2021 IEEE/ACM 29th International Conference on Program Comprehension (ICPC)

ICPC 2021

Table of Contents

Message from the ICPC 2021 Chairs xi
Organizing Committee xii
Steering Committee xiv
Program Committee xv
Keynotes xix

Research

A Multi-modal Transformer-Based Code Summarization Approach for Smart Contracts 1
Zhen Yang (City University of Hong Kong, China), Jacky Keung (City University of Hong Kong, China), Xiao Yu (Wuhan University of Technology, China), Xiaodong Gu (Shanghai Jiao Tong University, China), Zhengyuan Wei (City University of Hong Kong, China), Xiaoxue Ma (City University of Hong Kong, China), and Miao Zhang (City University of Hong Kong, China)

Assessing Semantic Frames to Support Program Comprehension Activities 13
Arthur Marques (University of British Columbia, Canada), Giovanni Viviani (University of British Columbia, Canada), and Gail C. Murphy (University of British Columbia, Canada)

Atoms of Confusion in Java 25
Chris Langhout (Delft University of Technology, The Netherlands) and Maurício Aniche (Delft University of Technology, The Netherlands)

Automated Comment Update: How Far are We? 36
Bo Lin (National University of Defense Technology, China), Shangwen Wang (National University of Defense Technology, China), Kui Liu (Nanjing University of Aeronautics and Astronautics, China; State Key Laboratory of Mathematical Engineering and Advanced Computing, China), Xiaoguang Mao (National University of Defense Technology, China), and Tegawendé F. Bissyandé (University of Luxembourg, China)

Bug or not bug? That is the question .47
Quentin Perez (EuroMov Digital Health in Motion, Univ Montpellier, IMT Mines Ales, France), Pierre-Antoine Jean (EuroMov Digital Health in Motion, Univ Montpellier, IMT Mines Ales, France), Christelle Urtado (EuroMov Digital Health in Motion, Univ Montpellier, IMT Mines Ales, France), and Sylvain Vauttier (EuroMov Digital Health in Motion, Univ Montpellier, IMT Mines Ales, France)

Characterization and Prediction of Questions without Accepted Answers on Stack Overflow .59
Mohamad Yazdaninia (Shiraz University, Iran), David Lo (Singapore Management University, Singapore), and Ashkan Sami (Shiraz University, Iran)

Code Authors Hidden in File Revision Histories: An Empirical Study .71
Siyi Gong (Shanghai Jiao Tong University, China) and Hao Zhong (Shanghai Jiao Tong University, China)

Comprehensive Integration of API Usage Patterns .83
Qi Shen (Peking University, China), Shijun Wu (Peking University, China), Yanzhen Zou (Peking University, China), and Bing Xie (Peking University, China)

ConfInLog: Leveraging Software Logs to Infer Configuration Constraints .94
Shulin Zhou (National University of Defense Technology, China), Xiaodong Liu (National University of Defense Technology, China), Shanshan Li (National University of Defense Technology, China), Zhouyang Jia (National University of Defense Technology, China), Yuanliang Zhang (National University of Defense Technology, China), Teng Wang (National University of Defense Technology, China), Wang Li (National University of Defense Technology, China), and Xiangke Liao (National University of Defense Technology, China)

Considerations and Pitfalls in Controlled Experiments on Code Comprehension .106
Dror G. Feitelson (The Hebrew University, Israel)

Does Code Structure Affect Comprehension? On Using and Naming Intermediate Variables .118
Roee Cates (Hebrew University, Israel), Nadav Yunik (Hebrew University, Israel), and Dror G. Feitelson (Hebrew University, Israel)

EtherSolve: Computing an Accurate Control-Flow Graph from Ethereum Bytecode .127
Filippo Contro (University of Verona), Marco Crosara (University of Verona), Mariano Ceccato (University of Verona), and Mila Dalla Preda (University of Verona)

Exploiting Method Names to Improve Code Summarization: A Deliberation Multi-task Learning Approach .138
Rui Xie (Peking University, China), Wei Ye (Peking University, China), Jinan Sun (Peking University, China), and Shikun Zhang (Peking University, China)

Exploiting the Unique Expression for Improved Sentiment Analysis in Software Engineering Text .149
Kexin Sun (Nanjing University, China), Hui Gao (Nanjing University, China), Hongyu Kuang (Nanjing University, China), Xiaoxing Ma (Nanjing University, China), Guoping Rong (Nanjing University, China), Dong Shao (Nanjing University, China), and He Zhang (Nanjing University, China)

FLeCCS: A Technique for Suggesting Fragment-Level Similar Co-Change Candidates .160
Manishankar Mondal (Khulna University, Bangladesh), Chanchal K. Roy (University of Saskatchewan, Canada), Banani Roy (University of Saskatchewan, Canada), and Kevin A. Schneider (University of Saskatchewan, Canada)

From Novice to Expert: Analysis of Token Level Effects in a Longitudinal Eye Tracking Study .172
Naser Al Madi (Colby College, USA), Cole S. Peterson (University of Nebraska–Lincoln, USA), Bonita Sharif (University of Nebraska–Lincoln, USA), and Jonathan I. Maletic (Kent State University, USA)

Improving Code Summarization with Block-Wise Abstract Syntax Tree Splitting .184
Chen Lin (Xiamen University, China), Zhichao Ouyang (Xiamen University, China), Junqing Zhuang (Xiamen University, China), Jianqiang Chen (Xiamen University, China), Hui Li (Xiamen University, China), and Rongxin Wu (Xiamen University, China)

Keywords Guided Method Name Generation .196
Fan Ge (Central South University, China) and Li Kuang (Central South University, China)

Locating Faulty Methods with a Mixed RNN and Attention Model .207
Shouliang Yang (Shanghai Jiao Tong University, China), Junming Cao (Shanghai Jiao Tong University, China), Hushuang Zeng (Shanghai Jiao Tong University, China), Beijun Shen (Shanghai Jiao Tong University, China), and Hao Zhong (Shanghai Jiao Tong University, China)

Multi-Programming-Language Commits in OSS: An Empirical Study on Apache Projects .219
Zengyang Li (Central China Normal University, China), Xiaoxiao Qi (Central China Normal University), Qinyi Yu (Central China Normal University, China), Peng Liang (Wuhan University, China), Ran Mo (Central China Normal University, China), and Chen Yang (IBO Technology (Shenzhen) Co., Ltd., China)

Predicting Community Smells' Occurrence on Individual Developers by Sentiments .230
Zijie Huang (East China University of Science and Technology, China), Zhiqing Shao (East China University of Science and Technology, China), Guisheng Fan (East China University of Science and Technology, China), Jianhua Gao (Shanghai Normal University, China), Ziyi Zhou (East China University of Science and Technology, China), Kang Yang (East China University of Science and Technology, China), and Xingguang Yang (East China University of Science and Technology, China)

Predicting Crash Fault Residence via Simplified Deep Forest Based on a Reduced Feature Set .242
Kunsong Zhao (Wuhan University, China), Jin Liu (Wuhan University, China), Zhou Xu (Chongqing University, China), Li Li (Monash University, Australia), Meng Yan (Chongqing University, China), Jiaojiao Yu (Wuhan University, China), and Yuxuan Zhou (Syracuse University, USA)

Project-Level Encoding for Neural Source Code Summarization of Subroutines .253
Aakash Bansal (University of Notre Dame, USA), Sakib Haque (University of Notre Dame, USA), and Collin McMillan (University of Notre Dame, USA)

RAID: Tool Support for Refactoring-Aware Code Reviews 265
Rodrigo Brito (Federal University of Minas Gerais, Brazil) and Marco Tulio Valente (Federal University of Minas Gerais, Brazil)

Shallow or Deep? An Empirical Study on Detecting Vulnerabilities using Deep Learning 276
Alejandro Mazuera-Rozo (Università della Svizzera italiana, Switzerland; Universidad de los Andes, Colombia), Anamaria Mojica-Hanke (Universidad de los Andes, Colombia), Mario Linares-Vásquez (Universidad de los Andes, Colombia), and Gabriele Bavota (Università della Svizzera italiana, Switzerland)

The Effect of a Block-Based Language on Formula Comprehension in Spreadsheets 288
Bas Jansen (Delft University of Technology, The Netherlands) and Felienne Hermans (Leiden University, The Netherlands)

The Effect of Crowding on the Reading of Program Code for Programmers with Dyslexia 300
Ian McChesney (Ulster University, United Kingdom) and Raymond Bond (Ulster University, United Kingdom)

Understanding Architecture Erosion: The Practitioners' Perceptive 311
Ruiyin Li (Wuhan University, China; University of Groningen, The Netherlands), Peng Liang (Wuhan University, China), Mohamed Soliman (University of Groningen, The Netherlands), and Paris Avgeriou (University of Groningen, The Netherlands)

Understanding Code Smell Detection via Code Review: A Study of the OpenStack Community 323
Xiaofeng Han (Wuhan University, China), Amjed Tahir (Massey University, New Zealand), Peng Liang (Wuhan University, China), Steve Counsell (Brunel University London, United Kingdom), and Yajing Luo (Wuhan University, China)

Using Grammar Patterns to Interpret Test Method Name Evolution 335
Anthony Peruma (Rochester Institute of Technology, USA), Emily Hu (Tufts University, USA), Jiajun Chen (Stony Brook University, USA), Eman Abdullah AlOmar (Rochester Institute of Technology, USA), Mohamed Wiem Mkaouer (Rochester Institute of Technology, USA), and Christian D. Newman (Rochester Institute of Technology, USA)

Using Non-Verbal Expressions as a Tool in Naming Research 347
Omer Regev (Hebrew University, Israel), Michael Soloveitchik (Hebrew University, Israel), and Dror G. Feitelson (Hebrew University, Israel)

Weighing the Evidence: On Relationship Types in Microservice Extraction 358
Lisa J. Kirby (The University of British Columbia, Canada), Evelien Boerstra (The University of British Columbia, Canada), Zachary J.C. Anderson (The University of British Columbia, Canada), and Julia Rubin (The University of British Columbia, Canada)

Where to Handle an Exception? Recommending Exception Handling Locations from a Global Perspective 369
Xiangyang Jia (Wuhan University, China), Songqiang Chen (Wuhan University, China), Xingqi Zhou (Wuhan University, China), Xintong Li (Wuhan University, China), Run Yu (New York University, USA), Xu Chen (Wuhan University, China), and Jifeng Xuan (Wuhan University, China)

Early Research Achievements

Automatic Extraction of Code Dependency in Virtual Reality Software 381
Jacinto Molina (University of Texas at San Antonio), Xue Qin (Villanova University), and Xiaoyin Wang (University of Texas at San Antonio)

Comprehending Spreadsheets: Which Strategies do Users Apply? 386
Karin Hodnigg (University of Klagenfurt, Austria), Christian Macho (University of Klagenfurt, Austria), Martin Pinzger (University of Klagenfurt, Austria), and Dietmar Jannach (University of Klagenfurt, Austria)

Detecting Inconsistent Thrown Exceptions 391
Lin Xu (Shanghai Jiao Tong University, China) and Hao Zhong (Shanghai Jiao Tong University, China)

Toward Automated Exploit Generation for Known Vulnerabilities in Open-Source Libraries 396
Emanuele Iannone (University of Salerno, Italy), Dario Di Nucci (Tilburg University, The Netherlands), Antonino Sabetta (SAP Security Research, France), and Andrea De Lucia (University of Salerno, Italy)

Towards Improving Architectural Diagram Consistency using System Descriptors 401
Jalves Nicacio (Université du Québec à Chicoutimi, Canada) and Fabio Petrillo (Université du Québec à Chicoutimi, Canada)

Understanding Execution Environment of File-Manipulation Scripts by Extracting Pre-Conditions 406
Rodney Rodriguez (University of Texas at San Antonio) and Xiaoyin Wang (University of Texas at San Antonio)

Replications and Negative Results

API2Com: On the Improvement of Automatically Generated Code Comments Using API Documentations 411
Ramin Shahbazi (University of British Columbia, Canada), Rishab Sharma (University of British Columbia, Canada), and Fatemeh H. Fard (University of British Columbia, Canada)

Checking App Behavior Against App Descriptions: What If There are No App Descriptions? 422
Md Shamsujjoha (Monash University, Australia), John Grundy (Monash University, Australia), Li Li (Monash University, Australia), Hourieh Khalajzadeh (Monash University, Australia), and Qinghua Lu (Data61, CSIRO, Australia)

Warning-Introducing Commits vs Bug-Introducing Commits: A Tool, Statistical Models, and a Preliminary user Study 433
Louis-Philippe Querel (Concordia University, Canada) and Peter C. Rigby (Concordia University, Canada)

What is the Vocabulary of Flaky Tests? An Extended Replication 444
Bruno Henrique Pachulski Camara (Centro Universitário Integrado, Brazil; Federal University of Paraná, Brazil), Marco Aurélio Graciotto Silva (Federal University of Technology - Paraná, Brazil), Andre Takeshi Endo (Federal University of Technology - Paraná, Brazil), and Silvia Regina Vergilio (Federal University of Paraná, Brazil)

Education

Is Algorithm Comprehension Different from Program Comprehension? 455
Philipp Kather (Westfälische Wilhelms-Universität Münster) and Jan Vahrenhold (Westfälische Wilhelms-Universität Münster)

Let's Ask Students About Their Programs, Automatically 467
Teemu Lehtinen (Aalto University, Finland), André L. Santos (Instituto Universitário de Lisboa, Portugal), and Juha Sorva (Aalto University, Finland)

Students' Misunderstanding of the Order of Evaluation in Conjoined Conditions 476
Eliane S. Wiese (University of Utah, USA), Anna N. Rafferty (Carleton College, USA), and Garrett Moseke (University of Utah, USA)

Tool Demonstration

ArCode: A Tool for Supporting Comprehension and Implementation of Architectural Concerns 485
Ali Shokri (Rochester Institute of Technology, USA) and Mehdi Mirakhorli (Rochester Institute of Technology, USA)

Interactive Static Performance Analysis in the IDE 490
Aaron Beigelbeck (TU Wien), Mauricio Aniche (Delft University of Technology), and Jürgen Cito (TU Wien)

RefactorHub: A Commit Annotator for Refactoring 495
Ryo Kuramoto (Tokyo Institute of Technology, Japan), Motoshi Saeki (Tokyo Institute of Technology, Japan), and Shinpei Hayashi (Tokyo Institute of Technology, Japan)

Author Index 501
