2021 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Developing an application to gather and centralize the information obtained from the innovation competencies assessment in massive project-based courses	1–20
Preferences for Teaching Materials: A Survey on a Multimodal World	21–24
Safe environments and female role models: important factors for girls approaching STEM-related careers through robotics initiatives	25–29
ISOLDE unIverSity wOmen LeaDEr	30–35
Digitization of an Electronic Instrumentation Laboratory Practice: Measurement of an LDR with Arduino	36–42
Autonomous Vehicles as a Development Platform: from High School to Faculty	43–49
The experience of women students in engineering and mathematics careers: a focus group study	50–56
Using Real-World Problems to Explore and Improve Students' Understanding of Basic Parallelism Concepts	57–62
Multipurpose Use of Quizzes in Teaching	63–67
An attempt to develop students' generic skills by raising their awareness in experimental practice	68–73
Attempts to improve the curriculum based on ongoing research into Generic Skills	74–79
Acquiring an overcoming attitude in students of computer technologies by troubleshooting challenge	80–85
Evaluation of the COVID-19 Shock on STEM Laboratory Courses	86–93
The inclusion of Sustainability in the Electrical Engineering degree: an integrative initiative of the University of The Basque Country (Campus Bizia Lab)	94–98
The Writing Factory: Structured Collaborative Academic Writing in Engineering	99–105
The Application of a Laboratory Practical Course Training for Technical Subjects in Engineering Education	106–110
Development of Inventor Profiles for Engineering Students to Acquire Exclusive Technology Rights	111–115
Women in Engineering: developing entrepreneurial attitudes through learning by doing approach	116–121
Women in science and technology studies. A study about the influence of parents on their children's choice of speciality. And about the trend of the different	122–130
Teamwork with an Automatic Tutoring Environment as Learning Strategy in Programming courses	131–135
Evaluation of remote or virtual laboratories in e-Learning engineering courses	136–143
CS-Students' Behavior in Times of Corona	144–152
Bridging the Gap: Adapting a Security Education Platform to a New Audience	153–159
The Importance of the Campus - A Study of the Effects of the Covid-19 Pandemic in a CS2 Course	160–169
Creating Learning Environments Within the Constraints of Higher Education - a Case Study of a First-Year Computing Program	170–177
Women in engineering academic programs: a dynamic modelling approach of south Mexico	178–183
Quantitative Exploration of International Female and Male Students in Undergraduate Engineering Programs in the USA	184–188
Building a Truly Inclusive Protocol for Students with Disabilities from an Experience in STEM areas	189–193
Developing Global Engineers through Interdisciplinary PBL and Design Thinking	194–198
Basic Distributed Algorithms Visual Simulations for Distributed Systems Students	199–205
Hands-on teaching with microcontrollers	206–209
Role of Gamification in Engineering Education: A Systematic Literature Review	210–213
Student perceptions of curriculum-based exit exams in civil engineering education	214–218
A Serious Game for Mobile Phones used in a Software Engineering Course: Usability Evaluation and Educational Effectiveness	219–225
Teacher Training during Covid-19: A Case Study of the Virtual STEM Hub Project in Africa	226–234
Widening Young People' Aspirations for STEM and DIGITAL Careers: A Case Study of the DIGISTEM Project	235–243
Specifics of developing and implementing remote classes in chemistry with hearing impaired students at a technical university of a general type	244–251
Widening the Shrinking Pipeline: The Case of Data Science	252–261
Project-based learning and training of in-service teachers in programming: Projects as a bridge between training and practice	262–271
Shifting the Flipped Classroom Online: Experiences from a Postgraduate Course on Usability Evaluation During COVID-19 Lockdown	272–277
Women for Leadership in Engineering: a link Between Students and High-Impact Projects	278–281
Polarizing Effect: Challenges of an Accelerated Digitalization caused by Sars-Cov-2	282–288
Women Engineers Empowerment through Linked Experiences	289–293
IoT based Smart Home Security Education using a Hands-on Approach	294–301
A Stand-Alone Simulation Game for the Participation of Wind Producers in Day-Ahead Electricity Markets	302–307
THE IMPACT OF PHYSICAL COMPUTING AND COMPUTATIONAL PEDAGOGY ON GIRLS' SELF-EFFICACY AND COMPUTATIONAL THINKING	308–315
Tec 21: first outcomes of a new integral university framework for long-life education through challenge-based learning	316–321
Pedagogical Innovations With A Gender Approach To Increase Computer Programming Self-Efficacy In Engineering Students	322–328
Development of a BIM-VR application for e-learning engineering education	329–333
Avatars and badges, are there differences between genders?	334–338
Pushing the 5G edge into the Principles of Communications Course based on a blended lab platform	339–343
Towards a 21st century personalised learning skills taxonomy	344–354
How gender affects in the engagement of students in a statistics course?	355–359
Learning Spaces for a Competency-based Model: Post-occupancy Evaluation.	360–365

2021 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Analysis-Design-Justification (ADJ): A Framework to Develop Problem-Solving Skills	366–372
India Industry-University Collaboration - A Novel Approach combining Technology, Innovation, and Entrepreneurship	373–380
A Hybrid and Flexible Teaching Model for Engineering Courses Suitable for Pandemic Conditions towards the New Normality	381–387
Design and conduct of clinical research: Raising awareness of ethical aspects in biopharmaceutics for students of Biotechnology Engineering	388–392
Computer Science Majors' Experiences of Their Distance Education Caused by the COVID-19 Pandemic	393–397
A Proposal for a Hybrid Syllabus Search Tool that Combines Keyword Search and Content Based Classification	398–403
Going Virtual: Teaching Practical Skills of Circuit Design and Programming for Heterogeneous Groups Online	404–412
Metrics Based on Attention Metadata for Learning Resource and Assessment Repository	413–419
A Data Science-based Approach for Identifying Counseling Needs in first-year Students	420–429
Lab Course on Electrical Drive Trains Based on Students' Participation	430–436
Utilization of Existing Resources to Support Active Distance Learning during Covid-19 Pandemic in Developing Country	437–442
The Impact of Combining Storytelling with Lecture on Female Students in Software Engineering Education	443–447
How does the Corona Pandemic Influences Women's Participation in Massive Open Online Courses in STEM?	448–455
Creating Inclusive Engineering and Computer Science Classes – the impact of Covid-19 on Student Experiences and Perceptions of Gender Inclusivity	456–458
A Step that Paves the Way of Teaching Modern Electrical Circuits	459–462
Women engineers' advancement to management and leadership roles: enabling resources and implications for higher education	463–467
Cybersecurity Teaching Expert Development Project by KOSEN Security Educational Community	468–477
SQheLper: A block-based syntax support for SQL	478–481
A Detailed Analysis of Gender Differences in the Course of CS-Studies	482–491
PBL Approach in Online Robotics Competition in Resource-Poor Environments: Maze Solver Robot	492–498
STEM & Gender equity: empowering women in vulnerable environments	499–504
Teaching Software Quality Assurance with Gamification and Continuous Feedback Techniques	505–509
Teaching Efficient Computer Science and Cybersecurity courses amidst the COVID-19 pandemic	510–520
Developing a Real World Escape Room for Assessing Preexisting Debugging Experience of K12 Students	521–529
Findings for Flexible Digital Model (MFD) Courses to enhance women participation in Industrial and Systems Engineering Courses	530–536
Teachers' Readiness for Remote Teaching During COVID-19 Pandemic: The Case of Latvia	537–542
Build your own robot	543–551
Mentoring program: women supporting women	552–556
Using AR/VR for Technical Subjects in Vocational Training – Of Substantial Benefit or Just Another Technical Gimmick?	557–561
Synchronous Distance Learning: Students and Faculty Experience from a Gender Perspective	562–566
A Study of Using Virtual Currency in a Discrete Mathematics Course	567–576
Student perceptions of emergency remote civil engineering pedagogy	577–581
A Lab of Hands-on STEM Experiments for Primary Teachers at CERN	582–590
Creativity in Criticality: tools for Generation Z students in STEM	591–598
Facilitating learning and startup formation in experience-based courses—A team-centered model	599–608
Validated Undergraduates' Misconceptions about Software Engineering	609–618
Student Experiences of Practical Activities During the Covid-19 Pandemic	619–623
A Remote Robot Based Lab to Develop Competencies in Engineering Students during Covid19 Pandemic	624–630
Greek MOOC of experiments with simple materials for students generates significant findings for teachers and Physics education	631–636
Cloud-based virtual labs vs. low-cost physical labs: what engineering students think.	637–644
Human Rights for Creative and Experimental Immersion Challenge	645–649
Revisit of automated marking techniques for programming assignment	650–657
A runtime execution environment for machine-learning laboratory work	658–663
Word2Mouth – An eLearning platform catered for Low-Income Countries	664–673
Global Experiences in IDEEA Global Projects	674–678
Cultivating entrepreneurship in higher education during a crisis condition: crisis related issues discussed in entrepreneurship literature	679–688
Active learning methodologies in STEM degrees jeopardized by COVID19	689–695
The Design and Evaluation of a Hands-on Course on Cloud Computing Environment	696–700
Improved Power Engineering Curriculum: Analysis in a Year 3 Course in Electrical Engineering	701–705
Intelligent Virtual Reality Tutoring Systems as a New Generation of Simulators: Requirements and Opportunities	706–718
The “Real Images” of Engineering Ethics Education: An Analysis Based on Systematic Literature Review(SLR)	719–725
Boosting the Students and Teachers Cybersecurity Awareness During COVID-19 Pandemic	726–731
Sharing of experience on the organization of secure distance exams in African universities in the context of Covid-19	732–737
Gender and Diversity aspects in Engineering Education and their impact on the design of engineering curricula	738–744

2021 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Experiences from the 1st Women in Data Science Conference in Villach, Austria	745–747
Evaluating a Computational Thinking and Computing Attitudes Instrument for Educational Purposes	748–754
Product validation in creative processes: a gender perspective in industrial design projects.	755–760
Information-Seeking Behavior of Computing Students while Programming: Educational Learning Uses, Satisfaction of Use, and Inconveniences	761–765
Techniques and Technologies for the Administrative Support of Distance Education in Junior High Schools in the Corona Virus Age	766–773
Advanced System to Measure UX in Online Learning Environments	774–777
"Beautiful Patterns 2019" MIT and Tecnologico de Monterrey high-impact IT/K12-STEM transnational initiative for young women students	778–784
Technical trainers overcoming the challenges of rapid methodological change	785–791
Contribution for the continuity of courses at the University of Bangui in the context of COVID-19	792–797
CreaMe: human augmentation platform for the creation of training in educational lakes inherent to dangerous situations	798–807
An Exploration of the Efficacy of Project-based Assessment as a Tool to Promote Basic Research Skills at Undergraduate Level in South African Rural	808–813
Computer Vision and NLP based Multimodal Ensemble Attentionness Detection API for E-Learning	814–820
A Remote CS0 Workshop Based on Peer Learning: Motivation, Engagement and Self-Regulation of Novice Programmers	821–830
Sentiments and Performance in an Introductory Programming Course Based on PBL	831–840
Teaching Team Collaboration in Cybersecurity: A Case Study From the Transactive Memory Systems Perspective	841–845
Assessing Individuals within Teams in Project-Based Learning Courses – Strategies, Evaluation and Lessons Learnt	846–850
Engineering School Women-Faculty Evaluation in the Tec21 competence educational model	851–856
Analyzing the emotions of students' parents at higher education level throughout the COVID-19 pandemic: An empirical study based on demographic	857–860
The Tec21 model educational and its perception. An educational innovation for student-based learning	861–866
A Structural Engineering Lab Based on Virtual Construction Site Visits to Develop Students' Competencies for the New Normality	867–872
Attack Specification Language: Domain Specific Language for Dynamic Training in Cyber Range	873–879
A survey for the distance education process in the National School of Public Administration and Local Government (ESDDA): a necessity or an opportunity to	880–884
MoalemCorpus: A Large-Scale Arabic Multimedia Corpus for Children Education of Arabic Vocabularies	885–890
Innovative teaching approaches in Conducting a Large Scale Online Synchronous Fresher's Programming Course	891–896
A continuous feedback system during COVID-19 online teaching	897–902
Laboratories 4.0: Laboratories for Emerging Demands under Industry 4.0 Paradigm	903–909
Interest High School Students in STEM Studies, while Preparing STEM Students for Leading Positions	910–914
Microelectronics Education Environment: Training for the Semiconductors Market	915–923
Evaluating the remote examination process applied by the Hellenic Open University (HOU) during COVID-19 pandemic: Students' opinions.	924–927
Not a Silver Bullet, but a Silver Lining: Metamorphic Marking Administration	928–935
Distributed applications in gamification of the learning process	936–940
Investigating the Situation of Brazilian Undergraduate Students during the COVID-19 Pandemic	941–945
Applying machine learning to a virtual serious game for neuropsychological assessment	946–949
Pilot study on effectiveness of a virtual game training on executive functions	950–954
Coding Club: a K-12 good practice for a STEM learning community	955–963
Dig-Equality FF - A playful approach for researching and fostering gender education in secondary schools	964–967
A Study on Effect of Generic Management Skills on Logical Thinking Skills in Systems Engineering Exploration	968–972
Women and Digital Economy: Culture Change or Perpetuation of Inequalities?	973–982
Apply VR and Simulation-Based Learning for Logistics and Warehouse Design Education	983–988
A Framework for Course-embedded Assessment for Evaluating Learning Outcomes of a Network Programming Course	989–995
An Outcome Based Approach for Applied Mechanics Courses using Bloom's Taxonomy and ABET Criteria	996–1002
Transmedia Ecosystems, Quality of Experience and Quality of Service in Fog Computing for Comfortable Learning	1003–1009
Review of Learning Design Choices of Primary School Programming Courses In Empirical Researches	1010–1018
An Online-Tool for career planning of women in STEM: From research to application	1019–1025
Exploring Educational Practices in Emergency Remote Teaching. The Role of Educational Neuroscience	1026–1034
Learning process of causes, consequences and solutions to climate change of undergraduate students without background in the subject	1035–1039
Analysis of student motivation in the use of a Physics Augmented Remote Lab during the Covid-19 pandemic	1040–1047
The International Impact of COVID-19 and "Emergency Remote Teaching" on Computer Science Education Practitioners	1048–1055
DigiCulture – course for enhancing digital competences	1056–1060
Strengthening of Women's Leadership in STEM educational environment through social NETWORKS: case of success with international network.	1061–1065
Termolabo Project: Design and Implementation of Thermo-Fluids Systems Online Laboratory	1066–1072
Co-creating with TalkTech developing attributes through international digital collaborative projects	1073–1077
Scripting an Integrated Learning and Work Process to Scaffold Online Action-oriented Learning	1078–1086
EMPOWERING YOUNG WOMEN IN THE CARIBBEAN REGION IN STEM	1087–1092

2021 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Non-Traditional Education to Advance Women in Computing Careers in the St. Louis Metro Region	1093–1097
SpaceMakers: Innovation Space Lab	1098–1101
Synchronous E-learning in Higher Education during the COVID-19 Pandemic	1102–1109
PROCESS THINKING IN ENGINEERING EDUCATION	1110–1115
Enhancing the Student Learning Experience by Adopting TDD and BDD in Course Projects	1116–1125
Work-in-Progress: An agile approach to formative assessment in higher education	1126–1130
Promoting Computational Thinking through Visual Block Programming Tools	1131–1136
Transitioning from Offline to Online Learning: Issues from Computing Student Perspective	1137–1142
Understand My World: An Interactive App for Children Learning Arabic Vocabulary	1143–1148
Face Morphing Attacks: A Threat to eLearning?	1149–1154
BOBShield: An Open-Source Miniature Ball and Beam Device for Control Engineering Education	1155–1161
Work-in-Progress: Syntactic Code Similarity Detection in Strongly Directed Assessments	1162–1166
Development of Network Applications and Services Through Project-Based Learning to Meet 21st Century Skills	1167–1174
Work-in-Progress: Interdisciplinary projects in times of COVID-19 crisis – challenges, risks and chances	1175–1179
Students' Emotions Using an Algorithm Experimentation Tool in the New Normal	1180–1188
A portrait of adopted programming languages of Portuguese Higher Education Institutions	1189–1194
First Preliminary Findings from the Implementation of a Rhythm based inclusive Program for Students with Special Educational Needs	1195–1201
Problem Based Learning (PBL) in four-week term block mode teaching	1202–1206
A Review on Requirements for Teaching the Relationship Between Business Models and Business Processes	1207–1216
A 3D Rhythm-based Serious Game for Collaboration Improvement of Children with Attention Deficit Hyperactivity Disorder (ADHD)	1217–1225
Towards the Development of a Digital Competency Framework for Digital Teaching and Learning	1226–1232
Work in Progress: Creative Coding and Computer Science Education – From Approach to Concept	1233–1236
Using the PerFECT Framework to Invent Playful Learning Activities for Exploring the Binary System	1237–1246
Student Perceptions of an Asynchronous Online Discussion Board Used to Assess the Professional Skills	1247–1253
Which Virtualization Technology is Right for My Online IT Educational Labs?	1254–1261
Teaching the Digital Transformation of Business Processes: Design of a Simulation Game of Business Process Change	1262–1271
Implementation of Research-based Experiential Learning for Electrical Engineering Master's Students during Covid-19 Pandemic	1272–1276
Engaging students in COVID times with immersive learning and Self-driven Challenge Based Learning	1277–1281
Eliciting Educators' Needs on the Design and Application of Augmented Reality Educational Board Games on Cultural Heritage: The case of CHARMap	1282–1286
Exploring the Programming Concepts Practiced by Scratch Users: An Analysis of Project Repositories	1287–1295
Work-in-Progress: Data Science Framework for Environmental Protection Education	1296–1300
Work in Progress: An Automated Management System for References in Programming Code	1301–1305
Multimedia as a substitute or complement to an optional lecture	1306–1309
A Serious Gaming Approach for Teaching Environmental Entrepreneurship	1310–1317
Work-in-Progress: A Novel Data Glove for Psychomotor-Based Virtual Medical Training	1318–1321
Female Career Technology and Engineering Education Professionals: A Journey through Reflections	1322–1328
Glassdoor Job Description Analytics - Analyzing Data Science Professional Roles and Skills	1329–1336
Integration of Professional Certifications with Information Systems Business Analytics Track	1337–1344
Developing a Platform for using Game-Based Learning in Vocational Education and Training	1345–1352
Work-in-Progress: Using Autonomous Training Resources for a More Inclusive Approach to the Teaching of Computer Networks	1353–1357
HeatQuiz: An app framework for game-based learning in STEM education	1358–1368
Providing Learning Success as a Service: A Structured Literature Review	1369–1378
Education in Cyber Physical Systems Security: The Case of Connected Autonomous Vehicles	1379–1385
Supporting effective education for special needs children in Saudi Arabia during COVID-19 pandemic	1386–1392
"Work-in-Progress: Road to learn: using the gamification".	1393–1397
Online Teaching amid COVID-19: The Case of Zoom	1398–1406
The engineering social role conception promoted in the engineering courses' advertising: looking from the point of view of women	1407–1415
A Stand-Alone Simulation Game for the Participation of Wind Producers in Day-Ahead Electricity Markets	1416–1421
The Effect of a Pre-Writing Strategy on the Writing Apprehension Levels of Science Students	1422–1423
Work-in-Progress: Analysis of the use of Mentoring with Online Mob Programming	1424–1428
Augmented Reality as a strategy to improve learning in engineering	1429–1433
G-Code Machina: A Serious Game for G-code and CNC Machine Operation Training	1434–1442
Education 4.0: AI empowers smart blended learning process with Biofeedback	1443–1448
Work-in-Progress: Closing the Gaps: Diversity in Programming Education	1449–1453

2021 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
3D Print your Artifacts - 3D Turtle Geometry as an Introduction to Programming	1454–1461
Open-source multi-purpose remote laboratory for IoT education	1462–1468
The role of machine shop sessions in building confidence amongst first year engineering students in Ghana	1469–1474
Studying the Students' Learning in LoT@UNED	1475–1479
Code Reuse and Formative Assessment in Secondary Education	1480–1488
Integrating Intrusive and Non- Intrusive Techniques to Detect Real Time Drivers' Fatigue	1489–1494
The influence of students' computer science learning experience on their perception of computational thinking	1495–1496
Work-in-Progress: Pre-college Teachers' Metaphorical Beliefs about Engineering	1497–1501
The Data Management of the Language of Trauma Narrative Communication	1502–1508
Open educational resources for Industry 4.0: supporting the digital transition in an European dimension	1509–1513
Internet of energy: new scenarios, opportunities, challenges and educational solutions	1514–1520
A framework of Malicious Vehicles Recognition in Real Time Foggy Weather	1521–1526
Virtual Design Office: Proposition of Problem- and Project-Based Learning Solution in the COVID-19 Era and Beyond	1527–1531
BeA (Blended e-Assessment): Adapting to the COVID-19 world	1532–1536
Teaching the Concepts of Servitization using a Serious Gaming Approach	1537–1545
Data science meets standardized game learning analytics	1546–1552
Work in Progress: Pedagogy of Engineering Ethics: A Bibliometric and Curricular Analysis	1553–1557
Pros and cons of Blockchain-based approaches in Education	1558–1564
A Cognitive Style-based Usability Evaluation of Zoom and Teams for Online Lecturing Activities	1565–1570
Online versus Face-to-face Collaborative Learning: Perceptions of Students and Instructors of Technical Writing for Engineers	1571–1581
How to design a competence-oriented study program for data scientists?	1582–1586
A Mixed Reality Approach Enriching the Agricultural Engineering Education Paradigm, against the COVID-19 Constraints	1587–1592
Classification and Analysis of Techniques and Tools for Data Visualization Teaching	1593–1599
Work in Progress: Addressing Barriers for Women in STEM in Mexico	1600–1604
Problem-Based Learning in Automation Engineering: Performing a Remote Laboratory Session Serving Various Educational Attainments	1605–1614
iLabs as an online laboratory platform: A case study at Stanford University during the COVID-19 Pandemic	1615–1623
Flipped mastery and gamification to teach Computer networks in a Cybersecurity Engineering Degree during COVID-19	1624–1629
Gender and STEAM as part of the MOOC STEAM4ALL	1630–1634
Using Augmented Reality in programming learning: A systematic mapping study	1635–1641
Towards a Cloud-Based University Accelerated By the Pandemic	1642–1649
Work-in-Progress: Virtual Reality System for training on the operation and programming of a Collaborative Robot	1650–1653
Adaptation to emergency remote teaching by students with distinct ICT backgrounds	1654–1659
Online Game-Based Learning through Minecraft: Education Edition Programming Contest	1660–1668
Introduction of the gender perspective in the university teaching: a study about inclusive language in Spanish	1669–1673
Cybersecurity Training in the Healthcare Workforce – Utilization of the ADDIE Model	1674–1681
EDISON Data Science Framework (EDSF): Addressing Demand for Data Science and Analytics Competences for the Digital Data Driven Economy	1682–1687
Teaching Operating Systems in the Time of COVID-19	1688–1695
TechCheck-K: A Measure of Computational Thinking for Kindergarten Children	1696–1702
Artificial Intelligence as a Gear to Preserve Effectiveness of Learning and Educational Systems in Pandemic Time	1703–1711
Why students' self-regulation is key towards the new normality?	1712–1716
Research Data Management and Data Stewardship Competences in University Curriculum	1717–1726
Teaching Software Engineering During Covid-19 - Constraint or an Opportunity?	1727–1731
In-Campus Work and Study: Motivation, Challenges, Benefits, Skills Developed and Impact on Studies	1732–1736
Covid-19 contingency plans: the impact on students' future choices	1737–1742
Distance learning during Covid-19: Lessons learned and Case studies from Egypt	1743–1748
A model for experiential learning by replicating a workplace environment in virtual classes	1749–1753
Remote laboratory VISIR: recent advances, initiatives, federation, limitations and future	1754–1757
