Volume 11752

Proceedings of SPIE 0277-786X, V. 11752

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ocean Sensing and Monitoring XIII*, edited by Weilin "Will" Hou, Proc. of SPIE 11752, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SEA SURFACE TEMPERATURE SENSING

- 11752 04 **Historical and near-real time SST retrievals from Metop AVHRR FRAC with the advanced clear-sky processor for ocean** [11752-3]
- 11752 05 **Filtering cold outliers in SSTs retrieved from early AVHRRs for the second AVHRR GAC reanalysis** [11752-4]

TURBULENCE

- 11752 08 **Effects of actuated boundaries on Tollmien-Schlichting waves and developed boundary layer turbulence** [11752-7]
- 11752 09 **Boundary layer turbulence near an actively controlled deformable surface** [11752-8]
- 11752 0A **Deployable scintillometer for ocean optical turbulence characterization** [11752-9]

REMOTE AND IN SITU SENSING OF WATER QUALITY

- 11752 0B **Estimation of chlorophyll-a concentration in complex coastal waters from satellite imagery** [11752-10]
- 11752 0C **Underwater spectrophotometer for *in-situ* seawater COD monitoring** [11752-11]
- 11752 0D **Development of underwater fluorimeters for assessing biochemical constituents of coastal seawater** [11752-12]

AI/MACHINE LEARNING

- 11752 0F **Pattern classification for enhanced detection using the underwater radar-encoded laser system** [11752-14]
- 11752 0G **Fish recognition in underwater environments using deep learning and audio data** [11752-15]
- 11752 0H **Deep learning for low altitude coastline segmentation** [11752-16]

IMAGING AND LIDAR

- 11752 0L **Determining the spatial phase distribution of light scattered by turbid water [11752-20]**
- 11752 0N **Restoration of time-of-flight (ToF) underwater images using TV regularization [11752-22]**
