2021 IEEE Workshop on Signal Processing Systems (SiPS) **SiPS 2021**

Table of Contents

Message from the Conference Chairs	xi
Organizing Committee	xiii
Technical Program Committee	xv
Keynotes	xviii
Sponsors	xxii

Special Session: Signal Processing and Hardware Architectures for IoT and Low-Latency Communication Systems

A Stage-wise Conversion Strategy for Low-Latency Deformable Spiking CNN	1
<i>Chunyu Wang (Nanjing University, China), Jiapeng Luo (Nanjing University, China), and Zhongfeng Wang (Nanjing University, China)</i>	
A Novel Blind Detection Method and FPGA Implementation for Energy-Efficient Sidelink Communications	7
<i>Chenhao Zhang (Shanghai University, China), Haiqin Hu (Shanghai University, China), Shan Cao (Shanghai University, China), and Zhiyuan Jiang (Shanghai University, China)</i>	
Flexible Channel Estimation for 3GPP 5G IoT on a Vector Digital Signal Processor	12
<i>Stefan Damjanovic (TU Dresden, Germany), Samuel Ajay Dasgupta (TU Dresden, Germany), Emil Matus (TU Dresden, Germany), Dmitry Utyansky (Synopsys Inc., Russia), Pieter van der Wolf (Synopsys Inc., Netherlands), and Gerhard P. Fettweis (TU Dresden, Germany)</i>	
Initial Analysis of Dynamic Panel Activation for Large Intelligent Surfaces	18
<i>Nafiseh Mazloum (Sony R&D Center Lund Lab, Sweden) and Ove Edfors (Lund University, Sweden)</i>	
Low-Latency Parallel Hermitian Positive-Definite Matrix Inversion for Massive MIMO	23
<i>Erik Bertilsson (Linköping University, Sweden), Carl Ingemarsson (Linköping University, Sweden), and Oscar Gustafsson (Linköping University, Sweden)</i>	

PhD Forum

Fully Convolutional Network-Based DOA Estimation with Acoustic Vector Sensor	29
<i>Sifan Wang (ShanghaiTech University, China; Shanghai Institute of Microsystem and Information Technology, China; University of Chinese Academy of Sciences, China), Jianhua Geng (ShanghaiTech University, China; Shanghai Institute of Microsystem and Information Technology, China; University of Chinese Academy of Sciences, China), and Xin Lou (ShanghaiTech University, China)</i>	
Low Resource Species Agnostic Bird Activity Detection	34
<i>Mark Anderson (Trinity College Dublin, Ireland), John Kennedy (Trinity College Dublin, Ireland), and Naomi Harte (Trinity College Dublin, Ireland)</i>	
Digital Predistortion with Compressed Observations for Cloud-Based Learning	40
<i>Arne Fischer-Bühner (Nokia Bell Labs, Antwerp, Belgium), Emil Matúš (Vodafone Chair Mobile Communications Systems, Technische Universität Dresden, Germany), Manil Dev Gomony (Nokia Bell Labs, Antwerp, Belgium), Lauri Anttila (Tampere University, Finland), Gerhard Fettweis (Vodafone Chair Mobile Communications Systems, Technische Universität Dresden, Germany), and Mikko Valkama (Tampere University, Finland)</i>	
Understanding the Energy vs. Adversarial Robustness Trade-Off in Deep Neural Networks	46
<i>Kyungmi Lee (Massachusetts Institute of Technology, USA) and Anantha P. Chandrakasan (Massachusetts Institute of Technology, USA)</i>	
Fault-Tolerance of Binarized and Stochastic Computing-Based Neural Networks	52
<i>Amir Ardakani (McGill University, Canada), Arash Ardakani (McGill University, Canada), and Warren J. Gross (McGill University, Canada)</i>	

Signal Processing Algorithms and Software

Globally Assisted Instance Normalization for Bandwidth-Efficient Neural Style Transfer	58
<i>Hsiu-Pin Hsu (National Tsing Hua University, R.O.C., Taiwan) and Chao-Tsung Huang (National Tsing Hua University, R.O.C., Taiwan)</i>	
Computationally-Efficient Voice Activity Detection Based on Deep Neural Networks	64
<i>Yan Xiong (Arizona State University, USA), Visar Berisha (Arizona State University, USA), and Chaitali Chakrabarti (Arizona State University, USA)</i>	
Mixed Precision ℓ_1 Solver for Compressive Depth Reconstruction: An ADMM Case Study	70
<i>Yun Wu (Heriot-Watt University, UK), Andrew Wallace (Heriot-Watt University, UK), Andreas Aßmann (STMicroelectronics R&D Ltd., UK), and Brian Stewart (STMicroelectronics R&D Ltd., UK)</i>	
Communication and Computation Reduction for Split Learning Using Asynchronous Training	76
<i>Xing Chen (Arizona State University, USA), Jingtao Li (Arizona State University, USA), and Chaitali Chakrabarti (Arizona State University, USA)</i>	

Algorithms and Architectures for Communications

Energy-Efficient Adaptive Modulated Fixed-Complexity Sphere Decoder	82
<i>Yun Wu (Heriot-Watt University, UK) and John Mcallister (Queen's University Belfast, UK)</i>	
Parallel CN-VN Processing for NB-LDPC Decoders	88
<i>Hassan Harb (Universite Bretagne Sud, Lorient, France), Cédric Marchand (Universite Bretagne Sud, Lorient, France), Laura Conde-Canencia (Universite Bretagne Sud, Lorient, France), Emmanuel Boutillon (Universite Bretagne Sud, Lorient, France), and Ali Chamas Al Ghouwayel (EFREI Paris, France)</i>	
Short Codes with Near-ML Universal Decoding: Are Random Codes Good Enough?	94
<i>Vivian Papadopoulou (Eindhoven University of Technology, The Netherlands), Marzieh Hashemipour-Nazari (Eindhoven University of Technology, The Netherlands), and Alexios Balatsoukas-Stimming (Eindhoven University of Technology, The Netherlands)</i>	
Time Sliding Window for the Detection of CCSK Frames	99
<i>Camille Moniere (Université de Bretagne Sud, France), Kassem Saied (Université de Bretagne Sud, France), Bertrand Le Gal (Bordeaux INP, France), and Emmanuel Boutillon (Université de Bretagne Sud, France)</i>	
Implementing a LoRa Software-Defined Radio on a General-Purpose ULP Microcontroller	105
<i>Mathieu Xhonneux (UCLouvain, Belgium), Jérôme Louveaux (UCLouvain, Belgium), and David Bol (UCLouvain, Belgium)</i>	

Machine Learning Algorithms and Architectures

TernGEMM: General Matrix Multiply Library with Ternary Weights for Fast DNN Inference	111
<i>Seokhyeon Choi (Seoul National University, South Korea), Kyuhong Shim (Seoul National University, South Korea), Jungwook Choi (Hanyang University, South Korea), Wonyong Sung (Seoul National University, South Korea), and Byonghyo Shim (Seoul National University, South Korea)</i>	
Automatic Generation of Dynamic Inference Architecture for Deep Neural Networks	117
<i>Shize Zhao (Nanjing University, China), Liulu He (Nanjing University, China), Xiaoru Xie (Nanjing University, China), Jun Lin (Nanjing University, China), and Zhongfeng Wang (Nanjing University, China)</i>	
Exploration and Generation of Efficient FPGA-Based Deep Neural Network Accelerators	123
<i>Nermine Ali (Université Paris-Saclay, CEA, List, France), Jean-Marc Philippe (Université Paris-Saclay, CEA, List, France), Benoit Tain (Université Paris-Saclay, CEA, List, France), and Philippe Coussy (University of South Brittany, France)</i>	
OneAI - Novel Multipurpose Deep Learning Algorithms for UWB Wireless Networks	129
<i>Arash Abbasi (Dakota State University, USA) and Huaping Liu (Oregon State University, USA)</i>	
Design and Implementation of Autoencoder-LSTM Accelerator for Edge Outlier Detection	134
<i>Nadya A. Mohamed (Rice University, USA) and Joseph R. Cavallaro (Rice University, USA)</i>	

Signal Processing Hardware Architectures and VLSI

A Memory-Efficient Hardware Architecture for Deformable Convolutional Networks	140
<i>Yue Yu (Nanjing University, China), Jiapeng Luo (Nanjing University, China), Wendong Mao (Nanjing University, China), and Zhongfeng Wang (Nanjing University, China)</i>	
Efficient Architecture for Long Integer Modular Multiplication over Solinas Prime	146
<i>Zheang Huai (The Ohio State University, USA), Keshab K. Parhi (University of Minnesota, USA), and Xinmiao Zhang (The Ohio State University, USA)</i>	
An Efficient Parallel Architecture for Resource-Shareable Reed-Solomon Encoder	152
<i>Yok Jye Tang (The Ohio State University, USA) and Xinmiao Zhang (The Ohio State University, USA)</i>	
High-Throughput VLSI Architecture for GRAND Markov Order	158
<i>Syed Mohsin Abbas (McGill University, Canada), Marwan Jalaleddine (McGill University, Canada), and Warren J. Gross (McGill University, Canada)</i>	

Special Session: Signal Processing and VLSI for 6G

Uplink Energy Efficiency of Cell-Free Massive MIMO With Transmit Power Control in Measured Propagation Channels	164
<i>Thomas Choi (University of Southern California, USA), Masaaki Ito (KDDI Research, Inc., Japan), Issei Kanno (KDDI Research, Inc., Japan), Takeo Ohseki (KDDI Research, Inc., Japan), Kosuke Yamazaki (KDDI Research, Inc., Japan), and Andreas Molisch (University of Southern California, USA)</i>	
Compressive Estimation of Wideband mmW Channel using Analog True-Time-Delay Array	170
<i>Veljko Boljanovic (University of California, Los Angeles, USA) and Danijela Cabric (University of California, Los Angeles, USA)</i>	
Beam-Slicing for Jammer Mitigation in mmWave Massive MU-MIMO	176
<i>Oscar Castañeda (ETH Zürich, Switzerland), Gian Marti (ETH Zürich, Switzerland), and Christoph Studer (ETH Zürich, Switzerland)</i>	
A Scalable Generator for Massive MIMO Baseband Processing Systems with Beamspace Channel Estimation	182
<i>Yue Dai (University of California, Berkeley, USA), Harrison Liew (University of California, Berkeley, USA), Maryam Eslami Rasekh (University of California, Santa Barbara, USA), Seyed Hadi Mirfarshbafan (ETH Zurich, Switzerland), Alexandra Gallyas-Sanhueza (Cornell University, USA), James Dunn (University of California, Berkeley, USA), Upamanyu Madhow (University of California, Santa Barbara, USA), Christoph Studer (ETH Zurich, Switzerland), and Borivoje Nikolic (University of California, Berkeley, USA)</i>	

An on-off Receiver Array for Low-Power Scaling of mmWave Massive MIMO	188
<i>Maryam Eslami Rasekh (University of California Santa Barbara, USA), Navid Hosseinzadeh (University of California Santa Barbara, USA), Upamanyu Madhow (University of California Santa Barbara, USA), and Mark Rodwell (University of California Santa Barbara, USA)</i>	

Signal Processing Applications

DFBNet: Deep Neural Network Based Fixed Beamformer for Multi-Channel Speech Separation	194
<i>Ruqiao Liu (Chongqing University of Posts and Telecommunications, China; vivo AI Lab, China), Yi Zhou (Chongqing University of Posts and Telecommunications, China), Hongqing Liu (Chongqing University of Posts and Telecommunications, China), Ximmeng Xu (vivo AI Lab, China; E.E. Engineering, Ireland), Jie Jia (vivo AI Lab, China), and Binbin Chen (vivo AI Lab, China)</i>	
Efficient Mind-Wandering Detection System with GSR Signals on MM-SART Database	199
<i>Li-Sheng Chang (National Taiwan University, Taiwan), Yi-Ta Chen (National Taiwan University, Taiwan), and An-Yeu Wu (National Taiwan University, Taiwan)</i>	
Leveraging Transprecision Computing for Machine Vision Applications at the Edge	205
<i>Umar Minhas (Queens University Belfast, UK), George Karakonstantis (Queens University Belfast, UK), Lev Mukhanov (Queens University Belfast, UK), Hans Vandierendonck (Queens University Belfast, UK), and Roger Woods (Queens University Belfast, UK)</i>	
Implementation of a Two-Dimensional FFT/IFFT Processor for Real-Time High-Resolution Synthetic Aperture Radar Imaging	211
<i>Hung-Yuan Chin (National Central University, Taiwan), Pei-Yun Tsai (National Central University, Taiwan), and Szy-Yuan Lee (National Applied Research Laboratory, Taiwan)</i>	
ComplexBeat: Breathing Rate Estimation from Complex CSI	217
<i>Sitian Li (École polytechnique fédérale de Lausanne, Switzerland), Andreas Toftegaard Kristensen (École polytechnique fédérale de Lausanne, Switzerland), Andreas Burg (École polytechnique fédérale de Lausanne, Switzerland), and Alexios Balatsoukas-Stimming (Eindhoven University of Technology, the Netherlands)</i>	

Special Session: Stochastic Signal Processing

Scalable Hardware Architecture for Invertible Logic with Sparse Hamiltonian Matrices	223
<i>Naoya Onizawa (Tohoku University, Japan), Akira Tamakoshi (Tohoku University, Japan), and Takahiro Hanyu (Tohoku University, Japan)</i>	

Reconfigurable Neural Synaptic Plasticity-Based Stochastic Deep Neural Network Computing	229
<i>Zihan Xia (University of Electronic Science and Technology of China, China; Sichuan University of Science and Engineering, China), Ya Dong (Sichuan University of Science and Engineering, China), Jienan Chen (University of Electronic Science and Technology of China, China), Rui Wan (University of Electronic Science and Technology of China, China), Shuai Li (University of Electronic Science and Technology of China, China), and Tingyong Wu (University of Electronic Science and Technology of China, China)</i>	
Hartley Stochastic Computing For Convolutional Neural Networks	235
<i>Seyyed Hasan Mozafari (McGill University, Canada), James Clark (McGill University, Canada), Warren Gross (McGill University, Canada), and Brett Meyer (McGill University, Canada)</i>	
Design and Implementation of a Highly Accurate Stochastic Spiking Neural Network	241
<i>Chengcheng Tang (University of Alberta, Canada) and Jie Han (University of Alberta, Canada)</i>	

Special Session: Energy-Efficient Hardware Architectures for ML and Neuromorphic Computing

Evaluation of Low-Voltage SRAM for Error-Resilient Augmented Reality Applications	247
<i>Tony F. Wu (Facebook, Inc., USA), Doyun Kim (Facebook, Inc., USA), Daniel H. Morris (Facebook, Inc., USA), and Edith Beigne (Facebook, Inc., USA)</i>	
Energy Efficiency of Photonic Convolution for Artificial Intelligence Workloads	250
<i>Jonas Weiss (IBM Research GmbH, Switzerland), Pascal Stark (IBM Research GmbH, Switzerland), Lorenz K. Muller (IBM Research GmbH, Switzerland), Folkert Horst (IBM Research GmbH, Switzerland), Roger Dangel (IBM Research GmbH, Switzerland), and Bert Jan Offrein (IBM Research GmbH, Switzerland)</i>	
Efficient Neuromorphic Signal Processing with Loihi 2	254
<i>Garrick Orchard (Intel Labs, USA), E. Paxon Frady (Intel Labs, USA), Daniel Ben Dayan Rubin (Intel Labs, USA), Sophia Sanborn (Intel Labs, USA), Sumit Bam Shrestha (Intel Labs, USA), Friedrich T. Sommer (Intel Labs, USA), and Mike Davies (Intel Labs, USA)</i>	
Exploration of Energy-Efficient Architecture for Graph-Based Point-Cloud Deep Learning	260
<i>Jie-Fang Zhang (University of Michigan, Ann Arbor, Michigan, USA) and Zhengya Zhang (University of Michigan, Ann Arbor, Michigan, USA)</i>	
A Multi-Domain Architectural Efficiency Metric	265
<i>Sumeet Nagi (University of California Los Angeles, USA) and Dejan Markovic (University of California Los Angeles, USA)</i>	
Author Index	271
