## 2021 IEEE Statistical Signal Processing Workshop (SSP)

### Signal Modelling, Adaptive Learning and Applications

<i>Tracking Analyses of M-estimate Based LMS and NLMS Algorithms</i> Yi Yu (Southwest University of Science and Technology, China); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)); Tao Yang and Qiang-Ming Cai (Southwest University of Science and Technology, China) .....	1
<i>Performance of adaptive filtering based on Legendre polynomials</i> Lu Shen and Yuriy Zakharov (University of York, United Kingdom (Great Britain)); Long Shi (Southwestern University of Finance and Economics, China); Benjamin Henson (University of York, United Kingdom (Great Britain)) .....	6
<i>Blind Carrier Frequency Offset Estimation for OFDM using Efficient Combinations of ESPRIT and MUSIC</i> Tadeu Ferreira (Fluminense Federal University, Brazil); Sergio Lima Netto (UFRJ, Brazil); Marcello Campos (Federal University of Rio de Janeiro, Brazil); Paulo Diniz (Universidade Federal do Rio de Janeiro, Brazil) .....	11
<i>FxlogRLP: The filtered-x logarithmic recursive least squares-power algorithm</i> Zongsheng Zheng (Southwest Jiaotong University, China); Lu Lu (Sichuan University, China); Yi Yu (Southwest University of Science and Technology, China); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)); Zhigang Liu (Southwest Jiaotong University, China) .....	16
<i>Adaptive Learning with Surrogate Assisted Training Models using Limited Labeled Acoustic Sample Sequences</i> Guilherme Zucattelli (Instituto Militar de Engenharia (IME) & Laboratório de Processamento de Sinais Acústicos (LASP), Brazil); Rosângela Coelho (Military Institute of Engineering (IME), Laboratory of Acoustic Signal Processing, Brazil) .....	21
<i>Zero-Padding OFDM Receiver Using Machine Learning</i> Paulo Diniz (Universidade Federal do Rio de Janeiro, Brazil); Marcele O K Mendonça (UFRJ, Brazil) .....	26
<i>Distributed Sparse Optimization with Minimax Concave Regularization</i> Kei Komuro and Masahiro Yukawa (Keio University, Japan); Renato L. G. Cavalcante (Fraunhofer Heinrich Hertz Institute, Germany) .....	31
<i>On the stochastic modeling of the NLMS algorithm operating with bilinear forms</i> Khaled Jamal Bakri (Federal University of Santa Catarina, Brazil); Eduardo V Kuhn (Federal University of Santa Catarina & Federal University of Technology - Parana, Brazil); Marcos Matsuo and Rui Seara (Federal University of Santa Catarina, Brazil); Jacob Benesty (INRS-EMT, University of Quebec, Canada); Constantin Paleologu and Silviu Ciochina (University Politehnica of Bucharest, Romania) .....	36
<i>Performance of a hybrid non-contiguous planar array: effect of phase shifter quantization</i> Thales Curioni Raia (Military Institute of Engineering (IME), Brazil); Mariana G Pralon (Brazilian Army Technological Center, Brazil); José Antonio Apolinário Jr. (IME, Brazil) .....	41

<i>Data-driven Personalized Cervical Cancer Risk Prediction: A Graph-Perspective</i> Vinay Chakravarthi Gogineni (Simula Research Laboratory, Norway); Severin R. E. Langberg (Cancer Registry of Norway, Norway); Valeriya Naumova (Simula Research Laboratory, Norway); Jan F Nygård and Mari Nygård (Cancer Registry of Norway, Norway); Markus Grasmair and Stefan Werner (NTNU, Norway) .....	46
<i>Direction Finding with List-Based Orthogonal Matching Pursuit for Sparse Arrays</i> Wesley Souza Leite (Pontifical Catholic University of Rio de Janeiro, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)) .....	51
<i>On change detection for PolSAR image time series: a new clustering approach</i> Violeta Roizman (L2S - CentraleSupélec, France); Guillaume Ginolhac (Université Savoie Mont-Blanc & LISTIC, France); Matthieu Jonckheere (Conicet, Argentina); Frederic Pascal (CentraleSupélec, France) .....	56
<i>Energy-Efficient Distributed Learning with Adaptive Bias Compensation for Coarsely Quantized Signals</i> Alireza Danaee (Pontifical Catholic University of Rio de Janeiro, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)); Vitor H Nascimento (University of São Paulo, Brazil) .....	61
<i>Exploring Undermodeling in Combinations of Adaptive Filters</i> Thiago Yuji Aoyagi (University of São Paulo, Brazil); Alexandre Ferreira (Inatel, Brazil); Cassio G. Lopes (University of São Paulo, Brazil); Vitor H Nascimento (University of São Paulo, Brazil) .....	66
<i>Competing Adaptive Networks</i> Stefan Vlaski (University of California, Los Angeles, USA); Ali Sayed (Ecole Polytechnique Federale de Lausanne EPFL, School of Engineering, Switzerland) .....	71

## Deep Learning

<i>Contaminated Multiband Signal Identification Via Deep Learning</i> Youye Xie, Michael Wakin and Gongguo Tang (Colorado School of Mines, USA) .....	76
<i>Minimizing Manual Labeling Effort for the Semantic Segmentation of Aerial Images</i> Daniel Gritzner (Leibniz Universität Hannover, Germany); Joern Ostermann (Leibniz Universitaet Hannover, Germany) .....	81

## Stochastic Optimization and Optimized Sampling

<i>Parallel Block Particle Filtering</i> Rui Min (University of Lille - CRISTAL, France); Christelle Garnier (IMT Lille Douai -CRISTAL, France); François Septier (Universite Bretagne Sud / LMBA UMR CNRS 6205, France); John Klein (University of Lille - CRISTAL, France) .....	86
<i>Fast Bayesian model selection in imaging inverse problems using residuals</i> Ana Fernandez Vidal and Marcelo Pereyra (Heriot-Watt University, United Kingdom (Great Britain)); Alain Durmus (Ecole Normale Superieure Paris-Saclay, United Kingdom (Great Britain)); Jean-François Giovannelli (IMS & Univ\, Bordeaux, CNRS, BINP, France) .....	91

<i>The Perturbed Prox-Preconditioned SPIDER algorithm: non-asymptotic convergence bounds</i>	
Gersende Fort (CNRS, France); Eric Moulines (Ecole Polytechnique, France) .....	96
<i>Simulated annealing: a review and a new scheme</i>	
Thomas Guilmeau (Université Paris-Saclay, Centrale Supélec, INRIA, France); Emilie Chouzenoux (CVN, Inria Saclay, France); Víctor Elvira (University of Edinburgh, United Kingdom (Great Britain)) .....	101

## Statistical Methods for IoT

<i>Energy-efficient 1-bit feedback NOMA in wireless networks with no CSIT/CDIT</i>	
Hajar El Hassani (ETIS UMR 8051, CY Cergy Paris Universite, ENSEA, CNRS, France); Anne Savard (IMT Lille Douai - IRCICA, France); E. Veronica Belmega (ETIS / ENSEA – UCP - CNRS, France) .....	106
<i>Comparison of Short Blocklength Slepian-Wolf Coding for Key Reconciliation</i>	
Mahdi Shakiba-Herfeh (ETIS, France); Arsenia Chorti (ETIS UMR 8051, CY University, ENSEA, CNRS & ETIS, France) .....	111
<i>Rate-Compatible Polar Code Construction Based on Extension and Non-Uniform Channel Polarization for IoT Applications</i>	
Robert Mota Oliveira (PUC-RIO, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)) .....	116
<i>Time-Instance Zero-Crossing Precoding with Quality-of-Service Constraints</i>	
Diana M. V. Melo (Pontifícia Universidade Católica do Rio de Janeiro, PUC-Rio, Brazil); Lukas T N Landau (Pontifícia Universidade Católica do Rio de Janeiro, Brazil); Lucas Ribeiro (TU Ilmenau, Germany); Martin Haardt (Ilmenau University of Technology, Germany) .....	121
<i>Control and data traffic isolation in SDWSN using IEEE 802.15.4e TSCH</i>	
Tarek Sayjari and Regina Melo Silveira (University of São Paulo & Escola Politécnica, Brazil); Cintia Borges Margi (Universidade de São Paulo & Escola Politécnica, Brazil) .....	126
<i>Distributed DoS Attack Detection in SDN: Tradeoffs in Resource Constrained Wireless Networks</i>	
Gustavo A. Nunez Segura (University of Sao Paulo, Brazil); Arsenia Chorti (ETIS UMR 8051, CY University, ENSEA, CNRS & ETIS, France); Cintia Borges Margi (Universidade de São Paulo & Escola Politécnica, Brazil) .....	131
<i>Low complexity distributed estimation for IoT sensor networks</i>	
Allan Eduardo Feitosa (University of Sao Paulo, Brazil); Vitor H Nascimento (University of São Paulo, Brazil); Cassio G. Lopes (University of São Paulo, Brazil) .....	136
<i>Adaptive IIR Diffusion Networks for IoT Applications</i>	
Rodrigo M. Coelho and Cassio G. Lopes (Escola Politécnica da Universidade de São Paulo, Brazil); Humberto F Ferro (Universidade Federal do Paraná, Brazil) .....	141

## Recent Trends and Applications in Latent Variable Analysis

<i>Blind Estimation of Sparse SIMO Channels: Quadratic vs. Linear Constraints</i>	
Mohamed Nait-Meziane (University of Orléans); Karim Abed-Meraim (University of Orleans & PRISME Lab., France) .....	146

<i>On enhanced ensemble learning for multimodal remote sensing data analysis by capacity optimization</i>	
Saloua Chlaily (UiT the Arctic University of Norway, Norway); Dino Ienco (IRSTEA, France); Christian Jutten (GIPSA-Lab, France); Andrea Marinoni (UiT the Arctic University of Norway, Norway).....	151
<i>An SOS-Based Algorithm for Source Separation in Nonlinear Mixtures</i>	
Caroline P. A. Moraes and Juliana O Saldanha (Federal University of ABC, Brazil); Romis Ribeiro Attux (State University of Campinas - Unicamp, Brazil); Leonardo Tomazeli Duarte (University of Campinas (UNICAMP), Brazil); Aline Neves and Denis Fantinato (Federal University of ABC, Brazil) .....	156
<i>Two-qubit unitary quantum process tomography by multiple-delay output measurements for one unknown input pure state value</i>	
François Verdeil (University of Toulouse Paul Sabatier, France); Yannick Deville (University of Toulouse, France); Alain Deville (Aix-Marseille Univ, France) .....	161
<i>A Hypothesis Testing Approach to Nonstationary Source Separation</i>	
Reza Sameni (Emory University, USA); Christian Jutten (GIPSA-Lab, France) .....	166
<i>How beamforming can solve the brain source imaging problem?</i>	
Paul Berraute (University of Rennes1-LTSI & Inserm - UMR 1099, France); Laurent Albera (Université de Rennes1 & Inserm, France); Michel Rochette (Ansys Inc., France); Isabelle Merlet (University of Rennes 1, France); Amar Kachenoura (University of Rennes1-LTSI & Inserm - UMR 1099, France) .....	171

## **Signal Processing for Multiple-Antenna Systems**

<i>Design of a Low-complexity Receiver for Uplink SCMA with Multiple Receive Antennas</i>	
Bruno Fontana da Silva (Instituto Federal Sul-rio-grandense (IFSul), Brazil); Juliana C Inácio and Ana L Scharf (Federal University of Santa Catarina, Brazil); Bartolomeu F. Uchôa-Filho (Federal University of Santa Catarina & Communications Research Group, Brazil) .....	176
<i>Iterative MMSE Precoding and Power Allocation in Cell-Free Massive MIMO Systems</i>	
Victoria M. T. Palhares (ETH Zurich, Switzerland); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)); Andre R. Flores (Pontifical Catholic University of Rio de Janeiro, Brazil); Lukas T N Landau (Pontifícia Universidade Católica do Rio de Janeiro, Brazil) .....	181
<i>Energy-Efficient Digital Beamforming by Means of Linear Computation Coding</i>	
Ralf R. Müller (Friedrich-Alexander Universität Erlangen-Nürnberg, Germany) .....	186
<i>Deep Stochastic Optimization for Algorithm-Specific Pilot Design in Massive MIMO</i>	
Zhe Huang, An Liu, Yunlong Cai and Minjian Zhao (Zhejiang University, China) .....	191
<i>RIS-Aided mmWave MIMO Radar System for Adaptive Multi-Target Localization</i>	
Emrah Cisija (Ruhr-University Bochum, Germany); Aya Mostafa (Ruhr University Bochum, Germany); Aydin Sezgin (RUB, Germany); Henk Wymeersch (Chalmers University of Technology, Sweden) .....	196
<i>Testing Uncorrelation of Multi-antenna Signals using Linear Spectral Statistics of the Spatio-temporal Sample Autocorrelation Matrix</i>	
Philippe Loubaton (Université de Marne La Vallée, France); Xavier Mestre (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain) .....	201

<i>Robust Adaptive Power Allocation for the Downlink of Multiple-Antenna Systems</i> Andre R. Flores (Pontifical Catholic University of Rio de Janeiro, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)) .....	206
<i>SPADE: Sparsity-Adaptive Equalization for mmWave Massive MU-MIMO</i> Seyed Hadi Mirfarshbafan and Christoph Studer (ETH Zurich, Switzerland) .....	211

## Sensor Array Signal Processing

<i>A cyclostationarity based ESPRIT algorithm for DOA estimation of uniform circular array</i> Qitong Zhang (Inner Mongolia University, China); Yang Liu (Institute of Electronic Information Engineering, Inner Mongolia University, China); Xudong Long (Inner Mongolia University & College of Electronic Information Engineering, China); Kaipeng Song (Inner Mongolia University, School of Electronic and Information Engineering, China); Xin He (Inner Mongolia University & School of Electronic Information and Engineering, China); Xueli Ren (Inner Mongolia University, China); Tianshuang Qiu (Dalian University of Technology, China) .....	216
<i>Matched Illumination Waveforms using Multi-Tone Sinusoidal Frequency Modulation</i> Kaushallya Adhikari (University of Rhode Island, USA); David Hague (Naval Undersea Warfare Center, USA) .....	221
<i>Off-grid Radar target detection with the Normalized Matched Filter: a monopulse-based detection scheme</i> Pierre Develter (ONERA, Université Paris-Saclay & SONDRRA, France); Jonathan Bosse (ONERA, France); Olivier Rabaste (Onera, France); Philippe Forster (Universite Paris Ouest Nanterre, France); Jean-Philippe Ovarlez (ONERA & Centrale-Supelec/SONDRRA, France) .....	226
<i>A Robust Blind Source Separation Algorithm Based on Non-negative Matrix Factorization and Frequency-Sliding Generalized Cross-Correlation</i> Shiting Wang, Yi Zhou, Xiuxiang Yang and Hongqing Liu(Chongqing University of Posts and Telecommunications, China) .....	231

## Bayesian techniques

<i>Bayesian Learning for Regression using Dirichlet Prior Distributions of Varying Localization</i> Paul Rademacher (Naval Research Laboratory, USA); Milos Doroslovacki (The George Washington University, USA) .....	236
<i>Bayesian model selection for unsupervised image deconvolution with structured Gaussian priors</i> Benjamin B. Harroué and Jean-François Giovannelli (IMS & Univ\ . Bordeaux, CNRS, BINP, France); Marcelo Pereyra (Heriot-Watt University, United Kingdom (Great Britain)) .....	241
<i>Bayesian Node classification for noisy graphs</i> Hakim Hafidi (Université Internationale de Rabat & Institut Polytechnique de Paris, Morocco); Mounir Ghogho (UIR, Morocco); Philippe Ciblat (Telecom Paris & Institut Polytechnique de Paris, France); Ananthram Swami (Army Research Lab., USA) .....	246
<i>Variational Bayesian Inference for Pairwise Markov Models</i> Katherine Morales (Samovar, Telecom Sudparis, Institut Polytechnique de Paris, France); Yohan Petetin (Telecom SudParis, France) .....	251

## mmWave Communications for B5G Cellular Networks

Capacity of Distributed Millimetre-wave Antenna Arrays Shammi Farhana Islam, Alister G. Burr and David Grace (University of York, United Kingdom (Great Britain)) .....	256
<i>Antenna Selection for Multi-Beam Multiplexing Design Based on the Hybrid Beamforming Architecture</i> Junwei Zhang and Wei Liu (University of Sheffield, United Kingdom (Great Britain)) .....	261
<i>An Adaptive Hierarchical Search Algorithm for Millimetre-Wave Beam Alignment</i> Song Li, Chunshan Liu and Lou Zhao (Hangzhou Dianzi University, China); Min Li (Zhejiang University, China) .....	266
<i>Hybrid Precoding for Partial-Full Mixed Connection mmWave MIMO</i> Prabhat R Gautam and Li Zhang (University of Leeds, United Kingdom (Great Britain)) .....	271

## Signal Processing for Relaying in Wireless Networks

<i>C-RAN-Based Cluster-Head-Driven UAV Relaying, with Recursive Maximum Minimum Distance Criterion</i> Flavio Duarte (Centre for Telecommunications Studies (CETUC), Pontifical Catholic University of Rio de Janeiro, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)) .....	276
<i>Simultaneous Wireless Information and Power Transfer in Low-Latency Relaying Networks with Nonlinear Energy Harvesting</i> Xiaopeng Yuan and Yulin Hu (RWTH Aachen University, Germany); James Gross (KTH Royal Institute of Technology, Sweden); Anke Schmeink (RWTH Aachen University, Germany) .....	281
<i>Radio-Map-Based UAV Placement Design for UAV-Assisted Relaying Networks</i> Xiaopeng Yuan and Yulin Hu (RWTH Aachen University, Germany); James Gross (KTH Royal Institute of Technology, Sweden); Anke Schmeink (RWTH Aachen University, Germany).....	286
<i>On the Generation of Autocorrelated <math>\alpha</math>-<math>\eta</math>-<math>\kappa</math>-<math>\mu</math> Fading Sequences</i> Vanessa Mendes Rennó (School of Electrical and Computation Engineering, State University of Campinas (Unicamp), Brazil); José Cândido Silveira Santos Filho (University of Campinas - Unicamp, Brazil) .....	291
<i>Fully Digital and Hybrid Beamforming Design For Millimeter-Wave MIMO-OFDM Two-Way Relaying Systems</i> Sepideh Gherekhloo (TU Ilmenau, Germany); Khaled Ardah and Martin Haardt (Ilmenau University of Technology, Germany) .....	296

## Adaptive techniques and Machine Learning

<i>A Nearest Neighbors quadrature for posterior approximation via adaptive sequential design</i> Fernando Llorente (Universidad Carlos III de Madrid, Spain); Luca Martino (Universidad Rey Juan Carlos, Spain); Víctor Elvira (University of Edinburgh, United Kingdom (Great Britain)); David Delgado (Universidad Carlos III de Madrid, Spain) .....	301
--	-----

<i>Multi-Output Kernel Adaptive Filtering with Reduced Complexity</i>	
Diego Cuevas and Ignacio Santamaria (University of Cantabria, Spain) .....	306
<i>Variational Log-Power Spectral Tracking for Acoustic Signals</i>	
Bart van Erp, Ismail Senoz and Bert de Vries (Eindhoven University of Technology, The Netherlands).....	311
<i>The Perturbed Prox-Preconditioned SPIDER algorithm for EM-based large scale learning</i>	
Gersende Fort (CNRS, France); Eric Moulines (Ecole Polytechnique, France) .....	316
<i>Mutil-Speaker tracking by fusing audio and video information</i>	
Xin Zhang, Hongqing Liu, Yi Zhou and Zhen Luo (Chongqing University of Posts and Telecommunications, China) .....	321
<i>Neural Enhanced Belief Propagation for Cooperative Localization</i>	
Mingchao Liang and Florian Meyer (University of California San Diego, USA) .....	326
<i>Random Forest-based Diffusion Information Geometry for Supervised Visualization and Data Exploration</i>	
Jake S. Rhodes and Adele Cutler (Utah State University, USA); Guy Wolf (Université de Montréal, Canada); Kevin Moon (Utah State University, USA).....	331
<i>Globally Convergent Algorithms For Learning Multivariate Generalized Gaussian Distributions</i>	
Bin Wang, Huanyu Zhang and Ziping Zhao (ShanghaiTech University, China); Ying Sun (The Pennsylvania State University, USA) .....	336
<i>A Subsampling-Based Method for Causal Discovery on Discrete Data</i>	
Austin Goddard and Yu Xiang (University of Utah, USA) .....	341

## **Signal Processing for Systems with Coarse Quantization**

<i>On the Modelling of Coarse Vector Quantization in Distributed Massive MIMO</i>	
Alister G. Burr (University of York, United Kingdom (Great Britain)); Dick Maryopi (Telkom University, Indonesia) .....	346
<i>Gridless Channel Estimation for MmWave Hybrid Massive MIMO Systems with Low-Resolution ADCs</i>	
In-soo Kim and Junil Choi (KAIST, Korea (South)) .....	351
<i>Iterative Detection and Decoding for Multiuser MIMO Systems with Low Resolution Precoding and PSK Modulation</i>	
Erico Lopes (PUC-Rio, Brazil); Lukas T N Landau (Pontifícia Universidade Católica do Rio de Janeiro, Brazil) .....	356
<i>Reduced-Complexity Greedy Distributed Information Bottleneck Algorithm</i>	
Steffen Steiner and Volker Kuehn (University of Rostock, Germany); Maximilian Stark and Gerhard Bauch (Hamburg University of Technology, Germany) .....	361
<i>Deep Learning Based Range and DOA Estimation Using Low Resolution FMCW Radars</i>	
Sai Annaluru and Khurram Usman (The University of Texas at Austin, USA); Robert Heath (North Carolina State University & The University of Texas at Austin, USA) .....	366
<i>Deep One-bit Compressive Autoencoding</i>	
Shahin Khobahi, Arindam Bose and Mojtaba Soltanalian (University of Illinois at Chicago, USA) .....	371
<i>ML Carrier Phase Estimation with 1-bit Quantization and Oversampling</i>	
Martin Schlüter (Dresden University of Technology, Germany); Florian Gast (Technische Universität Dresden, Germany); Meik Dörpinghaus (TU Dresden, Germany); Gerhard P. Fettweis (Technische Universität Dresden, Germany) .....	376

<i>Comparator Network Aided Channel Estimation and Achievable Rates for MIMO Receivers with 1-bit Quantization</i>	
Ana Beatriz L. B. Fernandes and Lukas T N Landau (Pontifícia Universidade Católica do Rio de Janeiro, Brazil) .....	381
<i>Continuous Phase Modulation with 1-bit Quantization using Adaptive Oversampling</i>	
Rodrigo Alencar (IME, Brazil); Lukas T N Landau (Pontifícia Universidade Católica do Rio de Janeiro, Brazil) .....	386
<i>Sparse linear precoders for mitigating nonlinearities in massive MIMO</i>	
Amine Mezghani (University of Manitoba, Canada); Daniel Plabst (Technische Universität München, Germany); Lee Swindlehurst (University of California at Irvine, USA); Inbar Fijalkow (ETIS / CY Cergy Paris University, ENSEA, CNRS, France); Josef A. Nossek (TU Munich, Germany & Federal University of Ceara, Fortaleza, Brazil) .....	391

## **Detection and estimation**

<i>Non-parametric Online Changepoint Detection Algorithm</i>	
Ranveer Uppal and Sanath Nagaraj (Georgia Institute of Technology, USA); Eva van Leer (Georgia State University, USA); David V Anderson (Georgia Institute of Technology, USA) .....	396
<i>Absolute Eigenvalues-Based Covariance Matrix Estimation for a Sparse Array</i>	
Kaushallya Adhikari (University of Rhode Island, USA) .....	401
<i>Unknown Signal Detection in Interference and Noise using Hidden Markov Models</i>	
Gabriel Ford, Benjamin Foster and Michael Liston (Lockheed Martin Advanced Technology Laboratories, USA); Moshe Kam (New Jersey Institute of Technology, USA) .....	406
<i>Sparse Subspace Averaging for Order Estimation</i>	
Vaibhav Garg (University of Cantabria, Spain); David Ramírez (Universidad Carlos III de Madrid, Spain); Ignacio Santamaria (University of Cantabria, Spain) .....	411
<i>A decision fusion for source detection based on multimodal supervised spectral unmixing</i>	
Johan Lefeuvre (Ecole Centrale de Nantes & Total SA, France); Saïd Moussaoui (Ecole Centrale Nantes, LS2N CNRS UMR 6004, France); Laurent Grosset, Anna Luiza Mendes Siqueira and Franck Delayens (Total Marketing & Services, France) .....	416
<i>Change detection in the covariance structure of high-dimensional Gaussian low-rank Models</i>	
Rémi Beisson (Université de Bordeaux & Laboratoire IMS, France); Pascal Vallet (Bordeaux INP & IMS, France); Audrey Giremus (Université de Bordeaux, France); Guillaume Ginolhac (Université Savoie Mont-Blanc & LISTIC, France) .....	421
<i>Quickest detection of stochastic false data injection attacks with unknown parameters</i>	
Bettina D'Avila Barros (Norwegian University of Science and Technology, Norway); Naveen K. D. Venkategowda (Linköping University, Sweden); Stefan Werner (NTNU, Norway) .....	426
<i>Marginalization on Bifurcation Diagrams: A New Perspective on Infinite-Horizon Prediction</i>	
Helmuth J Naumer, Yizhen Lu and Farzad Kamalabadi (University of Illinois at Urbana-Champaign, USA) .....	431
<i>Sampling Rate Offset Estimation In Acoustic Sensor Networks</i>	
Anil Ganti and Jeffrey L Krolik (Duke University, USA).....	436

<i>Multivariate Signal Denoising Based on Generic Multivariate Detrended Fluctuation Analysis</i>	
Khuram Naveed and Sidra Mukhtar (COMSATS University Islamabad (CUI), Islamabad, Pakistan); Naveed ur Rehman (Aarhus University, Pakistan) .....	441
<i>Post-Parameter-Selection Maximum-Likelihood Estimation</i>	
Nadav Harel (Ben-Gurion University of the Negev, Israel); Tirza Routtenberg (Ben Gurion University of the Negev, Israel) .....	446
<i>Prediction in the presence of response-dependent missing labels</i>	
Hyebin Song (The Pennsylvania State University, USA); Garvesh Raskutti (University of Wisconsin-Madison, USA); Rebecca Willett (University of Chicago, USA) .....	451

## **Signal analysis, decomposition and sampling**

<i>Robust Probabilistic Simplex Component Analysis</i>	
Yuening Li (The Chinese University of Hong Kong & CUHK, Hong Kong); Wing-Kin Ma (The Chinese University of Hong Kong, Hong Kong); Nikolaos D Sidiropoulos (University of Virginia, USA) .....	456
<i>Probabilistic Tensor Train Decomposition with Automatic Rank Determination from Noisy Data</i>	
Le Xu (The University of Hong Kong, Hong Kong); Lei Cheng (Shenzhen Research Institute of Big Data, Chinese University of Hong Kong (Shenzhen), Hong Kong); Ngai Wong (The University of HongKong, Hong Kong); Yik-Chung Wu (The University of Hong Kong, Hong Kong) .....	461
<i>One-Bit Direct Position Determination of Narrowband Gaussian Signals</i>	
Amir Weiss (Massachusetts Institute of Technology, USA); Gregory Wornell (MIT, USA) .....	466
<i>Social Bubbles and Superspreaders: Source Identification for Contagion Processes on Hypertrees</i>	
Sam Spencer and Lav R. Varshney (University of Illinois at Urbana-Champaign, USA) .....	471

## **Compressive sensing and sparsity-aware techniques**

<i>Weighed l1 on the simplex: Compressive sensing meets locality</i>	
Abiy Tasissa (Tufts University, USA); Pranay Tankala (Harvard University, USA); Demba E Ba (Harvard University) .....	476
<i>Recovery of Joint Probability Distribution from One-Way Marginals: Low Rank Tensors and Random Projections</i>	
Jian Vora (IIT Bombay, India); Karthik S. Gurumoorthy (Amazon, India); Ajit Rajwade (IIT Bombay, India) .....	481
<i>Online Learning of Sparse Gaussian Conditional Random Fields with Application to Prediction of Energy Consumers Behavior</i>	
Nasim Yahyasoltani (Marquette University, USA) .....	486
<i>Distortion Approximation of a Compressed Softmax Layer</i>	
Diana Resmerita (Université Côte d'Azur / Kalray, France); Rodrigo Cabral Farias (Universite Cote d'Azur, CNRS, France); Benoit Dupont de Dinechin (Kalray, France); Lionel Fillatre (Université Côte d'Azur, France) .....	491
<i>MR elasticity reconstruction using statistical physical modeling and explicit data driven denoising regularizer</i>	
Narges Mohammadi, Marvin Doyley and Müjdat Çetin (University of Rochester, USA) .....	496

<i>Multiple Measurement Vector Model for Sparsity-Based Vascular Ultrasound Imaging</i> Didem Dogan and Geert Leus (Delft University of Technology, The Netherlands); Pieter Kruizinga (ERASMUS MC, The Netherlands); Johannes Bosch (Erasmus Medical Center, The Netherlands) .....	501
---	-----

## **Massive Machine-Type Communications**

<i>A Cooperative Jamming Scheme for Physical Layer Security enhancement in Multihop IoT Networks with Colluding Eavesdroppers</i> Zaid Abdullah (University of Luxembourg, Luxembourg); Gaojie Chen and Jonathon Chambers (University of Leicester, United Kingdom (Great Britain)) .....	506
<i>Multi-Channel Estimation of Devices with Preamble Collision In Distributed MTC</i> Jinho Choi (Deakin University, Australia) .....	511
<i>Joint Activity Detection and Channel Estimation Based on Message Passing with RBP Scheduling for mMTC</i> Roberto Di Renna (Pontifical Catholic University of Rio de Janeiro, Brazil); Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro, Brazil & University of York, United Kingdom (Great Britain)) .....	516
<i>A semantics-aware communication scheme to estimate the empirical measure of a Quantity of Interest via multiple access fading channels</i> Johannes Dommel (Fraunhofer Heinrich Hertz Institute, Germany); Dennis Wieruch (Fraunhofer Institute for Telecommunications, Heinrich Hertz Institute, Germany); Zoran Utkovski (Fraunhofer HHI, Germany); Slawomir Stanczak (Technische Universität Berlin & Fraunhofer Heinrich Hertz Institute, Germany) .....	521
<i>Measure Concentration on the OFDM-based Random Access Channel</i> Gerhard Wunder (Freie Universität Berlin & Heisenberg Communications and Information Theory Group, Germany); Axel Flinth (Chalmers University of Technology, Sweden); Benedikt Groß (FU Berlin, Germany) .....	526
<i>Hierarchical Sparse Recovery from Hierarchically Structured Measurements with Application to Massive Random Access</i> Benedikt Groß (FU Berlin, Germany); Axel Flinth (Chalmers University of Technology, Sweden); Ingo Roth (FU Berlin, Germany); Jens Eisert (Free University Berlin, Germany); Gerhard Wunder (Freie Universität Berlin & Heisenberg Communications and Information Theory Group, Germany) .....	531

## **Signal Processing for UAV-Borne Radars**

<i>Overview of fully adaptive radar (FAR) for UAV applications</i> Muralidhar Rangaswamy (AFRL, USA); Matthew Shuman (Air Force Research Laboratory, USA); Michael Zoltowski (Purdue University, USA) .....	536
<i>Cardiac and Respiratory Sensing from A Hovering UAV Radar Platform</i> Yu Rong (ASU, USA); Andrew Herschfelt, Jacob B Holtom and Daniel W. Bliss (Arizona State University, USA) .....	541

## **Graph signal processing**

<i>Scalable Financial Index Tracking With Graph Neural Networks</i> Zepeng Zhang and Ziping Zhao (ShanghaiTech University, China) .....	546
--	-----

<i>Signal processing with a distribution of graph operators</i>	
Feng Ji and Wee Peng Tay (Nanyang Technological University, Singapore) .....	551
<i>Graph Learning from Noisy and Incomplete Signals on Graphs</i>	
Abdullah Karaaslanli and Selin Aviyente (Michigan State University, USA) .....	556
<i>Sparse Partial Least Squares for Coarse Noisy Graph Alignment</i>	
Michael Weylandt and George Michailidis (University of Florida, USA); T. Mitchell Roddenberry (Rice University, USA) .....	561
<i>Direction-of-Arrival Estimation Using Signal Processing on Graphs</i>	
Eldridge Alcantara and Les Atlas (University of Washington, Seattle, USA); Shima Abadi (University of Washington, Bothell, USA) .....	566

## **Machine Learning for Communications**

<i>Data-Driven Symbol Detection via Model-Based Machine Learning</i>	
Nariman Farsad (Ryerson University, Canada); Nir Shlezinger (Ben-Gurion University, Israel); Andrea Goldsmith (Stanford University, USA); Yonina Eldar (Weizmann Institute of Science, Israel) .....	571
<i>FedRec: Federated Learning of Universal Receivers over Fading Channels</i>	
Mahdi Boloursaz Mashhadi (Imperial College London, United Kingdom (Great Britain)); Nir Shlezinger (Ben-Gurion University of the Negev, Israel); Yonina C. Eldar (Weizmann Institute of Science, Israel); Deniz Gündüz (Imperial College London, United Kingdom (Great Britain)) .....	576
<i>Deep Learning Beam Optimization in Millimeter-Wave Communication Systems</i>	
Rafail Ismayilov and Renato L. G. Cavalcante (Fraunhofer Heinrich Hertz Institute, Germany); Slawomir Stanczak (Technische Universität Berlin & Fraunhofer Heinrich Hertz Institute, Germany) .....	581
<i>Machine Learning Approach to Estimate Video QoE of Encrypted DASH Traffic in 5G Networks</i>	
Raza Ul Mustafa (University of Campinas - UNICAMP, Brazil); David Moura (CTEx &INTRIG Information & Networking Technologies Research & Innovation Group, Brazil); Christian Esteve Rothenberg (University of Campinas - UNICAMP, Brazil) .....	586
<i>Adversarial Attacks on Deep Learning Based mmWave Beam Prediction in 5G and Beyond</i>	
Brian Kim (University of Maryland, USA); Yalin E Sagduyu (Intelligent Automation, Inc., USA); Tugba Erpek (Virginia Tech, USA); Sennur Ulukus (University of Maryland, USA) .....	590
<i>Generating MIMO Channels for 6G Virtual Worlds Using Ray-tracing Simulations</i>	
Aldebaro Klautau (Universidade Federal do Para, Brazil); Ailton P Oliveira (Universidade Federal do Pará, Brazil); Isabela P Trindade (Universidade Federal do Para, Brazil); Wesin Alves (UFPA, Brazil) .....	595
<i>Knowledge Distillation For Wireless Edge Learning</i>	
Ahmed Mohamed, Shafin Jameel and Aly El Gamal (Purdue University, USA) .....	600
