Volume 11875

Proceedings of SPIE 0277-786X, V. 11875

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Computational Optics 2021*, edited by Daniel G. Smith, Frank Wyrowski, Andreas Erdmann, Proc. of SPIE 11875, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

AI, ALGORITHMS, AND ARCHITECTURE I

- 11875 05 Deep learning applied to quad-pixel plenoptic images (Invited Paper) [11875-2]
- 11875 06 Open source library for polarimetric calculations "py_pol" [11875-3]
- 11875 07 Compressed sensing photoacoustic tomography using Stagewise Weak OMP algorithm based on k-wave: a simulation study [11875-4]

AI, ALGORITHMS, AND ARCHITECTURE II

- 11875 08 A regularized optimization approach for optogenetic stimulation using ferroelectric SLMs [11875-5]
- 11875 0A Denoising method for image quality improvement in photoacoustic microscopy using deep learning [11875-7]
- 11875 0B Propagation of light in gradient index media with symmetrical iso-indicial (constant refractive index) contours [11875-8]
- 11875 0C The virtual prototyping of complex optical systems on multiprocessor workstations [11875-9]

MICROSCOPY AND MULTIPHYSICS

- 11875 0E Simulation and compensation of thermal lensing in high-power optical systems [11875-11]
- 11875 0G Opto-thermal simulation model for optimizing the thermal response of the optical properties of Ce:YAG single-crystal phosphors [11875-13]
- 11875 0H 3D information fusion of optical-resolution photoacoustic microscopy for extended depth of field using pyramid transform [11875-14]

MICROLITHOGRAPHY

- 11875 0K Modeling of grayscale lithography and calibration with experimental data for blazed gratings [11875-17]
- 11875 0L Simulation study on EUV multilayer polarization effects [11875-18]

11875 0M A priori information in ptychographic image reconstruction for EUV mask metrology [11875-19]

POSTER SESSION

11875 0N Compressed sensing photoacoustic imaging for high-speed imaging with sparse measurement: a theoretical study [11875-20]

11875 0O Principles of operation and prospects for the development of laser lithographic systems for the synthesis of optical elements [11875-21]

11875 0P Nonlinearity in polarization imaging system with partially polarized and partially coherent illumination [11875-22]

11875 0Q Performance analysis for a polarization imaging system with rotational alignment errors from polarizing elements [11875-23]

11875 0R Some first-order and higher-order statistical properties of polarization speckle [11875-24]

11875 0S Visualization of the photothermal effect of mouse brain based on Monte Carlo and finite element method [11875-25]
