Table of Contents

Message from the General Chair and Program Co-Chairs	xv
Organizing Committee	xvii
Program Committee	xix
Steering Committee	xxi
Keynotes	xxii

Research Track

Towards Understanding Tool-Chain Bugs in the LLVM Compiler Infrastructure	1
<i>Xiaoyuan Xie (Wuhan University), Haolin Yang (Nanjing University), Qiang He (Swinburne University of Technology), and Lin Chen (Nanjing University)</i>	
Analyzing and Detecting Emerging Quality-Related Concerns Across OSS Defect Report Summaries	12
<i>Rrezarta Krasniqi (University of Notre Dame, USA) and Ankit Agrawal (University of Notre Dame, USA)</i>	
An Empirical Study for Common Language Features Used in Python Projects	24
<i>Yun Peng (University of Science and Technology of China, China), Yu Zhang (University of Science and Technology of China, China), and Mingzhe Hu (University of Science and Technology of China, China)</i>	
Graph Neural Network Based Collaborative Filtering for API Usage Recommendation	36
<i>Chunyang Ling (Peking University, China), Yanzhen Zou (Peking University, China), and Bing Xie (Peking University, China)</i>	
MulCode: A Multi-Task Learning Approach for Source Code Understanding	48
<i>Deze Wang (National University of Defense Technology, China), Yue Yu (National University of Defense Technology, China), Shanshan Li (National University of Defense Technology, China), Wei Dong (National University of Defense Technology, China), Ji Wang (National University of Defense Technology, China), and Liao Qing (Harbin Institute of Technology (Shenzhen), China)</i>	
A Neural Question Answering System for Basic Questions about Subroutines	60
<i>Aakash Bansal (University of Notre Dame, USA), Zachary Eberhart (University of Notre Dame, USA), Lingfei Wu (IBM Research, USA), and Collin McMillan (University of Notre Dame, USA)</i>	

A Multi-Metric Ranking Approach for Library Migration Recommendations	72
<i>Hao He (Peking University, China), Yulin Xu (Peking University, China), Yixiao Ma (Peking University, China), Yifei Xu (Peking University, China), Guangtai Liang (Huawei Technologies Co., Ltd., China), and Minghui Zhou (Peking University, China)</i>	
HashMTI: Scalable Mutation-Based Taint Inference with Hash Records	84
<i>Xiangdong Kong (National University of Defense Technology, China), Yong Tang (National University of Defense Technology, China; Hunan Normal University, China), Pengfei Wang (National University of Defense Technology, China), Shuning Wei (Hunan Normal University, China), and Tai Yue (National University of Defense Technology, China)</i>	
Is the Ground Truth Really Accurate? Dataset Purification for Automated Program Repair	96
<i>Deheng Yang (National University of Defense Technology, China), Yan Lei (Chongqing University, China), Xiaoguang Mao (National University of Defense Technology, China), David Lo (Singapore Management University, Singapore), Huan Xie (Chongqing University, China), and Meng Yan (Chongqing University, China)</i>	
OTA: An Operation-Oriented Time Allocation Strategy for Greybox Fuzzing	108
<i>Xumei Li (Ocean University of China, China), Lei Sun (Ocean University of China, China), Ruobing Jiang (Ocean University of China, China), Haipeng Qu (Ocean University of China, China), and Zhen Yan (Ocean University of China, China)</i>	
Leveraging Stack Overflow to Detect Relevant Tutorial Fragments of APIs	119
<i>Di Wu (Wuhan University), Xiao-Yuan Jing (Wuhan University, Guangdong University of Petrochemical Technology), Hongyu Zhang (The University of Newcastle), Yuming Zhou (Nanjing University), and Baowen Xu (Nanjing University)</i>	
Binary Level Toolchain Provenance Identification with Graph Neural Networks	131
<i>Tristan Benoit (Université de Lorraine, France), Jean-Yves Marion (Université de Lorraine, France), and Sébastien Bardin (Université Paris-Saclay, France)</i>	
Assessing Time-Based and Range-Based Strategies for Commit Assignment to Releases	142
<i>Felipe Curty do Rego Pinto (Universidade Federal Fluminense, Brazil), Bruno Costa (Instituto Federal de Educação, Brazil), and Leonardo Murta (Universidade Federal Fluminense, Brazil)</i>	
XSnare: Application-Specific Client-Side Cross-Site Scripting Protection	154
<i>Jose Carlos Pazos (University of British Columbia), Jean-Sébastien Légaré (University of British Columbia), and Ivan Beschastnikh (University of British Columbia)</i>	
Combining Query Reduction and Expansion for Text-Retrieval-Based Bug Localization	166
<i>Juan Manuel Florez (The University of Texas at Dallas), Oscar Chaparro (College of William and Mary), Christoph Treude (The University of Adelaide), and Andrian Marcus (The University of Texas at Dallas)</i>	
A Survey-Based Empirical Evaluation of Bad Smells in LabVIEW Systems Models	177
<i>Xin Zhao (University of Alabama, USA), Jeff Gray (University of Alabama, USA), and Taylor Riché (National Instruments, USA)</i>	

DeepCon: Contribution Coverage Testing for Deep Learning Systems	189
<i>Zhiyang Zhou (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Wensheng Dou (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Institute of Software Technology, China), Jie Liu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Chenxin Zhang (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jun Wei (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Dan Ye (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
FrameFix: Automatically Repairing Statically-Detected Directive Violations in Framework Applications	201
<i>Zack Coker (Carnegie Mellon University), Joshua Sunshine (Carnegie Mellon University), and Claire Le Goues (Carnegie Mellon University)</i>	
VIVA: Binary Level Vulnerability Identification via Partial Signature	213
<i>Yang Xiao (Institute of Information Engineering, China), Zhengzi Xu (Nanyang Technological University, Singapore), Weiwei Zhang (University of Science and Technology of China, China), Chendong Yu (Institute of Information Engineering, China), Longquan Liu (Institute of Information Engineering, China), Wei Zou (Institute of Information Engineering, China), Zimu Yuan (Institute of Information Engineering, China), Yang Liu (Nanyang Technological University, Singapore), Aihua Piao (Institute of Information Engineering, China), and Wei Huo (Institute of Information Engineering, China)</i>	
Assessing Code Clone Harmfulness: Indicators, Factors, and Counter Measures	225
<i>Bin Hu (Fudan University, China), Yijian Wu (Fudan University, China), Xin Peng (Fudan University, China), Jun Sun (Singapore Management University, Singapore), Nanjie Zhan (Fudan University, China), and Jun Wu (Fudan University, China)</i>	
The Usability (or Not) of Refactoring Tools	237
<i>Anna Maria Eilertsen (University of Bergen, Norway) and Gail C. Murphy (University of British Columbia, Canada)</i>	
Javadoc Violations and Their Evolution in Open-Source Software	249
<i>Marcel Steinbeck (University of Bremen, Germany) and Rainer Koschke (University of Bremen, Germany)</i>	
Quality Assurance for Automated Commit Message Generation	260
<i>Bei Wang (Chongqing University, China), Meng Yan (Chongqing University, China), Zhongxin Liu (Zhejiang University, China), Ling Xu (Chongqing University, China), Xin Xia (Monash University, Australia), Xiaohong Zhang (Chongqing University, China), and Dan Yang (Chongqing University, China)</i>	

Understanding and Facilitating the Co-Evolution of Production and Test Code	272
<i>Sinan Wang (Southern University of Science and Technology, China), Ming Wen (Huazhong University of Science and Technology, China), Yepang Liu (Southern University of Science and Technology, China), Ying Wang (Northeastern University, China), and Rongxin Wu (Xiamen University, China)</i>	
Leveraging Fault Localisation to Enhance Defect Prediction	284
<i>Jeongju Sohn (Korea Advanced Institute of Science and Technology, Korea), Yasutaka Kamei (Kyushu University, Japan), Shane McIntosh (University of Waterloo, Canada), and Shin Yoo (Korea Advanced Institute of Science and Technology, Korea)</i>	
On the Impact of Flaky Tests in Automated Program Repair	295
<i>Yihao Qin (National University of Defense Technology, China), Shangwen Wang (National University of Defense Technology, China), Kui Liu (Nanjing University of Aeronautics and Astronautics, China), Xiaoguang Mao (National University of Defense Technology, China), and Tegawendé F. Bissyandé (University of Luxembourg, Luxembourg)</i>	
GhostBuster: Understanding and Overcoming the Pitfalls of Transient Execution Vulnerability Checkers	307
<i>Andrea Mambretti (Northeastern University, USA; IBM Research - Zurich, Switzerland), Pasquale Convertini (IBM Research - Zurich, Switzerland), Alessandro Sorniotti (IBM Research - Zurich, Switzerland), Alexandra Sandulescu (IBM Research - Zurich, Switzerland), Engin Kirda (Northeastern University, USA), and Anil Kurmus (IBM Research - Zurich, Switzerland)</i>	
Automatic Detection of Five API Documentation Smells: Practitioners' Perspectives	318
<i>Junaed Younus Khan (Bangladesh University of Engineering and Technology), Md. Tawkat Islam Khondaker (Bangladesh University of Engineering and Technology), Gias Uddin (University of Calgary), and Anindya Iqbal (Bangladesh University of Engineering and Technology)</i>	
Action Word Prediction for Neural Source Code Summarization	330
<i>Sakib Haque (University of Notre Dame, USA), Aakash Bansal (University of Notre Dame, USA), Lingfei Wu (IBM Research, USA), and Collin McMillan (University of Notre Dame, USA)</i>	
Two-Stage Attention-Based Model for Code Search with Textual and Structural Features	342
<i>Ling Xu (Chongqing University, China), Huanhuan Yang (Chongqing University, China), Chao Liu (Zhejiang University, China), Jianhang Shuai (Chongqing University, China), Meng Yan (Chongqing University, China), Yan Lei (Chongqing University, China), and Zhou Xu (Chongqing University, China)</i>	
SQLIFIX: Learning Based Approach to Fix SQL Injection Vulnerabilities in Source Code	354
<i>Mohammed Latif Siddiq (Bangladesh University of Engineering and Technology), Md. Rezwanaur Rahman Jahin (Bangladesh University of Engineering and Technology), Mohammad Rafid Ul Islam (Bangladesh University of Engineering and Technology), Rifat Shahriyar (Bangladesh University of Engineering and Technology), and Anindya Iqbal (Bangladesh University of Engineering and Technology)</i>	

Call Frequency-Based Fault Localization	365
<i>Béla Vancsics (University of Szeged, Hungary), Ferenc Horváth (University of Szeged, Hungary), Attila Szatmári (University of Szeged, Hungary), and Árpád Beszédes (University of Szeged, Hungary)</i>	
A Multi-Criteria Strategy for Redesigning Legacy Features as Microservices: An Industrial Case Study	377
<i>Wesley K. G. Assunção (Pontifical Catholic University of Rio de Janeiro, Brazil), Thelma Elita Colanzi (State University of Maringá, Maringá, Brazil; State University of Maringá, Brazil), Luiz Carvalho (Pontifical Catholic University of Rio de Janeiro, Brazil), Juliana Alves Pereira (Pontifical Catholic University of Rio de Janeiro, Brazil), Alessandro Garcia (Pontifical Catholic University of Rio de Janeiro, Brazil), Maria Julia de Lima (Pontifical Catholic University of Rio de Janeiro, Brazil), and Carlos Lucena (Pontifical Catholic University of Rio de Janeiro, Brazil)</i>	
Underproduction: An Approach for Measuring Risk in Open Source Software	388
<i>Kaylea Champion (University of Washington) and Benjamin Mako Hill (University of Washington)</i>	
A Large-Scale Empirical Study of Android App Decompilation	400
<i>Noah Mauthe (Saarland University, Germany), Ulf Kargén (Linköping University, Sweden), and Nahid Shahmehri (Linköping University, Sweden)</i>	
EnHMM: On the Use of Ensemble HMMs and Stack Traces to Predict the Reassignment of Bug Report Fields	411
<i>Md Shariful Islam (Concordia University, Canada), Abdelwahab Hamou-Lhadj (Concordia University, Canada), Korosh Koochekian Sabor (Concordia University, Canada), Mohammad Hamdaqa (Polytechnique Montreal, Canada), and Haipeng Cai (Washington State University, Canada)</i>	
On the Co-Evolution of ML Pipelines and Source Code - Empirical Study of DVC Projects	422
<i>Amine Barrak (Polytechnique Montreal, Canada), Ellis E. Eghan (Polytechnique Montreal, Canada), and Bram Adams (Queen's University, Canada)</i>	
Summarizing Relevant Parts from Technical Videos	434
<i>Mahmood Vahedi (Ecole Polytechnique de Montreal), Mohammad Masudur Rahman (Dalhousie University), Foutse Khomh (Ecole Polytechnique de Montreal), Gias Uddin (University of Calgary), and Giuliano Antoniol (Ecole Polytechnique de Montreal)</i>	
Empirical Analysis of Security Vulnerabilities in Python Packages	446
<i>Mahmoud Alfadel (Concordia University, Canada), Diego Elias Costa (Concordia University, Canada), and Emad Shihab (Concordia University, Canada)</i>	
Plot2API: Recommending Graphic API from Plot via Semantic Parsing Guided Neural Network ...	458
<i>Zeyu Wang (Chongqing University, China), Sheng Huang (Chongqing University, China), Zhongxin Liu (Zhejiang University, China), Meng Yan (Chongqing University, China), Xin Xia (Monash University, Australia), Bei Wang (Chongqing University, China), and Dan Yang (Chongqing University, China)</i>	

Understanding Code Reuse in Smart Contracts	470
<i>Xiangping Chen (Sun Yat-sen University, China), Peiyong Liao (Sun Yat-sen University, China), Yixin Zhang (Sun Yat-sen University, China), Yuan Huang (Sun Yat-sen University, China), and Zibin Zheng (Sun Yat-sen University, China)</i>	
Android Compatibility Issue Detection Using API Differences	480
<i>Tarek Mahmud (Texas State University, USA), Meiru Che (Concordia University Texas, USA), and Guowei Yang (Texas State University, USA)</i>	

ERA Track

Evaluating Bug Prediction Under Realistic Settings	491
<i>Sho Ogino (Osaka University, Japan), Yoshiki Higo (Osaka University, Japan), and Shinji Kusumoto (Osaka University, Japan)</i>	
Multi-Threshold Token-Based Code Clone Detection	496
<i>Yaroslav Golubev (JetBrains Research, Russia), Viktor Poletansky (Saint Petersburg State University, Russia), Nikita Povarov (JetBrains, Russia), and Timofey Bryksin (JetBrains Research, Russia)</i>	
Onboarding to Open Source Projects with Good First Issues: A Preliminary Analysis	501
<i>Hyuga Horiguchi (Wakayama University, Japan), Itsuki Omori (Wakayama University, Japan), and Masao Ohira (Wakayama University, Japan)</i>	
Human-Centric Issues in eHealth App Development and Usage: A Preliminary Assessment	506
<i>Md. Shamsujjoha (Monash University, Australia), John Grundy (Monash University, Australia), Li Li (Monash University, Australia), Hourieh Khalajzadeh (Monash University, Australia), and Qinghua Lu (Data61, CSIRO, Australia.)</i>	
Enhancing Just-in-Time Defect Prediction Using Change Request-Based Metrics	511
<i>Hailemeleket Demtse Tessema (Addis Ababa University, Ethiopia) and Surafel Lemma Abebe (Addis Ababa University, Ethiopia)</i>	
Linking Developer Experience to Coding Style in Open-Source Repositories	516
<i>Heidi Hokka (Mid Sweden University, Sweden), Felix Dobslaw (Mid Sweden University, Sweden), and Jonathan Bengtsson (Mid Sweden University, Sweden)</i>	
Adaptive Immunity for Software: Towards Autonomous Self-Healing Systems	521
<i>Moeen Ali Naqvi (Simula Research Laboratory, Norway), Merve Astekin (Simula Research Laboratory, Norway), Sehrish Malik (Simula Research Laboratory, Norway), and Leon Moonen (Simula Research Laboratory, Norway)</i>	
How Do Users Answer MATLAB Questions on Q&A Sites? A Case Study on Stack Overflow and MathWorks	526
<i>Mahshid Naghashzadeh (Shiraz University, Iran), Amir Haghshenas (Shiraz University, Iran), Ashkan Sami (Shiraz University, Iran), and David Lo (Singapore Management University, Singapore)</i>	

Anti-Patterns in Modern Code Review: Symptoms and Prevalence	531
<i>Moataz Chouchen (University of Quebec, Canada), Ali Ouni (University of Quebec, Canada), Raula Gaikovina Kula (Nara Institute of Science and Technology, Japan), Dong Wang (Nara Institute of Science and Technology, Japan), Patanamon Thongtanunam (University of Melbourne, Australia), Mohamed Wiem Mkaouer (Rochester Institute of Technology, USA), and Kenichi Matsumoto (Nara Institute of Science and Technology, Japan)</i>	
MSR4ML: Reconstructing Artifact Traceability in Machine Learning Repositories	536
<i>Aquilas Tchanjou Njomou (Polytechnique Montréal, Canada), Alexandra Johanne Bifona Africa (Polytechnique Montréal, Canada), Bram Adams (Polytechnique Montréal, Canada), and Marios Fokaefs (Polytechnique Montréal, Canada)</i>	
Automatically Customizing Static Analysis Tools to Coding Rules Really Followed by Developers	541
<i>Yuki Ueda (Nara Institute of Science and Technology, Japan), Takashi Ishio (Nara Institute of Science and Technology, Japan), and Kenichi Matsumoto (Nara Institute of Science and Technology, Japan)</i>	
Using Structural and Semantic Information to Identify Software Components	546
<i>Cezar Sas (University of Groningen, Netherlands) and Andrea Capiluppi (University of Groningen, Netherlands)</i>	

Tool Track

G-Repo: a Tool to Support MSR Studies on GitHub	551
<i>Simone Romano (University of Bari, Italy), Maria Caulo (University of Basilicata), Matteo Buompastore (University of Basilicata, Italy), Leonardo Guerra (University of Basilicata, Italy), Anas Mounsif (University of Basilicata, Italy), Michele Telesca (University of Basilicata, Italy), Maria Teresa Baldassarre (University of Bari, Italy), and Giuseppe Scanniello (University of Basilicata, Italy)</i>	
Gasser	556
<i>Carmen Coviello (University of Basilicata, Italy), Simone Romano (University of Bari, Italy), Giuseppe Scanniello (University of Basilicata, Italy), and Giuliano Antoniol (Polytechnique Montreal, Canada)</i>	
Recording, Visualising and Understanding Developer Programming Behaviour	561
<i>Martin Schröer (University of Bremen, Germany) and Rainer Koschke (University of Bremen, Germany)</i>	
ClarchMap: API-Oriented Reconstruction of Architecture for Cloud-Based Systems	567
<i>Daniel Althviz (Universidad de los Andes, Colombia), Kelly Garcés (Universidad de los Andes, Colombia), and Jaime Chavarriaga (Aranda Software, Colombia)</i>	
TinySpline: A Small, yet Powerful Library for Interpolating, Transforming, and Querying NURBS, B-Splines, and Bézier Curves	572
<i>Marcel Steinbeck (University of Bremen, Germany) and Rainer Koschke (University of Bremen, Germany)</i>	

Makar: A Framework for Multi-Source Studies Based on Unstructured Data	577
<i>Mathias Birrer (University of Bern, Switzerland), Pooja Rani (University of Bern, Switzerland), Sebastiano Panichella (Zurich University of Applied Science, Switzerland), and Oscar Nierstrasz (University of Bern, Switzerland)</i>	

Industry Track

Practitioners' Testimonials about Software Testing	582
<i>Pradeep Waychal (Chhatrapati Shahu Institute, India), Luiz Fernando Capretz (Western University, Canada), Jingdong Jia (Beihang University, China), Daniel Varona (Western University, Canada), and Yadira Lizama (Western University, Canada)</i>	
Technical Debt in Large-Scale Distributed Projects: An Industrial Case Study	590
<i>Armando Sousa (Federal University of Ceará, Brazil), Lincoln Rocha (Federal University of Ceará, Brazil), Ricardo Britto (Ericson AB, Sweden), Zhixiong Gong (Blekinge Institute of Technology, Sweden), and Feng Lyu (Blekinge Institute of Technology, Sweden)</i>	
Mining for Graph-Based Library Usage Patterns in COBOL Systems	595
<i>Ruben Opdebeeck (Vrije Universiteit Brussel, Belgium), Johan Fabry (Raincode Labs, Belgium), Tim Molderez (Vrije Universiteit Brussel, Belgium), Jonas De Bleser (Vrije Universiteit Brussel, Belgium), and Coen De Roover (Vrije Universiteit Brussel, Belgium)</i>	
A Testing Approach While Re-Engineering Legacy Systems: An Industrial Case Study	600
<i>Hamid Khodabandehloo (University Of Saskatchewan), Banani Roy (University of Saskatchewan), Manishankar Mondal (University of Saskatchewan), Chanchal Roy (University of Saskatchewan), and Kevin Schneider (University of Saskatchewan)</i>	
How do Technical Debt Payment Practices Relate to the Effects of the Presence of Debt Items in Software Projects?	605
<i>Sávio Freire (Federal University of Bahia and Federal Institute of Ceará, Brazil), Nicolli Rios (Federal University of Rio de Janeiro, Brazil), Boris Pérez (University of Los Andes and Francisco de Paula Stder. University, Colombia), Darío Torres (University of Los Andes, Colombia), Manoel Mendonça (Federal University of Bahia, Brazil), Clemente Izurieta (Montana State University, United States), Carolyn Seaman (University of Maryland Baltimore County, United States), and Rodrigo Spínola (Salvador University and State University of Bahia, Brazil)</i>	

RENE Track

How Explicit Feature Traces Did Not Impact Developers' Memory	610
<i>Jacob Krüger (Otto-von-Guericke University Magdeburg, Germany), Gül Çalıkli (University of Zurich, Switzerland), Thorsten Berger (Ruhr-University Bochum, Germany & Chalmers, University of Gothenburg, Sweden), and Thomas Leich (Harz University of Applied Sciences Wernigerode & METOP GmbH Magdeburg, Germany)</i>	

Will Data Influence the Experiment Results?: A Replication Study of Automatic Identification of Decisions	614
<i>Liming Fu (Wuhan University, China), Peng Liang (Wuhan University, China), Xueying Li (Wuhan University, China), and Chen Yang (IBO Technology (Shenzhen) Co., Ltd., China)</i>	

Workshops

Regression Test Selection Tool for Python in Continuous Integration Process	618
<i>Eero Kauhanen (University of Helsinki, Finland), Jukka K. Nurminen (University of Helsinki, Finland), Tommi Mikkonen (University of Helsinki, Finland), and Matvey Pashkovskiy (F-Secure Corporation, Finland)</i>	
An Analysis of Testing Scenarios for Automated Driving Systems	622
<i>Siyuan Liu (University of Western Ontario, Canada) and Luiz Fernando Capretz (University of Western Ontario, Canada)</i>	
A Case Study on the Evolution of Configuration Options of a Highly-Configurable Software System	630
<i>Stefan Fischer (Software Competence Center Hagenberg GmbH, Austria)</i>	
AI-Based Enhancement of Test Models in an Industrial Model-Based Testing Tool	636
<i>Stefan Mohacsi (Atos IT Solutions and Services GmbH, Austria) and Michael Felderer (University of Innsbruck, Austria)</i>	
Research Progress of Flaky Tests	639
<i>Wei Zheng (Northwestern Polytechnical University, China), Guoliang Liu (Northwestern Polytechnical University, China), Manqing Zhang (Northwestern Polytechnical University, China), Xiang Chen (Nantong University, China), and Wenqiao Zhao (Northwestern Polytechnical University, China)</i>	
Representation vs. Model: What Matters Most for Source Code Vulnerability Detection	647
<i>Wei Zheng (Northwestern Polytechnical University, China), Abubakar Omari Abdallah Semasaba (Northwestern Polytechnical University, China), Xiaoxue Wu (Northwestern Polytechnical University, China), Samuel Akwasi Agyemang (Northwestern Polytechnical University, China), Tao Liu (Anhui Polytechnic University, Anhui), and Yuan Ge (Anhui Polytechnic University, Anhui)</i>	
Bug Question Answering with Pretrained Encoders	654
<i>Lili Bo (Yangzhou University, China) and Jinting Lu (Yangzhou University, China)</i>	
Characterizing Duplicate Bugs: An Empirical Analysis	661
<i>Berfin Kucuk (Udemy, Turkey) and Eray Tuzun (Bilkent University, Turkey)</i>	
Blockchain in Agri-Food Traceability Systems: a Model Proposal for a Typical Italian Food Product	669
<i>Luisanna Cocco (University of Cagliari, Italy) and Katuscia Mannaro (University of Cagliari, Italy)</i>	
Drone-Based Risk Management of Autonomous Systems Using Contracts and Blockchain	679
<i>Faiz Ul Muram (Mälardalen University, Sweden) and Muhammad Atif Javed (Mälardalen University, Sweden)</i>	

Lightweight Extension of an Execution Environment for Safer Function Calls in Solidity/Ethereum Virtual Machine Smart Contracts	689
<i>Sooyeon Lee (Chungnam National University, Republic of Korea) and Eun-Sun Cho (Chungnam National University, Republic of Korea)</i>	
Raising Sustainability Awareness in Agile Blockchain-Oriented Software Engineering	696
<i>Andrea Pinna (University of Cagliari, Italy), Gavina Baralla (University of Cagliari, Italy), Michele Marchesi (University of Cagliari, Italy), and Roberto Tonelli (University of Cagliari, Italy)</i>	
Analysis of Source Code Duplication in Ethereum Smart Contracts	701
<i>Giuseppe Antonio Pierro (Centre Inria Lille Nord Europe, France) and Roberto Tonelli (University of Cagliari, Italy)</i>	
Smart-Graph: Graphical Representations for Smart Contract on the Ethereum Blockchain	708
<i>Giuseppe Antonio Pierro (INRIA, France)</i>	
Investigation of Blockchain Cryptocurrencies' Price Movements Through Deep Learning: A Comparative Analysis	715
<i>Nicola Uras (Università of Cagliari, Italy) and Marco Ortu (Università of Cagliari, Italy)</i>	
Blockchain and Contact Tracing Applications for COVID-19: The Opportunity and The Challenges	723
<i>Mohamad Kassab (Pennsylvania State University, USA) and Giuseppe Destefanis (Brunel University, USA)</i>	
Author Index	731
