**Volume 11832**

Proceedings of SPIE 0277-786X, V. 11832

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *CubeSats and SmallSats for Remote Sensing V*, edited by Thomas S. Pagano, Charles D. Norton, Sachidananda R. Babu, Proc. of SPIE 11832, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## ENABLING TECHNOLOGIES AND TECHNIQUES

---

- 11832 03 **CubeSat active thermal control in support of advanced payloads: the active thermal architecture project** [11832-3]
- 11832 04 **Comparison of vicarious and on-board infrared calibration sources for small satellites** [11832-18]
- 11832 05 **Design and simulation of Ku-band microstrip patch antenna for satellite interchange application** [11832-4]
- 11832 08 **Integrated constellation analysis tools to support new observing strategy mission design** [11832-7]
- 11832 09 **A novel large area fan-shaped lidar sensor for space debris: laboratory demonstration and model validation** [11832-8]

---

## FUTURE EARTH MISSIONS: CLIMATE AND SPACE WEATHER

---

- 11832 0A **Triple magnesium ionospheric photometer (Tri-MIP) instrument overview** [11832-10]
- 11832 0B **Mechanical design and thermal analysis of a 12U CubeSat MTCW lidar based optical measurement system for littoral ocean dynamics** [11832-11]

---

## FUTURE EARTH MISSIONS: LAND, OCEAN, AND ATMOSPHERE

---

- 11832 0D **Ambient performance testing of the CubeSat Infrared Atmospheric Sounder (CIRAS)** [11832-12]
- 11832 0E **NACHOS, a CubeSat-based high-resolution UV-visible hyperspectral imager for remote sensing of trace gases: system overview and science objectives** [11832-14]
- 11832 0F **The NACHOS CubeSat-based hyperspectral imager: laboratory and field performance characterization** [11832-15]
