**Volume 11902**

Proceedings of SPIE 0277-786X, V. 11902

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Photonic Measurements, Data Management, and Processing VI*, edited by Ming Li, Bahram Jalali, Mohammad Hossein Asghari, Proc. of SPIE 11902, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510646537

ISBN: 9781510646544 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## IMAGING AND SENSING I

---

- 11902 02 **Temporal focusing based ultrafast high-resolution spectroscopy (Invited Paper)** [11902-1]
- 11902 03 **Proposal of real-time Brillouin optical fiber sensing based on compressing sensing and pattern recognition algorithms (Invited Paper)** [11902-7]
- 11902 04 **Brillouin optical fiber sensing via optical chirp chain for ultrafast distributed measurement (Invited Paper)** [11902-3]

---

## IMAGING AND SENSING II

---

- 11902 06 **Increase measurement range, distance, and speed of optical fiber distribution acoustic sensing (Invited Paper)** [11902-5]
- 11902 07 **High-resolution 3D range gated laser imaging for unmanned underwater vehicles (Invited Paper)** [11902-6]

---

## ADVANCED LASERS AND APPLICATIONS

---

- 11902 0I **Ultra-narrow linewidth SOA fiber laser assisted by distributed self-injection feedbacks (Invited Paper)** [11902-17]

---

## SIGNAL PROCESSING

---

- 11902 0O **All-fiber flat-top orbital angular momentum mode converter realized by a SMF-based helical grating with phase modulation (Invited Paper)** [11902-23]

---

## PHOTONIC MEASUREMENT I

---

- 11902 0S **Low-speed photonic sampling for self-referenced frequency response characterization of high-speed photodetectors** [11902-27]

---

## PHOTONIC MEASUREMENT II

---

- 11902 0W **A photonic-assisted transceiver for microwave Doppler frequency shift measurement (Invited Paper)** [11902-32]

11902 0X **Simultaneous three-dimensional measurement of temperature and velocity fields in swirling combustion (Invited Paper)** [11902-33]

---

**PHOTONIC MEASUREMENT III**

---

11902 11 **Frequency response measurement of Mach-Zehnder modulators utilizing double carrier based on low frequency detection** [11902-37]

---

**POSTER SESSION**

---

11902 15 **Reconfigurable photonic integrated computing chip based on quadrilateral MZI topology network** [11902-40]

11902 16 **A 50 km fiber-optic two-way quantum time transfer experiment with long-term stability below 100 fs** [11902-41]

11902 17 **A modified OAM Mach-Zehnder interferometer for displacement measurement** [11902-42]

11902 18 **LFM-Costas waveform generation based on a Fourier domain mode locking optoelectronic oscillator** [11902-43]

11902 1A **Real-time construction and control on dynamic systems** [11902-45]

11902 1B **Real-time identification of frequency-hopping millimeter-wave signals using photonic time stretch and reservoir computing** [11902-46]

11902 1C **Anti-resonant reflecting guidance mechanism in ring-core fibers for the first-order orbital angular momentum modes generation** [11902-47]

11902 1D **Analysis of nebulization process based on multi-angle polarization scattering measurements** [11902-48]

11902 1E **Post-calibrated carrier envelope offset frequency for ultrafast dual-comb spectroscopy** [11902-49]

11902 1F **Ultrafast tunable 16 channels integrated array DFB laser module** [11902-50]

11902 1G **An improved signal filtering strategy based on EMD algorithm for ultrahigh precision grating encoder** [11902-51]

11902 1H **Multi-channel wavelength-swept DFB laser array based on REC technique** [11902-52]

11902 1J **Ultrafast autocorrelator based on broadband radio frequency spectrum analyzer** [11902-54]
