SPIE

Volume 11815

Proceedings of SPIE 0277-786X, V. 11815

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Novel Optical Systems, Methods, and Applications XXIV*, edited by Cornelius F. Hahlweg, Joseph R. Mulley, Proc. of SPIE 11815, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BIOMEDICAL APPLICATIONS AND HUMAN PERCEPTION

- 11815 02 Remote measurement of spherocylindrical lens power and orientation through distortion analysis (Invited Paper) [11815-3]
- 11815 03 Visualization of the optoacoustic effect of ultrashort laser pulse using finite element method [11815-1]
- 11815 04 Holographic combiners for augmented reality applications fabricated by wave front recording [11815-5]

HYPERSPECTRAL AND FLUORESCENCE APPLICATIONS

- 11815 05 Multi-excitation fluorescence imaging for identifying clarity enhancement in gemstones [11815-6]
- 11815 06 Hyperspectral characterisation of natural illumination in woodland and forest environments [11815-7]

MATERIALS AND MANUFACTURING

- 11815 09 Wavelength- and angle-resolved technique for determining the energy-momentum diagram of photonic systems [11815-9]
- 11815 0A Industrial processing for printed polymer optical waveguides [11815-10]
- 11815 0B Fabrication of an integrated optical system in glass using laser assisted manufacturing (Invited Paper) [11815-12]
- 11815 0C Material removal mechanism of single crystal silicon by bonnet polishing [11815-14]

MODELING AND COMPUTATIONAL METHODS

- 11815 0D Optimal design of aspheric acoustic lens based on ray tracing [11815-15]
- 11815 0E On the use-case-specific quality degradations of light field visualization [11815-16]

PHOTONICS

- 11815 OF **SPAD-based time-of-flight discrete-time statistical model and distortion compensation** [11815-19]
- 11815 OG **Point source localization with a planar optical phased array compressive sensor** [11815-20]
- 11815 OH **Comparison of diagonal double weight and multi-diagonal codes for security enhancement in PONs** [11815-21]
- 11815 OI **Advances in Raman-based broadband optical refrigeration** [11815-22]

POSTER SESSION

- 11815 OK **Design and implementation of 3D scene walkthrough system based on augmented reality** [11815-4]
- 11815 OL **Visualization of the relationship between photothermal effect and wavelength in gastric tumor based on finite element analysis** [11815-24]
- 11815 OM **Recognition of gastric tumor using photon tracing based on Monte Carlo method** [11815-25]
- 11815 ON **Fast high-quality sparse reconstruction of photoacoustic imaging based on HTP compressed sensing** [11815-26]
- 11815 OO **Camouflage pattern segmentation for calculation of apparent reflectance spectra** [11815-27]
- 11815 OQ **Hands-on project aimed at technical education: realizing a DC magnetron sputtering system** [11815-29]
- 11815 OT **Schlieren technique to visualize the temperature gradient around an optical fiber tip** [11815-32]
- 11815 OU **Heart signals sensor based on optical fiber Fabry-Perot interferometer** [11815-33]
- 11815 OV **Fluorescence microscope as a core instrument for extraterrestrial life detection methods** [11815-34]
- 11815 OW **Freeform optical elements usage in imaging optical systems design** [11815-35]
- 11815 OY **Eccentric fixation measurements using visuoscopy and Macula Integrity Tester (MIT) in children with amblyopia** [11815-37]
- 11815 10 **Development of the optical scheme and design of a solar sculptural composition for installation on a city street** [11815-39]
