Volume 11759

Proceedings of SPIE 0277-786X, V. 11759

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Virtual, Augmented, and Mixed Reality (XR) Technology for Multi-Domain Operations II*, edited by Mark S. Dennison Jr., David M. Krum, John (Jack) N. Sanders-Reed, Jarvis (Trey) J. Arthur III, Proc. of SPIE 11759, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

DVE SENSING

- 11759 03 **Exploring the use of optical domain information for automated target detection and recognition** [11759-1]
- 11759 04 **A game engine based millimeter wave radar simulation** [11759-2]
- 11759 06 **Detection and localization of objects hidden in fog** [11759-4]

HUMAN PERFORMANCE

- 11759 07 **Modeling pilot performance under degraded visual environment** [11759-5]
- 11759 08 **Fundamental limitations of AR symbology in accidented terrain** [11759-6]
- 11759 09 **A virtual reality aviation emergency procedure (EP) testbed** [11759-7]
- 11759 0A **Impact of low visual contrast on posture, motion sickness, and performance in VR** [11759-8]
- 11759 0B **Does individual stereo acuity affect performance using stereo 3D in a helmet mounted display?** [11759-9]

INFORMATION PRESENTATION

- 11759 0D **Warfighter head movement in operational scenarios and its impact on digital visual augmentation systems** [11759-11]
- 11759 0F **Flying a helicopter with the HoloLens as head-mounted display** [11759-13]

SYSTEMS

- 11759 0H **Digital twinning within a novel human-in-the-loop verification method for HUD safety-critical approach and landing** [11759-15]

- 11759 OJ **Designing a mixed reality interface for autonomous robot-based change detection** [11759-17]
- 11759 OK **Multi-modal sensor fusion and selection for enhanced situational awareness** [11759-18]
- 11759 OM **An intelligent information mediation framework to enable decentralized decision-making in immersive environments** [11759-20]

POSTER SESSION

- 11759 ON **Penetrating radar combined with 3D imaging for real-time augmented reality sensing and classification** [11759-21]
