchai Tayjasant (Chulalongkorn University, Thailand), and Kritthapat Peanviboon (Chulalongkorn University, Thailand)</i>

A Novel Speech Recognition Algorithm for Substation Safety Notification Based on IPASS-LSTM .368.....	
	<i>Cong Li (China Southern Power Grid Company Limited, China), Gang Xu (Guangdong Power Grid Company Limited, China), Wenhong Li (Guangdong Power Grid Company Limited, China), Weibin Lin (South China University of Technology, China), Tianyao Ji (South China University of Technology, China), Luliang Zhang (South China University of Technology, China), and Wenhong Tang (South China University of Technology, China)</i>
Multi-Objective Optimal Configuration Model of Energy Storage System Considering Flexibility and Economy in Distribution Network .374.....	
	<i>Xiangying Tang (Shanghai Jiao Tong University, China), Yan Hu (Shanghai Jiao Tong University, China), and Zhanpeng Chen (Shanghai Jiao Tong University, China)</i>
Comparison of Two Coordinated Control Strategies Designed for Unbalanced Microgrids in Low Voltage Distribution System .379.....	
	<i>Jianguo Zhou (Tsinghua-Berkeley Shenzhen Institute (TBSI), Tsinghua University, P. R. China), Lun Yang (Tsinghua-Berkeley Shenzhen Institute, Tsinghua University, P. R. China), Yinliang Xu (Tsinghua-Berkeley Shenzhen Institute, P. R. China), and Hongbin Sun (Tsinghua University, P. R. China)</i>
Optimal Active and Reactive Power Coordinated Dispatch in Unbalanced Distribution Networks.385	
	<i>Ke Feng (Southeast University, China), Zaijun Wu (Southeast University, China), Peishuai Li (Nanjing University of Science & Technology, China), and Minqiang Hu (Southeast University, China)</i>
Toward Forecast Techniques in Optimal Sizing of Energy Storage System with Volatile Energy Sources for Hybrid Renewable Energy System .390.....	
	<i>Akanit Kwangkaew (Japan Advanced Institute of Science and Technology, Japan), Teeradaj Racharak (Japan Advanced Institute of Science and Technology, Japan), and Chalio Charoenlarnopparut (Sirindhorn International Institute of Technology, Thailand)</i>
A New Approach to Renewable Energy Sources Allocation Considering Robustness Against Fluctuations .396.....	
	<i>Akanit Kwangkaew (Japan Advanced Institute of Science and Technology, Japan), Saheer Javaid (Japan Advanced Institute of Science and Technology, Japan), Mineo Kaneko (Japan Advanced Institute of Science and Technology, Japan), and Chalio Charoenlarnopparut (Sirindhorn International Institute of Technology, Thailand)</i>
A Novel Load Flow Algorithm for Islanded Microgrid Considering the Regionalization Approach .402.....	
	<i>Sara Ashfaq (University of New South Wales, Australia) and Daming Zhang (University of New South Wales, Australia)</i>
Feedback Linearization Technique for DC Series Motor with LMI Based Observer and DREM .407..	
	<i>J. Hozefa (CDRC, EED VJTI, India), M. Ankit (CDRC, EED VJTI, India), S. Shadab (CDRC, EED VJTI, India), and Sudhir K. Bhil (CDRC, EED VJTI, India)</i>

Measurement Verification for Power Systems with Battery Energy Storage Integration .413.....	
	<i>Anna Glazunova (Institute of Siberian Branch of the Russian Academy of Sciences, Russia), Evgenii Semshchikov (University of Tasmania, Australia), and Michael Negnevitsky (University of Tasmania, Australia)</i>
Ranking Cyber Attack Vulnerability of Nodes in Power Transmission Network .419.....	
	<i>Shailla Arif (Ahsanullah University of Science and Technology, Bangladesh), Ata E Rabbi (Ahsanullah University of Science and Technology, Bangladesh), and Tareq Aziz (Ahsanullah University of Science and Technology, Bangladesh)</i>
A Business Model Using Salt Water Battery and PV Panels for Continuity of Supply .425.....	
	<i>Can Yukselen (Istanbul Technical University, Turkey), Murat Can Ozbasaran (Istanbul Technical University, Turkey), Utku Deniz Tuncer (Istanbul Technical University Energy Institute, Turkey), Batuhan Sahin (Istanbul Technical University, Turkey), and Sinan Küfeoğlu (University of Cambridge, USA)</i>
A Concept of Multi-Circuit HVDC Transmission System for Selective Fault Clearing without DC Circuit Breakers .431.....	
	<i>Kenichiro Sano (Tokyo Institute of Technology, Japan)</i>
A Study of Hybrid Energy Storage System to Suppress Power Fluctuations of Pulse Load in Shipboard Power System .437.....	
	<i>Zhiting Dong (Shanghai Jiao Tong University, China), Xinpeng Cong (Shanghai Jiao Tong University, China), Zhengguang Xiao (Shanghai Jiao Tong University, China), Xiaodong Zheng (Shanghai Jiao Tong University, China), and Nengling Tai (Shanghai Jiao Tong University, China)</i>
Power Flow Partitioning with Power Flow Decomposition, Full Line Decomposition and Power Flow Coloring .442.....	
	<i>Eric Glende (Otto-von-Guericke-University Magdeburg, Germany), Christian Klabunde (Otto-von-Guericke-University Magdeburg, Germany), Marc Gebhardt (Otto-von-Guericke-University Magdeburg, Germany), and Martin Wolter (Otto-von-Guericke-University Magdeburg, Germany)</i>
Large Signal Model of Variable Frequency Drive and Motor System for Transient Stability Analysis .447.....	
	<i>Haoqin Zhan (South China University of Technology, China), Zhaobin Du (South China University of Technology, China), and Xiaojie Liu (South China University of Technology, China)</i>
Optimal Droop Offset Adjustments for Accurate Energy Trading in Rural DC Mini-Grid Clusters .453.....	
	<i>Joan-Marc Rodriguez-Bernuz (Imperial College London, UK), Adrià Junyent-Ferré (Imperial College London, UK), and Xin Xiang (Imperial College London, UK)</i>
Power Sharing in an Islanded LV Distribution Network Fully Installed with PV-Battery Systems Based on Grid-Forming Control .459.....	
	<i>Bowen Wang (University of Sydney, Australia), Gregor Verbič (University of Sydney, Australia), and Weidong Xiao (University of Sydney, Australia)</i>

Investigation on Reliability and Cost in the Presence of Electric Vehicle Charging Station	465
<i>Vignesh S (SASTRA Deemed University, India), Nihith Koundinya (SASTRA Deemed University, India), Narayanan K (SASTRA Deemed University, India), Gulshan Sharma (Durban University of Technology, South Africa), and Tomonobu Senjyu (University of Ryukyus, Japan)</i>	
Annual Simulations of Output Curtailment to Ensure Fairness Among Wind Farms	470
<i>Daichi Sugawara (Tohoku University, Japan), Hiroumi Saitoh (Tohoku University, Japan), and Wataru Wayama (Tohoku Electric Power Network Co., Japan)</i>	
Segmentation and Defect Classification of the Power Line Insulators: A Deep Learning-Based Approach	476
<i>Arman Alahyari (Skolkovo Institute of Science and Technology (Skoltech), Russia), Anton Hinneck (Skolkovo Institute of Science and Technology (Skoltech), Russia), Rahim Tariverdizadeh (Skolkovo Institute of Science and Technology (Skoltech), Russia), and David Pozo (Skolkovo Institute of Science and Technology (Skoltech), Russia)</i>	
Using Q-Learning for OLTC Voltage Regulation in PV-Rich Distribution Networks	482
<i>Guilherme Custodio (University of Campinas, Brazil), Luis F. Ochoa (The University of Melbourne, Australia; The University of Manchester, UK), Fernanda C. L. Trindade (University of Campinas, Brazil), and Tansu Alpcan (The University of Melbourne, Australia)</i>	
Frequency Control Impact of Electric Vehicles on Grid-Connected Areas	488
<i>Sareh Agheb (University of New South Wales, Australia), Ke Meng (University of New South Wales, Australia), Gerard Ledwich (Queensland University of Technology, Australia), and Glenn Platt (CSIRO Energy Sector, CSIRO, Australia)</i>	
Tube-Based Model Predictive Control Approach for Real-Time Operation of Energy Storage System	493
<i>Cheng Lyu (The Hong Kong Polytechnic University, Hong Kong SAR), Youwei Jia (Southern University of Science and Technology Shenzhen, China), and Zhao Xu (Hong Kong Polytechnic University, Hong Kong SAR)</i>	
Input Data Extrapolation of Generator Unit Commitment and Optimal Load Dispatch for AGC 30 Model	498
<i>Koji Nishio (Meijo University, Japan), Kako Yoshida (Meijo University, Japan), Taisuke Masuta (Meijo University, Japan), Akila Asansana Herath (University of Peradeniya, Srilanka), Kithsiri M. Liyanage (University of Peradeniya, Srilanka), and Hasal Kulasekara (SLIIT, Sri Lanka)</i>	
The Impact of Residential Energy Management Systems on Electricity Retail Portfolios	504
<i>Peter Jean-Paul (Auckland University of Technology, New Zealand), Tek-Tjing Lie (Auckland University of Technology, New Zealand), Timothy N. Anderson (Auckland University of Technology, New Zealand), and Brice Valles (Private Consultant, New Zealand)</i>	
Exploring the Use of an ADMM-Based Three-Phase AC OPF in PV-Rich MV-LV Networks	510
<i>Arthur G. Gisoisiez (University of Melbourne, Australia), Michael Liu (University of Melbourne, Australia), and Luis Ochoa (University of Melbourne, Australia)</i>	

Community Energy Storage-Based Energy Trading Management for Cost Benefits and Network Support .516.....
<i>Chathurika Mediwaththe (Australian National University, Australia) and Lachlan Blackhall (Australian National University, Australia)</i>	
PMU Based Short Circuit Capacity Estimation and Experimental Verification on an Analog Simulator .522.....
<i>Takeshi Ogane (Tokyo City University, Japan), Tatsuhito Nakajima (Tokyo city university, Japan), Yutaka Ota (Osaka university, Japan), Yoshiki Nakachi (Chubu Electric Power Co., Japan), Ryo Yamaguchi (Chubu Electric Power Co., Japan), and Suresh Chand Verma (Chubu Electric Power Co., Japan)</i>	
Deep Neural Network Driven Electric Spring for Voltage Regulation .527.....
<i>Muhammad Sharjeel Javaid (University of Hafr Al Batin, Saudi Arabia), Usama Bin Irshad (Macquarie University, Australia), Mohamed Abido (King Fahd University of Petroleum and Minerals, Saudi Arabia), Muhammad Hanzla Javaid (GIK Institute of Engineering Sciences and Technology, Pakistan), and Housseem Boucekara (University of Hafr Al Batin, Saudi Arabia)</i>	
Recognition and Extraction of Information from Image-Based Tables for Electric Power System Operation and Maintenance .533.....
