Index of Papers

Jörg Albrecht

Optimisation of the air circulation in the design of a solar houseboat catamaran...1

Tiago Amaral, Manuel Rentschler, João Baltazar, Guilherme Vaz

Hydrodynamic analysis of a floating vertical cylinder...5

Andro Bakica, Nikola Vladimir, Hongil Im

On the propeller modelling and its effect on hydrodynamic loading and structural response of ship hull appendages...11

Jannes Berndt, Robinson Perić, Moustafa Abdel-Maksoud

Recommendations on application of the HRIC scheme for simulation of free surface waves...17

Volker Bertram, Milovan Perić

Chronological and critical review of steady free-surface flow computations...23

Yannick Eberhard, Age Nammensma

Calculation method for aperiodic propeller designs in order to reduce underwater radiated noise...N/A

Tiago Gomes, Sébastien Lemaire, Guilherme Vaz

Verification study of sliding and overset grids methods...28

Mohsen Irannezhad, Rickard E. Bensow, Martin Kjellberg, Arash Eslamdoost

Towards uncertainty analysis of CFD simulation of ship responses in regular head waves...34

Ebrahim Kadivar, Mikhail V. Timoshevskiy, Konstantin S. Pervunin, Bettar el Moctar

Control of incipient cavitation on a benchmark hydrofoil using a Miniature Vortex Generator (MVG)...40

Marek Kraskowski

A method for optimization of Olympic canoes by global shaping...42

Mariana Lopes Pinto, Felipe Ruggeri, Claudio Mueller Prado Sampaio, Kazuo Nishimoto, Philip von Pritzelwitz

Numerical simulation of air lubrication system on large ore carrier...48

Jacob E. Lotz, Marco F.P. ten Eikelder, Ido Akkerman

Space-time simulation of a heaving and pitching foil with exact enforcement of time periodicity...53

Stefano Lovato, Alex Kirichek, Serge Toxopeus, Just Settels, Arno Talmon, Geert Keetels

The resistance of a plate moving through mud: experiments and simulations...59

Sime Malenica

Some aspects of the local hydro structure interactions during hydrodynamic impacts...65

Philipp Mucha

Application of hybrid-temporal LES to airwake analyses of the ONR tumblehome surface combatant...71

Apostolos Papanikolaou

Holistic ship design optimisation: what is the difference?...77

Andreas Peters, Udo Lantermann, Bettar el Moctar

Compressible and multi-scale simulations of cavitating flows...N/A

- Hoyte C. Raven
Credibility of wave breaking computations by volume of fluid RANS codes...78
- Hemant Sagar, Bettar el Moctar
A single cavitation bubble collapse in perspective of numerical simulations...84
- Carsten Schumann
The validation of potential theory based predictions of full-scale resistance and propulsion characteristics...91
- Keun Woo Shin, Poul Andersen
CFD prediction of cavitation inception on marine propellers...97
- Hendrik Simonis, Patrick Marleaux, Moustafa Abdel-Maksoud, Norbert Stuntz
Dynamic stability analysis of a ship at high forward speed in calm water ...103
- Heinrich Söding
Nonlinear seakeeping by a potential method including hull vibrations and natural seaway...109
- Bram Starke
On the relation between measurable (AHR) and modelled (sand-grain) roughness heights to full-scale ship resistance...115
- Joseph Praful Tomy, Stephan Berger, Keun Woo Shin, Harry Bingham, Poul Anderson
Hydrodynamic and hydroacoustic simulations of propeller-induced URN in a hull wake-field...121
- Maurits van den Boogaard, Giacomo Alessi, Benoit Mallol, Dirk Wunsch, Nathan Clero, Dario Amadori, Luca Zampieri, Charles Hirsch
Accelerating marine propeller development in early design stages using machine learning...124
- Auke van der Ploeg
Anderson acceleration for maritime applications...130
- Arthur E.P. Veldman, Ronald A. Remmerswaal
Piecewise parabolic reconstruction methods for free-surface flow...N/A
- Ville Viitanen, J. Peltola, A. Jaatinen-Värri
Eulerian-Eulerian multiphase flow and turbulence modelling of hydrofoil cavitation...136
- Leonie Walter, Jann Strybny, Reinhard Hinkelmann
Simulating the transport of suspended superquadric shapes with a fully-resolved CFD-DEM algorithm...141
- Dongni Yan, Arun Lakshmyanarayana, Tommi Mikkola, Spyros Hirdaris
Comparative study on numerical hydroelastic analysis of impact-induced loads...147
- Jiawei Yu, Chaobang Yao, Liwei Liu, Zhiguo Zhang, Dakui Feng
Numerical simulations of KCS self-propulsion in regular head waves...153
- Lahbib Zentari, Simon Tödter, Bettar el Moctar
Experimental and numerical investigation of gap flow between a pusher and a barge in deep and shallow water...N/A
- Yifu Zhang
Evaluating the effects of drift angle on the self-propelled ship in waves using BEMt...159
