Volume 11630

Proceedings of SPIE, 1605-7422, V. 11630

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXV*, edited by Joseph A. Izatt, James G. Fujimoto, Proc. of SPIE 11630, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NEURAL/BRAIN

11630 0A **Optical coherence angiography to assess the combined effects of alcohol and nicotine on fetal brain vasculature** [11630-6]

OPHTHALMIC NEW TECHNOLOGY

11630 0N **Retinal phantom mimicking superficial vascular networks and full retinal layers for OCT and OCT-angiography** [11630-19]

GI/PULMONARY NEW TECHNOLOGY

11630 0T **Evaluation of machine learning techniques for Barret's and dysplasia discrimination of the esophagus from in vivo optical coherence tomography images** [11630-25]

MACHINE LEARNING/IMAGE PROCESSING

11630 10 **A GCN-assisted deep learning method for peripapillary retinal layer segmentation in OCT images** [11630-32]

11630 12 **Artefact removal for quantum optical coherence tomography using machine learning** [11630-34]

NOVEL CONTRAST

11630 17 **Characterization of RBC flux and velocity measurements in OCT with concurrent two-photon microscopy** [11630-39]

MICROSTRUCTURE IMAGING

11630 19 **Single-shot 4-phase shifting optical coherence microscopy** [11630-41]

11630 1E **OCT based cross-sectional and three-dimensional dynamics imaging for visualization and quantification of tumor spheroid activity** [11630-46]

11630 1F **Mirau-type full-field optical coherence tomography** [11630-47]

11630 1G **Dynamic optical coherence microscopy with model-based motion reduction** [11630-48]

OCT NEW TECHNOLOGY

11630 1M **Advantage of low NEP balanced receivers in swept source OCT** [11630-54]

11630 1N **Motion-compensated optical coherence tomography based on higher-order regression for real-time volumetric imaging** [11630-55]

POSTER SESSION

11630 1Q **Volumetric multi-contrast dynamics imaging for ex vivo liver microvasculature activity visualization using Jones matrix optical coherence tomography** [11630-58]

11630 1R **Optical coefficients as tools for increasing the optical coherence tomography contrast for breast cancer margin detection** [11630-59]

11630 1S **Creating a depth-resolved OCT-dataset for supervised classification based on ex vivo human brain samples** [11630-60]

11630 1T **Characterization of brain tumor tissue with 1310 nm optical coherence tomography** [11630-61]

11630 1U **Heartbeat optical coherence elastography: using heartbeat to measure corneal biomechanical properties** [11630-62]

11630 1Z **Deep-learning for thyroid microstructure segmentation in 2D OCT images** [11630-67]

11630 20 **Multi-contrast imaging with computational refocusing in polarization-sensitive optical coherence tomography** [11630-68]

11630 21 **Sample and system parameter estimation from local speckle pattern by fully numerically trained deep convolution neural network** [11630-69]

11630 23 **OCT applications in optics R&D and manufacturing** [11630-71]

11630 24 **Development of dual-side view swept source optical coherence tomography for opaque materials thickness measurement** [11630-72]

11630 26 **An iterative algorithm for artifacts removal in Fourier-domain optical coherence tomography** [11630-74]
