

2020 IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE 2020)

**Virtual Conference
8-11 December 2020**

Pages 1-496

**IEEE Catalog Number: CFP20TAL-POD
ISBN: 978-1-7281-6943-9**

Table of Contents

Title	Page range
Requirements of Challenge based Learning for Experiential Learning Spaces, an Industrial Engineering application case	1–8
Nearest Centroid: A Bridge between Statistics and Machine Learning	9–16
Overcoming the Sudden Conversion to Online Education During the COVID-19 Pandemic: A Case Study in Computing Education	17–22
The Learning Effectiveness for "Worked-example and Problem-solving" Pairing Combination in Electronics Remedial Teaching and the Impact on It by	23–30
MOLEAS: a Multi-stage Online Learning Effectiveness Assessment Scheme in MOOC	31–38
Challenges and Opportunities for Young Female Learners in STEM from the Perspective of Bangladesh	39–46
Peer-to-Peer (P2P) Learning Platform for Peer Instruction in Flipped Classroom	47–54
GO-GA: Class use of on- and offline digital Inquiry Learning Spaces in Africa	55–62
Jigsaw Cooperative Learning Trials In Optical Graduate Course	63–70
The Development and Evaluation of an Augmented Reality Learning System for Japanese Compound Verbs Using Learning Analytics	71–76
Creativity, Entrepreneurship, Innovation, Leadership and Professional Motivations: Comparing Design Students in Different Levels of Undergraduate Education	77–82
E-Learning in Entrepreneurship Education: A Systematic Literature Review	83–90
Contract Cheating in Computer Science: A Case Study	91–98
Enhancing Student Learning Through Mobile Learning Groups	99–105
Pre-service Teacher Conceptions of Integrated STEM using Engineering Design Process	106–111
Plagiarism, Contract Cheating And Other Academic Misconducts In Online Engineering Education: Analysis, Detection And Prevention Strategies	112–119
Evaluation of the Learning Support Strategies for Teaching Assistants	120–126
Social Robots that can Sense and Improve Student Engagement	127–134
Practical-Oriented Teaching in Naval Architecture via Blended and Project-based Learning	135–142
Identifying Potential Cheaters By Tracking Their Behaviors Through Mouse Activities	143–149
Raising Motivation of Programming Novices? Findings from a Controlled Laboratory Experiment Using Anki Vector™ Robots	150–156
Delivering an Effective Balance of Soft and Technical skills within Project-based Engineering Courses	157–164
Managing Data and Projects: Lessons learnt from comparing computing curricula	165–172
Prove Me Wrong! How Debating Becomes the Secret Weapon to Teach ICT Students Innovation and Entrepreneurship	173–180
Assessing Elementary School Students' Programming Thinking Skills using Rubrics	181–188
Industrial Training Courses – A Challenge During the COVID19 Pandemic	189–196
How to Design Collaborative Problem Solving-based STEM Lessons based on the Perspective of Learning behaviors?	197–204
Engaging Students in SQL Learning by Challenging Peer during the Pandemic	205–212
Exploring the Relationship Between Collaborative Discourse, Programming Actions, and Cybersecurity and Computational Thinking Knowledge	213–220
The Effect of Virtual Agent Gender and Embodiment on the Experiences and Performance of Students in Virtual Field Trips	221–228
Modeling of an Intelligent System for Education 4.0 Using Bayesian Networks and Active Methodologies	229–234
Facebook's Social Learning Group for Undergraduate Engineering Courses: A Case Study of Emergency Remote Teaching amid large Digital Divide	235–242
Opportunities for Improving the Learning/Teaching Experience in a Virtual Online Environment	243–250
Blended SPOC Teaching and Learning Model for Computer Programming Course: Insights and Defeating Challenges	251–257
A Review of Quantitative Offline Measurement Tools for Computer-based Metacognitive Tutoring Effectiveness Assessment	258–264
A Novel Approach to Policy Development under Disruptive Circumstances using Situation Awareness and Scenario Planning in Higher Education	265–272
Analysing the Learning Paths of Computer Science Students via Trajectory Analytics	273–280
Analyzing Engineers Writing for Non-engineers	281–286
Assessment and Feedback Under Disruptive Circumstances in Trans-National Education	287–294
A Weighted Feature Extraction Technique Based on Temporal Accumulation of Learner Behavior Features for Early Prediction of Dropouts	295–302
Practice-oriented Smartphone Security Exercises for Developing Cybersecurity Mindset in High School Students	303–310
Online Lectures – Strategies for Applying Advanced Digital Media for Future Higher Education	311–318
A Framework for Developing Critical Literacies in Computer Architecture Education	319–326
The Implementation of Precision Education for Learning Analytics	327–332
Design an ABA Learning WeChat Tool to Assess the Cognitive Capacity for Autistic Children	333–340
Advanced Data Literacy Culture enabled through App Assistance for Competence Creation	341–348
Learnability Index – A Composite Measure for Non-cognitive Skills Relevant in Academics	349–354
Transit Traditional Face-to-Face Teaching to Online Teaching During the Outbreak of COVID-2019	355–362
Emotion Regulation in Intelligent Tutoring Systems: A Systematic Literature Review	363–370
Chatbot In Industry 4.0: An Approach For Training New Employees	371–376
Augmented Reality-Supported Tangible Gamification for Debugging Learning	377–383
Crisis Resilience Pedagogy (CRP) for Teaching and Learning	384–391

Table of Contents

Title	Page range
Initial Evaluation of System for Visualizing Novices' Unaware Search Intentions by Analyzing Behaviors of Article Selection	392–397
Changing How Teachers Teach for STEM and Students Motivation for STEM: Experiences and Lessons Learned from DreamSpace' STEM-21CLD Educational	398–405
Curriculum Development to Acquire Analytical Competencies Using An Industry BOK	406–413
Cognitive Load Optimization - a statistical evaluation	414–421
Scaffolding Learners' Understanding of English Collocation Usages in Electronic References	422–427
Using Cognitive Load Optimization to teach STEM disciplines to Business students	428–435
AR in the Computer Programming Classroom: A Review of the Literature	436–443
Measuring Domain Knowledge for Early Prediction of Student Performance: A Semantic Approach	444–451
Virtual and Augmented Reality for Teaching Materials Science: a Students as Partners and as Producers Project	452–459
Designing an Autonomous Vehicle System Design Course for COVID-19 Remote Learning under First Principles of Instruction Framework	460–466
Low-cost Educational Robotics Car Promotes STEM Learning and 21st Century Skills	467–473
POEM: A personalized online education scheme based on Reinforcement Learning	474–481
Boocture: Automatic Educational Videos Hierarchical Indexing with eBooks	482–489
Using Educational Data Mining to Test the Validity of Learning Style Theory	490–496
Cubo Kids: A Proposal For An Educational Application With Augmented Reality	497–502
Interactive model tool about Center of Mass during COVID-19 Pandemic: STEM for K-12 Education	503–508
Implementation Of Microgrid Virtual Laboratory In A Design Course In Electrical Engineering	509–515
Using Consistency to Measure CS1 Student's Comprehension of User-defined Functions	516–522
Real-time Feedback Dashboard for Students in Online Class	523–529
Comparison of a Videoconferencing Intervention's Effects on Students' English-Speaking Anxiety	530–535
Understanding and Promoting Teacher Connections in Online Social Media: A Case Study on Pinterest	536–541
A PLS-SEM Approach to Technology-enhanced EFL Writing	542–547
Evaluation of the Graduate Attributes Achievement on Speciality of Remote Sensing Science and Technology	548–553
The Effectiveness and Acceptance of Collaborative E-learning in the Context of Bangladesh	554–558
Development Roadmap for Launching Online Education: A Case Study of an Online Graduate Certificate Course	559–563
Secure Answer Book and Automatic Grading	564–569
Experiments with Multinational Cross-Course Projects through Blended Learning	570–575
Developing a Virtual Smart Total Learning Environment for Future Teaching-Learning System	576–579
Trials and Consideration of Active Learning Methods in Massive Lecture-type Class	580–585
Developing a Massive Open Online Lab Course for Learning Principles of Communications	586–590
Full Online Implementation of Introductory Software Engineering Education Including Web Application Development Practice	591–594
A Taxonomy-Based Hybrid Approach for Recommending Lifelong Learning.	595–600
Innovative Training Model of Cross-Domain Digital ICT Talent Development for Training Application of Data Analysis in Medical Field	601–605
Using Web-based Visual Aids and Assignment in Enhancing Student's Learning in Materials Engineering Course	606–609
Flying Robot Production Program for Comprehensive Understanding of Mechanical and Aerospace Engineering	610–613
Open Activities And Technologies During COVID-19 From The IEEE Student Branch at UNED	614–619
On The Teaching Mode in Online Course of MEMS Fundamental Theory	620–625
From Seminar Presentations to Inquiry-Based Learning - Developing an Advanced Electronics Course	626–629
Analysis of Logic Errors Utilizing a Large Amount of File History during Programming Learning	630–634
Development of a Visualization System to Enhance Participation in Computer-Supported Collaboration Learning	635–639
Responsive Remote Teaching Capacity Building in Hong Kong During COVID-19	640–645
Extracurricular Activities Through Regional Collaboration That Fosters Learning Ability	646–651
Development of a Teaching Assistant Reflection System to Improve Self-Efficacy	652–657
Face Authentication for E-testing Using Sequential Reference Update	658–661
Teaching Generic Competences in Software Engineering via E-Learning - An Evaluation	662–667
Academic Writing Skills in the Online Platform- A success, a failure or something in between? A study on perceptions of Higher Education students and	668–673
Video Augmentation Method for the Facilitation of Skill Learning in Karate	674–677
Design of Typing Skills Feedback System for Behavior Change	678–683
On Adding Interdisciplinary Elements to the Classical Engineering Studies	684–687
E-Learning Resources for Improving Student Achievement in a Course on RF Engineering	688–691
Selection Criteria of Device under Test and Their Impact on Learning Outcomes of Functional Verification	692–697
Implementation of Project-Based Learning in Teaching an Antenna and Wave Propagation Course	698–703
A Simple Gamification Approach of Reflected Electron Diffraction Phenomenon For Lower Secondary School Students	704–707
Inactive Behavior Analytics In On-site Lectures	708–713

Table of Contents

Title	Page range
Quantifying and Improving Student Engagement with Remotely Accessible Laboratory Project Hardware (RALPH)	714–718
A Prototype System for Recommending Images Supplementing Web News for NIE in Elementary Schools in Japan	719–724
The Paperless Factory: From Document Driven Factories to Model Driven Factories	725–730
Research on the Talent Training Mode of “Integration of Work, Study and Business” in China’s Higher Vocational Education Under the Background of Industry	731–736
Cultivating AI Talents Through Real Field Competition	737–741
Exploring Trends of Potential User Experience of Online Classroom on Virtual Platform for Higher Education during COVID-19 Epidemic: A Case in China	742–747
Investigation of Vocational Students’ Skills for Determining Learning Experiences on CAD Construction Drawing Course	748–753
A Multilevel Approach To Recommend Working Paths In Industry 4.0	754–757
Education Technology for Online Learning in Times of Crisis	758–763
Exploring the Sequences of Synthetic Facial Expressions and Type of Problems Solved in a Personal Instructing Agent using Lag Sequential Analysis	764–769
Assessing the Efficacy of Personalized Online Homework in a First-Year Engineering Multivariate Calculus Course	770–773
Analysis of Online Posts to Discover Student Learning Challenges and Inform Targeted Curriculum Improvement Actions	774–779
The Future of Teaching Post-COVID19: Microlearning in Product Design Education	780–785
Creating a Digital Learning Community: Four Key Considerations	786–791
Improvement on Teaching Courses of Engineering Practice and Social Investigation by Introducing Group Discussion and Mock Conference	792–796
Synchronous Distance Learning for Improvement of Elementary School Teachers’ Motivation to Teach English	797–802
Application of the Online and Offline Blended Learning Mode in Innovation and Entrepreneurship Education	803–806
Toward Identification of Learning Skills from Learning Analytics Approach: A Research Review	807–812
Teaching Exploration on the Deep Integration of Artificial Intelligence and Information Technology with Online Experiments	813–818
The Analysis of Developing the Application of Critical Thinking in Oral and Written Discussions: The Case of Emirati students in the United Arab Emirates.	819–824
Analysis of Spatial Distribution Equilibrium of Educational Information Development with Taking Hubei Province’s Digital Campus Construction as an Example	825–830
Applicability Analysis of the Combination of Career Anchors and Big-Five Personality for Student Career Development	831–834
Design a 5G Wireless Communication Lab Platform for Developing Capstone Projects	835–840
Considerations for Classification of Procrastinator Focusing on Periodical Online Exam in Blended Learning Course	841–846
Development of a Short-Form Learning Style Inventory for Automated Driving Safety Education	847–851
An Automatic Phoneme Recognizer for Children’s Filipino Read Speech	852–856
A new Teaching-Objective Achievement based Adaptive Teaching Continuous Improvement Method	857–862
An Emergency Transformation of a TBL Programming Class from Face-to-Face to Online Due to The COVID-19 Pandemic	863–867
A Formative Assessment Framework Using Game-Quiz Educational Approach	868–872
Immersive Virtual Reality Training of Bioreactor Operations	873–878
Utilization of Both Free 3DCG Software “Blender” and 3D Printing for Early STEM Education	879–882
Introducing Raspberry Pi and its Peripherals to a Mechatronics Course under COVID-19 Disruption	883–888
Empathy Enhancement Among Engineering Students Through Cooperative Problem Based Learning	889–894
Design Method of Intelligent Questionnaire for the Automatic Assessment of Educational Informatization Level	895–899
Transforming TEL for Human Flourishing: Learning Enhanced Technology (LET)	900–905
Development of a Virtual Environment for Extrasomatic Communication	906–909
Use of the Resilience Concept in the CEFR-Aligned English for Science and Technology (EST) Classes in Malaysian Secondary Schools through Victorian	910–913
Analysis of Behavioral Patterns for Social Virtual Reality Based Active Learning	914–917
Planning and Implementation of Large Scale Online PBL and Flipped Classes	918–921
STE(A)M Education of Cell Biology Using Advanced 3D Technology for K-12 Learning	922–924
Attempt to Extract Lacking Information on University Campus by AR Content Production Activities	925–926
Development of a Moodle UI Using LINE Chat for Casual Learning as a Part of a Learner Assistive LMS	927–929
Design and Implementation of an Online Leadership Education	930–933
Constructing a Learning Management System for Video Production Using Multiple Online Software	934–935
Experimental Design of a Learning Support System for Algorithm Refinement in Novice Debugging	936–939
Welfare Design Education By Solving Regional Challenges Through Welfare Engineering	940–941
Programming Workshops of Quiz Game for Children in three Municipalities in Hokkaido	942–944
Computer Science Ethics Education in Australia – A Work in Progress	945–947
Study On UX Design In Enhancing Student Motivations In Mobile Language Learning	948–951
Faculty Survey on the Distance Learning of Engineering Education during the COVID-19	952–955
Kepler vs Newton: Teaching Programming and Maths to Almost All-Majors in a Single Classroom	956–957
Work-in-progress: A Series of Science Lessons at Local Elementary Schools Performed by the Extra-Curriculum Project Team of Undergraduate Students	958–960
Interweaving Data and Knowledge for Co-education Augmentation	961–964
Preliminary Comparison of K-12 Computing Education in China and the United States	965–967

Table of Contents

Title	Page range
Immersive Virtual Reality for Teaching Problem Solving in Networking	968–971
Interdisciplinary Research Towards Creating a Design Framework for Adaptable Virtual Learning Environments	972–975
Psychological Pedagogy for Extended Reality in STEM Education	976–979
Design of a Self-Development Support System for Workplace Learning	980–983
Promotion System For Home-Based Squat Training Using OpenPose	984–986
Evaluating the Motivation Effects of a Research Activity Support System Function	987–990
Exploring the Integration of Social Care Education with STEM: a Social-scientific Maker Curriculum	991–994

Additional Papers

Sharing Experiences of Teaching and Learning During COVID-19: Building Responsive and Resilient Curriculum for the Next Normal	995-996
Specific and Generic Performance Indicators for Measuring Learning Outcomes	997-999
IEEE Standard for Augmented Reality Learning Experience Models	1000-1002
Technology and Education in Japan: Research, Practice, and More	1003-1005
Student Research Competition (TALE SRC)	1006-1007
