SPIE

Volume 11675

Proceedings of SPIE 0277-786X, V. 11675

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Synthesis and Photonics of Nanoscale Materials XVIII*, edited by David B. Geohegan, Andrei V. Kabashin, Jan J. Dubowski, Maria Farsari, Proc. of SPIE 11675, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SYNTHESIS AND CHARACTERIZATION OF NANOSCALE QUANTUM MATERIALS

- 11675 03 **Plasmonic uni-traveling-carrier photodiode** [11675-1]
- 11675 04 **In situ electron-beam processing and cathodoluminescence microscopy for quantum nanophotonics** [11675-2]
- 11675 05 **Room-temperature molecular layer deposition of inorganic-organic hybrid aluminum oxide thin films for preventing spin relaxation of cell inner wall of optically pumped atomic magnetometer** [11675-3]
- 11675 06 **Nanodiamonds by laser filamentation in ethanol** [11675-4]

SYNTHESIS AND PROCESSING OF ATOMICALLY-THIN 2D MATERIALS

- 11675 0C **Laser patterning and crystallization of 2D materials on rigid and flexible substrates** [11675-10]
- 11675 0F **Laser-based synthesis of atomically thin monolayer 2D quantum materials** [11675-13]

SIMULATING LASER INTERACTIONS AT THE NANOSCALE

- 11675 0L **Effective medium-based optical real-time control over plasmon tuning in laser-induced nanocomposites (Invited Paper)** [11675-19]
- 11675 0N **Raman spectroscopy of colloidal nanoparticles: are we measuring what we think we are measuring?** [11675-22]
