Volume 11775

Proceedings of SPIE 0277-786X, V. 11775

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Integrated Optics: Design, Devices, Systems and Applications VI*, edited by Pavel Cheben, Jiří Čtyroký, Iñigo Molina-Fernández, Proc. of SPIE 11775, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

KEYNOTE SESSION

- 11775 04 **Microcombs for ultrahigh bandwidth optical data transmission and neural networks (Keynote Paper)** [11775-1]

DEVICES AND SYSTEMS

- 11775 0E **Silicon photonic devices for wavelength/mode-division-multiplexing (Invited Paper)** [11775-10]
11775 0G **High-speed germanium p-i-n avalanche photodetectors on silicon (Invited Paper)** [11775-12]
11775 0K **Three-dimensional tunable true time delay line** [11775-16]
11775 0L **Analysis of BTO-on-Si-waveguides for energy-efficient electro-optical modulators** [11775-17]

LASERS AND ACTIVE DEVICES

- 11775 0M **Quantum dot multi-wavelength for high capacity 5G fiber-wireless integrated mobile fronthaul and access links (Invited Paper)** [11775-18]
11775 0P **Monolithic and hybrid integration of InAs/GaAs quantum dot microdisk lasers on silicon** [11775-21]
11775 0Q **Two-dimensional distributed feedback lasing with colloidal quantum dots in photonic quasicrystals** [11775-23]
11775 0R **Passive Q-switched generation of all-fiber heavily erbium-doped laser** [11775-24]
11775 0S **Versatile linearly polarized photon generation from a quantum emitter in metasurface-decorated waveguides** [11775-25]
11775 0T **Acousto-optic tunable filter for tuning a copper vapor laser** [11775-26]

DESIGN AND SIMULATION

- 11775 0V Discussion on the principle of coupling and optimization of fiber-to-resonator coupling [11775-28]
- 11775 0W Design of an analyzer based on a quantum cascade laser for substance identification by infrared reflected radiation [11775-29]

POSTER SESSION

- 11775 0X Saturable absorber for ring fiber lasers on the base of coupler coated by CNTs [11775-22]
- 11775 0Y Micro-Raman to detect stress phenomena in Si-chips bonded onto Cu substrates [11775-30]
- 11775 11 Compressive single pixel phosphorescence lifetime and intensity simultaneous imaging: a pilot study using oxygen sensitive biomarkers [11775-33]
- 11775 12 FTIR spectroscopy based on a multipass gas cell and TE cooled HgCdTe sensors for environmental monitoring and defense applications [11775-34]
- 11775 13 Determination of a statistical lack of volume matter by resonance principle: experiential approach and modeling [11775-35]
- 11775 14 Analysis of giant waveguide tapers with funnel geometry: multi-mode interference regime to single mode [11775-36]
- 11775 15 Efficient visible light communication drivers using illumination LEDs in industrial environments [11775-37]
- 11775 19 An efficient mixed-signal dielectric-partitioning model of liquid crystals based shielded coplanar waveguide for electronically reconfigurable delay lines design [11775-42]
- 11775 1B Energy backflow in tightly focused cylindrical vector beam with fractional order [11775-44]
