**Volume 11859**

Proceedings of SPIE 0277-786X, V. 11859

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of Clouds and the Atmosphere XXVI*, edited by Adolfo Comerón, Evgueni I. Kassianov, Klaus Schäfer, Richard H. Picard, Konradin Weber, Upendra N. Singh, Proc. of SPIE 11859, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## SATELLITE RETRIEVAL OF ATMOSPHERIC GASES

---

- 11859 03 **Assessment of air quality with TROPOMI during COVID-19 pandemic: NO<sub>2</sub> over the Po valley (Invited Paper)** [11859-1]
- 11859 04 **Seasonal variability of degrees of freedom and its effect over time series and spatial patterns of atmospheric gases from satellite: application to carbonyl sulfide (OCS)** [11859-2]
- 11859 05 **Experiments on high-detailed mapping of tropospheric NO<sub>2</sub> using GSA/Resurs-P observations: results, validation with models and measurements, estimation of emission power** [11859-3]
- 11859 06 **High-detailed tropospheric transport of NO<sub>x</sub> from ground sources: comparison of model data and satellite imagery** [11859-4]

---

## TECHNOLOGIES, TECHNIQUES, AND ALGORITHMS FOR ACTIVE AND PASSIVE REMOTE SENSING

---

- 11859 08 **Physics-aware deep edge detection network** [11859-5]
- 11859 0B **Checking vitals of CERES scanners: parameters of a slow mode filter** [11859-8]
- 11859 0C **Compact wide field-of-view camera design for remote sensing of the Earth's emitted thermal radiation** [11859-9]

---

## CLOUD REMOTE SENSING AND RADIATIVE TRANSFER

---

- 11859 0F **Optimized MODIS channel selection to improve the NASA CERES FluxByCloudTyp product fluxes** [11859-13]
- 11859 0G **Umov effect for large nonspherical particles for remote sensing of cirrus clouds** [11859-14]
- 11859 0H **Cloud liquid and ice water content estimation from satellite: a regression approach based on neural networks** [11859-15]
- 11859 0I **Scattering properties of singular and aggregate atmospheric hexagonal ice particles** [11859-16]

---

**REMOTE SENSING OF AEROSOL, TRACE GASES AND METEOROLOGICAL PARAMETERS**

---

- 11859 OK **Retrieval of the relation between aerosol number concentration and aerosol optical depth using MOPSMAP (Invited Paper) [11859-18]**
- 11859 OL **GRASP retrievals in synergy with both polarized micro-pulse Lidar and sun/sky photometer measurements to derive optical and microphysical properties of aged smoke plumes [11859-20]**
- 11859 OO **Climatology of the subtropical high-pressure belt [11859-25]**

---

**POSTER SESSION**

---

- 11859 OQ **Lidar and satellite measurements of the vertical ozone distribution at the Siberian lidar station: profile retrieval and estimation of results [11859-23]**
- 11859 OR **Characteristics of aerosol distribution in mountainous regions obtained from AERONET/DRAGON/J-ALPS [11859-26]**
- 11859 OS **Analysis of aerosols in cloudy scene with satellite GCOM-C [11859-27]**
- 11859 OT **Very short-term prediction of torrential rains using polarimetric phased-array radar (MP-PAWR) and deep neural networks [11859-28]**
- 11859 OV **Comparison of two different techniques to determine the cloud cover from all-sky imagery [11859-30]**
- 11859 OW **Retrieval of cloud optical depth: synergies between whole sky imagers and radiative transfer modeling. [11859-31]**
- 11859 OX **Retrieval of cloud optical depth through radiative transfer and remote sensing: from 1D to 3D approach. [11859-32]**
- 11859 OY **Data bank of light backscattering matrices for atmospheric ice crystals of non-convex shape for wavelengths 0.355, 0.532, 1.064  $\mu\text{m}$  [11859-33]**
- 11859 OZ **Retrieving aerosol properties using signals from an All-Sky camera and a random forest model [11859-34]**
- 11859 11 **Backscattering Mueller matrices of 10-100  $\mu\text{m}$  atmospheric ice particles for interpretation of ground-based and space-born lidar data [11859-36]**
