**Volume 11861**

Proceedings of SPIE 0277-786X, V. 11861

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Microwave Remote Sensing: Data Processing and Applications*, edited by Fabio Bovenga, Claudia Notarnicola, Nazzareno Pierdicca, Emanuele Santi, Proc. of SPIE 11861, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## SOIL MOISTURE AND BIOMASS

---

- 11861 05     **Sensitivity to soil moisture by applying a model-based polarimetric decomposition to a time-series of airborne radar L-band data over an agricultural area** [11861-3]

---

## MACHINE LEARNING

---

- 11861 09     **Unsupervised learning applied to Persistent Scatterer Interferometry datasets for the characterisation of ground motion patterns in northern Germany** [11861-8]

---

## SAR INTERFEROMETRY

---

- 11861 0A     **Interferometric SAR deformation timeseries: a quality index** [11861-9]
- 11861 0B     **DInSAR deformation measurement using active and passive reflectors** [11861-10]
- 11861 0C     **Obtaining ground deformations by multitemporal DInSAR processing in vicinity of archaeological site “Solnitsata-Provadia”** [11861-11]
- 11861 0D     **Measurement of earth surface deformation using advanced Differential SAR Interometry: case study of Al Hoceïma region in Morocco** [11861-12]

---

## SAR INTERFEROMETRY AND GROUND-BASED RADIOMETRY

---

- 11861 0E     **Method of operational forecasting of aircraft icing conditions by means of atmosphere microwave remote sensing** [11861-15]
- 11861 0F     **An integration of SAR time series, optical data and archival documentation for the identification of hypogea as a possible factor of vulnerability in Rome** [11861-14]

---

## POSTER SESSION

---

- 11861 0H     **Landslide extraction with COSMO-SkyMed imageries using U-Net** [11861-16]
