Volume 11744

Proceedings of SPIE 0277-786X, V. 11744

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Radar Technology and Applications XXVI*, edited by Monte D. Turner, Gary W. Kamerman, Proc. of SPIE 11744, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NOVEL LIDAR SENSING APPLICATIONS

- 11744 03 **Using principle component analysis to estimate geometric parameters from point cloud LIDAR data** [11744-2]
- 11744 04 **Extraction of precise object orientation and position from LIDAR data using maximum-likelihood methods** [11744-3]

BATHMETRY AND ATMOSPHERICS

- 11744 06 **Simulation and optimization-based method of environmental parameter distribution from airborne bathymetric LIDAR data** [11744-5]

LASER AND SYSTEM COMPONENT ADVANCEMENTS

- 11744 0B **Thermal drift compensation in dark-frame non-uniformity correction for an InGaAs PIN 3D flash lidar camera** [11744-10]
- 11744 0C **In-situ proton radiation testing of 2.4 micron wavelength extended InGaAs photodiodes at dry ice and room temperatures** [11744-11]
- 11744 0D **Maturation of a single frequency ErYAG laser for water vapor/methane DIAL application** [11744-12]
- 11744 0F **Range-compensating lens design, implementation and experimental results** [11744-18]

ADVANCED AIR/GROUND LIDAR SYSTEMS AND USE

- 11744 0G **Random field models for spatial smoothing of airborne lidar transect data** [11744-14]
- 11744 0I **Compact laser altimeter dedicated to drone ballistic carriers** [11744-16]
- 11744 0J **Land movement detection from terrestrial laser scanner (LiDAR) analysis** [11744-17]
