

PROCEEDINGS OF SPIE

Emerging Applications in Silicon Photonics II

Callum G. Littlejohns

Marc Sorel

Editors

28–30 September 2021

Glasgow, United Kingdom

Sponsored by

Leybold (Germany)

Scanwel (United Kingdom)

Laser Components (Germany)

iXblue (France)

Glasgow City Council (United Kingdom)

Glasgow Convention Bureau (United Kingdom)

Cooperating Organizations

Photonics21 (United Kingdom)

Fraunhofer UK Research Ltd. (United Kingdom)

Future Photonics Hub (United Kingdom)

Knowledge Transfer Network (United Kingdom)

CENSIS (United Kingdom)

Association of Industrial Laser Users (United Kingdom)

Technology Scotland (United Kingdom)

Photonics Leadership Group (United Kingdom)

SPIE

Volume 11880

Proceedings of SPIE 0277-786X, V. 11880

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Applications in Silicon Photonics II*, edited by Callum G. Littlejohns, Marc Sorel, Proc. of SPIE 11880, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

EMERGING APPLICATIONS IN SILICON PHOTONICS I

- 11880 06 **Camera-based metrology of subwavelength scatterers in photonic integrated circuits**
[11880-23]

EMERGING APPLICATIONS IN SILICON PHOTONICS II

- 11880 0A **Developing optomechanical inertial sensors (Invited Paper)** [11880-8]

EMERGING APPLICATIONS IN SILICON PHOTONICS III

- 11880 0F **Fabrication tolerant design of silicon nitride Kerr comb generators** [11880-13]

H2020 PICTURE PROJECT

- 11880 0I **Wide-wavelength range AlGaInAs laser array achieved by selective area growth on heterogenous InP-on-Si wafer (Invited Paper)** [11880-15]
- 11880 0L **Electro-optic co-design for next generation silicon optical transmitters (Invited Paper)**
[11880-18]
- 11880 0M **Novel technology of III-V die-bonded SOI photonic integrated circuits (Invited Paper)**
[11880-19]
