2021 10th International Conference on Renewable Energy Research and Application (ICRERA 2021)

Istanbul, Turkey
26 – 29 September 2021

Additional Copies of This Publication Are Available From:

CMT ID	Paper Title	Authors	Pages
2	Solar PV module voltage output and maximum power yearly profile using Simulink-based model	Kelebaone Tsamaase (University of Botswana)*; Japhet Sakala (University of Botswana); Edward Rakgati (BITRI); Ishmael Zibani (University of Botswana); Kagiso Motshidisi (University of Botswana)	31-35
3	The output power smoothing method and its performance analysis of hybrid energy storage system for photovoltaic power plant	Qingquan Lv (State Grid Gansu Electric Power Research Institute); Jianmei Zhang (State Grid Gansu Electric Power Research Institute); Kun Ding (State Grid Linxia Electric Power Supply Company); Zhenzhen Zhang (State Grid Gansu Electric Power Research Institute); Honglu Zhu (North China Electric Power University); Ruyin Hou (North China Electric Power University)*	36-39
7	A New Load Detection Method and Circuit Analysis for Quasi Resonant Inverter	Metin Ozturk (İstanbul Esenyurt Üniversitesi)*; fatih zungor (yildiz technical university); Burhaneddin EMRE (Istanbul University - Cerrahpaşa); Barış Öz (Mamur Teknoloji Sistemleri)	40-46
8	A comparative study of Hidden Layer Neurons and Delay Time for Wind Energy Forecasting Model using NARX	Aisha Sa'ad (lgipm)*; Aime Nyoungue (lgipm); zied hajej (LGIPM)	47-51
9	Achieving simulation as REBIANA Village Case Study of Photovoltaics System-Based Residential Distribution Grid	Zakariya R Hasan (University of Benghazi)*; Saleh Adam (University of Plymouth); Abedeladim Moftah (2College of Science and Technology Qaminis); David Jenkins (University of Plymouth); Ahmed Suhail (University of Plymouth)	52-58
10	Optimized integrated maintenance, production and spare parts strategy for a wind turbine system	Abderrahmane Faker (LGIPM)*; Salim BOUSLIKHANE (universiapolis); zied hajej (LGIPM); Sofiene Dellagi (LGIPM)	59-64
12	Power Management of Microgrid Integrated with Electric Vehicles in Residential Parking Station	Hojun Jin (Korea Advanced Institute of Science Technology)*; Sarvar Hussain Nengroo (Korea Advanced Institute of Science Technology); Sangkeum Lee (Electronics and Telecommunications Research Institute); Dongsoo Har (Korea Advanced Institute of Science Technology)	65-70
13	Multi-level Stacking of Long Short-Term Memory Recurrent Models for Time Series Forecasting of Solar Radiation	Rami A AL-HAJJ (American University of the Middle East)*; Mohamad Fouad (Mansoura University); Ali ASSI (IEEE)	71-76
14	Increasing Renewable Energy Penetration and Efficient Utilization Through a Virtual Inductive Impedance Loop-based Droop Control	Daniel O Williams (Egypt-Japan University of Science and Technology)*; tamer F. Megahed (egypt japan university of science and technology); Sobhy M. Abdelkader (Electrical Engineering Department Mansoura University Mansoura)	77-81
16	Enhancement of biogas production from anaerobic co-digestion of rice straw and thickened waste activated sludge with hydrodynamic cavitation pretreatment	Hani Ezz (Egypt-Japan university of sciences and technology)*; Manabu Fujii (Tokyo Institute of Technology); Mahmoud Nasr (Alexandria University Alexandria); Mona Ibrahim (Egypt-Japan University of Science and Technology)	82-87
18	Optimal Protection Coordination Scheme of Overcurrent Relays for a Power Network Equipped with Renewable Energy	Feras M. Al Asali (THE HASHEMITE UNIVERSITY)*; Eyad Zarour (The University of Jordan, Amman); Ali Al-hayajneh (The University of Jordan, Amman); Othman Alsmadi (The University of Jordan, Amman)	88-93

19	Class-E Inverter with Frequency Modulation Control	Yutaro Komiyama (Chiba University)*; Wenqi Zhu (Chiba University); Kien Nguyen (Chiba University); Hiroo Sekiya (Chiba University)	94-98
20	Evaluation of residential up and down-regulation participation for additional flexibility of distribution grid: French case	Jura Arkhangelski (University of Paris Est Creteil, Certes Lab.)*; Abdou Tankari Mahamadou (University of Paris Est Creteil, Certes Lab.); Lefebvre Gilles (University of Paris Est Creteil, Certes Lab.)	99-104
23	Constant Power Control of Wireless Transfer System Using a Matrix Converter for Changing Coil Distance	Keita Kuriyama (Nagoya Institute of Technology)*; Takaharu Takeshita (Nagoya Institute of Technology)	105-110
24	Evaluation of Interoperability Functions via Modbus-TCP for Photovoltaic Inverters	Alperen Mustafa Colak (TMEIC)*; Yoshihiro Tawada (TMEIC); Ruben Inzunza (TMEIC); Tatsuaki Amboh (TMEIC)	111-115
25	An MPPT Controlled BLDC Motor Driven Water Pumping System	hamza mohamed alrajoubi (karabuk universty)*; Selim ONCU (Karabuk University); sinan Kivrak (Yildirim Beyazit University)	116-119
26	Open-Circuit Fault detection method for Grid-side Three-level NPC Inverter	Ahmed Al Ameri (University of Le Havre)*; Aimad Alili (University of Le Havre); Mamadou B Camara (University Le Havre); brayima DAKYO (Universit Le Havre)	120-124
27	Efficient Energy Management for Wind-Battery Hybrid System Based Variable Frequency Approach	Ahmed Al Ameri (University of Le Havre)*; Camara Mamadou Bailo (University of Le Havre - France); brayima DAKYO (Universit Le Havre)	125-130
29	External Rotor 6/8 Switched Reluctance Motor Design for E-Bike	Samet KOYUNCU (Pamukkale University)*; Ugur Tuncer (Hitit University); ADEM DALCALI (BANDIRMA ONYEDİ EYLÜL UNIVERSITY); Selim ONCU (Karabuk University)	131-135
30	Wind Energy Conversion System with PDM Controlled Converter	Tufan Vokan Küçük (Bilecik üniversitesi)*; Selim ONCU (Karabuk University)	136-140
31	Design and Simulation of Smart-Grids using OMNeT++/ Matlab-Simulink Co-simulator	Ammar Allaoua (University of Mohamed El Bachir El Ibrahimi Bordj Bou Arreridj-Algeria); Toufik Madani Layadi (university of Bordj Bou Arreridj)*; Ilhami Colak (Nisantasi University)	141-145
32	Organic Rankine Cycle- and Photovoltaic/Thermal-Solar Assisted Heat Pump-Based Micro-Trigeneration Systems: Comparative Performances in Canadian Condition	Wahiba Yaici (Natural Resources Canada/CanmetENERGY)*; Andres Annuk (Estonian University of Life Sciences); Evgueniy Entchev (CanmetENERGY/Natural Resources Canada); Michela Longo (Politecnico di Milano)	146-151
34	Production of biogas in a dry anaerobic digestion reactor of residues generated in the processing of sheep and alpaca wool	Luz Cardenas Herrera (Universidad Nacional de San Agustin)*; Jaime E Barreda-Del-Carpio (Universidad Catolica de Santa Maria); Giovanna M. Moscoso-Apaza (Instituto de Investigación y Desarrollo para el Sur Arequipa); Ruth E. Gárate-de-Dávila (Instituto de Investigación y Desarrollo para el Sur Arequipa)	152-154
35	Construction and evaluation of a dry anaerobic digestion reactor for the degradation of solid waste from the textile industry with the use of fungal keratinolytic strains	Jaime E Barreda-Del-Carpio (Universidad Catolica de Santa Maria); Luz Cardenas Herrera (Universidad Nacional de San Agustin)*; Giovanna M. Moscoso-Apaza (Instituto de Investigación y Desarrollo para el Sur Arequipa); Ruth E. Gárate-de-Dávila (Instituto de Investigación y Desarrollo para el Sur Arequipa)	155-158

38	Performance of a Dual-Chamber Microbial Fuel Cell Inoculated with Active Soil Microbes for Bioelectricity Generation and COD Removal of Wastewater	Irene S. Asetre (Partido State University); Lemmuel Tayo (Mapúa University)*	159-164
39	Tree Bean (Parkia timoriana) Seed Oil: A Potential Raw Material for Biofuel Production	Angelo Panlaqui (Philippine Nuclear Research Institute); Roderick De Luna (Pamantasan ng Lungsod ng Maynila); Lemmuel Tayo (Mapúa University)*	165-170
40	A Short-Term Load Demand Forecasting based on the Method of LSTM	İdris BODUR (Gazi Univesity); Emre Çelik (Duzce University); Nihat Ozturk (Gazi University)*	171-174
41	Independent controlled hot-plug switches for parallel operation of reused battery strings	Kazuo Takehara (NExT-e Solutions Inc.)*; Fumiaki Nakao (NExT-e Solutions Inc.); Kimihiro Nishijima (Sojo University); Eiji Sakai (Sojo University)	175-179
42	Estimating Wind Power Plant Outputs in Transmission System Planning Studies Based on Probability Approaches	Ahmet OVA (Gazi University)*; Sevki DEMIRBAS (Gazi University)	180-183
45	Fraction Open Circuit and Fractional Short Circuit Based Incremental Conductance Maximum Power Point Tracking Controller	Ahmed ALsulami (University of Leeds)*; Salma M S Alarefi (University of Leeds)	184-189
46	Design Requirements and Technical Architecture of a Fault- and Restoration-Based Load Forecasting Mechanism for Tanzania Secondary Distribution Electric Power Grid	Hussein Abubakar Bakiri (Institute of Finance Management)*; Hellen Maziku (University of Dar es Salaam (UDSM)); Nerey Mvungi (University of Dar es Salaam); Hamisi Ndyetabura (University of Dar es Salaam); Libe Valentine Massawe (University of Dar es Saalam, College of Information and Communication)	190-197
47	Backstepping Approach Based on Direct Power Control of a DFIG in WECS	Mazouz Farida (univ Batna 2)*; Belkacem Sebti (Batna 2 University); BOUKHALFA GHOULEM ALLAH (UNIVERCITY BATNA 2); Ilhami Colak (Nisantasi University)	198-202
49	Power Quality Enhancement of AC/DC Converter by a Smart Direct Power Control: Practical Assessment	OUALID AISSA (University of Mohamed El-Bachir El-Ibrahimi, Bordj Bou Arreridj)*; Samir Moulahoum (University of Medea); Badreddine Babes (Research Center in Industrial Technologies CRTI); Ilhami Colak (Nisantasi University)	203-209
50	Integration cost of variable renewable resources to power systems – a techno-economic assessment in European countries	Antoine Monterrat (TotalEnergies)*; Samantha Hilliard (TotalEnergies, Gas Renewables and Power); Carlos Carrejo (TotalEnergies, Gas Renewables and Power); Fabrice Devaux (TotalEnergies, Gas Renewables and Power)	210-215
51	Design of a Load Frequency Control based on a Fuzzy logic for Single Area Networks	MOHAMMED Kh. AL-NUSSAIRI (University of Misan)*; Sadeq AL-Majidi (University of Misan); Ahmed Raisan Hussein (University of Misan); Ramazan Bayindir (Gazi University)	216-220
52	Model Predictive Control for Full Bridge Boost Rectifier with Constant Switching Frequency	OGUZ ALKUL (Texas A&M University at Qatar)*; Sevki DEMIRBAS (Gazi University); Sertac BAYHAN (Gazi University); Haitham Abu-Rub (Texas A&M University)	221-225
53	Harmonics Mitigation in DC Based Charging Stations for EVs	Rares C Nacu (Technical University of Cluj Napoca)*; Daniel Fodorean (Technical University of Cluj-Napoca)	226-230

54	The Precision SOC Estimation for Fire Prevention of the EES Using ANN	Ga-Eun Jung (Korea Electrotechnology Research Institute)*; JiKook Baek (IES Co. LTD.); Jianyong Liu (IES Co., Ltd.); Van Quan Dao (Changwon National University); MINH-CHAU DINH (Changwon National University); Chang Soon Kim (Changwon National University); Myung-Kwan Lee (Battery Solution Co., Ltd.); Jung-Hyo Bae (Korea Electrotechnology Research Institute)	231-234
57	Control Strategy for Power Smoothing Converter with Energy Storage for Maximum Power Controlled Wave Energy Convertor	Akihiro Masuda (Utsunomiya University); Hiroki Goto (Utsunomiya University)*	235-238
59	Optimal Scheduling Of Hybrid AC-DC Microgrid Using Information Gap Decision Theory	ramin nourollahi (Student of power systems)*; Kazem Zare (University of Tabriz); Behnam Mohammadi-ivatloo (University of Tabriz); Amjad Anvari-Moghaddam (Aalborg University)	239-243
60	Optimization of the Operating Frequency of a Bidirectional Synchronous H6 Inverter	Meshari Alshammari (National University of Ireland Galway)*; Maeve Duffy (National University of Ireland Galway)	244-249
61	Special Outlook of energy optimization for a bioecological infrastructure	Daniel Icaza (Catholic University of Cuenca, Cuenca, Ecuador)*; Dario Valarezo (Universidad Politécnica Salesiana); Gino Méndez (Universidad Politécnica Salesiana); Arturo Peralta (Universidad Politécnica Salesiana); Jorge Rojas (Universidad Politécnica Salesiana); Pablo Chacho (Catholic University of Cuenca)	250-257
63	Numerical Investigation on the Effects of Gas Induction Velocity on the Performance of a Fluidized Bed Reactor	Mariam M Yehia (Egypt-Japan University of Science and Technology (EJUST))*; hamdy hassan (EJUST); Shinici Ookawara (Tokyo Institute of Technology); Shinsuke Mori (Tokyo Institute of Technology); Ahmed Elwardany (Egypt-Japan University of Science and Technology (E-JUST))	258-263
64	Power Consumption Characteristics of Appliances in a Smart House powered by Multi-Phase Transformer-based DC Power	Kazuki Ikeda (Aichi Institute of Technology)*; Yuto Iwasaki (Aichi Institute of Technology); Masaki Tsunekawa (Aichi Institute of Technology); Kazuto YUKITA (Aichi Institute of Technology); Toshiro Matsumura (Aichi Institute of Technology); Toshiya Nanahara (Aichi Institute of Technology); Akinori Kato (Kawamura Electric Inc)	264-269
65	Supercapacitor-Based Shuttle Bus Characterization for Urban Charging Infrastructure Design	Nicola Campagna (University of Palermo)*; Vincenzo Castiglia (University of Palermo); Rosario Miceli (University of Palermo); Alessandro Busacca (University of Palermo)	270-275
67	Implementation on NI-SOM sbRIO-9651 and Experimental Validation of Multi-Carrier PWM Techniques for Three-Phase Five Level Cascaded H-Bridge Inverter	Claudio Nevoloso (University of Palermo)*; Giuseppe Schettino (University of Palermo); Rosario Miceli (University of Palermo); Antonino Oscar Di Tommaso (University of Palermo); Fabio Viola (Università di Palermo); Alessandro Busacca (University of Palermo); Gioacchino Scaglione (University of Palermo)	276-281
68	BLE to improve IoT connection in the Smart Home	Mariacristina Roscia ("University of Bergamo, Italy")*; CRISTIAN LAZAROIU (University Politehinica of Bucarest)	282-287

69	An Iterative Method for Bifurcation-Free Resonant Inductive Power Transfer System Design	Nicola Campagna (University of Palermo)*; Vincenzo Castiglia (University of Palermo); Rosario Miceli (University of Palermo); Filippo Pellitteri (University of Palermo)	288-293
70	The Comparing of Linear Damping Methods for Constant Power Loads and Stability Analysis	Ferhat Bodur (Gazi University); Orhan KAPLAN (Gazi University)*; Nihat Ozturk (Gazi University)	294-300
71	A Basic Study on Electricity Demand for Energy Management	Yuto Iwasaki (Aichi Institute of Technology)*; Kazuto YUKITA (Aichi Institute of Technology); Kazuki Ikeda (Aichi Institute of Technology)	301-304
72	An Application of PDM Technique for MPPT in Solar Powered Wireless Power Transfer Systems	Gungor Bal (Gazi University); Selim ONCU (Karabuk University); Nihat Ozturk (Gazi University); Kenan UNAL (Gazi University)*	305-309
74	A 3.3 V Output Voltage Optical Plasmonic Solar Energy Harvester	Patrizia Livreri (University of Palermo)*	310-313
75	CONTROL STRATEGY OF THE PERMANENT MAGNET STEPPER MOTOR	Harrouz Abdelkader (Department of Hydrocarbon and Renewable Energy, Laboratory (LEESI), University of Adrar, Algeria)*; hachemi Mr glaoui (university of bechar); Ilhami Colak (Nisantasi University); Korhan KAYISLI (Gazi University); Virgil DUMBRAVA (University POLITEHNICA Bucharest)	314-319
77	Importance of Lithium-Ion Energy Storage Systems in Balancing the Grid: Case Study in Turkey	Yusra M Mendi (Enerjisa Enerji)*; Mehmet Demirtas ("Faculty of Technology, Gazi University"); Hulya Akinc (Enerjisa)	320-326
78	Battery Integrated Off-grid DC Fast Charging: Optimised System Design Case for California	Burak Elibol (Başkent Elektrik Dağıtım A.Ş.)*; Gokturk Poyrazoglu (Ozyegin University); Çiğdem Armağan (Enerjisa Enerji A.Ş.); Hatice Güven (Başkent Elektrik Dağıtım A.Ş.); Bahadır Can Çalışkan (Başkent Elektrik Dağıtım A.Ş.); Hulya Akinc (Enerjisa); Alp Kaymaz (Enerjisa Enerji A.Ş.)	327-332
80	Experimental validation of the sliding mode controller to improve the efficiency of the MPPT solar system	Abdelhakim Belkaid (Bordj Bou Arreridj University)*; Seddik BENHADOUGA (Bordj Bou Arreridj University); Ilhami Colak (Nisantasi University); Mounir Meddad (Bordj Bou Arreridj University); Adil Eddiai (Casablanca University)	333-337
81	A Vector Voltage Modulator for a Dual Inverter with a Floating Bridge to Operate in Normal and Fault Tolerant Mode	V. Fernao Pires (ESTSetubal/IPS)*; Daniel Foito (ESTSetubal - IPS); Armando Cordeiro (ISEL); José Silva (INESC-ID, IST, Universidade de Lisboa)	338-343
82	Design, Simulation, and Comparison of Wireless Power Transfer Systems with Single and Multiple Resonator Coils for UAVs	Altynay Smagulova (Nazarbayev University); Seyed saeid heidari yazdi (Amirkabir university of technology)*; Mehdi Bagheri (Bagheri)	344-350
83	Minimizing Reactive Power of DAB Converters in EPS Control with Evolutionary Computation	Erdem AKBOY (Yıldız Teknik Üniversitesi)*; Revna ACAR VURAL (Yıldız Teknik Üniversitesi)	351-356
84	Coreloss Estimation via Long Short-Term Memory Model (LSTM) of Dry-Type Transformer Based on FEA	Seda KÜL (Karamanoğlu Mehmetbey Üniversitesi)*; Seda Kül (Karamanoglu Mehmetbey University); Berat Yıldız (Karamanoğlu Mehmetbey University); Bunyamin Tamyurek (Gazi University); Ires Iskende (Cankaya University)	357-361

88	A Novel Control Approach of Multi Motor Electric Scooter Drive	Chergui Hicham (Tahri Mohamed Bechar University); Abdelfatah Nasri (Tahri Mohamed Bechar University); Harrouz Abdelkader (Department of Hydrocarbon and Renewable Energy, Laboratory (LEESI), University of Adrar, Algeria); Korhan KAYISLI (Gazi University)*	362-369
90	The effect of the use of bio-waste on the generation of electrical energy in municipal solid waste incineration	Husniye Bilen (Bahcesehir University); Ethem Canakoglu (Bahçeşehir University); Gurkan Soykan (Bahcesehir University)*	370-375
91	Efficient Parameter Estimation of Double Diode-Based PV Cell Model Using Marine Predators Algorithm	Mehmet Yesilbudak (Nevsehir Haci Bektas Veli University)*; Medine Colak (Gazi University)	376-380
92	Design Process of Optimal Dead-time for SiC MOSFET-Based Three-Phase Six-Switch Rectifier	Jizhe Wang (Nagasaki Institute of Applied Science)*; Sho Tezuka (Isahaya Electronics Corporation); Kazuhiro Kajiwara (Nagasaki Institute of Applied Science); Akio Segami (Isahaya Electronics Corporation); Nobumasa Matsui (Nagasaki Institute of Applied Science); Fujio Kurokawa (Nagasaki Institute of Applied Science)	381-384
93	Automatic and Self Adaptive P&O MPPT Based PID Controller and PSO Algorithm	Abdelhakim Belkaid (Bordj Bou Arreridj University)*; Celia Aoughlis (Bejaia University); Ilhami Colak (Nisantasi University); Ouahib GUENOUNOU (University of Bejaia); Mohand Akli. Kacimi (Bejaia University)	385-390
94	Locational Marginal Electricity Price Forecasting-Based Self-Attention Mechanism and Simulated Annealing Optimizer using Big Data	Mohamed Sadok Massaoudi (TAMUQ)*; Haitham Abu-Rub (Texas A&M University); Shady Khalil (Texas A&M University at Qatar); tingwen huang (TAMUQ)	391-396
95	A Systematic Data-driven Analysis of Electric Vehicle Electricity Consumption with Wind Power Integration	Murat Akil (Aksaray University)*; Emrah Dokur (Bilecik S.E. University); Ramazan Bayindir (Gazi University)	397-401
96	A Robust Grid-Tied PV System based Super Twisting Integral Sliding Mode Control	Mohamed Ali (Texas A&M University at Qatar); Abdelbasset Krama (Texas A&M University at Qatar)*; Shady Khalil (Texas A&M University at Qatar)	402-407
97	Power Supply Vehicle Hybrid Biomass-PV FPSEG Generator System as a Countermeasure Against Disaster	Mamadou NDIAYE (Shibaura Institute of technology)*; Hiroshi Takami (Shibaura Institute of Technology); Yue Liu (Shibaura Institute of Technology)	408-411
99	A Review of Microgrid Control Strategies	Necmi ALTIN (Gazi University); Süleyman Emre Eyimaya (Gazi University)*	412-417
100	Power Factor and Reactive Power in US Residences - Survey and EnergyPlus Modeling	Hope Anderson (University of Kentucky); Abdullah Hadi (University of Kentucky); Evan S. Jones (University of Kentucky)*; Dan M. Ionel (University of Kentucky)	418-422
102	Electric Vehicles Charging Management With Monte Carlo Simulation	Asker Sebati (Europower Enerji); Ensar KILIC (Gazi University); Murat Akil (Aksaray University); Ramazan Bayindir (Gazi University)*; Ramin Malek (Europower Enerji)	423-427
103	Policy Instruments to Promote the Use of Renewable Energy for Residential Heating and Cooling: A Case of Turkey	Bilal Düzgün (Gazi University)*; Ramazan Bayindir (Gazi University); Halil Ibrahim BULBUL (Gazi University)	428-433
104	Detecting Snow Layer on Solar Panels using Deep Learning	Oktay Ozturk (Metamorfoz ICT. Inc.)*; Batuhan Hangün (Istanbul Gelisim University); Onder Eyecioglu (Bolu Izzet Baysal University)	434-438

105	Voltage Balance of Multiconnected Half Bridge Converter	Kazuhiro Kajiwara (Nagasaki Institute of Applied Science)*; Ryuya Daimon (Nagasaki Institute of Applied Science); Yuji Ohta (Isahaya Electronics Corporation); Akio Segami (Isahaya Electronics Corporation); Nobumasa Matsui (Nagasaki Institute of Applied Science); Fujio Kurokawa (Nagasaki Institute of Applied Science)	439-442
106	Estimation of Gas Emission Values on Highways in Turkey by Machine Learning	Nursac Kurt (Nisantasi University); Oktay Ozturk (Metamorfoz ICT. Inc.); Murat BEKEN (Bolu Abant İzzet Baysal University)*	443-446
107	Comprehensive Non-Intrusive Load Monitoring Process:Device Event Detection, Device Feature Extraction and Device Identification Using KNN,Random Forest and Decision Tree	Fethi Batincan Gurbuz (Gazi University); Ramazan Bayindir (Gazi University); Seyfettin Vadi (Gazi University)*	447-452
108	A Brief Review on Capacity Sizing, Control and Energy Management in Hybrid Renewable Energy Systems	Ayse Colak (University of Strathclyde)*; Dr K Ahmed (Strathclyde)	453-458
109	Uncoordinated Charging Profile of EVs Based on An Actual Charging Session Data	Murat Akil (Aksaray University); Ensar KILIC (Gazi University); Ramazan Bayindir (Gazi University)*; Asker Sebati (Europower Enerji); Ramin Malek (Europower Enerji)	459-462
