Volume 11866

Proceedings of SPIE 0277-786X, V. 11866

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electro-Optical and Infrared Systems: Technology and Applications XVIII and Electro-Optical Remote Sensing XV*, edited by Duncan L. Hickman, Helge Bürsing, Gary W. Kameron, Ove Steinvall, Proc. of SPIE 11866, Seven-digit Article CID Number (DD/MM/YYYY): (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SENSORS AND TECHNOLOGY I

- 11866 03 **Calibir: an uncooled IR open platform designed for multipurpose applications (Invited Paper)** [11866-1]
- 11866 04 **The need for deep etching to fabricate Ga-free InAs/InAsSb T2SL nBn mid-wave infrared photodetector (Invited Paper)** [11866-2]
- 11866 05 **6 μm microbolometers for uncooled thermal imaging** [11866-3]
- 11866 06 **Electro-optical characterizations to study minority carrier transport in Ga-free InAs/InAsSb T2SL XNn midwave infrared photodetector** [11866-4]

SENSORS AND TECHNOLOGY II

- 11866 07 **Efficient characterization of assembled IR lenses for all opto-mechanical parameters** [11866-7]

IMAGE AND DATA PROCESSING

- 11866 0B **Reconstruction of compressed sensing Raman imaging using machine learning** [11866-11]
- 11866 0C **Improving the accuracy of combining pairs of thermal images based on the analysis of visual information** [11866-12]

MODELLING AND SIMULATION

- 11866 0D **Imager performance assessment with TRM4 version 3: an overview (Invited Paper)** [11866-13]
- 11866 0E **A standard target for triangles or how to transfer TOD to MTD** [11866-14]
- 11866 0F **Target detection: the transition from unresolved to extended targets** [11866-15]
- 11866 0G **Towards atmospheric turbulence simulation using a conditional variational autoencoder** [11866-16]
- 11866 0H **Turbulence simulation for anisoplanatic imaging based on phase screens with experimental validation of differential tilt variances** [11866-17]

SYSTEMS AND APPLICATIONS I

- 11866 OI **Towards cognitiveIRST (Invited Paper)** [11866-20]
- 11866 OJ **Prototype measurement setup to assess near-eye display imaging quality** [11866-21]
- 11866 OK **Optical window characterization experiment with laser-induced gradients** [11866-22]

SYSTEMS AND APPLICATIONS II

- 11866 OL **Active polarimetric imager for detection of static and moving manufactured objects in natural environment (Invited Paper)** [11866-23]
- 11866 OM **Development of a radiometric sensor for the hazard assessment of scattered high-power laser radiation** [11866-24]
- 11866 ON **Design a short-time backscanning profile forIRST application** [11866-26]

SYSTEMS AND APPLICATIONS III

- 11866 OO **How signal processing can improve the quality of division of focal plane polarimetric imagers** [11866-28]
- 11866 OP **The M3T process forIRST systems** [11866-29]

LASER SENSING

- 11866 OS **The potential role of lasers in combating UAVs, part 1: detection, tracking, and recognition of UAVs (Invited Paper)** [11866-32]
- 11866 OT **LiDAR-based localization and automatic control of UAVs for mobile remote reconnaissance** [11866-33]
- 11866 OU **Comparison of the experimental, scientific gated-viewing sensor TRAGVIS and the commercial MODAR system during a field test** [11866-34]
- 11866 OV **Long-term performance evaluation of a NIR gated viewing sensor in scattering environments** [11866-35]
- 11866 OW **Velocity estimation and recognition of moving objects from a single ladar image** [11866-36]

POSTER SESSION

- 11866 0Y **Active hyperspectral sensing for border control** [11866-38]
- 11866 0Z **Possibilities of assessing weapon barrel condition by means of eddy current thermography**
[11866-39]
- 11866 10 **Automatic removal of various annotations and marking from maritime surveillance recorded
video** [11866-40]
- 11866 11 **Hyperspectral camera development on an unmanned aerial vehicle** [11866-42]
- 11866 12 **Radio communication system with a high degree of protection of information against non-
allowed access** [11866-43]
