SPIE

Volume 11701

Proceedings of SPIE 0277-786X, V. 11701

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Complex Light and Optical Forces XV*, edited by Enrique J. Galvez, Halina Rubinsztein-Dunlop, David L. Andrews, Proceedings of SPIE Vol. 11701 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

WORKSHOP ON METHODS OF COMPLEX LIGHT

11701 05 **Structuring light with digital micro-mirror devices** [11701-44]

11701 06 **Remote quantum optics labs** [11701-43]

FUNDAMENTAL OAM

11701 0D **Longitudinal fields of quantized Laguerre-Gaussian modes** [11701-7]

SPATIAL POLARIZATION

11701 0N **Interferometric polarimetry using full-Poincaré beams** [11701-17]

3D MODE EFFECTS

11701 0U **Einstein beams: optical beams following gravitationally lensed trajectories** [11701-24]

11701 0V **Tailored spectral rotation of vortex pulses by non-uniform spiral phase gratings** [11701-25]

LIGHT AND NANOSTRUCTURES

11701 0Y **Discrete dipole approximation simulation of optical vortex excited plasmonic properties of a partially capped core-shell nanostructure** [11701-27]

11701 10 **Extending range through structured back focal plane interferometry** [11701-29]

TRAPPING FIELDS

11701 13 **Giant optical forces using an array of asymmetric split-ring plasmonic nanostructures** [11701-32]

11701 16 **Algorithmic considerations for complex light** [11701-35]

NOVEL TRAPPING

11701 1A **High-resolution and massive trapping and separation of dielectric nanoparticles in an optical potential well array** [11701-39]

OPTICAL TWEEZERS

11701 1D **GPC-modalities for neurophotonics and optogenetics** [11701-42]

POSTER SESSION

11701 1F **Generation of polarization singularities using propagating cylindrical vector beams** [11701-47]
