

PROCEEDINGS OF SPIE

ODS 2021: Industrial Optical Devices and Systems

**Ryuichi Katayama
Yuzuru Takashima**
Editors

**1-5 August 2021
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 11828

Proceedings of SPIE 0277-786X, V. 11828

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *ODS 2021: Industrial Optical Devices and Systems*, edited by Ryuichi Katayama, Yuzuru Takashima, Proc. of SPIE 11828, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MEASUREMENT AND SENSING

- 11828 02 **Highly reconfigurable and integrated optical time-domain reflectometer featuring high spatial resolution for short-reach and long-haul networks** [11828-11]
- 11828 05 **Automated 3D geometrical measurement system for mobile and large-scale conical workpiece based on laser scanning technologies** [11828-12]

NEW TECHNOLOGIES

- 11828 06 **Curved waveguide combiner for HUD/AR** [11828-14]
- 11828 07 **Enhancing the multi-tone continuous-wave lidar with phase detection** [11828-15]
- 11828 08 **An optical computing chip executing complex-valued neural network and its on-chip training (Invited Paper)** [11828-13]
- 11828 09 **Analysis of diffraction efficiency of TI-PLM and its potential in beam steering** [11828-16]

OPTICAL DATA STORAGE

- 11828 0C **Media noise suppression by multimodal optical disc readout** [11828-3]
- 11828 0D **Investigation on how to excite a desired eigenmode selectively in the ring-resonator-type device for heat-assisted magnetic recording** [11828-4]
