Volume 11613

Proceedings of SPIE 0277-786X, V. 11613

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Microlithography XXXIV*, edited by Soichi Owa, Mark C. Phillips, Proceedings of SPIE Vol. 11613 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MACHINE LEARNING AND COMPUTATIONAL LITHOGRAPHY I

11613 05 **SRAF placement with generative adversarial network** [11613-3]

11613 06 **Fast prediction of process variation band through machine learning models** [11613-4]

11613 07 **Effective data sampling techniques for machine learning OPC in full chip production** [11613-5]

11613 08 **Lithography tool improvement at productivity and performance with data analysis and machine learning** [11613-6]

OPTICAL DIRECT WRITING AND MASK WRITING: JOINT SESSION WITH CONFERENCES 11610 AND 11613

11613 09 **Digital scanner, optical maskless exposure tool with DUV solid state laser (Invited Paper)** [11613-7]

LITHOGRAPHY EQUIPMENT AND NEW APPLICATIONS

11613 0B **A study on various curvilinear data representations and their impact on mask manufacturing flow** [11613-9]

11613 0C **High-resolution patterning for panel level packaging** [11613-10]

RESIST MODELING AND COMPUTATIONAL LITHOGRAPHY

11613 0G **Contour-based model calibration to a minimum number of patterns** [11613-14]

11613 0H **Fast rigorous modeling of photoresist in lithography** [11613-15]

11613 0I **Optimization of accurate resist kernels through convolutional neural network** [11613-16]

OVERLAY CONTROL AND LITHOGRAPHY EQUIPMENT

11613 0J **Qualification of small alignment mark by on-product overlay performance** [11613-17]

11613 0K Innovative dual mark design for alignment verification and process monitoring in advanced lithography [11613-18]

MACHINE LEARNING AND COMPUTATIONAL LITHOGRAPHY II

11613 0M Advanced ILT solutions to manufacture photonics designs [11613-21]

11613 0N The application of a new stochastic search algorithm "Adam" in inverse lithography technology (ILT) in critical recording head fabrication process [11613-22]

11613 0O Test pattern extraction for lithography modeling under design rule revisions [11613-23]

11613 0P Machine learning ILT for memory customers [11613-26]

POSTER SESSION

11613 0Q Design ULVLED stepper with programmable reflective display panel as mask for multiple process wafer [11613-27]

11613 0R SRAF generation based on SGM/CTM contour line [11613-28]

11613 0S Lithocell availability improvement through light source maintenance cycle improvement and optimization and its availability impact analysis for cutting-edge ArFi light source [11613-29]

11613 0U Lithography layout classification based on graph convolution network [11613-31]

11613 0V Fast optical proximity correction based on graph convolution network [11613-32]

11613 0W Advanced spectral engineering: a new way of process improvements by laser spectra optimization for optical lithography [11613-33]

11613 0X Error modeling and accuracy breakdown in optical overlay metrology for advanced nodes [11613-34]

11613 0Y Enhancing model accuracy and calibration efficiency with image-based pattern selection using machine learning techniques [11613-35]
