Volume 11724

Proceedings of SPIE 0277-786X, V. 11724

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Technology for Defense and Security XVI*, edited by Mark Dubinskii, Lawrence Grimes, Proc. of SPIE 11724, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510642850

ISBN: 9781510642867 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LASER DIODE DEVELOPMENT

11724 03 **High-brightness lasers and amplifiers between 1500 nm and 2500 nm** [11724-2]

TECHNOLOGY FOR FUTURE DEFENSE APPLICATIONS

11724 0A **Evaluation of high-power blue laser technology for defense applications (Invited Paper)**
[11724-9]

MID-IR LASERS & NONLINEAR MATERIALS

11724 0C **Comparative study of rare-earth doped low-phonon fluoride and chloride crystals for mid-IR laser potential** [11724-11]

FIBER LASERS & FIBER DEVELOPMENT

11724 0I **Watt-level thulium:holmium-codoped versus holmium-doped polarization-maintaining fiber amplifier at 2050 and 2090 nm** [11724-17]

11724 0J **Higher order mode generation in an anti-resonant hollow-core fiber** [11724-18]

11724 0L **Quasi-phase-matched electric-field-induced optical parametric amplification in xenon-filled hollow-core fibers** [11724-20]

POSTER SESSION

11724 0M **Features of vibroacoustic monitoring of pulsed laser operation** [11724-21]
