Volume 11774

Proceedings of SPIE 0277-786X, V. 11774

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Holography: Advances and Modern Trends VII*, edited by Antonio Fimia, Miroslav Hrabovský, John T. Sheridan, Proc. of SPIE 11774, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

HOLOGRAPHIC MATERIALS

- 11774 04 Holographic photopolymer with high sulfur content for high refractive index modulation (Invited Paper) [11774-1]
- 11774 06 Expanded property profile of Bayfol HX films towards NIR recording and ultra-high index modulation (Invited Paper) [11774-3]

STORAGE, SECURITY AND MODULATION I

- 11774 07 Holographic method for precise measurement of wavefront aberrations (Invited Paper) [11774-4]

STORAGE, SECURITY AND MODULATION II

- 11774 0A LCOS SLM based compact system of polarization modulation for data storage in glass [11774-7]

DIGITAL HOLOGRAPHIC TECHNIQUES I

- 11774 0E A holographic method for generating structured illumination of structured illumination microscopy [11774-11]
- 11774 0F Immersion-based holographic wave front printer setup for volume holographic retinal projection elements (Invited Paper) [11774-12]
- 11774 0G Numerical autofocusing in Gabor lensless microscopy employing computational dark-field imaging [11774-13]
- 11774 0H FPM app: a MATLAB application for Fourier ptychographic microscopy reconstruction (Invited Paper) [11774-14]

DIGITAL HOLOGRAPHIC TECHNIQUES II

- 11774 0I **Realistic physical camera motion for light field visualization (Invited Paper)** [11774-15]
- 11774 0J **Fast digital image displacement measurement algorithm: theoretical analysis and simulation**
[11774-16]
- 11774 0M **Tunable geometric phase retarders using photo-aligned liquid crystal devices** [11774-19]

HOLOGRAPHIC APPLICATIONS AND ALGORITHMS I

- 11774 0N **Highly stable digital holography for temperature measurement** [11774-20]
- 11774 0O **Decoupling the refractive index and thickness by dual-wavelength digital holographic microscopy** [11774-21]
- 11774 0P **Interaction methods for light field displays by means of a theater model environment (Invited Paper)** [11774-22]
- 11774 0Q **On the simulation of hand-held cameras in light field rendering** [11774-23]

HOLOGRAPHIC APPLICATIONS AND ALGORITHMS II

- 11774 0R **Fringe pattern background and amplitude modulation in DeepDensity: convolutional neural network for local fringe density map estimation** [11774-24]
- 11774 0U **Space division multiplexing of communication channels in a multimode fiber using holographic correlator method** [11774-27]
- 11774 0V **Holographic solar concentrators stored in an eco-friendly photopolymer** [11774-28]

GENERAL APPLICATIONS AND ELEMENTS

- 11774 0W **Visible and terahertz motion measurements** [11774-29]
- 11774 0Y **Waveguide couplers based on HPDLC for see-through applications: initiator optimization**
[11774-31]
- 11774 0Z **Reflection silver halide sensitized gelatin diffraction gratings in BB plates** [11774-32]
