Volume 11637

Proceedings of SPIE, 1605-7422, V. 11637

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Microfluidics, BioMEMS, and Medical Microsystems XIX*, edited by Bonnie L. Gray, Holger Becker, Proceedings of SPIE Vol. 11637 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MANUFACTURING

- 11637 05 **Towards high-throughput polymer replication of transparent fused silica glass** [11637-1]
- 11637 06 **Direct printing of microfluidic chips using a novel liquid photocurable polystyrene prepolymer** [11637-2]
- 11637 07 **Electrowetting induced μ -droplet actuation using Fluoropor in digital microfluidics (DMF)** [11637-3]
- 11637 08 **Inkjet printing of dielectric layers with high relative permittivity for digital microfluidics** [11637-4]
- 11637 09 **Time-dependent pulsing of microfluidic pumps to enhance 3D bioprinting of peptide bioinks** [11637-5]
- 11637 0A **Photopolymer formulations for μ SL printing of hydrogel microstructures as swellable functional elements** [11637-6]

DEVICES

- 11637 0C **Development of dielectric coated alternating current electrothermal micropumps for biomicrofluidic applications** [11637-8]
- 11637 0D **High-resolution colorimetric detection on paper-based microfluidic devices via indicator merging and machine learning** [11637-9]
- 11637 0E **Membrane-based fluorinated microfluidic device for water-oil separation** [11637-10]
- 11637 0F **Diffusion-based probe for low liquid sampling rate for biomedical application** [11637-11]
- 11637 0G **Impedimetric sensor for salvinia layer detection on fluoropor-coated electrodes under shear stress** [11637-12]

APPLICATIONS

- 11637 0L **Fluorescent detection of nucleosomes using functionalized magnetic beads on a digital microfluidic device** [11637-17]
- 11637 0M **An optofluidic dye concentration detector based on the pulsed photoacoustic effect** [11637-18]

11637 0O **PDMS-free modular plug and play construction kit for the development of micro-physiological systems** [11637-20]

OPTOFLUIDICS

11637 0Q **Nanodiamond optical sorting at the femtonewton scale inside a tapered glass capillary** [11637-22]

11637 0R **Imaging flow cytometry with snapshot-mosaic cameras for characterization of *Haematococcus pluvialis* cells** [11637-23]

11637 0S **Impulsive stimulated Brillouin spectroscopy for non-invasive microfluidic-based viscoelastic measurements in vitro** [11637-24]
