PROCEEDINGS OF SPIE

Holography, Diffractive Optics, and Applications XI

Yunlong Sheng
Changhe Zhou
Liangcai Cao
Editors

10–12 October 2021
Nantong, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations
Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • The Optical Society of Japan(Japan) • Optical Society of Korea (Korea, Republic of) • Australia and New Zealand Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations
China Association for Science and Technology (CAST) (China) • Department of Information of National Nature Science Foundation, China (NSFC) (China)

Volume 11898

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Holography, Diffractive Optics, and Applications XI*, edited by Yunlong Sheng, Changhe Zhou, Liangcai Cao, Proc. of SPIE 11898, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510646452
ISBN: 9781510646469 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

DIFFRACTIVE OPTICS

11898 03 **3D holographic near-eye display based on Fraunhofer diffraction using metalens as an eyepiece** [11898-2]

NOVEL HOLOGRAPHY

11898 09 **A method of three-dimensional cell morphology analysis based on digital holography** [11898-8]

11898 0A **Fresnel incoherent correlation holographic localization microscopy with enhanced localization accuracy by employing autofocus algorithm** [11898-9]

11898 0D **Incoherent digital holographic microscopy for high-speed three-dimensional motion-picture sensing (Invited Paper)** [11898-11]

11898 0E **Holographic subdiffraction limit illumination and its application (Invited Paper)** [11898-12]

3D HOLOGRAPHIC RECONSTRUCTION

11898 0F **Single-shot 3D reconstruction imaging approach based on polarization properties of reflection lights** [11898-13]

11898 0G **Investigation on three-dimensional localization characteristics of fluorescence self-interference digital holography** [11898-14]

11898 0H **Recovery of 3D particles distribution from digital hologram using a one-stage detection network** [11898-15]

11898 0I **Three-dimensional holographic laser reconstruction and processing with optimized computer-generated hologram (Invited Paper)** [11898-16]

SCANNING HOLOGRAPHY

11898 0J **Review on edge extraction as pre-processing in optical scanning holography (Invited Paper)** [11898-17]

NEAR-EYE DISPLAYS

11898 0L **Physics-driven topological optimization of diffractive elements for augmented reality (Invited Paper)** [11898-20]

11898 0M **Design of near-eye display with cylindrical holographic waveguide** [11898-21]

HOLOGRAPHIC MICROSCOPY

11898 0N **Full-color holographic Maxwellian near-eye display with extended eyebox (Invited Paper)** [11898-22]

11898 0P **Coherent diffraction imaging using structured phase modulation** [11898-24]

11898 0Q **Compressive phase retrieval via complex constrained total variation regularization** [11898-25]

11898 0T **Interferenceless coded aperture correlation holography with enhanced reconstruction image quality by employing an optimization coded phase mask** [11898-29]

11898 0W **Transport of intensity equation for low-light quantitative phase imaging and security applications** [11898-32]

11898 0X **Study on object wavefront sensing in parallel phase-shifting camera with geometric phase lens** [11898-33]

DEEP-LEARNING FOR COMPUTATIONAL IMAGING

11898 11 **Super-resolution quantitative phase imaging of out-of-focus images based on deep learning** [11898-37]

11898 13 **Image descattering with synthetic polarization imaging and untrained network** [11898-39]

GRATING FABRICATION

11898 19 **A mechanical mosaic method for reflective grating base on diffracted beams orientation** [11898-45]

OPTICAL COMPUTING

11898 1B **Roadmap of optical computing (Invited Paper)** [11898-47]

HOLOGRAPHIC APPLICATIONS

11898 1F **Super-resolution algorithm for lensless microscope based on z-axis correction** [11898-51]

POSTER SESSION

11898 1H **Application of modular digital holographic microscopy to clinical pathology samples before histopathological staining** [11898-26]

11898 1I **A variable profile depth crossed-grating-based exit pupil expander with improved imaging brightness uniformity** [11898-53]

11898 1J **High-resolution reconstruction in off-axis digital holographic imaging by using aliasing-spectrum filtering** [11898-54]

11898 1L **Automatic filtering processing in off-axis digital holography with clustering algorithm** [11898-56]

11898 1M **Elimination of the zero-order term in off-axis digital holography by multiplexing light intensity ratio** [11898-57]

11898 1O **Optical convolutional neural network based on an amplitude modulation spatial light modulator and a 4-level phase plate** [11898-59]

11898 1Q **Research on the fusion method of virtual and real light field of holographic stereogram** [11898-61]

11898 1U **Encrypting information through controlling polarization distributions in far field** [11898-65]

11898 1Y **Computer generated hologram compression with attention-based deep convolutional neural network** [11898-69]

11898 1Z **A method for compressing computer-generated hologram using genetic algorithm optimized quantum-inspired neural network** [11898-70]

11898 20 **Study on the immersion grating with dielectric film** [11898-71]

11898 21 **Adaptive method of computational imaging based on super resolution technology** [11898-72]

11898 24 **Imaging harmonic diffractive lens for RGB LED radiation** [11898-75]

11898 25 **Visible color routing metasurface using dual focal phase profile in green light** [11898-76]

11898 26 **Generating elliptical zero-order Bessel beams with a tilted diffraction grating** [11898-77]
