Volume 11622

Proceedings of SPIE, 1605-7422, V. 11622

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multiscale Imaging and Spectroscopy II*, edited by Paul J. Campagnola, Kristen C. Maitland, Darren M. Roblyer, Proc. of SPIE 11622, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LIGHT AND DATA

- 11622 06 **A novel method for the generation of linear structured illumination for structured illumination microscopy [11622-4]**

MULTISCALE IMAGING IN ONCOLOGY

- 11622 0E **Optical imaging of zebrafish xenograft tumors for a high throughput drugs screen [11622-12]**
- 11622 0H **Vibrational coherent control toward spectroscopic sensing and imaging applications [11622-15]**

EMERGING SOURCES OF CONTRAST I

- 11622 0N **Analysis on the photonic transmission and heat transfer of pulsed laser and breast cancer based on COMSOL multiphysics [11622-21]**

EMERGING SOURCES OF CONTRAST II

- 11622 0R **Design and operation analysis of a fabricated spectracoustic probe for tissue classification in microscopic level [11622-25]**
- 11622 0S **Simulation platform of Bessel-beam photoacoustic microscopy using k-wave [11622-26]**

POSTER SESSION

- 11622 0T **Early breast tumor detection utilizing thermal time-response imaging [11622-27]**
- 11622 0U **Multi-scale photoacoustic microscopy by integrating optical-resolution photoacoustic microscopy and acoustic-resolution photoacoustic microscopy using multi-dimension optical fiber [11622-28]**
- 11622 0X **Simulation platform of photoacoustic spectrum analysis based on k-space pseudospectral method [11622-31]**
