

PROCEEDINGS OF SPIE

Fifteenth International Conference on Quality Control by Artificial Vision

**Kenji Terada
Akio Nakamura
Takashi Komuro
Tsuyoshi Shimizu**
Editors

**12–14 May 2021
Virtual Tokushima, Japan**

Sponsored by
Technical Committee on Industrial Application of Image Processing, Japan Society for
Precision Engineering (JSPE)

Volume 11794

Proceedings of SPIE 0277-786X, V. 11794

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifteenth International Conference on Quality Control by Artificial Vision*, edited by Kenji Terada, Akio Nakamura, Takashi Komuro, Tsuyoshi Shimizu, Proc. of SPIE 11794, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FIFTEENTH INTERNATIONAL CONFERENCE ON QUALITY CONTROL BY ARTIFICIAL VISION

11794 02	Monocular visual odometry for underground railway scenarios [11794-5]
11794 03	Synthetic training data generation for deep learning based quality inspection [11794-13]
11794 04	Inner and outer 3D shape reconstruction of puppet head from CT images [11794-17]
11794 05	Interest of pseudo-focused images for key-points detection in plenoptic imaging [11794-20]
11794 06	A reconstruction method of 3D face model from front and side 2D face images using deep learning model [11794-22]
11794 07	Inspection of mechanical assemblies based on 3D deep learning approaches [11794-23]
11794 08	Deflectometry based on light-field imaging [11794-24]
11794 09	Scan quality estimation for industrial computed tomography using convolutional neural networks [11794-25]
11794 0A	Aperture localization based on vibro-stimuli generated from distance variation [11794-45]
11794 0B	Training PointNet for human point cloud segmentation with 3D meshes [11794-32]
11794 0C	Development of a 3D visualization system for the cerebral aneurysm coil embolization [11794-35]
11794 0D	3D reconstruction of mirror-like surfaces by smart deflectometry [11794-47]
11794 0E	Quality assessment of dynamic virtual relighting from RTI data: application to the inspection of engineering surfaces [11794-48]
11794 0F	Tiny range image sensors using multiple laser lights for short distance measurement [11794-50]
11794 0G	Improved visual saliency estimation on manufactured surfaces using high-dynamic reflectance transformation imaging [11794-51]
11794 0H	Development of image simulator for forward-looking sonar using 3D rendering [11794-53]
11794 0J	Polynomial-fitting based calibration for an active 3D sensing system using dynamic light section method [11794-55]

- 11794 OK **Separation of compound actions with wrist and finger based on EMG** [11794-4]
- 11794 OL **Digital twins of human corneal endothelium from generative adversarial networks** [11794-10]
- 11794 OM **Latent space visualization of half face and full face by generative model** [11794-21]
- 11794 ON **Identification of insect infiltration time by tissue slice** [11794-18]
- 11794 OO **Piano performance support system with a head-mounted display** [11794-30]
- 11794 OP **Recipe recommendation and cooking instruction based on food material recognition** [11794-34]
- 11794 OQ **Environment understanding during walking via modality conversion from visual to haptic information: evaluate impression for the vibro-stimuli simulated by optical flow** [11794-36]
- 11794 OR **Supporting sports instruction with comparative display of forms** [11794-42]
- 11794 OS **Webcam-based categorization of task engagement of PC users at work** [11794-43]
- 11794 OT **Social distance measurement for indoor environments** [11794-44]
- 11794 OU **Vision-based classification of mosquito species: data augmentation by background replacement for convolutional neural network-based species classification of smashed mosquitoes** [11794-41]
- 11794 OV **Proposal for 3D visualization of cardiac mechanical activity by hybrid stereo measurement** [11794-56]
- 11794 OW **Reducing depth ambiguity in 3D human pose and body shape estimation** [11794-57]
- 11794 OX **You don't drink a cupboard: improving egocentric action recognition with co-occurrence of verbs and nouns** [11794-60]
- 11794 OY **Automatic dataset collection for speech-driven gesture generation** [11794-61]
- 11794 OZ **Multi-modal action segmentation in the kitchen with a feature fusion approach** [11794-65]
- 11794 10 **A comparative study of batch ensemble for multi-object tracking approximations in embedded vision** [11794-26]
- 11794 11 **Personal authentication and recognition of aerial input Hiragana using deep neural network** [11794-3]
- 11794 12 **R-CNN based automated visual inspection system for engine parts quality assessment** [11794-8]
- 11794 13 **Active learning using weakly supervised signals for quality inspection** [11794-9]

- 11794 14 **Weed detection by analysis of multispectral images acquired under uncontrolled illumination conditions** [11794-12]
- 11794 15 **Identify solar panel defects by using differences between solar panels** [11794-14]
- 11794 16 **Towards a quantitative characterization of wear particles using image analysis and machine learning** [11794-15]
- 11794 17 **Estimation of beef marbling standard for live cattle using multi-input convolutional neural network with ultrasound images** [11794-16]
- 11794 18 **On learning deep domain-invariant features from 2D synthetic images for industrial visual inspection** [11794-28]
- 11794 19 **Automatic recognition of parasitic bee species using wing vein shape** [11794-29]
- 11794 1A **Continual learning: linear layer classifier concatenation using image processing transform functions** [11794-33]
- 11794 1B **Evaluation of shot peening machined surface by image processing** [11794-1]
- 11794 1C **An intelligent traffic control systems using on-road cameras** [11794-49]
- 11794 1D **Pre-training dataset generation for classifying beams of vehicle headlights from nighttime camera image** [11794-59]
- 11794 1E **Out-of-distribution detection for fungi images with similar features** [11794-63]
- 11794 1F **Verification of denoising performance of edge-preserving noise reduction filter using fast M-estimation method** [11794-66]
- 11794 1G **Human detection from low-resolution video images using 3D convolutional neural network** [11794-52]
