Volume 11590

Proceedings of SPIE 0277-786X, V. 11590

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nano-, Bio-, Info-Tech Sensors and Wearable Systems*, edited by Jaehwan Kim, Proc. of SPIE 11590, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

WEARABLE TECHNOLOGIES

- 11590 04 **Printed skin-conformal bioelectronics for wireless continuous stress monitoring and management (Invited Paper) [11590-2]**
- 11590 05 **Automated classification of bimanual movements in stroke telerehabilitation: a comparison of dimensionality reduction algorithms [11590-24]**

WEARABLE TECHNOLOGIES AND MEDICINE APPLICATION

- 11590 06 **Development of a nanosensor-integrated stent for wireless, continuous monitoring of restenosis progression (Invited Paper) [11590-4]**
- 11590 07 **Pressure mapping using a nanocomposite Smartfoam and electrical impedance tomography [11590-5]**
- 11590 09 **Phosphorene-based nanosensor for lung cancer detection [11590-7]**

3D PRINTING AND NOVEL MATERIALS

- 11590 0B **Optimization of 3D printing parameters of twin-screw extruder for high concentration nanocellulose (Invited Paper) [11590-9]**
- 11590 0C **3D-printed pressure sensor with heterogeneous polymer material and annealing effect [11590-10]**

NOVEL MATERIALS

- 11590 0I **Gamma irradiation effect studies on monolayer molybdenum disulfide on metallic substrates [11590-16]**

ENERGETIC MATERIALS AND POWER SYSTEMS

- 11590 0P **Infrared spectra in air pollution research and monitoring from space: a review [11590-23]**

POSTER SESSION

- 11590 0Q **A virtual reality interface to test wearable electronic travel aids for the visually impaired**
[11590-3]
- 11590 0U **Graphene kinesiology tape for monitoring distributed human movements of the ankle-foot complex** [11590-28]
- 11590 0W **3D printed polypyrrole scaffolds for pH-dependent drug delivery for bone regeneration**
[11590-30]
- 11590 0X **Near-field communication for battery-free in vivo sensors** [11590-31]
- 11590 0Y **New optical pressure sensor based on the Fabry-Perot interferometer combined with mechanoluminescence diaphragm** [11590-32]
- 11590 0Z **A study on shunt damping performance, current servo response, and energy harvesting analysis for voice coil motors** [11590-33]
- 11590 10 **Simulation of dissociation using resources on the lunar for in-situ resource utilization (ISRU)**
[11590-34]
- 11590 11 **Analyzing functional connectivity in the brain using cross-correlation analysis of local field potentials** [11590-35]
- 11590 12 **Signal processing to improve speed and accuracy of electrical impedance tomography imaging** [11590-36]
- 11590 13 **Bessel ultrasonic sensor for large volumetric optical-resolution photoacoustic microscopy for based on conical acoustic lens** [11590-38]
- 11590 14 **Optimal design of Bessel acoustic lens suitable for optical-resolution photoacoustic microscope with large depth of field** [11590-39]
- 11590 15 **Simulation study of interaction of Bessel beam with brain based on COMSOL** [11590-40]
- 11590 16 **Visualization of Airy-beam large volumetric sensing photoacoustic microscopy based on K-wave** [11590-41]
- 11590 17 **Virtual compressed sensing photoacoustic tomography with high-detection efficiency using k-wave** [11590-42]
