

PROCEEDINGS OF SPIE

Plasmonics VI

Zheyu Fang
Takuo Tanaka
Editors

10–12 October 2021
Nantong, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China)
• Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing
University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of
Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital
Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong
University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS
(China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of
Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS
(China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China)
• The Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • Australia and New
Zealand Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European
Optical Society

Supporting Organizations

China Association for Science and Technology (CAST) (China)

Volume 11904

Proceedings of SPIE 0277-786X, V. 11904

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Plasmonics VI*, edited by Zheyu Fang, Takuo Tanaka, Proc. of SPIE 11904, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LIGHT-MATTER INTERACTION

- 11904 04 **Generation of multi-ring perfect vortex beams with tunable intensity distribution (Invited Paper)**
[11904-3]

OPTOELECTRONICS AND APPLICATIONS

- 11904 0U **Optimization of metal nanoparticles dimensions for efficient energy harvesting device using localized surface plasmon resonance** [11904-29]

POSTER SESSION

- 11904 0V **Polarization-insensitive Fano resonance for highly sensitive terahertz sensors** [11904-30]
- 11904 0W **Exotic coupling between plasmonic nanoparticles through geometric configurations** [11904-31]
- 11904 0Z **Effect of baseline correction on the quantitative analysis of soil LIBS** [11904-34]
- 11904 11 **Tunable double Rabi splitting in hybrid plasmonic-J-aggregates-WS₂ nanocavity** [11904-36]
- 11904 12 **Spatiotemporal imaging of weakly excited femtosecond SPP based on space-dependent-quantum channel effect** [11904-37]
- 11904 13 **Wavelength controllable device for simultaneous generation of surface plasmon polariton Bessel-like beams and bottle beams** [11904-38]
- 11904 14 **Dynamics of localized plasmonic excitation excited by pure propagating surface plasmon source at different positions** [11904-39]
- 11904 15 **Strong circular dichroism generation in an Au SRR/graphene nanoribbon arrays plasmonic hybrid system** [11904-40]
- 11904 17 **Stabilization three-dimensional refractive-index reconstruction system of single suspension cell**
[11904-42]
- 11904 1B **Space-time adaptive precision imaging and near-field engineering** [11904-46]
- 11904 1C **Spatial characteristics of spectral intensity of laser induced plasma** [11904-47]

- 11904 1G **Nonlinear optical properties of silver nanoparticles: separating thermo-optical and Kerr effects** [11904-51]
- 11904 1H **The plasmon splitting reflectance spectra on anodized titanium surface in the presence of Yb_2O_3 upconversion luminescence** [11904-52]
- 11904 1I **FDTD simulations field on gold nanoparticles and silver nanorods** [11904-53]
- 11904 1J **Optical properties of Cu/Au surfaces structures induced by fs laser exposure with circular polarization** [11904-54]
