2020 3rd World Conference on Mechanical Engineering and Intelligent Manufacturing (WCMEIM)

WCMEIM 2020

Table of Contents

Preface xxv
Committees xxvii
Reviewers xxix

1. Intelligent Technology and Robotics

Development of Mobile Robot System Based on Computer Vision 1
Zhimin Qin (Beijing Institute of Graphic Comminication, China), Zhenqing Gao (Beijing Institute of Graphic Comminication, China), Boyu Wen (Beijing Institute of Graphic Comminication, China), Yuan Zhang (Beijing Institute of Graphic Comminication, China), Anran Wu (Beijing 6-Robot Technology Co., Ltd., China), and Zepeng Wu (Beijing 6-Robot Technology Co., Ltd., China)

Fuzzy PID and Sliding Mode Control for Master-Slave Bilateral Teleoperation System with Disturbance Observer 6
Qikai Yu (Nanjing Polytechnic Institute, China), Jiangyi Han (Jiangsu University, China), Xuwei Jiang (Nanjing Polytechnic Institute, China), and Hongxin Yang (Nanjing Polytechnic Institute, China)

Research and Implementation of Automatic Cutlery Recognition Method Based on X-ray Security Inspection Image 12
Lexu Gu (Army Academy of Armored Forces, China)

Monitoring and Analysis of Wind Turbine Working Status Based on LSSVR 18
Zhengnan Hou (Southwest Jiaotong University, China), Xiaoxiao Lv (Southwest Jiaotong University, China), and Shengxian Zhuang (Southwest Jiaotong University, China)

Research on a Novel RCM Mechanism of Surgical Robot 22
Baoping Ma (The 21st Research Institute of China Electronics Technology Group Corporation, China), Chunlei Wang (The 21st Research Institute of China Electronics Technology Group Corporation, China), Ya Yang (The 21st Research Institute of China Electronics Technology Group Corporation, China), Chunhui Fan (The 21st Research Institute of China Electronics Technology Group Corporation, China), Yuefeng Rui (The 21st Research Institute of China Electronics Technology Group Corporation, China), and Weiqi Jin (The 21st Research Institute of China Electronics Technology Group Corporation, China)

Deisgn and Optimization of Dual-Arm Robot for Avionics System Testing .31
Yiqi Yang (SJTU-Paris Tech Elite Institute of Technology, Shanghai Jiao Tong University, China), Tao Sun (Shanghai Hangyi Research Institute of High-tech development, China), Zhuangzhuang Zhang (Shanghai Jiao Tong University, China), Kaiyi Xie (Shanghai Jiao Tong University, China), Xiaoxiao Zhu (Shanghai Jiao Tong University, China), and Qixin Cao (Shanghai Jiao Tong University, China)

Disengagement Causes Analysis of Automated Driving System .36
Jiacheng Feng (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China), Shengbo Yu (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China), Guihua Chen (China Society of Automotive Engineers; China Automotive Engineering Research Institute, China), Weijie Gong (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China), Qiao Li (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China), Juejian Wang (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China), and Haiting Zhan (China Intelligent and Connected Vehicles (Beijing) Research Institude Co.Ltd, China)

Structure Design of Ankle Rehabilitation Robot .40
Ying Chang (Harbin Engineering University, P.R. of China; Jilin Agricultural Science and Technology University, P.R. of China), Lan Wang (Harbin Engineering University, P.R. of China), Lingjie Lin (Harbin Engineering University, P.R. of China), and Ming Liu (Yamamoto Seisakusho, Inc., Japan)

Research on Laser Navigation AGV Positioning Technology Based on Dynamic Matching .44
Liang Zhao (Zhejiang University, China), Junwei Chen (Zhejiang University, China), and Zhi Liang (Zhejiang University, China)

Design, Control and Testing of Soft Pneumatic Rehabilitation Glove .50
Qitong Du (Shanghai Jiao Tong University, China), Wei Zhao (Shanghai Jiao Tong University, China), Xiao Cui (Shanghai Jiao Tong University, China), and Yanqiong Fei (Shanghai Jiao Tong University, China)

Out-Pipe Climbing Soft Robot with Omnidirectional Actuator .56
Lingyun Dai (Shanghai Jiao Tong University, China), Jiangbei Wang (Shanghai Jiao Tong University, China), Zhaoyu Liu (Shanghai Jiao Tong University, China), and Yanqiong Fei (Shanghai Jiao Tong University, China)

A Portable System for ToF Camera Based Human Body Detection and Pose Estimation .61
Chuang Cao (Dalian University of Technology, China), Shilei Lyu (Shanghai Jiao Tong University, China), Yujie Jiang (Shanghai Jiao Tong University, China), and Qixin Cao (Shanghai Jiao Tong University, China)

Quaternion Invariant Cubature Kalman Filtering for Attitude Estimation .67
Huijuan Guo (Northwestern Polytechnical University, China), Huiying Liu (Northwestern Polytechnical University, China), Yan Zhou (Northwestern Polytechnical University, China), and Jing Li (Northwestern Polytechnical University, China)

Structure Design and Generation of Bookbinding Parameters for Launch Vehicle Flight Software .73
Mao Ye (Nanjing University of Science and Technology; Shanghai Aerospace Control Technology Institute, China), Ri-na Sa (Shanghai Aerospace Control Technology Institute, China), and Yong-guan Fan (Shanghai Aerospace Control Technology Institute, China)

Structural Optimization Design of Pneumatic Wiping Robot for Small Gun Bore .77
Renbin Zhou (Wuchang Shouyi University, China) and Lei Liu (Wuchang Shouyi University, China)

Stiffness Analysis of the 4-DOF Parallel Manipulator with Compound Spherical Joints .82
Canguo Zhang (Hebei University of Architecture, China), Xiaoyu Ni (Hebei University of Architecture, China), Shaolei Wang (Hebei University of Architecture, China), Jiuqiang Wang (Hebei University of Architecture, China), and Chunhua Zhu (Hebei University of Architecture, China)

Research on Motion Blur Image Restoration Algorithm Based on Improved Wiener Filter .87
Guanyang Zhang (Hubei University of Technology; Hubei Key Lab of Modern Manufacture Quality Engineering, China), Songqing You (Hubei University of Technology; Hubei Key Lab of Modern Manufacture Quality Engineering, China), and Kaikai Wu (Hubei University of Technology; Hubei Key Lab of Modern Manufacture Quality Engineering, China)

A Method of RCS Measurement in the Outfield .91
Qian Zhang (Xi'an Electronic Engineering Research Institute, China), Dong Wang (Xi'an Electronic Engineering Research Institute, China), and Yongwei Zhou (Xi'an Electronic Engineering Research Institute, China)

Super Resolution Image Restoration Algorithm: Based on Wavelet and Interpolation .95
Xiuyun Zeng (Anhui Polytechnic University, China), Huacai Lu (Anhui Polytechnic University, China), and Chenyan Zhang (Anhui Polytechnic University, China)

A Study on Rural Water Supply Detection Technology Based on Internet of Things .99
Hengfei Zhang (Changjiang Schinta Software Technology Co., LTD., China), Xuefu Cheng (Changjiang Schinta Software Technology Co., LTD., China), Hao Tian (Changjiang Schinta Software Technology Co., LTD., China), and Linhui Mei (Changjiang Schinta Software Technology Co., LTD., China)

RGBD-Based Real-Time 3D Human Pose Estimation for Fitness Assessment .103
Yujie Jiang (Shanghai Jiao Tong University, China), Chuang Cao (Dalian University of Technology, China), Xiaoxiao Zhu (Shanghai Jiao Tong University, China), Yanhong Ma (Shanghai Jiao Tong University Affiliated Sixth People's Hospital, China), and Qixin Cao (Shanghai Jiao Tong University, China)

Research on Trajectory Optimization of Handling Robot Based on ABB .109
Ying Bai (Changzhou Vocational Institute of Mechatronic Technology, China), Xu Yang (Hohai University, China), and Weijun Huang (Hohai University, China)

Design of Internet of Things Information Security Based on Blockchain .114
Jiasheng Zhang (Guizhou University, China) and Zetao Li (Guizhou University, China)

Design of a High-Precision and Multi-degree-of-Freedom Automatic Attitude Adjustment System .118
Ligang Lu (Beijing Satellite Manufacturing Co., Ltd., China), Fuyong Zhang (Zhongkexin Engineering Consulting (Beijing) Co., Ltd., China), Danni Zhao (Beijing Satellite Manufacturing Co., Ltd., China), Deyong Li (Beijing Satellite Manufacturing Co., Ltd., China), and Shuai Gao (Harbin Institute of Technology, China)

Garbage Classification and Recognition Based on SqueezeNet .122
Wentao Zhi (Nantong University, China), Lan Gao (Nantong University, China), and Zhisong Zhu (Nantong University, China)

Optimization and Control of Wireless Rechargeable Sensor Network Based on Intelligent Algorithm .126
Jinfu Liu (Wuhan University of Technology, China) and Fan Feng (Wuhan University of Technology, China)

Machine Learning Aided Design Optimization for Micro-Chip Reliability Improvement .131
Jiahe Lv (Zhejiang University of Technology, China)

Research on Character Correction Method Based on Machine Learning .136
Minglei Yao (Jiangsu University of Technology, China), Xingjie Zhou (Jiangsu University of Technology, China), and Xiaoling Zhang (Jiangsu University of Technology, China)

Design of Patrol Inspection System for Special Equipment Based on UAV .143
Qingcheng Chen (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Jun Si (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Xiang Wen (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Haixiang Xu (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Fengqi Wu (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Yuqing Yang (Shanghai Institute of Special Equipment Inspection & Technical Research, China), Guoyong Hou (Shanghai Institute of Special Equipment Inspection & Technical Research, China), and Yingjie Shen (Shanghai Institute of Special Equipment Inspection & Technical Research, China)

A Generic RCM Constraint Algorithm Based on Optimization of a Modular RAMIS System .147
Haoyuan Miao (Shanghai Jiao Tong University, China), Mingjing Sun (Shanghai Jiao Tong University, China), Yiqi Yang (Shanghai Jiao Tong University, China), Xiandong Tao (Third Affiliated Hospital of Naval Medical University, China), Xiaoxiao Zhu (Shanghai Jiao Tong University, China), Qixin Cao (Shanghai Jiao Tong University, China), and Tiewen Pan (Third Affiliated Hospital of Naval Medical University, China)

Design and Implementation of Intelligent Control System for Open Flame Smokeless Moxibustion Instrument .153
Weihong Wang (Institute of Information and Technology, Hebei University of Economics and Business, China), Lanlan Shang (Institute of Information and Technology, Hebei University of Economics and Business, China), Yuhui Cao (Institute of Information and Technology, Hebei University of Economics and Business, China), Jingyuan Yang (Institute of Information and Technology, Hebei University of Economics and Business, China), Jiarui Liu (Institute of Information and Technology, Hebei University of Economics and Business, China), and Chaoran Pang (Institute of Information and Technology, Hebei University of Economics and Business, China)

Design of High-Altitude Curtain Wall Cleaning Robot .157
Haihong Dai (Wuhan University of Technology, China)

2. Intelligent Manufacturing and Processing Technology

Research on Predicting Machining Surface Roughness Based on Neural Network .161
Youpeng Zhang (Shanghai University of Engineering Science, China) and Jian Mao (Shanghai University Of Engineering Science, China)

Overview of Non-Destructive Testing of Composite Materials .166
Miaoxin Liu (Shanghai University of Engineering Science, China) and Xiaoyu Zhao (Shanghai University of Engineering Science, China)

Research Advance on Geometric Error Recognition Algorithm for CNC Machine Tools .170
Xingchi Wei (Shanghai University of Engineering Science, China) and Jian Mao (Shanghai University of Engineering Science, China)

Review of Research on Chatter Stability in Milling of Thin-Walled Parts .175
Hao Liu (Shanghai University of Engineering Science, China) and Yufeng Zhou (Shanghai University of Engineering Science, China)

Study on Microstructure Evolution of Tube in Hydroforming .179
Fengshuo Tian (Guilin University of Electronic Technology, China), Jianwei Liu (Guilin University of Electronic Technology, China), Xiangwen Fan (Guilin University of Electronic Technology, China), and Changying Sun (Guilin University of Electronic Technology, China)

Design of U-Shaped Bending Stamping Die for Chain Plate .183
Yongming Wang (Anhui University of Technology; Anhui Province Key Laboratory of Special Heavy Load Robot, China), Wei Li (Anhui University of Technology; Anhui Province Key Laboratory of Special Heavy Load Robot, China), Chen Jiang (Anhui University of Technology; Anhui Province Key Laboratory of Special Heavy Load Robot, China), and Chengtao Tang (Anhui University of Technology; Anhui Province Key Laboratory of Special Heavy Load Robot, China)

Cutting Constitutive Model of Metallic Glass Based on Stress-Temperature Sensitivity .187
Fu-wang Zhang (CITIC Dicastal Co., Ltd, China), Chuang Zhang (Yan Shan University, China), Jia-bin Fu (CITIC Dicastal Co., Ltd, China), and Jia-chun Wang (Yan Shan University, China)

Design of automatic filling line system for weight reduction .194
Sai-Kun Zhang (Beijing Polytechnic, China), Jun Ji (Beijing Polytechnic, China), and Yu-Hang Li (Beijing Polytechnic, China)

Research on Markov Method Based on Multi-parameter Variable Fusion .198
Fengmei Xin (HeiLongJiang University of Technology, China)

A Monitoring Method for the State of Yarn Based on Sliding Window and Its Application .203
Yu Zhang (Southeast University, China), LiMiao Gu (Southeast University, China), Weijie Chu (Southeast University, China), and Fang Jia (Southeast University, China)

Nonlinear Error Analysis of Convex Surface Grinding in RTCP Mode .208
Shaolei Wang (Hebei Institute of Construction Engineering, China), Jiuqiang Wang (Hebei Institute of Construction Engineering, China), Lijuan Liu (Hebei Institute of Construction Engineering, China), Zhanying Wang (Hebei Institute of Construction Engineering, China), Jianming Liang (Hebei Institute of Construction Engineering, China), Yuanjiang Xu (Hebei Institute of Construction Engineering, China), Jiale Pang (Hebei Institute of Construction Engineering, China), Yixuan Jiao (Hebei Institute of Construction Engineering, China), Shitong Wang (Hebei Institute of Construction Engineering, China), and Yangzheng Hao (Hebei Institute of Construction Engineering, China)

Research and Design of Welding Seam Tracking Control System .212
Lin Hou (Dalian Polytechnic University, China), Haichuan Zhang (Dalian Polytechnic University, China), and Yan Mu (Dalian Polytechnic University, China)

Optimization of FHB5.10 Electrical Appliance Shell Injection Molding Process Based on Moldflow and BP Neural Network .217
Tiancan Yan (Guizhou University, China), Yi Mei (Guizhou University, China), and Lin Wang (Kweichow Moutai Co., Ltd, China)

Design of Intelligent Conveying System for Die Forging Production Line .226
Dan Yi (Beijing University of Technology, China), DeWei Li (Beijing University of Technology, China), Qiang Cheng (Beijing University of Technology, China), CaiXia Zhang (Beijing University of Technology, China), and He Huang (Beijing University of Technology, China)

Design and Development of Management and Control System for Intelligent Die Forging Production Line .230
YuanLong Ji (Institute of Advanced Manufacturing and Intelligent Technology, Beijing University of Technology, China), ShuWen Sun (Institute of Advanced Manufacturing and Intelligent Technology, Beijing University of Technology, China), ZhiFeng Liu (Institute of Advanced Manufacturing and Intelligent Technology, Beijing University of Technology), and ChenFei Liu (Institute of Advanced Manufacturing and Intelligent Technology, Beijing University of Technology)

Integrated Condition-Based Maintenance and Quality Improvement Model for Deteriorating Single-Machine Manufacturing Systems Considering Condition Indicator ..234
Haohao Shi (State Key Laboratory of Mechanical Transmission, Chongqing University, China), Xiaohui Chen (State Key Laboratory of Mechanical Transmission, Chongqing University, China), Ji Zhang (State Key Laboratory of Mechanical Transmission, Chongqing University, China), and Youjun An (State Key Laboratory of Mechanical Transmission, Chongqing University, China)

A Modified Point Cloud Reconstruction Method for Complex Surfaces ..239
Jian-wei Ma (Dalian University of Technology, China), Zi-wen Qu (Dalian University of Technology, China), Guan-lin Li (Dalian University of Technology, China), Jian-zhou Zhang (Dalian University of Technology, China), and Jia-wei Li (China Academy of Engineering Physics, Institute of Machinery Manufacturing Technology, China)

Study of the Influence of Force Reducing Column on the Formation of Main Shield Cover Based on FEM-DEM Coupling ..244
Chang Liu (Pinggao Group Co., Ltd., China), Fang-shuai Zhao (Pinggao Group Co., Ltd., China), Miao-yan Cao (Yanshan University, China), Kuan-peng Sui (Yanshan University, China), Han Hu (Yanshan University, China), and Peng-fei Song (Yanshan University, China)

Research and Application of a WYSIWYG Structural Process Design Module in CAPP System ..248
Chao Guo (China Academy of Engineering Physics, China), Bo Zhang (China Academy of Engineering Physics, China), Ying-song Li (China Academy of Engineering Physics, China), and Xiao-ying Jiang (China Academy of Engineering Physics, China)

Research on the Integration of CAD / CAM Technology and Design Aesthetics of Modern Mechanical Products ..252
Yong-hong Chen (Wuhan Donghu University, China), Ping Hu (Naval University of Engineering, China), Wen-ye Luo (Wuhan Donghu University, China), and Hui-zi Zuo (Wuhan Donghu University, China)

Research on Numerical Simulation of Surface Micro-Texture in EDM ..256
Xuxu Wang (Changchun University, China), Changlong Zhao (Changchun University, China), Qiyin Lv (Changchun University, China), Zhenrong Ma (Changchun University, China), and Chen Ma (Changchun University, China)

Data Driven and Running Simulation System for Intelligent Workshop ..260
Yan Liu (Nanjing University of Science and Technology, China), Niansong Zhang (Nanjing University of Science and Technology, China), Aimin Wang (Beijing Institute of Technology, China), and Hailong He (Beijing Xinfeng Aerospace Equipment Co., Ltd., China)

Research on Innovative Design of Industrial Ceramics Baler ..265
Chong Peng (Southwest Forestry University, China) and Sheng-wen Yang (Southwest Forestry University, China)

Feature-Based Optimization Analysis Technology of Precision Casting Machining Allowance ..269
Qingluo Zou (Nanjing University of Science and Technology, China), Niansong Zhang (Nanjing University of Science and Technology, China), and Aimin Wang (Beijing Institute of Technology, China)

Research on Normative Inspection Method of Geometric Tolerance Marking for MBD Model ..274
Wenhao Zhong (Beihang university, China), Meiqing Wang (Beihang university, China), and Yansheng Cao (Beijing Aerospace Xinfeng Mechanical Equipment Co. Ltd, China)

Ultrasonic-Assisted Micro-Hole Machining Research and Parameter Optimization Experiment ..283
Changgui Zhu (Nanjing University of Science and Technology, China), Niansong Zhang (Nanjing University of Science and Technology, China), Aimin Wang (Beijing Institute of Technology, China), and Hailong He (Beijing Xinfeng Aerospace Equipment Co., Ltd., China)

Evaluation Method of Stationarity for NC Machining Process Based on Information Entropy ..287
Meiqing Wang (Beihang University, China) and Yuan Bian (Beihang University, China)

Roughness Classification of End Milling Based on Machine Vision ..292
Kaixuan Tang (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China), Fumin Chen (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China), and Fan Chang (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China)

Research on the Operation Improvement of an Automobile Spare Parts Distribution Center by Using FlexSim ..297
Owusu Gyan Eric (Wenzhou University, China), Yarong Chen (Wenzhou University, China), and Huaxin He (Wenzhou University, China)

Research on Digital Welding Technology of Spacecraft Pipeline System ..303
Ligang Dong (Beijing Satellite Manufacturing Co., Ltd., China), Jiabo Zhang (Beijing Satellite Manufacturing Co., Ltd., China), Yongliang Li (Beijing Satellite Manufacturing Co., Ltd., China), Longqi Yu (Beijing Satellite Manufacturing Co., Ltd., China), and Jianhua Liu (Beijing Institute of Technology, China)

Constructing an Innovative and Optimized Model for Green Manufacturing of Intelligent Electronic Products ..308
Yongdong Wang (Wuhan University of Technology, China) and Xianyi Yang (Wuhan University of Technology, China)

Study on the Influence of Process Parameters on Wall Thickness Variation of H96 Waveguide Tube in Rotary Draw Bending ..312
Hong Zhan (Southwest Technology and Engineering Research Institute, China), Dayu Shu (Southwest Technology and Engineering Research Institute, China), Maolin Yu (Nanjing Sinovatio Technology Co., Ltd., China), Yang Wu (Southwest Technology and Engineering Research Institute, China), Shuxin Chai (Southwest Technology and Engineering Research Institute, China), Yanbin Wang (Southwest Technology and Engineering Research Institute, China), Fei Li (Southwest Technology and Engineering Research Institute, China), and Yuli Liu (Northwestern Polytechnical University)

Research on Optimal Scheduling of Workshop Equipment Maintenance Based on Quantum Genetic Algorithm ..318
Xin Feng (Wuhan University of Science and Technology, China), Yun Cai (Wuhan University of Science and Technology, China), and Hegen Xiong (Wuhan University of Science and Technology, China)

The Effects of Water Content of Lubricating oil on Wear of Friction Pair Composed of Aluminum Alloy Disk and Gray Cast Iron Pin .324
Jing Li (Naval University of Engineering, China), Hongxiang Tian (Wuhan Donhu University, China), Yunling Sun (Naval University of Engineering, China), and Longfei Li (Naval University of Engineering, China)

Research on Temperature Field of Dissimilar Metals by Tungsten Inert Gas Welding .328
Xiangyu Cai (Shanghai University, China), Guangwei Yu (Shanghai University, China), and Lu Zhou (Shanghai University, China)

Using Phased Array Ultrasonic to Detect and Analyze Defect Position of Connecting Rod for Remanufacturing .332
Xing Wang (Anhui Sanlian University; University of San Carlos, China), Mingming Wu (Anhui Sanlian University, China), and Yuchen Li (Anhui Sanlian University, China)

Diagnosis and Tracing of the Edge Warping Defect of Hot Rolled Strip Based on the Fault Tree Method of Fusion Contribution Factor .336
He-song Guo (Yanshan University, China), Jian-liang Sun (Yanshan University, China), and Meng-qian Sun (Yanshan University, China)

An Exact Algorithm for Identical Parallel Machine Scheduling under Scenarios .341
Han-Xin Xie (Shanghai University, China) and Bing Wang (Shanghai University, China)

In-Processing Monitoring of Turning Operations Based on Modulation Signal Bispectrum Analysis of Motor Current Signals .345
Zhexiang Zou (Beijing Institute of Technology, China; University of Huddersfield, UK), Yubin Lin (Beijing Institute of Technology, China; University of Huddersfield, UK), Bing Li (Beijing Institute of Technology Zhuhai, China), Qinyu Wu (Beijing Institute of Technology Zhuhai, China), Fengshou Gu (University of Huddersfield, Uk), and Andrew D Ball (University of Huddersfield, Uk)

Fast Recognition Algorithm of Weld Seam Image under Passive Vision .351
Peng Jiang (Beijing Institute of Technology, China), Aimin Wang (Beijing Institute of Technology, China), Jin Yang (Beijing Institute of Technology, China), and Xinyi Shen (Beijing Institute of Technology, China)

Development of Computer Aided System for Jet Aerator .356
Wenwu Mao (Shanghai Ocean University, China), Shuang Liang (Shanghai Ocean University, China), Junhua Ge (Shanghai Ocean University, China), Xuanmeiyan Hu (Shanghai Ocean University, China), and Jingyan Hua (Shanghai Ocean University, China)

Research on Intelligent Collaborative Manufacturing Mechanism with Full-Processing Parallel Interaction Based on Data-Driven .360
Ziqi Xie (Tongji University, China), Xianhui Liu (Tongji University, China), and Weidong Zhao (Tongji University, China)

Modelling Surface Topography in Ultra-Precision Grinding Process .364
Qiuyan Wang (Qingdao University, China), Luyi Qiu (Qingdao University, China), Shuowei Bai (Qingdao University, China), and Runze Lin (Qingdao University, China)

A Fiber Diameter Measurement Algorithm Based on Image Processing Technology 368
Yeting Shen (Shanghai University, China), Linyong Shen (Shanghai University, China), Wei Song (Shanghai University, China), and Yanan Zhang (Shanghai University, China)

Acoustic Emission Intelligent Prediction of Grinding Surface Roughness Based on BP Neural Network 373
Li Guo (Hunan University, China), Yongfeng Ma (Hunan University, China), Yi Wang (Hunan University, China), Chong Wang (Hunan University, China), Zhenxing Liao (Hunan University, China), Bo Li (Hunan University, China), and Xun Chen (Liverpool John Moores University, United Kingdom)

Part Coaxiality Detection Based on Polynomial Interpolation Subpixel Edge Detection Algorithm 377
Yao Xiao (Dalian University of Technology, China), Yi Luo (Dalian University of Technology, China), Yunpeng Xin (Dalian University of Technology, China), and Xiaodong Wang (Dalian University of Technology, China)

Automated Assembly System for Miniature Bolted Joints During the Gimbal Assembly 381
Yuntao Fang (Dalian University of Technology, China), Huibin Wang (Dalian University of Technology, China), Xiaodong Wang (Dalian University of Technology, China), and Yi Luo (Dalian University of Technology, China)

B-rep Based Automatic Incremental Blend Suppression for Meshing 385
Jiping Li (South China Agricultural University, China), Kai Zhu (South China Agricultural University, China), and Wanrong Gu (South China Agricultural University, China)

Experimental Study on Improving Properties of 5083 Al-Mg Alloy by Deep Cryogenic Treatment 389
Fangwei Jin (Guizhou University of Engineering Science, China) and Xueying Ji (Research Institute of Bijie Circular Economy, Guizhou University of Engineering Science, China)

Optimization of Stamping Process Parameters Based on Orthogonal Test and Intelligent Algorithm 393
Gai Yan (Maanshan Engineering Technology Research Center, China; Wanjiang University of Technology, China; Shanghai Polytechnic University, China), Yanping Zheng (Nanjing Forestry University, China), Lieliang Wang (Schaeffler (Nanjing) Co., Ltd, China), and Zhaoming Huang (Maanshan Engineering Technology Research Center, China; Wanjiang University of Technology, China)

Research on Key Technology of Intelligent Design for Fixture Board 398
Wei Cao (AVIC Manufacturing Technology Institute, China)

Online Monitoring of a Shaft Turning Process Based on Vibration Signals from On-Rotor Sensor 402
Chun Li (Beijing Institute of Technology, China; University of Huddersfield, UK), Bing Li (Beijing Institute of Technology, China), Lichang Gu (University of Huddersfield, UK), Guojin Feng (University of Huddersfield, UK), Fengshou Gu (University of Huddersfield, UK), and Andrew D Ball (University of Huddersfield, UK)

3. Mechatronics and Automation Technology

Research on the Principle of New Type Sensor Detection Circuit .408
YiHan Liu (Shanghai University of Engineering Science, China) and Jian Mao (Shanghai University of Engineering Science, China)

Research Progress of Mechanical Vibration Sensors .412
Feng Zhu (Shanghai University of Engineering Science, China) and Yufeng Zhou (Shanghai University of Engineering Science, China)

Design of Large Travel Displacement Automatic Measuring System Based on Hall Quadrature Sensor .417
Weiqing Jin (Xi'an Mingde Institute of Technology, China), Yu Li (Xi'an Mingde Institute of Technology, China), and Duxi Liu (Northwestern Polytechnical University, China)

The Design of Automatic Pipe Cutting and Grooving Machine Based on the Solid Works .422
Hong Wen (Shandong Transport Vocational College, China), Yuying Wang (Shandong Transport Vocational College, China), and Chuanfeng Yao (Shandong Transport Vocational College, China)

Design of Minimal Quantity Lubrication System with Improved PID Control .426
Jia Yuan (Chengdu University of Technology, China) and Niancong Liu (Chengdu University of Technology, China)

Fuzzy Neural Network Simulation of Vehicle Yaw Rate Control Based on PID .430
Hongtu Zhang (Beijing University of Technology, China), Donglai Xu (Beijing University of Technology, China), Yansheng Li (Beijing University of Technology, China), and Xudong Hu (Beijing University of Technology, China)

Automatic Control System of Biomass Pyrolysis Gas Carbon Compound Furnace Based on PLC .435
Biao Zhang (Beijing University of Technology, China), Dong-Lai Xu (Beijing University of Technology, China), Xu-dong Hu (Beijing University of Technology, China), and yuan Liu (Beijing University of Technology, China)

Parametric Design of Ball-Cage Constant Velocity Joint Based on CATIA Customized Development .443
Kui Zhang (Zhejiang Sci-Tech University, China), Yujun Lu (Zhejiang Sci-Tech University, China), Wei Wang (Zhejiang Sci-Tech University, China), and Aifang Xia (Zhejiang Sci-Tech University, China)

Design of Fuzzy PID Stepping Motor Controller Based on Particle Swarm Optimization .449
Min Li (Hubei University of Technology, China), Yang Zhang (Hubei University of Technology, China), and Dazhang You (Hubei University of Technology, China)

Simulation Analysis of Mechanical Property of Aircraft Throttle Controller .454
Xiaoyu Ni (Hebei University of Architecture, China), Canguo Zhang (Hebei University of Architecture, China), Guoqing Shi (Hebei University of Architecture, China), and Shaolei Wang (Hebei University of Architecture, China)

A Novel Robust Time-Varying Modal Parameter Estimation Method Based on Absolute Deviation for Missile and Rocket .458
Lei Yu (Xi'an Institute of modern control technology, People's Republic of China), Yong-Li Zhang (Xi'an Institute of modern control technology, People's Republic of China), Teng-Hui Li (Xi'an Institute of modern control technology, People's Republic of China), and Bin Sun (Xi'an Institute of modern control technology, People's Republic of China)

Clothing Pressure Test System Based on STM Single Chip Microcontroller .463
Kai Ma (Beijing Institute of Fashion Technology, China)

Key Performance Indicator for Application of Numerical Control Simulation Tools .468
Zhi Li (China Academy of Engineering Physics, China), ManCang Liang (China Academy of Engineering Physics, China), and Chao Guo (China Academy of Engineering Physics, China)

Simulation Design of Acceleration Sensor with Multi-stage Induction System .472
Jiacheng Feng (China Intelligent and Connected Vehicles (Beijing) Research Institude Co. Ltd, China), Juejian Wang (China Intelligent and Connected Vehicles (Beijing) Research Institude Co. Ltd, China), and Guihua Chen (China Intelligent and Connected Vehicles (Beijing) Research Institude Co. Ltd, China)

Research on Stability of Inverter with Fuzzy Digital Locked Loop .476
Zhihao Xu (Engineering Lanzhou university, China)

Design of Automatic Pipe Bender for Greenhouse Frame .483
Hong Wen (Shandong Transport Vocational College, China) and Chuanfeng Yao (Shandong Transport Vocational College, China)

Digital Design Technology and Its Application of Servo Device .487
Zifan Fang (China Three Gorges University, China) and Hongyu Zhang (China Three Gorges University, China)

Research on Equivalent Circuit Model of Lithium-ion Battery for Electric Vehicles .492
Kaifeng Huang (Engineering Technology Research Center of Rail Transit Power and Control; Huainan Normal University, China), Yong Wang (CenterNational Engineering Technology Research Institute of Coal Mining, China), and Juqiang Feng (Engineering Technology Research Center of Rail Transit Power and Control, China)

Design of DLP 3D Printer Control System Based on Arduino .497
Jian Liu (Jiangsu University of Technology, China), Jia-li Tang (Jiangsu University of Technology, China), and Chen-Yu Dai (Jiangsu Totes Technology Co., Ltd., China)

Design and Simulation of Multi-station Translation Cam Manipulator .501
Yingjie Wang (Shaanxi University of Science and Technology, China), Zhenghao Ge (Shaanxi University of Science and Technology, China), and Qiujie Zhao (Shaanxi University of Science and Technology, China)

Research on the Automatic Measurement of the Clearance Width of Flameproof Electrical Apparatus .508
Guofeng Dong (The Key Laboratory of Optical Fiber Sensing Technology of Shandong Province; Qilu University of Technology, China), Yuan Liu (The Key Laboratory of Optical Fiber Sensing Technology of Shandong Province; Qilu University of Technology, China), Jinyu Wang (The Key Laboratory of Optical Fiber Sensing Technology of Shandong Province; Qilu University of Technology, China), Jiqiang Wang (The Key Laboratory of Optical Fiber Sensing Technology of Shandong Province; Qilu University of Technology, China), and Tongyu Liu (The Key Laboratory of Optical Fiber Sensing Technology of Shandong Province; Qilu University of Technology, China)

Accuracy Evaluation Method of Non-Intrusive Load Identification Based on Load Component Analysis .512
Xingqi Liu (China Electric Power Research Institute, China), Enguo Zhu (China Electric Power Research Institute, China), Heping Zou (China Electric Power Research Institute, China), Hao Ding (China Electric Power Research Institute, China), and Zhongxing Wu (China Electric Power Research Institute, China)

Path Planning and Damage Analysis of Laser Ablation for Melanin in Skin .517
Ruixue Zhang (Beijing University of Posts and Telecommunications, China)

3D Reconstruction Based Plant-Monitoring and Plant-Phenotyping Platform .522
Chenhui Lin (Shanghai Jiaotong University, China), Hong Wang (Institute of Facility Horticulture, Shanghai Academy of Agricultural Sciences, China), Chengliang Liu (Shanghai Jiaotong University, China), and Liang Gong (Shanghai Jiaotong University, China)

4. Mechanical Engineering and Control Technology

Research on Control Method of Linear-Generator System Used for Free-Piston Energy Converter in Range Extenders .527
Yunqi Liu (Beijing Institute of Technology, China), Zhengxing Zuo (Beijing Institute of Technology, China), Huihua Feng (Beijing Institute of Technology, China), and Yao Wang (Beijing Institute of Technology, China)

The Control Research Based on Predictive Current Controlled PMSM Drive .532
Mao Lin (Air Force Engineering University, China), Yinghui Li (Air Force Engineering University, China), HaoJun Xu (Air Force Engineering University, China), XinMin Han (Air Force Engineering University, China), and YiPeng Chang (Air Force Engineering University, China)

One Dimensional Particle Simulation Analysis Based on SPH Method .536
Li Cheng (Shen Yang University), Chao Zhang (Shen Yang University), and Daolin Xiao (Shen Yang University)

Research on Operation Mechanisms and Temperature Field for Outer Squirrel-Cage Magnetic Coupler .540
Yanjun Ge (Dalian Jiaotong University, China), Zhe Zhou (Dalian Jiaotong University, China), Jianan Liu (Dalian Jiaotong University, China), and Guangwei Ren (Dalian Jiaotong University, China)

Modeling and Numerical Simulations of an Active Vibration Isolation Module by the Power Flow Analysis .546
Qiang Yu (University of Electronic Science and Technology of China, China) and Deng-feng Xu (Tsinghua University, China)

Summarize of the Linear Motor .552
Yuying Wang (Shandong Transport Vocational College, China), Hong Wen (Shandong Transport Vocational College, China), and Tiewei Bu (Shandong Transport Vocational College, China)

Design Optimization and Simulation Analysis of Grab Sampling Head .556
Daolin Xiao (Shenyang Institute of Automation, Chinese Academy of Sciences; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Wei Zhang (Shenyang Institute of Automation, Chinese Academy of Sciences; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Zhaowei Zhang (Shenyang Institute of Automation, Chinese Academy of Sciences; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Chao Zhang (Shenyang Institute of Automation, Chinese Academy of Sciences; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), and Sheng Gao (Shenyang Institute of Automation, Chinese Academy of Sciences; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China)

An Efficient Subset Simulation Based on the Active Learning Kriging Model for Structural Reliability Analysis .561
Jingkui Li (Shenyang Aerospace University, China) and Bomin Wang (Shenyang Aerospace University, China)

A N=3 MEMS Disk Gyroscope Operating in Force to Rebalance Mode with 103 PPM Initial Frequency Splitting .566
Yi Zhou (Nanjing University of Science & Technology, China), Qi Fan (Nanjing University of Science & Technology, China), Mengxiang Liu (Nanjing University of Science & Technolog, China), Jingbo Ren (Nanjing University of Science & Technology, China), Tong Zhou (Nanjing University of Science & Technology, China), and Yan Su (Nanjing University of Science & Technology, China)

Waiting Traffic Volume Calculation Rule of Phase for Self-Organizing Control of Urban Traffic Signal .571
Anlin Wang (Tongji University, China), Qiancheng Ding (Tongji University, China), Guangcheng Long (Tongji University, China), and Tao Jiang (Tongji University, China)

Gear Checking for the Sun Gear in Planet-Gear Reducer Based on Practical Engineering Application .575
Shuai Ma (China north vehicle research Institute, China), Yue-jiang Shi (China north vehicle research Institute, China), Yun-kun Gao (China north vehicle research Institute, China), and Jin-long Guo (China north vehicle research Institute, China)

Lightweight Design of an Airborne Radar Mounting Bracket Based on Additive Manufacturing .579
Xiaolei Feng (Nanjing Research Institute of Electronics Technology, China), Zhigang Yang (Nanjing Research Institute of Electronics Technology, China), and Ji Zhou (Nanjing Research Institute of Electronics Technology, China)

Analysis and Synthesis of Cardioid Crank Guide-Bar Mechanism with Approximate Uniform Motion .583
Jiguang Han (Jiangsu Normal University, China) and Haotong Han (Jiangsu Huai Gong Vehicle Testing Research Institute Co. LTD, China)

The Large Diameter Replaceable Flush Pipe Assembly Design and Engineering Application .588
Yong Gao (Xi'an Research Institute, China Coal Technology and Engineering Group Corp, China)

Research Progress on Vapor Injection Heat Pump System for Electric Vehicles .592
Xin Luo (Beijing Institute of Technology, China), Fen Guo (Beijing Institute of Technology, China), Yichun Wang (Beijing Institute of Technology, China), Xiuhui Duan (Beijing Institute of Technology, China), and Xiaohan Zhang (Beijing Institute of Technology, China)

Numerical Simulation Analysis of Different Flow Directions in Natural Gas Pipeline .597
Hong-Wei Yan (North University of China, China), Lu Wang (North University of China, China), Peng-Cheng Li (North University of China, China), Yi Liu (North University of China, China), Jian Li (North University of China, China), and Xiu-Ye Wei (Shanxi Key Laboratory of Advanced Manufacturing Technology, North University of China, China)

Finite Element Analysis and Topology Optimization of Triangular Track's Load-Bearing Wheels .603
Lihao Yang (High-Tech institute of Xi'an, P R China), Changhua Hu (High-Tech institute of Xi'an, P R China), Qi Zhang (High-Tech institute of Xi'an, P R China), Jianfei Zheng (High-Tech institute of Xi'an, P R China), and Yubin Wu (High-Tech institute of Xi'an, P R China)

Wear of Sprag Clutch in the Transmission State Under Unsteady Fluctuation of Input Speed .607
Jia Li (Central South University, China) and Hongzhi Yan (Central South University, China)

Energy Consumption Model of Diamond Disc Sawing Machine with Variable Material Removal Rate .613
Liqiang Luan (Qingdao University, China) and Shuowei Bai (Qingdao University, China)

Identifying Key Parts of Complex Mechanical Products Based on Evidence Theory .620
Jiakun Zhang (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China), Kun Chen (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China), Jianmin Gao (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China), Jiadong Jiang (Key Laboratory of Quality Infrastructure Efficacy Research, China), and Zhiyong Gao (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China)

The Influence of Groove Types on Air Bearing Properties .626
Kun Wei (Shanghai University of Electric Power, China), Naichao Chen (Shanghai University of Electric Power, China), Shuai Chen (Shanghai University of Electric Power, China), Fan Zhou (Shanghai University of Electric Power, China), and Ping He (Shanghai University of Electric Power, China)

Stability Analysis of Singular Networked Control Systems with Short Time-Varying Delay .631
Hongyan Zhou (University of Science and Technology Liaoning, China), Hua Li (University of Science and Technology Liaoning, China), Zhao Zhang (University of Science and Technology Liaoning, China), and Xuebo Chen (University of Science and Technology Liaoning, China)

Comparative Analysis and Experimental Study on Single-Wrap and Double-Wrap Scroll Compressor .635
Pengcheng Zhang (Lanzhou University of Technology, China), Bin Peng (Lanzhou University of Technology, China), and Yubo Zhang (Lanzhou University of Technology, China)

Research on Risk Assessment of Vehicle Failsafe .642
Chong Peng (Southwest Forestry University, China) and Sheng-wen Yang (Southwest Forestry University, China)

Influence of Supporting Stiffness on Critical Speed of Aero-Engine .646
Liquan Chen (Shanghai University, China) and Jingjing Xu (Shanghai University, China)

Effects of Rear Window Angle on Car Aerodynamic Characteristics .650
Haitao Bao (huaiyin institute of technology, China), Cheng Wang (huaiyin institute of technology, China), and Yonghai Wu (huaiyin institute of technology, China)

Development and Experiment of Elastic-Rope Launcher for Small Fixed-Wing UAVs .654
Yafei Lu (National University of Defense Technology, China), Qingyang Chen (National University of Defense Technology, China), Gaowei Jia (National University of Defense Technology, China), and Zheng Guo (National University of Defense Technology, China)

Influence of Nozzle Structure on Propulsion Performance of Laser Thruster .659
Zhaobin Tan (North China Institute of Aerospace Engineering), Xianbiao Zhan (North China Institute of Aerospace Engineering), and Shangqing Xin (North China Institute Of Aerospace Engineering)

Numerical Simulation of Lubrication Film in Piston Ring of Fuel Dispenser Flowmeter Based on Hydrodynamic Lubrication .664
Yajun Liu (South China University of Technology, China), Qi Luo (South China University of Technology, China), Shenchao Zhang (South China University of Technology, China), and Liya Wang (South China University of Technology, China)

Research on Modular Design Method for Typical Insulation Fault of Power Cable .674
Zhihua Lu (Guangdong Power Grid Co., Ltd., China), Danbing Liu (Guangdong Power Grid Co., Ltd., China), and Jiaming Huang (Guangdong Power Grid Co., Ltd., China)

Isomorphism Identification Algorithm of the Planar Multiple Joint Kinematic Chains .679
Yanhuo Zou (Haixi Institutes, Chinese Academy of Science; Quanzhou Institute of Equipment Manufacturing, China) and Yongtai Yang (Haixi Institutes, Chinese Academy of Science; Quanzhou Institute of Equipment Manufacturing, China)

Structural Automatic Synthesis of Planar Simple Joint Kinematic Chains .684
Yanhuo Zou (Haixi Institutes, Chinese Academy of Science, China; Quanzhou Institute of Equipment Manufacturing, China) and Yongtai Yang (Haixi Institutes, Chinese Academy of Science, China; Quanzhou Institute of Equipment Manufacturing, China)

Study on the Performance of Disturbance Flow Fan with Bionic Sparrow Hawk Blade .688
Lei Diao (Guizhou University, China) and Feng He (Guizhou University, China)

Power System Short Term Load Forecasting Based on Weather Factors .694
Shuai Di (Datang Northeast Electric Power Test & Research Institute Co., Ltd, China)

Research on Scheduling Optimization of Free-Floating Bike Sharing Based on Improved Ant Colony Algorithm .699
Shenshen Deng (Wuhan University of Science and Technology, China), Yun Cai (Wuhan University of Science and Technology, China), and Hegen Xiong (Wuhan University of Science and Technology, China)

Research on Stochastic Resonation-Hilbert Transform Method for Fault Diagnosis of Rolling Bearings .703
Qian Xiang (Wuchang Institute of Technology, China) and Yan-Wu Wang (Wuhan Donghu University, China)

Optimization of Garlic Digging Shovel Parameters Based on EDEM and Quadratic Regression Orthogonal Rotation Combination Design .707
Weitao Huang (University of Jinan, China), Dong Zhao (University of Jinan, China), Cheng Liu (University of Jinan, China), Xianjiang Meng (University of Jinan, China), Linghui Kong (University of Jinan, China), and Wenhao Du (University of Jinan, China)

System Nonlinear Analysis for Frequency-Modulated Gyroscope .712
Mengxiang Liu (MEMS Inertial Technology Research Center, Nanjing University of Science & Technology, China), Qi Fan (MEMS Inertial Technology Research Center, Nanjing University of Science & Technology, China), Yi Zhou (MEMS Inertial Technology Research Center, Nanjing University of Science & Technology, China), and Yan Su (MEMS Inertial Technology Research Center, Nanjing University of Science & Technology, China)

On-Line Detection of Valve Gas Leakage by Sensing Untrasonic Impedance .716
Xinhai Yu (East China University of Science and Technology, China) and Longhua Liu (East China University of Science and Technology, China)

Displacements Transfer in Static Aeroelastic Analysis Using Least-Squares Fitting Method .722
Yunhe Cheng (Northwestern Polytechnical University, China) and Qin Sun (Northwestern Polytechnical University, China)

Research On The Parametric Design Of Hydrautic Station Tank Unit Based On Creo .728
Jiale Wang (Hohai University, China), Kaiwen Zhou (Hohai University, China), Minghai Yuan (Hohai University, China), and Chenxi Zhang (Hohai University, China)

Vibration Analysis of High Pressure Mud Piping Systems and Vibration Reduction Method .732
Hong-Mei Xu (Yantai University, China) and Bo Wang (Huazhong university of science and technology, China)

Optimized Design of Power Supply Mounting Frame in Airborne Radar .738
Henghai Wang (Nanjing Research Institute of Electronics Technology, China)

Community Division of Multi-factor Coupled Complex Network Based on Graph Neural Network 742
Juntai Xie (Xi'an Jiaotong University, China), Jing Huang (Xi'an Jiaotong University, China), Jianmin Gao (Xi'an Jiaotong University, China), Zhiyong Gao (Xi'an Jiaotong University, China), and Jiadong Jiang (Key Laboratory of Quality Infrastructure Efficacy Research, China)

Research on Cooperative Scheduling of Berths, Quay Cranes and Container Trucks Based on Multi-population Genetic Algorithm at Container Terminals .747
Meng Yu (Wuhan University of Technology, China), Yucong Ren (Wuhan University of Technology, China), and Xiaoyun Ma (Wuhan University of Technology, China)

Kinematic Analysis for the Novel Parallel Three Fingers .752
Canguo Zhang (College of Mechanical Engineering, China), Xiaogang Gao (College of Mechanical Engineering, China), Shaolei Wang (College of Mechanical Engineering, China), and Mingchao Geng (College of Mechanical Engineering, China)

Optimization Design of Distributed Drive Vehicle Reducer Based on Improved Particle Swarm Optimization Algorithm .757
Zhongyan Lin (Tongji University, China), Jiantao Zhang (Tongji University, China), Xiang Xu (Tongji University, China), Jiawei Chen (Tongji University, China), and Xinbo Chen (Tongji University, China)

Life Prediction of Outer Oil Pipe of Controllable Pitch Propeller Based on Test and Finite Element Method .763
Lu Zhou (Shanghai University, China), Guangwei Yu (Shanghai University, China), and Xiangyu Cai (Shanghai University, China)

An MI-BRB Based Health State Assessment Methodology for Running Gears in High-Speed Trains..... 768
Lijuan Zhu (Jilin University, China)

Design and Research of Multi-chip Rotary Cleaning Equipment for Quartz Wafer .773
Linlin Wei (Shaanxi University of Science and Technology, China), Zhenghao Ge (Shaanxi University of Science and Technology, China), Congrui Lei (Shaanxi University of Science and Technology, China), and Pengyu Bai (Shaanxi University of Science and Technology, China)

Mechanical Analysis and Optimal Design of On-board Fuel Cell System Steel Frame Structure Under Impact and Vibration Load .779
Jing Li (Tongji University, China), Jing Xue (Tongji University, China), and Pingwen Ming (Tongji University, China)

Analysis and Optimization of Screw Failure of Synchronous Rod Bracket .785
Di Chen (Nanjing Institute of Technology, China), Yunxia Wang (Nanjing Institute of Technology, China), Ruilong Liu (Nanjing Kangni Mechanical and Electrical Co., Ltd, China), and Longjing Qiu (Nanjing Kangni Mechanical and Electrical Co., Ltd, China)

Lightweight Design of Ti6Al4V Small Scale Spatial Structure Based on Topology Optimization.789
Siyuan Peng (Jianghan University, China), Liang Xuan (Jianghan University, China), Yuanyuan Yi (Jianghan University, China), and Xuan Yang (Jianghan University, China)

Modeling and Experimental Study of Vehicle Dynamic Characteristics .793
Youjie Wang (Tianjin aerospace reliability technology Co., Ltd., China), Yue Liu (Tianjin aerospace reliability technology Co., Ltd., China), and Lutao Yan (Beijing University of Posts and Telecommunications, China)

Analysis of Factors Affecting the Tightness of Sliding Plug Doors of Intercity Trains .798
Ping Ni (Nanjing Institute of Technology, China), Yunxia Wang (Nanjing Institute of Technology, China), and Hui Wang (Nanjing Kangni Electromechanical Co., Ltd., China)

Design and Simulation Analysis of Ultrasonic Extrusion Transducer .802
HaiLi Jia (Tianjin University Of Technology And Education, China), YuChen Wang (Tianjin University Of Technology And Education, China), Fan Kong (Tianjin University Of Technology And Education, China), and Hua Zhao (Tianjin University Of Technology And Education, China)

Mechanical Stability Analysis of Running Deepwater Tree .806
Xiujuan Lin (Weihai Vocational College, China)

Pneumatic Actuator Based Tracheal Intubation System .810
Zhaohui Liang (Shanghai Jiao Tong University, China), Haoyuan Miao (Shanghai Jiao Tong University, China), Ziyi Guo (Shanghai Jiao Tong University, China), Xiaoxiao Zhu (Shanghai Jiao Tong University, China), Xinyu Wang (Third Affiliated Hospital of Naval Medical University, China), Qixin Cao (Shanghai Jiao Tong University, China), Xiandong Tao (Third Affiliated Hospital of Naval Medical University, China), and Tiewen Pan (Third Affiliated Hospital of Naval Medical University, China)

Research on Bearing Capacity Parameters of Radial Enveloping Ultrasonic Levitation Bearing.815
Shuai Lv (Dalian Jiaotong University, China), Dongming Li (Dalian Minzu University, China), and Wenqiang Shen (Dalian Jiaotong University, China)

A Simple Garbage Bin Design for Garbage Classification and Recycling .819
Junyan Wang (Shandongjianzhu University, China), Ziqiang Hu (Shandongjianzhu University, China), Shihang Bi (Shandongjianzhu University, China), Zechao Zhang (Shandongjianzhu University, China), Junxiang Wang (Shandongjianzhu University, China), Baojian Liu (Shandongjianzhu University, China), and Yifei Chen (Shandongjianzhu University, China)

Dynamic Characteristics Analysis of Conjugate Cam Beating-up Mechanism of Rapier Loom ..823..
Yang Li (Tiangong University, China), Guoguang Jin (Tiangong University, China; Tianjin Key Laboratory of Advanced Mechatronics Equipment Technology, Tiangong University, China), Zhan Wei (Tiangong University, China; Tianjin Key Laboratory of Advanced Mechatronics Equipment Technology, Tiangong University, China), and Yanyan Song (Tiangong University, China)

Design and Research of Anti-Collision Device Based on Stiffness Matching ..831.....
Chunjuan Shi (Air Force Engineering University, China) and Zhiyong Sun (Air Force Engineering University, China)

Author Index 835 . . . . . .
