Volume 11779

Proceedings of SPIE 0277-786X, V. 11779

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Acceleration of Electrons, Protons, and Ions VI*, edited by Stepan S. Bulanov, Jörg Schreiber, Carl B. Schroeder, Proc. of SPIE 11779, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LASER WAKEFIELD ACCELERATION OF ELECTRONS I

- 11779 06 **Efficient forward direct laser acceleration of electrons in subcritical plasma with injection through hybrid parametric instability** [11779-4]
- 11779 07 **Generation of a static plasma electron grating** [11779-5]
- 11779 09 **Ring-shaped electron beams from laser-wakefield accelerator** [11779-7]

LASER WAKEFIELD ACCELERATION OF ELECTRONS II

- 11779 0D **Online measurements of gamma radiation from laser-plasma and signal unfolding using a scintillator calorimeter** [11779-11]
- 11779 0E **Coherent-transition-radiation-based reconstruction of laser plasma accelerated electron bunches** [11779-12]
- 11779 0G **Ultrashort electron beam isochronous, achromatic transport line design** [11779-14]

LASER ION ACCELERATION I

- 11779 0N **Commissioning of the laser-driven ion acceleration beamline at the Centre for Advanced Laser Applications** [11779-21]

LASER ION ACCELERATION II

- 11779 0Q **Ion acceleration enhancement by laser-pulse shaping via plasma shutter** [11779-24]
- 11779 0T **First tests of the I-BEAT detector as primary monitor for target normal sheath accelerated protons** [11779-27]
