Volume 11843

Proceedings of SPIE 0277-786X, V. 11843

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Applications of Machine Learning 2021*, edited by Michael E. Zelinski, Tarek M. Taha, Jonathan Howe, Proc. of SPIE 11843, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MACHINE VISION AND MANUFACTURING

11843 03 **Data-driven learning of impactor strength properties from shock experiments with additively manufactured materials** [11843-2]

11843 04 **Forecasting infrastructure deterioration with inverse GANs** [11843-3]

11843 05 **Evaluating regression-based techniques for modelling fabrication variations in silicon photonic waveguides** [11843-4]

REMOTE SENSING

11843 07 **Expanding SAR-based probabilistic deforestation detections using deep learning** [11843-6]

11843 09 **Utilizing Mask R-CNN for automated segmentation of condensed water vapor plumes from multi-view imagery** [11843-8]

11843 0B **Simulated SAR imagery generation of marine vehicles and associated wakes using electromagnetic modeling and simulation techniques** [11843-12]

ALGORITHMS AND IMAGING

11843 0C **VisHash: visual similarity preserving image hashing for diagram retrieval** [11843-14]

11843 0D **Contrastive pooling segmentation network** [11843-15]

11843 0E **On the practical applications of objective quality metrics for stereoscopic 3D imaging** [11843-16]

11843 0G **Distilled Gaussianization** [11843-18]

11843 0I **Biologically-vision-inspired vs. CNN texture representations in novelty detection** [11843-20]

11843 0J **Computing continuous nonlinear Fourier spectrum of optical signal with artificial neural networks** [11843-22]

11843 0K **Face detection in the darkness using infrared imaging: a deep-learning-based study** [11843-49]

11843 0L **Improving nighttime periocular recognition performance by image superresolution** [11843-51]

BIG DATA, SIMULATIONS, AND PHYSICS

11843 0M **A sparse coding approach to up-sampling and extrapolating 2-dimensional computational fluid dynamics simulations** [11843-23]

11843 0N **Predicting shockwaves in radiograph images using different deep learning models** [11843-24]

11843 0O **Machine learning for physics simulation anomaly detection** [11843-25]

11843 0P **Self-directed training of person reidentification with synthetic data** [11843-26]

11843 0Q **Neural networks for modelling nonlinear pulse propagation** [11843-28]

CONSUMER APPLICATIONS AND E-COMMERCE

11843 0R **Expanding smart assistant accessibility through dysarthria speech-trained transformer networks** [11843-29]

11843 0S **Large-scale visual search and similarity for e-commerce** [11843-31]

11843 0T **Contextual matching via graph representation learning with side information** [11843-32]

POSTER SESSION

11843 0V **Identify seismically vulnerable unreinforced masonry buildings using deep learning** [11843-34]

11843 0W **Applications of machine learning on detection of trace explosives using multispectral imaging** [11843-35]

11843 0X **Video classification using transfer learning techniques for human-machine interface** [11843-36]

11843 0Y **Pupil size detection based on convolution neural network applied on portable pupillometer** [11843-37]

11843 0Z **Optical distortion calibration using machine-learning for exoplanet detection** [11843-38]

11843 10 **Use of deep learning in transport services for maintaining safety and regulating unauthorized drivers** [11843-39]

11843 11 **Determination of foveal avascular zone parameters using a new location-aware deep-learning method** [11843-40]

11843 12 **A deep learning approach to pupillometry** [11843-41]

11843 13 **Exploring CNN features in the context of adversarial robustness and human perception** [11843-42]

11843 15 **SIAM-REID: confuser aware Siamese tracker with re-identification feature** [11843-45]

11843 17 **Deep-learning-based machine vision system for defect detection of fiber interlock cable** [11843-47]

11843 18 **Machine learning modeling of periodical subwavelength tapers coupling efficiency** [11843-48]
