

PROCEEDINGS OF SPIE

# ***International Conference on Signal Image Processing and Communication (ICSIPC 2021)***

**Siting Chen**  
**Wei Qin**  
*Editors*

**16–18 April 2021**  
**Chengdu, China**

*Organized by*  
AEIC Academic Exchange Information Centre (China)

*Sponsored by*  
ACUMINOUS RESEARCH FOUNDATION (China)  
FutureLab Artificial Intelligence IBal\_2 (Germany)

*Published by*  
SPIE

**Volume 11848**

Proceedings of SPIE 0277-786X, V. 11848

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Signal Image Processing and Communication (ICSIPC 2021)*, edited by Siting Chen, Wei Qin, Proc. of SPIE 11848, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## DIGITAL SIGNAL PROCESSING AND INFORMATION IMAGE FORMATION

---

11848 02	<b>Image encryption based on improved chaos and hash function [11848-14]</b>
11848 03	<b>Research on super-resolution reconstruction of single frame image oriented to multi-type semantics [11848-24]</b>
11848 04	<b>Star centroid extraction in stray light background for star sensor [11848-4]</b>
11848 05	<b>Super-resolution reconstruction of image based on generative adversarial network with attention module [11848-23]</b>
11848 06	<b>Degraded document image binarization based on U-Net and transfer learning [11848-53]</b>
11848 07	<b>Research on the identification of obstacle image based on convolutional neural network [11848-51]</b>
11848 08	<b>Hyperspectral and multispectral image fusion via coupled block term decomposition with graph Laplacian regularization [11848-20]</b>
11848 09	<b>Image denoising based on learning sparse coding network [11848-47]</b>
11848 0A	<b>Chaotic image encryption algorithm based on higher and lower bit image operations [11848-40]</b>
11848 0B	<b>Low-illuminance color image enhancement method based on gradient domain guided filtering [11848-31]</b>
11848 0C	<b>What's wrong with the tongue: color grading quantization based on hyperspectral images [11848-15]</b>
11848 0D	<b>Research on cooperative signal and information processing in wireless sensor network [11848-52]</b>
11848 0E	<b>Dispersive selected mapping without side information for PAPR reduction in FBMC/OQAM [11848-3]</b>
11848 0F	<b>Research on image reliable transferring and compression based on coding theory [11848-41]</b>
11848 0G	<b>Low-light image enhancement based on deep convolutional neural networks [11848-55]</b>
11848 0H	<b>Densely connected convolutional networks for breast cancer histopathological image classification [11848-27]</b>

- 11848 OI **Hyperspectral anomaly detection with nonlocal self-similarity prior** [11848-59]
- 11848 OJ **Real-time video stitching system using parallel architecture** [11848-22]
- 11848 OK **Novel polarization-maintaining fiber sensor based on magneto-optical modulation for transverse pressure measurement** [11848-44]

---

**FACE RECOGNITION AND REMOTE SENSING SURFACE MODELING AND SIMULATION**

---

- 11848 OL **Binocular monitoring method based on fisheye lens camera** [11848-65]
- 11848 OM **An improved 3D human model reconstruction technique based on Cascade MVSNet** [11848-63]
- 11848 ON **Cross-domain infrared target recognition based on simulation** [11848-11]
- 11848 OO **Research on face recognition technology based on KPCA and SVM under convolutional filtering** [11848-42]
- 11848 OP **Extracting ground object information from remote sensing images based on DeepLabv3+ model integrating dual attention mechanism** [11848-54]
- 11848 OQ **Design of NFC tag read-write system based on FPGA** [11848-33]
- 11848 OR **Background prediction applied in the correction of defective pixels based on FPGA** [11848-72]
- 11848 OS **Improved SRCNN remote sensing image spatio-temporal fusion based on multi-stream data input and attention mechanism: taking Landsat8 and MODIS remote sensing images as examples** [11848-61]
- 11848 OT **Radar jamming classification and recognition technology based on deep learning** [11848-57]
- 11848 OU **Discrimination of active false targets in distributed multiple-radar system** [11848-37]
- 11848 OV **Brain tumor segmentation based on multi-scale superpixel and kernel low-rank representation** [11848-45]
- 11848 OW **A simulation model of back-projection based non-line-of-sight imaging (NLOS) for resolution analysis** [11848-16]
- 11848 OX **Remote sensing plot segmentation and extraction based on few samples** [11848-70]
- 11848 OY **An improved IHS fusion method of GF-2 remote sensing images** [11848-56]
- 11848 OZ **Visual roughened sensing for private human pose recognition** [11848-38]

- 11848 10     **High-voltage experiment virtual simulation training system based on virtual reality** [11848-64]
- 11848 11     **Adaptive LOD representation of terrain model based on quad-tree** [11848-36]
- 11848 12     **Design of handwritten digit recognition system based on FPGA** [11848-26]
- 11848 13     **Two level complex image method for periodic Green's function in scattering problem of periodic rough surface** [11848-1]
- 11848 14     **Face mask recognition based on object detection** [11848-69]
- 11848 15     **Detection and autonomous landing of insulators by light and small UAV based on deep learning** [11848-46]
- 11848 16     **HUSC: a local feature descriptor of point cloud based on hemisphere neighborhood** [11848-17]

---

**COMMUNICATION NETWORK TECHNOLOGY AND DATA ALGORITHM APPLICATION**

---

- 11848 17     **Timing and carrier synchronization algorithm of MQAM signal** [11848-60]
- 11848 18     **Image steganography algorithm based on image colorization** [11848-62]
- 11848 19     **Research on the security of communication network based on 5G technology** [11848-67]
- 11848 1A     **Muller matrix of medium based on polarized light and its polar decomposition calculation** [11848-10]
- 11848 1B     **Deep CNN with batch renormalization based channel estimation algorithms** [11848-66]
- 11848 1C     **Multi-level quantization method for suppressing interrupted-sampling repeater jamming** [11848-5]
- 11848 1D     **Flame detection method based on improved YOLO-v3** [11848-43]
- 11848 1E     **CNN-HKNN for osteoporosis magnetic resonance imaging classification with data augmentation** [11848-71]
- 11848 1F     **Calculation of the vaulted magnetic field over a ship based on magnetic dipole equivalence** [11848-18]
- 11848 1G     **Development of ultra-wideband multiplex synthesis technology** [11848-35]
- 11848 1H     **Algorithm of infrared-polarization image fusion based on fireworks algorithm** [11848-19]
- 11848 1I     **TCP-BQLP: congestion control algorithm based on buffer queue length prediction in LEO satellite network** [11848-6]

- 11848 1J **Efficient wideband DOA estimation method in the presence of mutual coupling** [11848-48]
- 11848 1K **Semi-distributed load balancing routing algorithm based on LEO satellite networks** [11848-9]
- 11848 1L **License plate extraction and character segmentation in haze weather** [11848-49]
- 11848 1M **FPGA-based fuse muzzle induction setting method** [11848-30]
- 11848 1N **Evaluation of optical camouflage effect based on entropy weight TOPSIS method** [11848-32]
- 11848 1O **Study of alternant-channel chaotic secure communication system and its chaos alternant coding** [11848-25]
- 11848 1P **Single-scale motion blur kernel estimation method based on continuous double frames** [11848-29]
- 11848 1Q **An FPGA-based efficient architecture for accelerating large-scale matrix multiplication** [11848-28]
