2021 IEEE 24th International Symposium on Real-Time Distributed Computing (ISORC)

ISORC 2021

Table of Contents

Message from the General Chairs viii
Message from the Program Chairs ix
Organizing Committee x
Program Committee xi
Steering Committee xii
Subreviewers xiii
Sponsor xiv

Time-Triggered and Time-Sensitive Networks

A Reliable Job Allocation Scheduler for Time-Triggered Wireless Networks 1
Haytham Baniabdelghany (University of Siegen, Germany), Roman Obermaisser (University of Siegen, Germany), and Ala' Khalifeh (German Jordanian University, Jordan)

Synchronizing Real-Time Tasks in Time-Triggered Networks 11
Eleftherios Kyriakakis (Technical University of Denmark, Denmark), Jens Sparsø (Technical University of Denmark, Denmark), Peter Puschner (Inst. of Computer Engineering, TU Wien, Austria), and Martin Schoeberl (Technical University of Denmark, Denmark)

T-Pack: Timed Network Security for Real Time Systems 20
Swastik Mittal (North Carolina State University) and Frank Mueller (North Carolina State University)

Multi-Link Failure Effects on MPLS Resilient Fast-Reroute Network Architectures 29
Wayne Gray (University of Hertfordshire, UK), Athanasios Tsokanos (University of Hertfordshire, UK), and Raimund Kirner (University of Hertfordshire, UK)

Predictability in Real-Time Systems

A Processor Extension for Time-Predictable Code Execution 34
Michael Platzer (Institute of Computer Engineering, TU Wien, Austria) and Peter Puschner (Institute of Computer Engineering, TU Wien, Austria)

Taming Non-Deterministic Low-Level I/O: Predictable Multi-Core Real-Time Systems by SoC Co-Design .43
Steffen Vaas (Friedrich-Alexander-Universität Erlangen-Nürnberg), Peter Ulbrich (Technische Universität Dortmund), Christian Eichler (Friedrich-Alexander-Universität Erlangen-Nürnberg), Peter Wägemann (Friedrich-Alexander-Universität Erlangen-Nürnberg), Marc Reichenbach (Friedrich-Alexander-Universität Erlangen-Nürnberg), and Dietmar Fey (Friedrich-Alexander-Universität Erlangen-Nürnberg)

An Evaluation of Adaptive Partitioning of Real-Time Workloads on Linux .53
Andrea Stevanato (Scuola Superiore Sant'Anna, Italy), Tommaso Cucinotta (Scuola Superiore Sant'Anna, Italy), Luca Abeni (Scuola Superiore Sant'Anna, Italy), and Daniel Bristot De Oliveira (Red Hat, Inc., Italy)

Experiences from Adjusting Industrial Software for Worst-Case Execution Time Analysis .62
Patrick Denzler (Institute of Computer Engineering, TU Wien, Austria), Thomas Frühwirth (Institute of Computer Engineering, TU Wien, Austria; Austrian Center for Digital Production, Austria), Andreas Kirchberger (Institute of Computer Engineering, TU Wien, Austria), Martin Schoeberl (DTU, Lyngby, Denmark), and Wolfgang Kastner (Institute of Computer Engineering, TU Wien, Austria)

Real-Time Systems for Machine Learning Applications

Real-Time Detection of the More is Less Performance Anti-pattern in MySQL Databases .71
Nyalia Lui (Indiana University-Purdue University Indianapolis, USA), Mohammad Al Hasan (Indiana University-Purdue University Indianapolis, USA), and James H. Hill (Indiana University-Purdue University Indianapolis, USA)

Real-Time Scheduling of Multistage IDK-Cascades .79
Sanjoy Baruah (Washington University in Saint Louis)

CUPiD^RT: Detecting Improper GPU Usage in Real-Time Applications .86
Tanya Amert (University of North Carolina at Chapel Hill) and James H. Anderson (University of North Carolina at Chapel Hill)

Energy-Efficient Adaptive System Reconfiguration for Dynamic Deadlines in Autonomous Driving .96
Saehanseul Yi (University of California, Irvine, USA), Tae-Wook Kim (Kookmin University, Korea), Jong-Chan Kim (Kookmin University, Korea), and Nikil Dutt (University of California, Irvine, USA)

Distributed Real-Time Systems

RT-Cloud: Virtualization Technologies and Cloud Computing for Railway Use-Case .105
Gautam Gala (Technische Universität Kaiserslautern, Germany), Gerhard Fohler (Technische Universität Kaiserslautern, Germany), Peter Tummeltshammer (Thales Austria GmbH, Austria), Stefan Resch (Thales Austria GmbH, Austria), and Reinhard Hametner (Thales Austria GmbH, Austria)

Fault-Tolerant Clock Synchronization using Precise Time Protocol Multi-Domain Aggregation . 114
Eleftherios Kyriakakis (Technical University of Denmark, Denmark), Koen Tange (Technical University of Denmark, Denmark), Niklas Reusch (Technical University of Denmark, Denmark), Eder Ollora Zaballa (Technical University of Denmark, Denmark), Xenofon Fafoutis (Technical University of Denmark, Denmark), Martin Schoeberl (Technical University of Denmark, Denmark), and Nicola Dragoni (Technical University of Denmark, Denmark)

Handling Communication Dropouts in an Artificial Hormone and DNA System . 123
Uwe Brinkschulte (Johann Wolfgang Goethe Universität Frankfurt am Main, Germany) and Mathias Pacher (Johann Wolfgang Goethe Universität Frankfurt am Main, Germany)

Handling Assignment Priorities to Degrade Systems in Self-Organizing Task Distribution . 132
Eric Hutter (Goethe University Frankfurt, Germany) and Uwe Brinkschulte (Goethe University Frankfurt, Germany)

Author Index 141
