SPIE

Volume 11663

Proceedings of SPIE, 1605-7422, V. 11663

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Integrated Sensors for Biological and Neural Sensing*, edited by Hooman Mohseni, Proceedings of SPIE Vol. 11663 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

ISSN: 1605-7422

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NEURAL INTERFACES

- 11663 05 Large-scale neural interfaces for optogenetic actuators and sensors in non-human primates (Invited Paper) [11663-17]
- 11663 08 Chronic multi-modal monitoring of neural activity in rodents and primates (Invited Paper) [11663-20]
- 11663 0A Detecting and decoding spiking activity from sample populations of single motor neurons using wearable sensors (Invited Paper) [11663-22]
- 11663 0B Kernel flow: a high channel count scalable TD-fNIRS system (Invited Paper) [11663-23]

NOVEL BIOSENSING MATERIAL & METHODS

- 11663 0I Integrated functional characterization and optical tagging for cell-type identification (Invited Paper) [11663-29]

MOBILE DIAGNOSTICS & PERSONAL CARE

- 11663 0K Photonic metamaterial surfaces for digital resolution biosensor microscopies using enhanced absorption, scattering, and emission (Invited Paper) [11663-8]
- 11663 0P Enhanced multifunctional bioelectronics with integrated organic electrochemical transistor architectures (Invited Paper) [11663-13]

POSTER SESSION

- 11663 0X An integrated opto-microfluidic device for microflow cytometry [11663-30]
- 11663 0Y Real time analysis of phosphate transitions from adenosine triphosphate [11663-31]
- 11663 0Z Microfluidic reaction modeling for evaluating mass transfer of enzymes [11663-32]
- 11663 14 Integrated amplifier with complementary organic electrochemical transistors for high-sensitivity ion detection and real-time monitoring [11663-37]
