Volume 11731

Proceedings of SPIE 0277-786X, V. 11731

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Computational Imaging VI*, edited by Lei Tian, Jonathan C. Petrucci, Chrysanthe Preza, Proceedings of SPIE Vol. 11731 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 MACHINE LEARNING FOR COMPUTATIONAL IMAGING

- 11731 02 **Synthetic training of machine learning algorithms for holographic cell imaging** [11731-1]
- 11731 03 **Machine learning assisted holography** [11731-2]
- 11731 04 **Large-scale dynamical graph networks applied to brain cancer image data processing** [11731-3]

SESSION 2 MODEL-BASED COMPUTATIONAL IMAGING

- 11731 05 **Imaging through deconvolution with a spatially variant point spread function** [11731-4]
- 11731 07 **Blind deconvolution super-resolution photoacoustic microscope to achieve fine structural information of cerebral capillaries** [11731-6]

SESSION 3 CODED COMPUTATIONAL IMAGING

- 11731 09 **Blur-free low-light imaging with color and event cameras** [11731-8]
- 11731 0A **Generation of structured illumination for three-dimensional shape measurement using phase modulation** [11731-9]
- 11731 0B **Contrast transfer function with sinusoidal illumination for super resolved phase imaging** [11731-10]

POSTER SESSION

- 11731 0C **Machine learning with a convolutional neural network for segmentation of ophthalmological images** [11731-11]
- 11731 0D **Terahertz image super-resolution using an improved attention U-net** [11731-12]
- 11731 0E **Super resolution reconstruction of low light level image based on the feature extraction convolution neural network** [11731-13]
