2021 International Conference on Networking and Network Applications (NaNA) **NaNA 2021**

Table of Contents

Message from the General Conference Chairs	xix
Committees	xx
Reviewers	xxii
Keynotes	xxvi

Track 1: Wireless Networks

Session A1

Spectrum Utilization Improvement for Multi-Channel Cognitive Radio Networks with Energy Harvesting	1
<i>Wendi Sun (Zhejiang University of Technology, China), Xiaoying Liu (Zhejiang University of Technology, China), Kechen Zheng (Zhejiang University of Technology, China), Yang Xu (Xidian University, China), and Jia Liu (Xidian University, China; Center for Cybersecurity Research and Development, National Institute of Informatics, Japan)</i>	
Wiretapping or Jamming: On Eavesdropper Attacking Strategy in mmWave Ad Hoc Networks	8
<i>Yuanyu Zhang (Xidian University, China), Ji He (Xidian University, China), Qianyue Qu (Nara Institute of Science and Technology, Japan), and Zhiwei Zhang (Xidian University, China)</i>	
Covert Communication in D2D Underlying Cellular Network	15
<i>Ranran Sun (Xidian University, China), Bin Yang (Chuzhou University, China), and Shenghui Zhao (Chuzhou University, China)</i>	
Calibrating Privacy Budgets for Locally Private Graph Neural Networks	23
<i>Wentao Du (University of Science and Technology of China), Xinyu Ma (University of Science and Technology of China), Wenxiang Dong (Institute of Advanced Technology, University of Science and Technology of China, China), Dong Zhang (Institute of Advanced Technology, University of Science and Technology of China, China), Chi Zhang (University of Science and Technology of China, China; Institute of Advanced Technology, University of Science and Technology of China, China), and Qibin Sun (University of Science and Technology of China, China; Institute of Advanced Technology, University of Science and Technology of China, China)</i>	

Session A2

Physical Layer Authentication using MmWave Channel State Information	30
<i>Yangyang Liu (Xidian University), Pinchang Zhang (Nanjing University of Posts and Telecommunications), and Xufei Li (Xidian University)</i>	
Tetris: Near-Optimal Scheduling for Multi-Path Deadline-Aware Transport Protocol	34
<i>Yanwen Liu (Beijing Jiaotong University, PR China), Wei Su (Beijing Jiaotong University, PR China), and Lizhuang Tan (Beijing Jiaotong University, PR China)</i>	
Covert Authentication at the Physical Layer	41
<i>Xufei Li (Xidian University, China), Shuiguang Zeng (Hebei Normal University, China), and YangYang Liu (Xidian University, China)</i>	
Beam Selection Algorithm for Beamspace HAP-MIMO Systems Based on Statistical CSI	47
<i>Shiyi Zou (Shanghai Jiaotong University, China), Lingge Jiang (Shanghai Jiaotong University, China), Pingping Ji (Shanghai Jiaotong University, China), Chen He (Shanghai Jiaotong University, China), Di He (Shanghai Jiaotong University, China), and Guorong Zhang (Shanghai Jiaotong University, China)</i>	

Session B1

Towards Attack and Defense Views to (t, n) -Threshold Secret Sharing Scheme using Information Theory	52
<i>Ze Yang (Guizhou University, P.R. China) and Youliang Tian (Guizhou University, P.R. China)</i>	
Energy-Efficient UAV Trajectory Planning Based on Flexible Data Rate	59
<i>Muhammad Fawad Khan (Kyungpook National University, South Korea) and Limei Peng (Kyungpook National University, South Korea)</i>	
Covert MIMO Communication in Two-hop Relay Systems	63
<i>He Zhu (Future University Hakodate, Japan), Huihui Wu (Future University Hakodate, Japan), and Xiaohong Jiang (Future University Hakodate, Japan)</i>	
Buffer-Aided Relay Selection for Wireless Cooperative Relay Networks with Untrusted Relays.....	69
<i>Cheng Zhang (Key Laboratory of Modern Teaching Technology, Ministry of Education, China; Shaanxi Normal University, China), Xuening Liao (Key Laboratory of Modern Teaching Technology, Ministry of Education, China; Shaanxi Normal University, China), Zhenqiang Wu (Key Laboratory of Modern Teaching Technology, Ministry of Education, China; Shaanxi Normal University, China), and Guoyong Qiu (Key Laboratory of Modern Teaching Technology, Ministry of Education, China; Shaanxi Normal University, China)</i>	
Privacy-Preserving Federated Generative Adversarial Network for IoT	75
<i>Hui Wang (Xidian University, China), Yani Han (Xidian University, China), Shaojing Yang (Xidian University, China), Anxiao Song (Xidian University, China), and Tao Zhang (Xidian University, China)</i>	

Session B2

Improved Anonymous Hybrid Authentication Scheme for Body Area Network Utilizing Channel Characteristics	81
<i>Mubarak Umar (Shaanxi Normal University, China; Bayero University, Nigeria), Xuening Liao (Shaanxi Normal University, China; Bayero University, Nigeria), and Jiawang Chen (Shaanxi Normal University, China)</i>	
Random Verifiable Multi-Server Searchable Encryption Scheme	88
<i>Yu He (State Key Laboratory of Public Big Data; Guizhou University, P. R. China), Youliang Tian (State Key Laboratory of Public Big Data; Guizhou University, P. R. China), and Hua Xu (Guizhou University, P. R. China)</i>	
Detecting Http Flooding Attacks Based on Uniform Model	94
<i>Dalia Nashat (Assuit University, Egypt) and S. Khairy (Assuit University, Egypt)</i>	
Privacy-Preserving Proximity Detection Framework for Location-Based Services	99
<i>Chen Yang (Shaanxi Normal University, China), Zhen Jia (Shaanxi Normal University, China), and Shundong Li (Shaanxi Normal University, China)</i>	

Track 2: Wired Networks and Data Center (DC) Networks

Session A3

Comparative Study of Symmetric Cryptographic Algorithms	107
<i>Alibek Nurgaliyev (Institute of Sustainable Industries and Liveable Cities, Victoria University, Australia) and Hua Wang (Institute of Sustainable Industries and Liveable Cities, Victoria University, Australia)</i>	
Research on PDCCH Channel in 5G NR System	113
<i>Liang Tianyi (Science and Technology on Communication Information Security Control Laboratory, China; No.36 Research Institute of China Electronics Technology Group Corporation, China) and Zhu Huijie (Science and Technology on Communication Information Security Control Laboratory, China; No.36 Research Institute of China Electronics Technology Group Corporation, China)</i>	
Exact Evaluation of Total Variation Distance in Covert Communications	119
<i>Ahmed Salem (Future University Hakodate, Japan), Huihui Wu (Future University Hakodate, Japan; Xidian University, China), and Xiaohong Jiang (Future University Hakodate, Japan)</i>	
A Secure Identifier-to-Locator Mapping Mechanism in Smart Identifier Network	125
<i>Jiahui Sun (Beijing Jiaotong University, China), Ningchun Liu (Beijing Jiaotong University, China), Shuai Gao (Beijing Jiaotong University, China; PCL Research Center of Networks and Communications, Peng Cheng Laboratory, China), and Wei Su (Beijing Jiaotong University, China)</i>	

Privacy Protection Scheme for edge Computing Based on Function Encryption	131
<i>Yuanhang He (No.30 Research Institute of China Electronics Technology Group Corporation, China), Lei Chen (No.30 Research Institute of China Electronics Technology Group Corporation, China), Yi Ni (No.30 Research Institute of China Electronics Technology Group Corporation, China), Yuyao Wang (No.30 Research Institute of China Electronics Technology Group Corporation, China), Jiangtao Li (Shanghai University, China), and Yufeng Li (Shanghai University, China)</i>	

Session A4

Online Scheduling of Machine Learning Jobs in Edge-Cloud Networks	136
<i>Jingping She (Wuhan University, China), Ne Wang (Wuhan University, China), Ruiting Zhou (Wuhan University, China), and Chen Tian (Nanjing University, China)</i>	
Emergency Virtual Machine Online Migration in Cloud Data Centers	144
<i>Zhonghua Xie (Anhui University of Technology, P.R. China), Tao Tao (Anhui University of Technology, P.R. China), and Lisheng Ma (Chuzhou University, P.R. China)</i>	
Energy-Saving mechanism based on tidal characteristic in computing power network	150
<i>Ran Pang (Beijing University of Posts and Telecommunications, P.R.China; Research Institute, China Unicom, P.R.China), Hui Li (Beijing University of Posts and Telecommunications, P.R.China), Yuefeng Ji (Beijing University of Posts and Telecommunications, P.R.China), Guangquan Wang (Research Institute, China Unicom, P.R.China), and Chang Cao (Research Institute, China Unicom, P.R.China)</i>	
Petri net Modeling and Vulnerability Analysis of the Heartbleed	155
<i>Yichuan Wang (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology), He Wang (Xi'an University of Technology, China), Xinhong Hei (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology), Wenjiang Ji (Xi'an University of Technology, China), and Lei Zhu (Xi'an University of Technology, China)</i>	
A Fine-Grained Petri Model for SQL Time-Blind Injection	161
<i>Guiling Zhang (Xi'an University of Technology, China), Yaling Zhang (Xi'an University of Technology, China), Yichuan Wang (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Lei Zhu (Xi'an University of Technology, China), and Wenjiang Ji (Xi'an University of Technology, China)</i>	

Track 3: Network Management, Monitoring, and Automation

Session B3

Dynamic Overhead Queue-Based Efficient Service Delivery at Edge for Adaptive Live Streaming	168
<i>Zichen Feng (Beijing University of Posts and Telecommunications, China), Changqiao Xu (Beijing University of Posts and Telecommunications, China), Han Xiao (Beijing University of Posts and Telecommunications, China), Yongpu Jia (Beijing University of Posts and Telecommunications, China), Zhongyi Ding (Beijing University of Posts and Telecommunications, China), and Zhaoyang Liu (Beijing University of Posts and Telecommunications, China)</i>	
A Modified Vehicular Handover Scheme in Non-Standalone 5G Networks With the Assistance of Multi-Access Edge Computing	174
<i>Gaofeng Hong (Beijing Jiaotong University, China), Qili Wen (Beijing Jiaotong University, China), and Wei Su (Beijing Jiaotong University, China)</i>	
A Game Theory Perspective on IP Routing Protocols Evaluation	181
<i>Pin Chen (University of Science and Technology of China, China) and Naijie Gu (University of Science and Technology of China, China)</i>	
Research on Data Security of Unmanned Aerial Vehicles	186
<i>Yuxiang Chen (Science and Technology on Communication Security Laboratory, China; No.30 Inst, China Electronics Technology Group Corporation; China Electronics Technology Cyber security Co., Ltd), Yao Hao (No.30 Inst, China Electronics Technology Group Corporation; China Electronics Technology Cyber security Co., Ltd), Kaijun Wu (Science and Technology on Communication Security Laboratory, China), Zhongqiang Yi (Science and Technology on Communication Security Laboratory, China; No.30 Inst, China Electronics Technology Group Corporation), Haiyang Peng (No.30 Inst, China Electronics Technology Group Corporation; China Electronics Technology Cyber security Co., Ltd), and Liao Sijie (Science and Technology on Communication Security Laboratory, China)</i>	

Session B4

CD-SR: A Real-Time Anomaly Detection Framework for Continuous Concept Drift	194
<i>Zhongyi Ding (Beijing University of Posts and Telecommunications, China), Shujie Yang (Beijing University of Posts and Telecommunications, China), Zhaoyang Liu (Beijing University of Posts and Telecommunications, China), Tengchao Ma (Beijing University of Posts and Telecommunications, China), Zichen Feng (Beijing University of Posts and Telecommunications, China), and Mingze Wang (Beijing University of Posts and Telecommunications, China)</i>	
On the Applicability of Multi-Characteristics for the Continuous Authentication in IIoT Scenarios	200
<i>Guozhu Zhao (Future University Hakodate, Japan; Chuzhou University, China), Pinchang Zhang (Nanjing University of Posts and Telecommunications, China), and Lisheng Ma (Chuzhou University, China)</i>	

Performance Analysis for Dual-Hop Covert Communication System with Outdated CSI	206
<i>Jiaqing Bai (Xian University of Posts and Telecommunications, China), Ji He (Xidian University, China), Xiaohong Jiang (Future University Hakodate, Japan), and Lijun Chen (Xian University of Posts and Telecommunications, China)</i>	
The Cooperative Authentication Mechanism and Performance Evaluation for Unmanned Systems	212
<i>Yue Zhao (Science and Technology on Communication Security Laboratory, China), Yarang Yang (College of Physics and Electrical Engineering, Kashi University, China), Yiru Niu (Science and Technology on Communication Security Laboratory, China), Dongyu Yang (Science and Technology on Communication Security Laboratory, China), Bo Tian (Science and Technology on Communication Security Laboratory, China), Yao Hao (Science and Technology on Communication Security Laboratory, China), and Kaijun Wu (Science and Technology on Communication Security Laboratory, China)</i>	
Monitoring System of Carbon Neutralization Forestland in Plateau Based on Edge Computing	217
<i>Yanchun Kong (Kunming Metallurgy College Kunming, China), Weibin Su (Edge Computing and Network Center, USeP & YTBU University, China), and Gang Xu (Edge Computing and Network Center, USeP & YTBU University, China)</i>	

Session A5

Review of Research on the Curriculum for Artificial Intelligence and Industrial Automation Based on Edge Computing	222
<i>Mingbo Pan (Edge Computing and Network Center, Yunnan Technology and Business University, Kunming, China), Weibin Su (Edge Computing and Network Center, USeP & YTBU University, China), and Yikai Wang (Edge Computing and Network Center, Yunnan Technology and Business University, Kunming, China)</i>	
Experimental Demonstration of End-to-End Service Orchestration Architecture Based on Northbound API	227
<i>Yanxia Tan (China United Network Communications Group Company Limited, China; Beijing University of Posts and Telecommunications, China), Yong Zhang (China Information Technology Consulting and Designing Institute, China), Yanlei Zheng (China Unicom Research Institute, China), Yacheng Liu (China Unicom Research Institute, China), Guangquan Wang (China Unicom Research Institute, China), and Yuefeng Ji (Beijing University of Posts and Telecommunications, China)</i>	
Heterogeneous Network Embedding With Enhanced Event Awareness Via Triplet Network	231
<i>Zhi Qiao (Shaanxi Normal University, China), Bo Liu (Shaanxi Normal University, China), Bo Tian (No.30 Research Institute of China Electronics Technology Group Corporation, China), and Yu Liu (Shaanxi Normal University, China)</i>	
A Method for Fast Outlier Detection in High Dimensional Database Log	236
<i>Xin Song (Xi'an University of Technology, China), Yichuan Wang (Xi'an University of Technology, China), Lei Zhu (Xi'an University of Technology, China), Wenjiang Ji (Xi'an University of Technology, China), Yanning Du (Xi'an University of Technology, China), and Feixiong Hu (Shenzhen Tencent Computer System Co., Ltd, China)</i>	

Shellshock Bash Vulnerability Modeling Analysis Based on Petri Net	242
<i>Liumei Zhang (Xi'an Shiyou University, China), Xi Deng (Xi'an Shiyou University, China), and Yichuan Wang (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China)</i>	
Transmission Characteristics of Photonic Crystal Fiber Filled with Magnetic Fluid	248
<i>Wu Wang (Yunnan Minzu University, China), Yuejuan Liu (Yunnan Minzu University, China), and Shikai Shen (Kunming University, China)</i>	

Session A6

Multi-Domain Feature Extraction for Human Activity Recognition using Wearable Sensors	254
<i>Aiguo Wang (Foshan University, China), Yue Meng (Donghua University, China), Jinjun Liu (Chuzhou University, China), Shenghui Zhao (Chuzhou University, China), and Guilin Chen (Chuzhou University, China)</i>	
CLSDRL:A Routing Optimization Method for Traffic Feature Extraction	260
<i>Hong Xia (Xi'an University of Posts and Telecommunications, China; Shaanxi Key Laboratory of Network Data Analysis and Intelligent Processing, China; Xi'an Key Laboratory of Big Data and Intelligent Computing, China), Jianguo Li (Xi'an University of Posts and Telecommunications, China), Yanping Chen (Xi'an University of Posts and Telecommunications, China; Shaanxi Key Laboratory of Network Data Analysis and Intelligent Processing, China; Xi'an Key Laboratory of Big Data and Intelligent Computing, China), Ning Lv (Xi'an University of Posts and Telecommunications, China; Shaanxi Key Laboratory of Network Data Analysis and Intelligent Processing, China; Xi'an Key Laboratory of Big Data and Intelligent Computing, China), ZhongMin Wang (Xi'an University of Posts and Telecommunications, China; Shaanxi Key Laboratory of Network Data Analysis and Intelligent Processing, China; Xi'an Key Laboratory of Big Data and Intelligent Computing, China), and Qingyi Dong (Xi'an University of Posts and Telecommunications, China)</i>	
A Proposal of Large Scale Network Route Optimization Technique Based on Genetic Algorithm ...	265
<i>Yusuke Noda (Okayama Prefectural University, Japan) and Bishnu P. Gautam (Kanazawa Gakuin University, Japan)</i>	
Fatigue Detection Technology for Online Learning	272
<i>Junjie Lu (Shaanxi Normal University, China) and Chao Qi (Shaanxi Normal University, China)</i>	
Cryptanalysis of Double-Trapdoor Hash Function and Multi-Trapdoor Hash Function Schemes	278
<i>Xu An Wang (Engineering University of Chinese Armed Police Force, P. R. China; Guizhou University, P. R. China), Yunxuan Su (Engineering University of Chinese Armed Police Force, P. R. China), and Jindan Zhang (Xianyang Vocational Technical College, P. R. China; Guizhou University, P. R. China)</i>	

Dual Attention Mechanism Object Tracking Algorithm Based on Fully-Convolutional Siamese Network	282
<i>Sugang Ma (Xi'an University of Posts and Telecommunications, China; Chang'an University, China), Zixian Zhang (Xi'an University of Posts and Telecommunications, China), Lei Zhang (Xi'an University of Posts and Telecommunications, China), Yanping Chen (Xi'an University of Posts and Telecommunications, China), Xiaobao Yang (Xi'an University of Posts and Telecommunications, China), Lei Pu (Air Force Engineering University, China), and Zhiqiang Hou (Xi'an University of Posts and Telecommunications, China)</i>	
A Modified K-Means User Grouping Design for HAP Massive MIMO Systems	288
<i>Guorong Zhang (Shanghai Jiao Tong University, China), Lingge Jiang (Shanghai Jiao Tong University, China), Pingping Ji (Shanghai Jiao Tong University, China), Shiyi Zou (Shanghai Jiao Tong University, China), Chen He (Shanghai Jiao Tong University, China), and Di He (Shanghai Jiao Tong University, China)</i>	

Track 4: Network Applications

Session B5

A New Symmetric Information Hiding Scheme Based on Cover Randomness	293
<i>Fang Ren (Xi'an University of Posts and Telecommunications, China), Mingyu Yu (Xi'an University of Posts and Telecommunications, China), Haiyan Xiu (Xi'an University of Posts and Telecommunications, China), and Wei Hou (Xi'an University of Posts and Telecommunications, China)</i>	
Network Traffic Oriented Malware Detection in IoT (Internet-of-Things)	301
<i>Wang Wangwang (Yunnan University, P.R. China), Zhang Yunchun (Yunnan University, P.R. China), Li Chengjie (Yunnan University, P.R. China), Sun Xuchenming (Yunnan University, P.R. China), Zhong Yuting (Yunnan University, P.R. China), and Zhang Xin (Yunnan University, P.R. China)</i>	
An Improved Method of Median Filtering Forensics for Enhanced Image Security Detection	308
<i>Kaijun Wu (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Wanli Dong (Southwest University of Science and Technology, China), Yunfei Cao (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Xue Wang (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), and Qi Zhao (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China)</i>	

A Recommendation Scheme with Reputation-Based Incentive Mechanism on Consortium Blockchain.. 313

Qingyi Ye (Jiangsu University, China), Tingting Zhao (Jiangsu University, China), Guo Sun (Jiangsu University, China), and Xia Feng (Jiangsu University, China)

Session B6

A Survey on Security and Privacy Threats to Federated Learning 319

Junpeng Zhang (Hebei Normal University, China; Xidian University, China), Mengqian Li (Guizhou University, China), Shuiguang Zeng (Hebei Normal University, China; Xidian University, China), Bin Xie (Hebei Normal University, China), and Dongmei Zhao (Hebei Normal University, China)

NLEU: A Semantic-Based Taint Analysis for Vetting Apps in Android 327

Yuanqing Liu (Xidian University, China), Ning Xi (Xidian University, China), and Yongbo Zhi (Xidian University, China)

Research on A Vulnerability Detection Technology for Network Topology Security 334

Jianxin Ji (Xi'an University of Technology, China), Chunli Xia (Xi'an University of Technology, China), Tong Zhang (Xi'an University of Technology, China), Yichuan Wang (Xi'an University of Technology, China), and Sheng Liu (Xi'an University of Technology, China)

Network Intrusion Detection Based of Semi-Supervised Ensemble Learning Algorithm for Imbalanced Data 338

Zhang Lin (Shangluo University, China; Shangluo Public Big Data Research Center, China)

TPLI:A Traceable Privacy-Preserving Logistics Information Scheme via Blockchain 345

Xiaoguo Lin (School of Computer Science and Communication Engineering), Pujie Jing (School of Computer Science and Communication Engineering), Chuntang Yu (School of Computer Science and Communication Engineering), and Xia Feng (Jiangsu University, China)

Network Application Vulnerability Detection Based on Fuzzing Technology 351

Chen Chong (Beijing University of Posts and Telecommunications, China) and Zou Ping (Beijing University of Posts and Telecommunications, China)

Session A7

An Efficient Authentication Scheme Based on Zero Trust for UAV Swarm	356
<i>Dongyu Yang (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Yue Zhao (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Kaijun Wu (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Xiaoyu Guo (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), and Haiyang Peng (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China)</i>	
Expression Tree-Based Policy Conflict Detection Algorithm	361
<i>Xue Wang (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Hao Zhang (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), and Kaijun Wu (Science and Technology on Communication Security Laboratory, China; No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China)</i>	
On the Robustness of Complex System With Percolation Theory Under Node Attack	367
<i>Xiaoteng Yang (Shaanxi Normal University, China), Wenbo Zhang (Shaanxi Normal University, China), Bo Liu (Shaanxi Normal University, China), and Hong Su (Research Institute of China Electronics Technology Group Corporation, China)</i>	
The Trade-off Between Privacy and Utility in Local Differential Privacy	373
<i>Mengqian Li (Guizhou University, P. R. China), Youliang Tian (Guizhou University, P. R. China; Guizhou University, P. R. China), Junpeng Zhang (Hebei Normal University, P. R. China), Dandan Fan (Guizhou University, P. R. China), and Dongmei Zhao (Hebei Normal University, P. R. China)</i>	

Access Control Scheme Supporting Attribute Revocation in Cloud Computing	379
<i>YaChen He (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), GuiShan Dong (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), Dong Liu (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), HaiYang Peng (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China), and YuXiang Chen (No.30 Research Institute of China Electronics Technology Group Corporation, China; China Electronics Technology Cyber Security Co., Ltd, China)</i>	
The Nearest Neighbor Algorithm for Balanced and Connected k-Center Problem Under Modular Distance	385
<i>Rui Li (Lijiang Cultural and Tourism College, China) and Zilan Yang (Lijiang Cultural and Tourism College, China)</i>	

Session A8

Implementation and Analysis of Hybrid DRAM PUFs on FPGA	390
<i>Yu Zheng (Xidian University, China), Zhao Huang (Xidian University, China), Liang Li (Xidian University, China), Changjian Xie (Xidian University, China), Quan Wang (Xidian University, China), and Zili Wu (Xidian University, China)</i>	
Graph Neural Networks for Privacy-Preserving Recommendation with Secure Hardware	395
<i>Sisong Ru (University of Science and Technology of China, P. R. China), Bingbing Zhang (University of Science and Technology of China, P. R. China), Yixin Jie (University of Science and Technology of China, P. R. China), Chi Zhang (University of Science and Technology of China, P. R. China), Lingbo Wei (China Nanhu Academy of Electronics and Information Technology, P. R. China), and Chengjie Gu (University of Science and Technology of China, P. R. China)</i>	
Exploration of Simulation Teaching Mode for Intelligent Information Network Course	401
<i>Yue He (Beijing University of Posts and Telecommunications, China; BUPT, China), Hui Li (Beijing University of Posts and Telecommunications, China; Beijing Key Laboratory of Network System Architecture and Convergence, BUPT, China; BUPT, China), Yiming Li (Beijing Key Laboratory of Network System Architecture and Convergence, BUPT, China; Beijing University of Posts and Telecommunications, China; BUPT, China), Qiang Wu (Beijing University of Posts and Telecommunications, China; BUPT, China), Yuefeng Ji (BUPT, China), Rentao Gu (Beijing University of Posts and Telecommunications, China; Beijing Key Laboratory of Network System Architecture and Convergence, BUPT, China; BUPT, China), and Shaobin Fan (China Unicom, China)</i>	

Dyn-GCN: Graph Embedding via Dynamic Evolution and Graph Convolutional Network for Personal Recommendation	408
<i>Zhihui Wang (Shaanxi Normal University, China), Jianrui Chen (Shaanxi Normal University, China; Key Laboratory of Modern Teaching Technology, Ministry of Education, China), Peijie Wang (Shaanxi Normal University, China), and Tingting Zhu (Shaanxi Normal University, China)</i>	
You Can See, But You Cannot Photograph: An Intelligent Content Protection Scheme for Videos on Screens	414
<i>Zhihao Xu (Xidian University, P.R.China), Kezhang Lin (Hangzhou Hikvision Digital Technology Co., LTD., P.R.China), Zhiwei Zhang (Xidian University, P.R.China), Wangzhe Xu (Xidian University, P.R.China), Kui Liu (Xidian University, P.R.China), Bin Wang (Hangzhou Hikvision Digital Technology Co., LTD., P.R.China), Xinghui Zhu (Xidian University, P.R.China), and Jiadong Chen (Hangzhou Hikvision Digital Technology Co., LTD., P.R.China)</i>	

Session B7

Chinese Named Entity Recognition Method for the Field of Network Security Based on RoBERTa..	420
<i>Xiaoyan Zhu (Xi'an Jiaotong University, China), Yu Zhang (Xi'an Jiaotong University, China), Lei Zhu (Xi'an University of technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Xinhong Hei (Xi'an University of technology, China), Yichuan Wang (Xi'an University of technology, China), Feixiong Hu (Shenzhen Tencent Computer System Co., Ltd, China), and Yanni Yao (Shenzhen Tencent Computer System Co., Ltd, China)</i>	
Design of Binocular Stereo Vision System Via CNN-Based Stereo Matching Algorithm	426
<i>Yan Jiao (University of Waterloo, Canada) and Pin-Han Ho (University of Waterloo, Canada)</i>	
Heterogeneous Flow Scheduling using Deep Reinforcement Learning in Partially Observable NFV Environment	432
<i>Chun-Jen Lin (University of Massachusetts Lowell), Yan Luo (University of Massachusetts Lowell), and Liang-min Wang (Intel Corporation)</i>	
A Fine-Tuning-Based Adversarial Network for Member Privacy Preserving	437
<i>Xiangyi Lu (Shaanxi Normal University, China), Qing Ren (Shaanxi Normal University, China), and Feng Tian (Shaanxi Normal University, China)</i>	
Signature Scheme Based on The SM2 Algorithm in Fabric	443
<i>Yaling Zhang (Xi'an University of Technology, China), Hongyun Wang (Xi'an University of Technology, China), Yichuan Wang (Xi'an University of Technology, China), Wenjiang Ji (Xi'an University of Technology, China), and Lei Zhu (Xi'an University of Technology, China)</i>	
Novel Firewall Application for Mitigating Flooding Attacks on an SDN Network	449
<i>Yubaraj Gautam (Muroran Institute of Technology, Japan), Kazuhiko Sato (Muroran Institute of Technology, Japan), Bishnu Prasad Gautam (Kanazawa Gakuin University, Japan), and Norio Shiratori (Chuo University, Japan)</i>	

Session B8

UAV Deployment with Flexible Height Under SINR Constraint	456
<i>Ke Zhao (Kyungpook National University, Republic of Korea) and Limei Peng (Kyungpook National University, Republic of Korea)</i>	
Cold-Start Recommendation Method Based on Homomorphic Encryption	461
<i>Tianci Zhou (Xidian University, China), Yong Zeng (Xidian University, China), Yixin Li (Xidian University, China), Zhongyuan Jiang (Xidian University, China), Zhihong Liu (Xidian University, China), and Teng Li (Xidian University, China)</i>	
Joint Task Offloading and Resource Allocation via Proximal Policy Optimization for Mobile Edge Computing Network	466
<i>Lingling An (Xidian University, China), Zhuo Wang (Xidian University, China), Jiahao Yue (Xidian University, China), and Xiaoliang Ma (China Telecom Corporation Limited, China)</i>	
Network Construction using Overlapping Histogram Under Local Differential Privacy	472
<i>Cuicui Niu (Guizhou Light Industry Technical College, China), Zhengzhi Pan (Guizhou Light Industry Technical College, China), Wuchao Shi (Xi'an Aeronautical Polytechnic Institute, China), and Hai Liu (Guizhou University, China)</i>	
AttentionAE: Autoencoder for Anomaly Detection in Attributed Networks	480
<i>Kenan Qin (Shaanxi Normal University, China), Yihui Zhou (Shaanxi Normal University, China), Bo Tian (No.30 Research Institute of China Electronics Technology Group Corporation, China), and Rui Wang (Shaanxi Normal University, China)</i>	

Session A9

Construction of MDS Matrices Based on the Primitive Elements of the Finite Field	485
<i>Wu You (Institute of Southwestern Communication, IOSC, China), Dong Xin-Feng (Institute of Southwestern Communication, IOSC, China), Wang Jin-Bo (Institute of Southwestern Communication, IOSC, China), and Zhang Wen-Zheng (Institute of Southwestern Communication, IOSC, China)</i>	
Privacy-Preserving and Efficient Range Counting in IoT Networks	489
<i>Ruiyang Qin (Xidian University, China), Bowen Deng (Xidian University, China), Lele Zheng (Xidian University, China), and Xutong Mu (Xidian University, China)</i>	
A Permission Generation and Configuration Method Based on Rules and FP-Growth Algorithm ...	495
<i>Lei Zhu (Xi'an University of Technology; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Ziheng Zhang (Xi'an University of Technology), Xinhong Hei (Xi'an University of Technology), Yichuan Wang (Xi'an University of Technology), Ziliang Yang (Xi'an University of Technology), Feixiong Hu (Shenzhen Tencent Computer System Co., Ltd, China), and Ping He (Shenzhen Tencent Computer System Co., Ltd, China)</i>	

Deep Learning for GPS Spoofing Detection in Cellular-Enabled UAV Systems	501
<i>Yongchao Dang (Aalto University, Finland), Chafika Benzaid (Aalto University, Finland), Bin Yang (Aalto University, Finland), and Tarik Taleb (University of Oulu, Finland)</i>	

Session B9

Characterizing and Improving the Probability of Correct Phase Ambiguity Resolution for Uniform Circular Array Phase Interferometers	507
<i>M.-Y. You (Communication Information Security Control Laboratory No. 36 Research Institute of CETC, China), B.-H. Shi (Communication Information Security Control Laboratory No. 36 Research Institute of CETC, China), Y.-X. Ye (Communication Information Security Control Laboratory No. 36 Research Institute of CETC, China), and K. Huang (Communication Information Security Control Laboratory No. 36 Research Institute of CETC, China)</i>	

ConvCatb: An Attention-Based CNN-CATBOOST Risk Prediction Model for Driving Safety	513
<i>Xinhong Hei (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Hao Zhang (Xi'an University of Technology, China), Wenjiang Ji (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Yichuan Wang (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Lei Zhu (Xi'an University of Technology, China), and Yuan Qiu (Xi'an University of Technology, China)</i>	

A Driving Risk Prediction Approach Based on Generative Adversarial Networks and VANET for Autonomous Trams	520
<i>Wenjiang Ji (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Jiangcheng Yang (Xi'an University of Technology, China), Yichuan Wang (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China), Lei Zhu (Xi'an University of Technology, China), Yuan Qiu (Xi'an University of Technology, China), and Xinhong Hei (Xi'an University of Technology, China; Shaanxi Key Laboratory for Network Computing and Security Technology, China)</i>	

Wet Aggregate Stability Predicting of Soil in Multiple Land-Uses Based on Support Vector Machine	527
<i>Rui-zhi Zhai (Hohai University, China), De-shun Yin (Hohai University, China), Jian-ping Wang (Henan Institute of Science and Technology, China), Li-li Yuan (Shenzhen Guoyi Park Construction Co., LTD, China), and Ziheng Shangguan (Hohai University, China)</i>
