Volume 11639

Proceedings of SPIE, 1605-7422, V. 11639

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Tomography and Spectroscopy of Tissue XIV*, edited by Sergio Fantini, Paola Taroni, Proceedings of SPIE Vol. 11639 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BREAST IMAGING

- 11639 05 **Edge artifact removal in diffuse optical tomography using the heterogeneous VICTRE digital breast model** [11639-1]
- 11639 06 **Minor tissue absorbers can distinguish benign and malignant breast lesions using broadband quantitative diffuse optical spectroscopy** [11639-2]
- 11639 08 **High-throughput multi-wavelength time-resolved optical mammograph: importance of in vivo performance assessment** [11639-4]
- 11639 09 **Total hemoglobin changes in the breast tumors volume of patients undergoing neoadjuvant chemotherapy: a longitudinal analysis (Invited Paper)** [11639-5]
- 11639 0A **Unsupervised machine learning model for DOT reconstruction** [11639-6]
- 11639 0C **SOLUS: an innovative multimodal imaging system to improve breast cancer diagnosis through diffuse optics and ultrasounds** [11639-8]
- 11639 0D **MRI guided wearable near infrared spectral tomography: simulation study** [11639-9]

TISSUE SPECTROSCOPY AND IMAGING

- 11639 0E **Neural network forward model and transfer learning calibration from Monte Carlo to diffuse reflectance spectroscopy** [11639-10]
- 11639 0F **A multi-laboratory comparison of photon migration instruments and their performances: the BitMap exercise** [11639-11]
- 11639 0G **Vascular optical spectroscopy for the detection of contrast-agent perfusion during x-ray angiography in peripheral artery disease patients undergoing a surgical intervention** [11639-12]
- 11639 0H **Broadband absorption spectroscopy in tissue: combining dual-slope continuous-wave and self-calibrating frequency-domain measurements** [11639-13]
- 11639 0I **Broadband optical spectroscopy of the human adipose and muscle tissues: an in-vivo pilot study** [11639-14]
- 11639 0J **In silico experiments of time-resolved near-infrared light transport through human fingers with simulated rheumatoid arthritis** [11639-15]
- 11639 0K **Time-resolved reflectance spectroscopy for buried flaps monitoring: analysis methods** [11639-16]

11639 0M **Investigating the lung using time-resolved diffuse optics (Invited Paper)** [11639-18]

DIFFUSE OPTICS FOR THE BRAIN

- 11639 0Q **Depth selectivity in time-domain fNIRS by analyzing moments and time windows (Invited Paper)** [11639-22]
- 11639 0R **Combining time-resolved near-infrared spectroscopy with regression analysis to improve the reconstruction of cerebral hemodynamic responses** [11639-23]
- 11639 0S **Sensitivity of FD-NIRS dual slopes to absorption perturbations in layered media** [11639-24]
- 11639 0T **Towards functional dual-slope imaging: methods to design, evaluate, and construct a source-detector array** [11639-25]
- 11639 0U **Estimating adult cerebral oxygen saturation from time-resolved near-infrared spectroscopy measurements with few discrete wavelengths at a single source-detector distance** [11639-26]
- 11639 0V **“Walking” into freely moving brain monitoring via real-time TD-NIRS** [11639-27]

DCS AND SPECKLE CONTRAST IMAGING I: PHANTOMS AND TISSUE

- 11639 0Z **Using hyperspectral near infrared spectroscopy and diffuse correlation spectroscopy to monitor the microvascular effects of phenylephrine in vivo (Invited Paper)** [11639-31]
- 11639 11 **In vivo time-domain diffuse correlation spectroscopy at 1 μm** [11639-33]

DCS AND SPECKLE CONTRAST IMAGING II: BRAIN

- 11639 18 **Assessing the ability to monitor cerebral blood flow and oxygen consumption by combining time-resolved near-infrared and diffuse correlation spectroscopy** [11639-43]

SPATIAL FREQUENCY-DOMAIN IMAGING

- 11639 19 **Towards pixel-dependent spatial frequency domain imaging modelling and recovery** [11639-44]
- 11639 1C **Spatio-temporal frequency domain imaging using time-resolving CMOS image sensor and stripe pattern projection** [11639-47]
- 11639 1D **Real-time oxygenation mapping from structured light imaging with deep learning** [11639-48]

POSTER SESSION

- 11639 1I **Time-domain reflectance diffuse optical tomography for imaging breast cancer** [11639-50]
- 11639 1J **MRI-guide near infrared spectroscopic tomographic imaging system with wearable optical breast interface for breast imaging** [11639-51]
- 11639 1O **Quantitative evaluation of frequency domain measurements in high density diffuse optical tomography** [11639-57]
- 11639 1Q **Design and development of a functional diffuse optical tomography probe for real-time 3D imaging of tissue** [11639-59]
- 11639 1S **Square-waves for frequency multiplexing for fully parallel 3D diffuse optical tomography measurement** [11639-61]
- 11639 1U **Iterative reconstruction using Monte Carlo generated system matrix for angle-restricted optical tomography** [11639-63]
