Volume 11647

Proceedings of SPIE, 1605-7422, V. 11647

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Imaging, Manipulation, and Analysis of Biomolecules, Cells, and Tissues XIX*, edited by Irene Georgakoudi, Attila Tarnok, James F. Leary, Proceedings of SPIE Vol. 11647 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FUNCTIONAL IMAGING OF LIVING CELLS AND TISSUES

- 11647 04 Non-invasive label-free assessment of contraction induced damage to skeletal muscle structure using second harmonic generation (SHG) microscopy [11647-27]
- 11647 06 In vivo imaging of newt lens regeneration with OCT [11647-29]
- 11647 07 Classification of T cell metabolism from autofluorescence imaging features [11647-30]

FUNTIONAL IMAGING WITH SUBCELLULAR RESOLUTION

- 11647 09 Analysis of the metabolic and oxygen status of 3D neurospheres from iPSCs using FLIM / PLIM methods [11647-32]
- 11647 0B Investigation of nuclear structural variations under chronic stress conditions in *Allium cepa* using LSM [11647-34]

INSTRUMENTATION FOR SENSING AND IMAGING

- 11647 0J Integrated SPAD-fed artificial neural networks for computer vision and image processing [11647-37]
- 11647 0K Vibrational spectroscopy of aromatic compounds: is hyper-Raman spectroscopy worth the effort? [11647-38]
- 11647 0L Configurable automated well plate illuminator for in vitro research in drug discovery and optogenetics [11647-39]

CYTOMICS I: SINGLE CELL IMAGING

- 11647 0M Single-cell manipulation and analysis using microfluidics, photomechanical actuation, and machine learning (Invited Paper) [11647-13]

CYTOMICS II: HIGH-THROUGHPUT CYTOMETRY

- 11647 0R Towards FRET-based studies using high throughput time-resolved acoustofluidic flow cytometry [11647-18]

11647 0T Systems-level designs of portable microfluidic cytometers for operation in the field [11647-20]

CYTOMICS III: MACHINE LEARNING ENABLED CYTOMETRY

11647 0V U-Net based image segmentation of mesenchymal stem cells [11647-21]

11647 0W A machine learning approach to transport categorization for vesicle tracking data analysis [11647-22]

11647 0X Comparing Mask R-CNN and U-Net architectures for robust automatic segmentation of immune cells in immunofluorescence images of Lupus Nephritis biopsies [11647-23]

NANOSCALE IMAGING

11647 16 Quantification of light localization properties to study the effect of probiotic on chronic alcoholic brain cells via confocal imaging [11647-41]

11647 19 Optical quantification of nanoscale structural alterations in pups' brain cells due to fetal alcoholism using dual spectroscopy [11647-44]

CLINICAL DIAGNOSTIC APPLICATIONS OF SPECTRAL IMAGING

11647 1A MID infrared multispectral imaging for tumor tissue detection [11647-5]

BIOMEDICAL FABRICATION & IMAGING USING DMD / ADVANCED TECHNIQUES: JOINT SESSION WITH 11647/11698

11647 1E Enabling high-throughput spectroscopy with liquid crystal polarization gratings [11647-2]

BIOMEDICAL MICROSCOPY USING A DMD OR SLM: JOINT SESSION WITH 11647/11698

11647 1G 3D cell instance segmentation via point proposals using cellular components [11647-4]
